His principal works include a 'Chorus tragicus' for chorus and orch., 'Chorus symphonius' (four psalms with Latin text and intermezzo) for soprano and tenor, chorus and orch., a number of a *cappella* choruses, Vocalises for solo voice and chamber orch., 2 Concertos for vn, one for pf., one for oboe and a 'Symphonietta' for clar. and orch., three Sextets for pf. and wind instruments, a Trio for 2 oboes and English horn, a pf. Sextet, Variations for orchestra, a stg. Quartet based on old Dutch melodies, two Sonatas for cello and pf., a Suite for cello solo, a Sonata for vn. solo, works for organ and for pf., and an operetta, 'Toto', for which he himself wrote the libretto.

H. A.

**DRESSER, Marcia van** (b. Memphis, Tenn., 4 Dec. 1877; d. London, 11 July 1937).

American soprano singer and actress of Dutch and English extraction. Having sung in church choirs and at concerts in her girlhood, she went into light opera with the Bostonians company at the age of seventeen, but afterwards turned for a time to acting

under the producer Augustin Daly and with the actors Otis Skinner, Viola Allen, Gertrude Norman and others. She was then given an engagement for small parts at the Metropolitan Opera in New York, where she was coached by Aurelia Jaeger. Having appeared as first Flower Maiden in 'Parsifal', one of the Valkyries and similar minor parts, she went to Munich for further study on the advice of Mottl and Milka Ternina. There she studied singing under Hermine Bosetti and operatic acting under Anton Fuchs. In 1907 she was engaged for leading soprano parts by the Dresden Court Opera, where she made her début as Elisabeth in 'Tannhäuser'. She also appeared frequently as guest artist at the Court Opera of Dessau, where she had been introduced to the Grand Duke by Ellen Gulbransson. For three years she was the supreme star there, singing some twenty different parts.

Richter, who described her as the best Mozart singer in Germany, engaged her for the 1911 season at Covent Garden in London, where she sang Sieglinde in Wagner's 'Ring'. By this time she had made further studies under Jean de Reszke and become, in 1910, the leading lyric soprano at the Frankfurt o/M. Opera. In 1914, after an absence of ten years, she went to the U.S.A. again and was engaged by Campanini for the Chicago Opera for two seasons. After that she took to acting once more for a short time and devoted herself to concert work, appearing both with the outstanding American orchestras and in recitals. After a very successful recital at the Wigmore Hall in London in 1920, she settled in England, where she did much admirable concert work, excelling particularly in a great variety of songs and in vocal chamber music, and often introducing unknown modern works. Ill-health eventually compelled her to give up her career, but she continued to sing a little until two years before her death, appearing in Florida, Madeira and at Florence, where she wintered.

E. B.

**DRESSLER, Ernst Christoph** (b. Greussen, Thuringia, 1734; d. Cassel, 6 Apr. 1779).

German singer and composer. He studied about 1751 at Halle, Jena and Leipzig, went to Bayreuth to study singing under Signora Turcotti, became a member of the court chapel and chamber secretary there and held a similar post at the court of Gotha about 1763. In 1767 he was *Kapellmeister* to Prince Fürstenberg at Wetzlar, but he went as opera singer to Vienna in 1771 and finally to Cassel. He wrote a number of songs, as well as 'Fragmente einiger Gedanken des musikalischen Zuschauers . . .' (1767); 'Gedanken die Vorstellung der Alceste . . . betreffend' (1774); 'Theaterschule für die Deutschen' (1777).

E. v. d. s.

**DRESSLER, Gallus** (b. Nebra o/Unstrut, 16 Oct. 1533, d. ?).

German composer. He was teacher at the Magdeburg "Gymnasium" in 1559, cantor in 1563 and deacon at St. Nicolas at Zerbst in 1577, where he married for the second time. Eitner questions the latter date, as Dressler still calls himself cantor at Magdeburg in 1580. He was a church composer of great merit, a long list of whose sacred and secular compositions appears in Q.-L. Seventeen of his motets were republished by Eitner. E. v. d. s.

BIBL.—LUTHER, WILHELM MARTIN, 'Gallus Dressler ein Beitrag zur Geschichte des protestantischen Schulkantors des 16. Jahrhunderts' (Cassel, 1942).

See also Beethoven (vars. for pf.).

**DRESZER, Anastazy Wilhelm** (b. Kalisz, 28 Apr. 1845; d. Halle o/S., 2 June 1907).

Polish pianist and composer. He studied under Döring, Früh and Krebs at the Dresden Conservatory. For a time he worked at Leipzig and Paris. In 1868 he moved to Halle, where he founded a music school that year, of which he was director until his death. He wrote two symphonies, a string Quartet, sonatas and pieces for pianoforte, and an opera 'Valmoda' (?). C. R. H.

**DRETZEL, Cornelius Heinrich** (b. Nuremberg, 1698; d. Nuremberg, 7 May 1773).

German organist and composer. According to Schubart (who calls him Drexel) he was a pupil of J. S. Bach. He was organist at various Nuremberg churches (Frauenkirche, St. Aegidius, St. Lorenz and from 1764 until his death at St. Sebald) and published in 1731 a collection of hymns, 'Des Evangelischen Sions Musikalische Harmonie, oder Evangelische Choral-Buch', with an historical introduction (a copy in B.M.). Gerber also mentions 'Harmonische Ergötzung, bestehend in einem Concert auf dem Klaviere' (Nuremberg, n.d.). A. L.

**DREULETTE, Edmond.** See CABEL.

**DREW, Mr. & Mrs. Dennis.** See ARUNDELL.

**DREXEL, Johann Evangelist** (b. ?; d. Augsburg, 1801).

German organist and composer. He was chapel master at Augsburg Cathedral. Eitner quotes at length an account of one Drexel who is called by Schubart, in his 'Ideen zu einer Ästhetik der Tonkunst' (1806, p. 207), one of the best Nuremberg organists and a pupil of J. S. Bach, identifying him as J. E. Drexel; but it is quite obvious that Schubart refers to the Nuremberg organist Cornelius Heinrich Dretzel.

Drexel wrote several *Singspiele* for the pupils of the Augsburg Jesuit school of St. Salvator, such as 'Pythias und Damon' (1781), 'Die kleinen Waghälse' and 'Cyrillus der Kappa-doziere' (both 1785), 'Joseph der Unterkönig

in Agypten' (1786), etc. (librettos in Library of Congress, Washington). Masses and other church music by Drexel are preserved in Vienna, Munich, Ratisbon and Einsiedeln.

A. L.

**DREXEL MANUSCRIPTS.** See VIRGINAL MUSIC.

**DREYER, Giovanni** (b. Florence, c. 1700; d. Florence, ?).

Italian singer and composer of German parentage. He made his début as a contralto singer, as far as is known, at Venice in 1725; during the following years he was a prominent member of the Italian opera company at Breslau, was at Dresden about 1730 and in Russia from Aug. 1731 to 1734. Nothing further is known about his activities until 1770, when Burney met him at Florence; he was then *maestro di cappella* at the church of the Annunziata, and the English traveller "had a long conversation with him and found him very intelligent and obliging". He heard a motet of his composition sung at the church. From Dreyer's Breslau period dates an oratorio, 'Christo nell' orto', and an intermezzo, 'Vespetta e Velasco' (1728), and he contributed arias to several pasticcios such as 'Ariodante' and 'Merope' (Breslau, 1727-1728). A. L.

**DREYER, Johann Melchior** (b. ?; d. ?).

German composer. In 1792 he was organist and musical director in the small Suabian town of Ellwangen. According to Gerber, 3 'Salve Regina' (for soprano and instruments) of his appeared at Speyer in 1784. His Op. 1, 3 sonatas for pianoforte and violin, was published at Mannheim, while most of his later works, comprising misereres, masses, litanies and hymns, bear the imprint of Lotter of Augsburg. The oboe Sonata in the Paris Bibliothèque Nationale, listed by Eitner among his works, is by one Domenico Maria Dreyer.

A. L.

**DREYSCHOCK, Alexander** (b. Žak, Bohemia, 15 Oct. 1818; d. Venice, 1 Apr. 1869).

Bohemian pianist and composer. In early youth he was a pupil of Tomašek in Prague. He began his travels in 1838 and continued them with little interruption for twenty years. Up to 1848, from which year the golden time for itinerant virtuosi began to decline, Drey-schock gathered applause, reputation, decorations and money in plenty, from one end of Europe to the other. In 1862 he was called to the professorship of the pianoforte at the Conservatory of St. Petersburg and was at the same time chosen director of the imperial school for theatrical music, and appointed court pianist. Unable to endure the Russian climate, he was sent to Italy in 1868, and died at Venice. His body was buried in Prague in accordance with the desires of his family.

Dreyschöck's publications consist chiefly of drawing-room music. A Sonata, a Rondo with orchestra, a string Quartet and an Overture for orchestra had no lasting success. But he had great executive powers. J. B. Cramer, who in his old days heard him in Paris, exclaimed: "The man has no left hand! here are two *right* hands!" Dreyschöck played his own pieces principally, though his repertory included many classical works, which he gave with faultless precision, but in a manner cold and essentially prosaic.

E. D.

**DREYSCHÖCK, Raimund** (b. Žak, 30 Aug. 1824; d. Leipzig, 6 Feb. 1869).

Bohemian violinist, brother of the preceding. He was professor of violin at the Conservatory at Leipzig and leader of the Gewandhaus orchestra.

R. N.

**DRIEBERG, Friedrich von** (b. Charlottenburg, 10 Dec. 1780; d. Charlottenburg, 21 May 1856).

German scholar and composer. He entered the army in 1794, but left it in 1804 and went to Paris, where he studied music and composition under Cherubini and Spontini. He was in Vienna in 1810, but returned after the death of his father to attend to his estate near Neu Ruppin. In 1812 he produced his opera 'Don Tacagno' in Berlin, which met with success and was followed by others, of which 'Der Sanger und der Schneider' (Berlin, Court Opera, 23 Nov. 1814) was performed for a long time. From 1816 he occupied himself chiefly with the music of the ancient Greeks, about which he wrote a number of books, including the following:

'Die musikalischen Wissenschaften der Griechen' (1820)

'Die pneumatischen Erfindungen der Griechen' (1821).

'Die griechische Musik auf ihre Grundgesetze zurückgeführt' (1841)

His findings have long been superseded and although he was both learned and clever, he lacked the power of concentration and thoroughness to ensure full success for works of this nature. He also wrote a book on the art of composition, published in 1858.

E. v. d. s.

**DRIGO, Riccardo** (b. Padua, 30 June 1846; d. Padua, 1 Oct. 1930).

Italian conductor and composer. He officiated for many years as orchestral conductor at the St. Petersburg Opera. He composed a number of operatic works of insufficient importance to have earned mention even in Russian sources of reference, and two ballets: 'Millions d'Arlequin' and 'The Talisman'. The former achieved widespread fame, largely by virtue of a popular number entitled 'Serenade' which eventually appeared in every conceivable kind of arrangement. This ballet was inspired by Ivan Vsevolozhsky, the director of the imperial theatres in the early 1880s. During a visit to Paris he had been

deeply impressed by the picturesqueness of a Harlequinade he had witnessed at a theatre, and he resolved to create a similar choreographic essay with Drigo's musical co-operation. It was the same official who later conceived a desire to improve the quality of ballet music, which hitherto had been furnished by musicians of Drigo's calibre, by commissioning scores by composers of rank. One of these was Tchaikovsky's 'Nutcracker', produced in Dec. 1892 under the conductorship of the now "relegated" Drigo himself. The action of 'The Talisman' takes place in India and centres on a goddess who is translated into a human environment.

**DRINKER, Henry S. (Sandwith)** (b. Philadelphia, 15 Sept. 1880).

American lawyer and musical scholar. Although his profession is the law, he belongs to the most interesting and picturesque personalities in American musical life. He holds the view that the contribution of amateurs is as important to sound musical conditions as that of professional artists. He is the founder of the "Accademia dei dilettanti" at Philadelphia, a group of several hundred amateur singers and players who meet regularly in his house to study, under his direction, cantatas and oratorios by Bach, and works by Mozart, Beethoven, Brahms and modern composers. His plans were at first jeopardized by the lack of good English translations of foreign texts and by the difficulty of obtaining the necessary printed music. In order to cope with these problems he started to translate systematically the major works of vocal music and to have them printed at his own expense. As a result outstanding translations of the collected vocal works (including songs) by Bach, Brahms, Schumann, Wolf, Medtner and others were made available. For many years he has been working on a translation of all Schubert's songs. The use of these translations is by no means confined to the circle of musicians meeting in Drinker's own house. Any choral group within the U.S.A. may borrow his editions against a nominal fee through the H. S. Drinker Library, which is conveniently housed in the Westminster Choir School of Princeton, N.J. Drinker was awarded the degree of Mus.D. by the University of Pennsylvania in 1942 and that of Litt.D. by Oberlin College in 1944. His studies include 'Bach's Use of Slurs in Recitativo Secco' and 'The Chamber Music of Johannes Brahms'.

See also Philadelphia.

**DRINKER, Sophie H. (Hutchinson)** (b. Philadelphia, 24 Aug. 1888).

American amateur musician, wife of the

preceding. She has devoted many years to the problem of women's contribution to music. The result of her studies is laid down in a richly documented volume, 'Music and Women', which supplies a wealth of hitherto inaccessible information covering not only the musical side of the matter, but also its anthropological and sociological aspects. Like her husband, Mrs. Drinker combines research with the practical performance of music. She was for fifteen years the president of the Montgomery Singers, a group of some 50 women meeting at her house, and she always insisted on having a woman conductor and on performing only music originally written for women's voices. She is considered an expert on this branch of composition. In 1949 Sophie Drinker was awarded the degree of Mus.D. by Smith College, Northampton, Mass.

**Drinkwater, John.** See Boughton ('Festival Choruses'). Filippi (A., 'Robert E Lee', incid. m). Head (2 songs) Ireland (J., part-song). Jacobson (song) Kennedy (Daisy, wife).

**DRIVING.** A 17th-century English term for syncope.

**DRONE (1).** A name given to the three lower pipes of the bagpipe, which each emit only a single note. They are distinguished from the chanter, which has the power of producing a melodious succession of notes.

The term has hence been transferred to a continuous or pedal bass in a composition.

W. H. S.

See also Bagpipe. Chanter

**DRONE (2).** A bowed monochord known as the "drone" or "bladder and string" was in use in England by wandering minstrels until the early 19th century and, as the *Bumbass* or *Basse de Flandres*, is still to be found on the Continent. It was employed as a rhythmic accompaniment to song and dance, but claims no descent from the true Musical Bow. A coarse gut string was attached at both ends to a long pole or stick and stretched over a bladder, a can or a wooden box, which served as a bridge and resonator. It was played with a short horsehair bow plentifully rosined. Jewett ('Ballads and Songs of Derbyshire') gives an illustration of "Singing Sam" (1760) using this instrument.

**DROUET, Louis (François Philippe) (b.** Amstredam, 1792; *d.* Berne, 30 Sept. 1873).

Dutch flautist, teacher, conductor and composer of French descent. At seven years of age he played at the Paris Conservatoire and Opéra. From 1807 to 1810 he was teacher to King Louis of Holland. He claimed at that time to have put 'Partant pour la Syrie' into shape for Queen Hortense. His serious study of the flute began in 1807, after an extraordinary success he achieved at a concert of

Rode's in Amsterdam. In 1811 he was appointed solo flute to Napoleon I, a post he retained after the Restoration. He settled in London and established a flute factory which existed from 1815 to 1819. He appeared at the Philharmonic, 25 Mar. 1816, and this was probably the beginning of a lengthened tour, during which he resided for some time at Naples and The Hague. He played again at the Philharmonic, 17 May 1830. From 1836 to 1854 he was *Hofkapellmeister* at Coburg, after which he visited America. After his return he lived at Gotha and Frankfurt o/M. As a flautist Drouet was eminent, not remarkable for tone, but extraordinarily skilled in rapid passages and in double-tonguing. He left some 150 works of all kinds, admirably written for the flute and greatly esteemed by players, but of little account as music.

**Drouot, P.** See Capdevielle (song).

**DROZDOWSKI, Jan** (also known as **Jan Jordan**) (*b.* Cracow, 1857; *d.* Cracow, 21 Jan. 1918).

Polish pianist and writer on music. He began his musical studies at Cracow under Płachecki. Shortly afterwards he moved to Vienna where at the Conservatory he studied with Dachs, Epstein and Bruckner. He returned to Poland in 1889 and was appointed professor of pianoforte at the Cracow Conservatory, where he remained until his death.

He published several books and exercises for the pianoforte, including

'Preparatory Exercises for Pianoforte Playing' (1886).  
'Systematic School of Pianoforte Technique' (in Polish 1887, 2nd ed. in German in 1889, publ. at Munich under the pseudonym of Jan Jordan).

He also produced a popular 'History of Music' (1903, 2nd ed. 1913).

C. R. H.

**DRUM.** A percussion instrument made in many varieties, all but one of indefinite pitch. The most important species in orchestral use are dealt with below in the following order.

(A) Kettledrums; (B) Bass Drum; (C) Side Drum; (D) Tenor Drum; (E) Tambourine; (F) Tomtom.<sup>1</sup>

(A) **Kettledrums** (Fr. *tambales*; Ger. *Pauken*; Ital. *timpani*<sup>2</sup>). The kettledrums are the most important, not only of all the drums but of all the percussion instruments used in the orchestra. One of the reasons for this is that they are capable of producing notes of

<sup>1</sup> For the tabor see PIPE AND TABOR.

<sup>2</sup> Owing to the excessive use of the word *timpani* in English and certain faulty variants thereof in reference to the kettledrums some explanation is required. *Timpani* is the correct Italian name for kettledrums, the singular is *timpano*. The word *sympani* is incorrect as an Italian term, there being no letter Y in the Italian alphabet, but it is explained, if not excused, by a misguided derivation from the Latin *sympanum* (plur. *sympana*), itself rooted in the Greek *τύμπανον*. It may be noted that in the Italian word the accent is on the first syllable and not, as is sometimes heard in England, on the second.

definite pitch. They are tuned exactly, each to a given note, according to the composer's directions in the score, and these notes may be altered, as required during the performance of a work, by tightening or slackening the skin or "head" by means of screws or some other device.

At least a pair of kettledrums is needed, but a set of three is now the normal minimum for a full orchestra, while at times it is necessary for a player to provide himself with even more when a composer requires four or more different notes in rapid succession. Each drum is of a different size, the smallest being given the highest notes and the largest the lowest. The use of four drums enables the player to choose the most suitably sized drum for any particular note. Drums not actually in use should be damped by placing a cloth or a spare sheet of music on the centre of the drum-head to prevent the possibility of audible vibration in sympathy with other instruments (*e.g.* horns, trombones or double basses).

A kettledrum consists of a large bowl-shaped resonating chamber or "shell", usually of copper, with a drum-head of specially prepared calf skin covering the open top of the shell and a means of tightening or slackening the drum-head. Brass has been used for the shell, though rarely, while recently a light metal of the aluminium kind has been tried in order to facilitate transportation. The shape of the shell varies in different countries. French drums are often almost hemispherical, as are many of the American types. English drums have much deeper shells, and Italian drums may be deeper still. German drums have about the same depth as the English but differ somewhat in shape. Some players consider that the deeper the shell the more resonant the tone, but there is no doubt that some shallow drums give an extremely clean note.

Kettledrums are divided into two distinct types: hand-tuned drums and machine drums (those which have some mechanical arrangement for tuning). On all kettledrums the drum-head is fitted by being first damped with water and then tucked round a wood or metal hoop (the "flesh-hoop") by a procedure known as "lapping". In the hand-tuned drums the flesh-hoop is of wood and fits the top of the shell with no greater clearance than is necessary to allow the head to move when tuned. In machine drums the flesh-hoop is of metal and fits the shell with a greater clearance, and the drum is then said to have a "floating head". The whole, having been placed in position on the shell, is allowed to become thoroughly dry before the drum is used. A metal hoop called the "counter-hoop" is then placed above the flesh-hoop and the whole drawn down to tighten the head.

Hand-tuned drums have a number of equidistant handles which pass through rings on the counter-hoop and engage in brackets on the shell by means of threaded screws. The drum is tightened and loosened by these handles, and one of the most important points in the use of kettledrums is to take care that the drum-head retains equal tension all round. Hand-tuned drums are supported either on a loose tripod stand or on three iron legs which pass through sockets at the base of the shell and can be retracted inside the drum when not in use. Legs are to be preferred to the tripod stand since the height of the drums can be adjusted to suit the player.

The object of machine drums is to allow the player greater ease and speed in altering his notes. Varieties include: the European pedal drums; those tuned by a single large handle, mostly of German make; rotary drums, particularly popular in Italy, in which the entire drum is rotated on its stand; and the American types, which are either pedal or rotary. The German machine drums all have rather heavy outside frames, in which the drum is supported, with the pedal conveniently placed for the player's feet and with long rods connecting the counter-hoop with the pedal. The mechanism of the "one-handle" type is similar except that instead of a pedal a connection leads upwards again to a large handle convenient to the player's hand. Rotary drums are turned by the player on their rather heavy outside frames and should have some means of locking in position once they are tuned. The American types are of lighter build than the types mentioned above, and in the pedal drum there is no outside supporting frame as a rule (though some of the latest have a light one), but there are six light internal rods which connect with the central pillar-stand and thence to the pedal. The light construction of these drums is of great value in transport, and the whole pedal and support can be detached from the drum itself by, usually, one simple adjustment. The American rotary types similarly have internal mechanism.

The opinion has been prevalent from time to time that mechanical methods of tuning tend to spoil the tone of a kettledrum, but they are in general use outside England and the most up-to-date models, whether German or American, come very near the ideal. In England the hand-tuned drum still holds pride of place and among the leading players is preferred to any form of machine drum, but it is essential to have machine drums of one kind or another for some of the parts written nowadays unless such parts are to be re-arranged for two or more players with several hand-tuned drums each. On the other hand, a pair of machine drums cannot

be expected to give of their best when they are tuned to extreme notes to cover the full range, for any drum of a certain size can give only certain notes with full tone.

The minimum compass either of a pair or of a set of three kettledrums of normal size is F to f. The smaller drum of a pair is usually about the same in diameter as the smallest of a set of three, so that the highest drum in each has the same compass. The larger drum of a normal pair is usually slightly smaller than the largest of a set of three. The middle drum of a set of three is midway between its fellows. Yet some composers seem ignorant of these facts and are capable of writing their three notes all very high or all very low. This point is admirably made by Percival Kirby (*see* *Bibl.*).

Beyond the octave F to f, the notes E, E $\flat$  and D are occasionally found (*e.g.* Mahler, Wagner, Liadov) as well as f $\sharp$  (Schubert's eighth Symphony and some works by Mendelssohn) and g (Glinka's 'Russlan and Ludmila' overture, Rimsky-Korsakov's 'Russian Easter Festival' overture and Elgar's 'Enigma Variations'). To obtain f $\sharp$  and g a player should provide himself with a fourth drum smaller in diameter than the smallest of the normal set of three, and with such a set he should be able to cope with all that he is normally given to play. For notes above g, *e.g.* a $\flat$  in Mussorgsky's 'Boris Godunov' (original score), b $\flat$  in Janáček's 'Sinfonietta', b in Stravinsky's 'Rite of Spring' and d $\flat$  in Rimsky-Korsakov's 'Mlada', special considerably smaller drums are required. As a curiosity may be mentioned a part in Ippolitov-Ivanov's 'Caucasian Sketches' for "piccoli timpani orientali", *i.e.* the small Turkish kettledrums, not obtainable in western orchestras.

The diameters of kettledrums, then, are roughly 22 ins., 24 ins., 26 ins. and 29 $\frac{1}{2}$  to 31 ins. The drums of a normal pair are usually about 24 $\frac{1}{2}$  ins. and 27 $\frac{1}{2}$  ins. in diameter. There are slight differences between different makes of drums.

Kettledrums are played with a pair of sticks varying in design in different countries and with different players. The ordinary English sticks have malacca cane handles of not less than 12 ins. in length, with a small horn or wood knob at the end held in the hand. The beating end consists of a hard felt core covered with soft felt. These felt covers are made of a circular piece of white piano-forte felt, and much the best method is to use a piece twice as thick as that required, split it carefully by hand and use the inner (woolly) side thus produced as the beating side on the completed stick. Various weights and thicknesses of felt head are used, and a variety of sticks are needed for different tone-qualities.

Certain drums may sound much better with a particular kind of stick. The German type of stick has a rigid cane handle, which has a distinct advantage over the whippiness, however slight, of the malacca cane. A hard wood or a cork core forms the centre of the beating end and a wool cover is drawn over it, the wool being made up like a small bag with drawn threads and fitting the core exactly. Various weights and sizes are made, and the smaller sizes, the most satisfactory, are generally favoured in England. The larger sizes, some with a ball nearly as big as a tennis ball, are far too cumbersome. American sticks usually have rigid hickory wood handles, which in themselves are much too thick, and rather too heavy felt balls, some hold that American drums all sound much better when English or the smaller German sticks are used on them.

Plain wood-headed sticks are used when a score demands wood sticks. Berlioz in his book on instrumentation describes the use of sponge-headed sticks and demands these in many of his works. The writer has seen a very old pair having whale-bone handles with wooden hand grips and sponge balls about the size of a golf ball. Coins or the fingers are sometimes prescribed by composers to produce various rattling sounds. Kettledrums are often muted by placing a cloth of the size of a small duster on each drum-head in such a way that the tone is damped but not entirely killed.

Though hand-tuned drums, unlike the pedal drums, can be played standing up, it is better that the player should be seated, preferably on an adjustable swivelling stool, for then his body is relaxed, he always strikes the head at the correct place (about a hand's breadth from the hoop) and can lower his ear down to the heads, when he tunes, without being noticed. A good kettledrum in fine condition will, when it is exactly in tune, vibrate in sympathy to the note or its fifth when it is hummed softly by the player with his mouth close over the beating-spot of the head.

**HISTORY.**—There are other and older drums than the kettledrum which give a changeable note. For instance a West African hour-glass-shaped drum with a head which is tightened at will by the player's arm pressing against the thongs where they traverse the waist of the drum; also the Indian drum with a head partially loaded by the application of a paste, so that when struck by the fingers on different parts of its surface, it gives different notes. The kettledrum is not by origin a tuneable drum, but is a derivative of the ancient earthenware pot drum. Use of a pair of kettledrums, one giving a higher note than the other, first appears in the Middle East

in early Islamic times and was adopted in Europe, for martial music in consort with trumpets and pipes, during the Crusades. The drums were of the small, thong-tightened kind still in use among various peoples of the Middle East.<sup>1</sup>

Larger kettledrums were introduced to western Europe in the 15th century, the earliest known report of them being in the train of a Hungarian envoy to France in 1457. By 1500 it was already customary for the retinue of German noblemen to include a mounted kettledrummer in support of his trumpeters. The copper or silver drums, screw-tuned and made or supplied by trumpet makers, closely resembled the cavalry drums of to-day, being smaller than the modern orchestral drums and having a loose tuning-key or a spanner with which all the screws were turned one after the other. Their German name was *Heerpauken* ("army drums") and they are mentioned by Virdung (1511) and by subsequent authorities. They reached England in the middle of the 16th century.

About the middle of the 17th century the kettledrums followed the trumpet into the orchestra both in German church music and in Italian opera. The two drums were tuned in fourths to the tonic and the dominant of the key of the piece, which, on account of the trumpets, was almost invariably either C or D, and even in the 18th century the drums generally shared the trumpet's transposition, their two notes being written c and G whatever the key. The kettledrums used by Bach and Handel were still of the small cavalry size; a pair captured at Malplaquet are still preserved at the Tower of London, whence Handel used to borrow them for some of his performances. Both composers wrote solo passages for the drums, Bach in the opening of the Christmas Oratorio and Handel in 'Semele'. Haydn also wrote solo passages for the drums, but it was Beethoven who brought them to a position of much greater importance. He uses them solo with extraordinarily fine effect at the beginning of the violin Concerto, at the end of the fifth piano-forte Concerto and in the slow movement of the fourth Symphony, the last of which may be said to contain one of his finest drum parts. The octave tuning (F and f) in the eighth and ninth Symphonies and the two-note chords in the latter must also be mentioned. They were complete novelties at the time and it is probable that with modern drums and carefully graded sticks their effect surpasses that which could have been achieved by contemporary players.

Weber was the first to use the third drum in the orchestra (in the 'Peter Schmoll' over-

ture), though Mozart had written for four in his Divertimento for flutes, trumpets and kettledrums. Meyerbeer favoured the use of four drums, and there is a solo for four in the original manuscript of 'Robert the Devil', though in the printed version one of the notes is left to the double basses. Brahms was fond of chords on kettledrums, and the drum parts of his Requiem and of the 'Song of Destiny' contain some of the finest passages ever written for the instruments. Brahms's drum parts, like Beethoven's, show very careful distinction between a roll and demisemiquavers played "open", i.e. not allowed to become a roll.

Berlioz urged that two players, each with a pair of drums, would give a composer greater scope than one player with a set of three, and he frequently employed this idea. In the 'Benvenuto Cellini' overture he demands three players each playing one note, and writes for them chords and the rolling of chords. Rolled chords for four players occur in the 'Symphonie fantastique', but his most lavish parts are in his Requiem, with ten players to eight pairs of drums, each of the first two pairs of drums having two players. There is a long excerpt from this in his 'Instrumentation', a work which should be studied by all those interested in drumming. Wagner uses two pairs, with one player to each pair, in the 'Ring' and in 'Parsifal', but it is usual to find that each player will use a set of three, in order to have available the most suitably-sized drum for every note.

The main systems of machine drum had been invented by the mid-19th century, the earliest being probably the single-handle method devised by Gerhard Cramer at Munich in 1812. Kastner (? 1840, see Bibl.) mentions many types and names Stumpf, in Holland, as the inventor of a rotary type and Boracchi, of Monza, as that of the exterior-frame pedal drums. Many of Richard Strauss's parts are written for machine drums and cannot well be played without them by a single player. Without machine drums 'Till Eulenspiegel' needs four hand-tuned drums, though five are better, and yet the part is simple compared with those in 'Salome' and 'Elektra'.

A curious effect obtainable with machine drums is the *glissando*, of which Bartók's 'Concerto for Orchestra' provides an example. English composers, until recently content with a set of three hand-tuned drums, now also write frequently for machine drums.

(B) **Bass Drum** (Fr. *grosse caisse*; Ger. *grosse Trommel*; Ital. *gran cassa* or *tamburo grande*). Thus, the largest of the drums, has an indefinite pitch. The true bass drum consists of a large cylindrical shell of wood, fitted with two drum-heads lapped onto flesh-hoops and placed over the open ends of the shell. The diameter of the heads is much greater

<sup>1</sup> For further details of these medieval kettledrums see NAKERS.

than the depth of the shell, so that the drum is normally placed upright, with the heads vertical. For orchestral use the heads should be not less than 32 ins. in diameter. There are two counter-hoops, and in the military bass drum these are usually of wood and the drum is tensioned by cross-roping tightened by leather braces. Since one long piece of rope is used, when one head has to be replaced the whole rope has to be removed before the new head can be placed on the shell, and tightening up the rope again so that the two heads become level requires great care. The orchestra, although it can use a roped bass drum with success, is really better served by a bass drum tightened by rods lying across the shell and furnished with hand-screws or with nuts turned by a loose key. This rod tension can be arranged in two ways. If each rod runs from hoop to hoop without centre support, both the heads will be drawn up together and the arrangement is called "single tension". If, however, each rod has a central support, fixed rigidly to the shell, each head will be drawn up independently, with the great advantage that it can be tensioned to give its best tone and be removed, if necessary, without disturbing the other head. In the orchestra this double-headed bass drum is supported on a folding stand which resembles the frame of a camp stool.

A single-headed type of bass drum is the "gong drum" or "gong bass drum". This usually has a greater head diameter than the double-headed bass drum, a metal counter-hoop and a very narrow shell open on one side. Too narrow to stand up by itself, it is slung on straps in a frame, like a large gong. Its tone resembles that of the double-headed bass drum and its vibrations can be damped more easily. Introduced for theatre use to save space (before the appearance of that abomination, the bass drum pedal) it was adopted towards the end of the 19th century by London orchestras and is still in use in these to-day. It seems to be peculiar to them; most of the large British provincial orchestras and orchestras in other countries use the double-headed bass drum.

In the orchestra the bass drum is struck with one large felt-headed stick of sufficient weight to extract the full tone. The stick may have a small felt knob at its handle end and may then be used to give a tolerable roll, but a roll on the bass drum is better made with a pair of sticks, and for convenience these should be rather less bulky than the ordinary single stick. The drum must be struck near the hoop, though not as near as in the case of kettledrums, the best spot being found by experiment.

Before it became customary to employ a single line in a score for the part of a percussion

instrument of indefinite pitch, the bass drum part was written on the bass stave. The cymbals part then often appears on the same stave, in which case the bass drum notes have tails downwards and the cymbals notes tails upwards (though some publishers reverse this, causing players much confusion). It is most desirable, and the rule in every good orchestra, that a separate player should play the cymbals, even with certain old operatic parts which, though labelled simply "Bass Drum", are considered by some players and conductors to be intended for bass drum and cymbals *a due*.

**HISTORY**—In the East the bass drum dates back to the Sumerians. It had various shapes: with large heads, or with narrow heads and deep shell ("barrel drum"). There are Egyptian specimens of the latter at Cairo and in Paris (Louvre). It remained a rarity in Europe until the 18th century, when imitation of the percussion of the Turkish Janissary bands grew fashionable in European military bands and, on appropriate occasions, in opera. An early experiment is Gottfried Finger's 'Concerto alla turcheſta' (MS Rostock) with *tamburo turchese* and *cembalo turchese*. Later the military-band "Turkish Music" included bass drum, cymbals, triangle, tambourine and jingling Johnny, but only the first three of these were used with the orchestra. They were so used by Gluck in 1764 and subsequently by Haydn, Mozart and Beethoven. The bass drum was then much deeper in the shell and narrower across the heads than it is now; its shell-depth and head-diameter were roughly equal (about 28 ins.) and it was therefore known as the "long drum". Hence Berlioz, when he wants a roll on it, demands that it be placed "upright" — i.e. with the heads horizontal and the rolls made with kettledrum sticks. The Dresden State Opera orchestra recently used a drum of this old pattern and in this position to meet this demand, but often a modern bass drum is rested with its heads horizontal upon two chairs for Berlioz's rolls. The remarkable bass drum part in his Requiem gives a good idea of the instrument's capabilities.

In the Turkish Music days the long drum was sometimes played with a drum-stick in the right hand and a switch of birch twigs in the left. The birch strokes and the stick strokes were then distinguished in the part by notes with tails up and tails down respectively, as may be seen in the second movement of Haydn's "Military" Symphony. Mahler used this switch under the name *Rute*, e.g. in his second Symphony.

(C) **Side Drum** (Fr. *tambour militaire* or *caisse claire*; Ger. *kleine Trommel* or *Militär-trommel*; Ital. *tamburo militare* or *tamburo piccolo*. In America it is also called "snare drum"). The side drum has a shell of wood

or metal and two drum-heads. The size varies, but a good standard size for use in all but the very largest orchestras has a head diameter of 14 to 15 ins. and a shell depth of 6 to 8 ins. The largest English orchestras favour a side drum of about 12 ins. shell depth, resembling in its dimensions the deep military side drum. The shallower drums have too snappy a tone for the symphony orchestra. Like the bass drum, the side drum may be tensioned either by ropes or by rods. In a marching band it is nearly always of the deep (12 ins.) size and rope-tensioned (though some up-to-date pipe bands have rod-tensioned drums). The shallow side drums are always rod-tensioned. The rod system allows for floating heads (described above under Kettledrums) and — most important in the side drum — separate tensioning for each head. The "batter" head is usually thicker and kept at greater tension than the bottom or "snare" head. Against the latter rest the snares, which are the cause of the hard, dry and rattling quality of tone by which the side drum is distinguished from all other drums. The snares consist of a group of eight to ten cords of gut (or special silk) wound with fine wire. They can be adjusted from the side of the drum and can be lifted clear of the snare head without altering their tension. This last is done when the side drum is required to be muffled or muted, or to give a tomtom effect.

For marching all side drums are slung on a strap passing over the right shoulder; in the orchestra they rest on an adjustable floor stand, the player normally standing.

A pair of sticks are used. They are of wood without any form of felt attached and they vary both in weight and in taper with different players and with drums of different sizes, but they must be of sufficient weight to bring out the full tone of the drum used. The technique of the side drum is very intricate and difficult to acquire. The whole method is really founded on the roll. This is made up by two strokes of even weight with one hand and then with the other alternately, and in learning to roll a player is taught to start these beats very slowly, gradually to increase the speed until the roll is achieved and finally, as a rule, to slow up the beating until it becomes slow again. To hear and watch an efficient player doing this is most fascinating. There are also a number of "beatings", peculiar to the side drum, all founded on the beating of the roll, being in themselves really very short rolls. They are termed "open" or "closed" beating according to whether the slow or the fast method of beating the roll is used in them. There are also much-used ornamental beatings known as flams (♩ or ♩), drags (♩♩, ♩♩, etc.) and parradiddles (ways of beating rhythmic figures). The single stroke or iso-

lated tap is little used and is often held to be the side drum's least effective sound, yet it has been used effectively by some composers to accentuate a loud staccato chord.

**HISTORY.**—The earliest known true side drum is the medieval tabor, which is clearly depicted in early 14th-century miniatures as a very small rope-tensioned side drum with snares, beaten either with two sticks or, by players of the pipe and tabor, with one. The big military side drum became popular during the 16th century, used chiefly with the fife in the manner then said to have been introduced by Swiss soldiery. It was generally considerably larger than the modern military side drum (which is of 18th-century size). The drum and its beatings are described by Arbeau ('Orchésographie', Langres, 1589), who mentions its two-cord snare stretched across the bottom head. It was occasionally brought into the orchestra by 18th-century composers for martial effect. In certain movements of the 'Fireworks Music' Handel writes "with the side drums", and Gluck uses it in 'Iphigénie en Tauride'. Its employment by Rossini, Auber and other early 19th-century composers is well known. A rod-tensioned side drum is illustrated by Kastner ('Manuel général de musique militaire', Paris, 1848). Berlioz emphasizes that several side drums played together are preferable to one, and he demands them in his funeral march for the last scene of 'Hamlet'. Similarly Sir Henry Wood used to make all his extra percussion players (usually three) play side drums together in his arrangement of the Purcell (or Clarke) 'Trumpet Voluntary'. Elgar and Rimsky-Korsakov should be noticed for their real understanding of the side drum. Among special effects, Walton requires it to be played with kettledrum sticks in 'Façade', and Lambert with the wire brushes of the dance band in 'The Rio Grande', a work which employs fifteen percussion instruments in charge of five players.

(D) **Tenor Drum** (Fr. *casse roulante*, *casse sourde*; Ger. *Ruhrtrommel*, *Rolltrommel*, *Wirbeltrommel*; Ital. *tamburo rullante*). This is a large drum somewhat similar to the deep side drum but without snares. Its shell is about as deep as that of the deep side drum, but its heads are wider, being 17 to 18 ins. in diameter. When correctly proportioned it has a peculiar dull sound, quite unlike that of any other drum, it might be described as that of a very small bass drum but with little resonance, since its heads are well tensioned. The instrument originated in military circles, and there its main use still lies, for it is included in the "Drums" or "Corps of Drums", i.e. the band of drums, fifes and bugles (as opposed to the full military band, in which the tenor drum is not used). Here

it usually has rope tension to match the side drums it accompanies, but for the orchestra it is better made with rod tensioning. In a "Corps of Drums" it is invariably played with felt-headed sticks midway in weight between those of kettledrums and that of a bass drum. In the orchestra it is usually played with side drum sticks, requiring fairly heavy ones, and then gives a mournful, hollow tone. Side drum technique is used, but seldom with intricate rhythms.

In the orchestra it is not common. Wagner uses it in 'Rienzi', 'The Ring' and 'Parsifal', Elgar in the third 'Pomp and Circumstance' March; Bax in several works; and Richard Strauss in 'Ein Heldenleben'. For many years it has been the custom in London to use a tenor drum for the loud solo roll near the end of Strauss's 'Till Eulenspiegel' for *kleine Trommel* directed to be *dumphy*—i.e. for side drum with its snares out of use. This was Sir Henry Wood's custom especially, and undoubtedly the tenor drum gives out more tone than a side drum with its snares silenced. Yet it is said in Berlin that the latter is what Strauss himself always desired. The tenor drum is also frequently employed instead of the side drum in Stanford's song 'Drake's Drum' ('Songs of the Sea'), where the side drum is directed to be loosened or tuned low. No player can afford thus to throw his side drum out of its careful adjustment for a single piece in the programme, and the sound of the tenor drum probably approaches that of the heavy Elizabethan military drum much more closely.

(E) **Tambourine** (Fr. *tambour de Basque*; Ger *Baskische Trommel*, *Handtrommel*, *Schellentrommel*, *Tambourin*; Ital. *tamburino*, *tambourin*, *tamburo basco*; the Fr. *tambourin* denotes the tabor, and the word is occasionally used with this meaning in the other languages, causing some confusion<sup>1</sup>). The tambourine is a drum having a single head stretched over a hoop of wood. Round the side of the hoop, in holes cut out of the wood, are inserted a series of metal jingles about 2 ins. in diameter and resembling small cymbals, and it is these which, when the instrument is struck or shaken, produce its characteristic quality of sound. The diameter of the head, which should be of tough skin (sheep or goat), is usually 10 or 12 ins. The head is fixed directly to the hoop, which is about 3 ins. deep, by means of large-headed nails. Formerly there was also used a type of tambourine with thumb-screwed rods for tightening the head, but these proved too heavy and too tiring to the player's wrist. If a really coarse head is selected, well wetted and nailed on

while wet and the whole instrument well tensioned when the head is dry, a good tambourine will retain its tension satisfactorily unless kept in a very damp atmosphere.

The method of playing varies for different effects demanded by composers. (1) It may be struck with the closed knuckles, when both head and jingles sound. (2) It may be shaken, when only the jingles sound. (3) The finger, or, better, the thumb may be moistened with the tongue and rubbed round the head near its edge. This cannot produce a long roll because the thumb cannot travel farther than about two-thirds of the circumference of the head. (4) It can be laid on the knee, lightly held in place with the underside of the wrists and struck upon the head by the extended fingers of both hands; or, alternatively, held head-downwards on the knee and struck by the fingers on the edge of the hoop. Little sound beyond that of the jingles results from these "knee" methods, but they are useful in complicated rhythms which are too quick to be played with one hand only.

**HISTORY**—The tambourine in the form known to-day dates back to the medieval Arabs, but a kindred instrument, a double-headed tambourine without jingles, was used by the Assyrians and the Egyptians, and was the *tympanon* of the Greeks and probably also the *toph* (transl. timbrel in the Bible) of the Hebrews. Among the Arabs this double-headed tambourine was, and is, generally square-headed, with interior snares stretched against the inner surface of the heads.

The single-headed Arab tambourine often, though not always, has a snare, and similarly jingles. It was adopted in Europe during the crusades and called timbrel (Fr. *timbre*). The timbrel usually had both snare and jingles and was beaten in the oriental manner with the fingers. After the middle ages its use declined in Europe (during the 16th century it was chiefly used in allegorical and exotic spectacles) and it was virtually re-introduced from the East in the 18th century in the military band "Turkish Music" (see (B) *above*). In this it was played by Negroes and, as today, it had no snare. An early example of its orchestral use is Weber's music to 'Preciosa' (1820). Berlioz made full use of it and often requires two to be played together.

(F) **Tomtom**. A kind of drum introduced into jazz music in the 1920s in imitation of African native drums, and one or two tomtoms are now a standard component of a dance or variety drummer's kit. It has a single head lapped onto a flesh-hoop and secured to a wooden shell by rod-tensioning. Its head-diameter and shell-depth are approximately equal and vary in different instruments from 12 to 16 ins. There are no snares. The tomtom is supported on a stand

<sup>1</sup> Timbrel would be the ideal English word, but unfortunately the Franco-English hybrid "tambourine" is firmly established.

and struck by side-drum sticks or felt-headed sticks as required. The note of a tomtom lies on the borderline between definite and indefinite pitch. It is not tuned to a definite note, but two tomtoms of different sizes are commonly used, the smaller giving a higher sound than the larger. The tomtom is also made with two heads, each with its own rod-tensioning, and by tightening one more than the other something of the effect of two different tomtoms can be obtained with convenient saving of space.

**DRUM CALLS.** Before bugle calls were used in armies the side drum sounded the requisite calls and signals. Later these were accompanied by fife calls. The former, which were practised in the British army as late as the 19th century, were doubtless hoary with antiquity, although the oldest British notation only dates from c. 1760. France possesses drum calls a century earlier, and so does Italy. For the sake of appropriateness, here is the British "Drummers' Call":

Drums were used in Britain until the 1890s, the last official version being 'Drum and Flute [= Fife] Duty', issued on 1 Oct. 1887.<sup>1</sup>

**DRUM-MAJOR.** A non-commissioned officer in the army, or an individual in civil life, who directs drummers (fifers and buglers). In spite of the general belief that the military office is no older than the reign of Charles II (Stainer & Barrett, Dict. Mus. s.v.) it is mentioned, and its duties are defined, as early as 1590 (cf. Oxford Dict. s.v., which says 1598). Thomas Digges, in his 'Arithmetical Warlike Treatise' (1590), says that "there ought to be a Dromme Maior of every regiment" who should be a man "of great

perfection in his science". That the author had originally called this officer the "chief drummer" in the first edition (1579) of his book, which he changed to "drum major" in the later issue (1590), is some slight indication of the date of the office in Britain. Robert Barret ('The Theorike and Practice of Modern Warres', 1598) is equally insistent on the importance of the office. It was certainly commonly adopted on the Continent, where we see the *tamburo generale* in Ferretti ('Della osservanza militare', 1568), the "generall drum" in Vega ('De re militari', 1582), the "drummer major" in Monro ('Monro His Expedition', 1637) and the "colonel-drumm" of the French in Turner ('Pallas armata', 1683). Strange to say, it was Turner who expressed the opinion that although the drum-major was "necessary enough in all Regiments of Foot" there was no place for him "here at home". The statement cannot be strictly correct, seeing that a dozen military writers of the 17th century describe the functions of the drum-major. Gerat Barry ('Militarie Discipline', 1634) says that the "Drom mayor" was responsible for the provision of "dromes and phifes". Robert Ward ('Animadversions of Warre', 1639) has a lengthy chapter on "the Duty and Office of . . . the Drum Major of the Regiment". Richard Elton ('The Compleat Body of the Art Military', 1659) says that as well as being proficient in the drummer's art, the drum-major "must likewise be well skill'd in several languages and tongues". Venn ('Military and Maritime Discipline', 1672) considers him indispensable. Yet Grose holds the view that the office was not universally admitted into the English service until about the latter end of the reign of Charles I, although he thinks it possible that some regiments that had served abroad may have adopted the drum-major. This latter may be true enough since Hepburn's Regiment (= The Royal Scots) had a drum-major in 1637, as they did when they entered the British service in 1666. France, in which this regiment had served, was proud of the *tambour-major* as we know from the Sieur de Praussac ('The Art of Warre', 1639), 'The Art of War at Present Practised in France' (1678), A. Manesson Mallet ('Les Travaux de Mars', 1696), and the Sieur de Briquet ('Code militaire . . . des roys de France' (1728), where the *tambour-major* was on the regimental staff. This was his position in the British Foot Guards from 1650, and in July 1655, when the Lord Protector agreed on field and garrison forces for Scotland, a drum-major was similarly recognized in each of the thirteen infantry regiments. In July 1657, however, the office was wholly abolished. It was not restored until Jan. 1680, and then only to the Foot

<sup>1</sup> But cf. 'Manual for the Corps of Drums of the 22nd (Cheshire) Regiment' (c. 1921) and 'Drums and Drummers' by G. R. Howe (privately printed, London, 1932).

Guards. Yet in spite of this, and notwithstanding the testimony of Turner (writing in 1670-71), there is every reason to suppose that infantry regiments still continued to use the drum-major unofficially (see under 1678, 'Commons Journal', IX, 487).

Before the establishment of a standing army in the mid-17th century, the drum-major held a rank somewhat analogous to that of a present first-class warrant officer, *i.e.* a position between the commissioned and non-commissioned ranks. In 'The Souldiers Grammar' (1639) he is superior to the sergeant, and in 'The Art of Warre' (1639) of the *Sieur de Praissac* we are told that "the drum-major must be lodged near the sergeant-major [=major] or in his own lodging". He was generally the most lavishly dressed man in the regiment, as the clothing regulations and accounts reveal, and one should read the delicious although anonymous satire on this in Grose's 'Advice to the Officers' (1782), where he calls him "the Paris if not the Adonis of the regiment". His "staff" has ever been considered part of his insignia, and one of the oldest examples of this mark of office is that of the Honorable Artillery Company of London, dated 1671, still preserved. Some regiments treasure staves that have been captured from the enemy as trophies. The *Sieur de Praissac* allows that the drum-major may "with his staff correct the drum[mer]s which fail in their duty". The familiar display with this staff was officially recognized, and Charles James says in his 'Military Companion' (1805) that the drum-major was required to turn it "with an easy air one round, so as to keep time, and plant it at every fourth pace". If this rotating and twirling of the staff was merely a part of the "pompe" of war, the precise angle at which this emblem of office was held was certainly the "circumstance", because by this means were conveyed no fewer than seventeen commands, without a solitary word being spoken. In France, from the time of Manesson Mallet (1696), the *tambour-major*, who used his *canne* for a similar purpose, abandoned it in time of war for a side drum. In the British service the same expediency found recognition, and we read, in an indent for arms and accoutrements in 1684, of a request for "one drum for the drum-major". As late as 1777 the 'Rudiments of War', which says that every regiment has a drum-major, also explains that "he is always that person who beats the best drum", but the writer should have added by way of complement, "in time of war".

During the whole of the 18th century only the Foot Guards and the Royal Artillery were officially allowed a drum-major, although most, if not all, infantry regiments had one;

but, as Grose says, being unofficial, he had no pay from the government. He did, however, "receive some addition by stoppage from the pay of the young drummers, and contributions of the captains". Notwithstanding this, both the numerous general orders and the discipline of war gave the drum-major full recognition, as may be seen from Humphrey Bland's 'Treatise of Military Discipline' (1727) to Thomas Simes's 'Military Guide' (1781). However, by 1809 the commander-in-chief thought that the petty system of stoppages to finance the drum-major was improper, and the following year a drum-major, with the rank of sergeant, was allowed to infantry regiments. In the Foot Guards he was taken off the staff of the regiment, one being allowed for each battalion. In 1881 the War Office looked askance at so high-sounding a title as "drum-major", as it seemed rather to convey the idea of a rank much higher than that of a non-commissioned officer. The result was that he was termed "sergeant-drummer", but in 1928 a royal command restored the time-honoured original name. H. G. F.

**DRUM-MAJOR GENERAL.** Originally he was the drum-major of the royal household who supplied drummers, fifers and other musicians for military service, but later was seconded to the army as drum-major general, when the position was carried over to the Army Estimates. Grose says ('Military Antiquities', 1801) that "there was in the king's household an officer stiled, drum-major general of England, without whose licence no one could, except the king's troops, formerly beat a drum". Up to the year 1700 there does not appear to be any authority giving jurisdiction of this sort to the drum-major general. Before that year the right to demand a licence to play a trumpet, drum or fife was solely the privilege of the sergeant-trumpeter of the royal household. If there was a restricted authority of this sort in favour of the drum-major general, it must have been after 1700. What did exist, although it is not mentioned by Grose, was his right or duty to impress drummers and others for the services. This was also the duty of the sergeant-trumpeter of the royal household, and the latter may have delegated this duty partly to the drum-major

general, just as the latter delegated his duty to deputies. That this supply of drummers and others, by impressment or otherwise, for the services carried a fee is clear from a payment made in Oct. 1676, on the occasion of troops being raised for service in Virginia, where we read: "Drummers impressed by Drum-Major-General John Mawgridge for the occasion — 15". Three years later we read, under the date 10 Apr. 1679, of an order to pay the same individual £5:12.0 for "impressing and furnishing 16 drummers for the eight companies added to the Coldstream Guards in 1678".

From these entries it is clear that the office of drum-major general was in existence in 1676 at the latest, and that it was held by the drum-major of the royal household. *Per contra*, Major Charles Foulkes is of opinion ('Journal of the Society for Army Historical Research', 1838) that the document (P.R.O., W.O. 30/88) dated 1690 is the earliest mention of the office, and he even questions whether the drum-major general had any official standing before 1702 (P.R.O., W.O. 44/168). These statements are clearly wrong. That something approaching this office in the army was in existence even earlier than 1676 is suggested in 'The Souldiers Grammar' (London, 1639), where we read that "the Drum Major of the Army hath the first range, then the Drum Majors of the Regiments successively, according to the antiquities of the Colonells". Indeed the drum-major of the royal household, with his drummers and fifer, were doing duty with the first Foot Guards (= Grenadier Guards), and in this connection there appears to have been a slight delinquency. On the 8 Aug. 1689 we read this instruction: "His Majesty's drum-major to order that the [three] drums and fife do attend his Majesty's First regiment of Foot Guards . . . as they did heretofore". This, in itself, shows a rather close connection between the drum-major of the royal household and the services, which is on all fours with the trumpeters of the royal household being seconded as trumpeters to His Majesty's Horse Guards (= Life Guards). Until 1716 the foot guards were allowed royal livery-garb for four drummers (including the drum-major), and to-day the drum-major still wears it on special occasions, a relic from the old drum-major of the royal household.

The real proof for the official recognition of the drum-major general is to be seen in his warrant of 21 Sept. 1689, "to swear John Mawgridge, esquire [drum-major of the royal household], in the place and quality of drum-major general of all his Majesty's forces". On 21 May 1690 he petitioned the authorities that his fees for supplying drummers for the service be paid. He pointed out that he had secured 144 drummers for six of the royal

regiments, and had certificates from colonels and field offices to verify this. Therefore he prayed that his fees, amounting to £43:4:0, i.e. 6s. per drummer, be allowed to him. It is to be hoped that his claim was settled, since his fee as king's drum-major was only £30 a year, which was £10 less than the annual cost of his livery-garb. In 1694 we have his warrant authorizing him "to presse or cause to be impressed from time to time such numbers of Drums, Fifes, and Hoboyes [i.e. the players of such] as shall be necessary for His Majesty's Service either by sea or land". It was not a pleasant duty, and he was allowed to appoint deputies for the work. Another warrant for the office exists for 1702. Another, dated 8 Sept. 1719, appoints John Clothier as drum-major general. He had been a drummer in ordinary under Mawgridge, jun., since 1699 and appears to have been the son of Devereux Clothier, an old drummer in ordinary of the royal household (fl. 1662-99). In a manuscript entitled 'Establishment: H.M. Guards, Garrisons, & Land Forces', dated 25 Dec. 1735 (P.R.O.) there is allowed a drum-major general at 1s. 7d. *per diem* and we read of it again in 1755 when John Conquest held the position. He too was drum-major to the royal household, in which we see him officiating as late as 1769. Perhaps he was the last to hold this dual position because the drum-major of the 3rd Foot Guards (Scots Guards) became drum-major general in 1777. On 11 Jan. 1777 a warrant is addressed to Charles Stuart, Gent., saying that the Secretary of State does "constitute and appoint you drum-major-general of our Forces", and that the same must carry out his duties "according to the rules and discipline of war". Since Grose (*d.* 1791) speaks in the past tense of the office, it would seem to have lapsed by this date. At the same time it is mentioned by Charles James in his 'Universal Military Dictionary' (London, 1816, 4th ed.). Nowadays drummers and fifers for the army are supplied by voluntary enlistment, generally of boys from the Duke of York's School and similar institutions.

**DRUM-MAJOR OF THE ROYAL HOUSEHOLD.** An officer who had charge of the drummers and fifer(s) of the king's household, a position which later became merged into that of drum-major general of the forces. Drummers had long been a part of the royal retinue, especially in military and processional demands. We know of a Janino le Nakerer (kettle-drummer) as a king's minstrel in 1310, and Edward III had a "tabrer" (not *mabrer*, cf. Hawkins) who, in 1369-70, was Lambekin Taborer. In 1483 Richard III had his "taberetts" and in 1509 Henry VII had three "tabretts and others", one of them, probably, being a fifer, although only one "fyfer" and one "drome player" find a place in 1548. Ten years later there were two of each. What was considered desirable by drummers at this period is apparent from a letter in the state papers (1582 *sic*) from one, Gawen Smithe, who applied to be appointed a drummer in ordinary of the royal household, when he enumerated the marches and dances that he could play. We know from the Lord Chamberlain's accounts that Smithe was appointed in 1576, which shows that the Rev. H. C. de Lafontaine's dating of the above document must be wrong.

As with the sergeant-trumpeter of the royal household, who had charge of the trumpeters in ordinary, there was the need for a similar office for the control of the drummers and fifers in ordinary, and as early as 1552 a Robert Brewer is dubbed "master-drummer"; but although he appears on the pay lists until 1568, the above is the only occasion in which his superiority over his fellows is recognized. When James I came to the throne (1603) there were two drummers and two fifers, and likewise at the accession of Charles I (1625). In 1628, however, there is once more an attempt to recognize a head drummer when, for the first time, we read of a "drum-major" who has charge of four side drummers and a fifer, a complement which continued to be the official strength until the 18th century.

The first "King's drum-major", as he was sometimes dubbed, or more rarely the "chief drummer", was William Gosson, who had been drummer in ordinary since 1603. When he died, in 1629, Robert Tedder received the appointment. At his early decease, William Allen succeeded (1630), and he appears to have retained the position until the Commonwealth. At the Restoration (1660) John Mawgridge had the post conferred on him, and three of his family, all drummers, served in the king's music. His livery-garb, quite a handsome one, cost £52 odd (1674), and we see him in it, with his short staff of office, at the

head of his drummers and fifer in Sandford's plates of the coronation of James II. Old John Mawgridge died in 1688, when he was succeeded by his son, also called John, who had entered the king's music in 1671 (Lafontaine, in his index, does not discriminate between the father and son). By this time the office had become merged into that of drum-major general of the forces, whose duty it was to furnish musicians for the services. Mawgridge, jun., was the drum-major of the royal household as late as 1723-26 and was drawing his customary dues as well as his salary. John Clothier, who had been drum-major general of the forces since 1719, was "court drummer", i.e. drum-major to the household, at £24 a year in the 1740s. John Conquest, mentioned as drum-major general in 1755, was officiating as drum-major to the household during 1762-69 at £100 a year. After this the post seems to have lapsed, although in 1888 John Day, who had previously been listed among the court musicians as "solo violinist", became "household drummer".

**"DRUM" MASS** (Ger. *Paukenmesse*). The familiar name of Haydn's Mass in C major, written in 1790. It is so called because it makes an unusually continuous use of the kettledrums, even in the "Agnus Dei", where by tradition they are usually silent.

**"DRUM-ROLL" SYMPHONY** (Ger. *Sinfonie mit dem Paukenwirbel*). The familiar name of Haydn's Symphony No. 103, in E<sub>b</sub> major (No. 8 of the Salomon symphonies), written for London in 1795. It derives from the drum-roll with which the slow introductions opens.

**DRUMS and FIFES.** The name given to a combination of these instruments, sometimes with other percussion or concussion instruments added. It is the oldest surviving "band" of military music. The idea of this

combination may have come from the Turks, whose Janissaries (*Yeni cherik*=new troops) had reached the Piave in the last quarter of the 15th century. Waterman, writing in 1550, says that the Turks still "vse a dromme and a fiphe, to assemble their Bandes". In the 15th century the Swiss mercenaries were the professional soldiers *par excellence* in western Europe, and they had these fifes and drums, making music for their infantry. The Swiss custom spread with great rapidity, as the name "Swiches grete tabours" in England (1492), *Schweitzer Pfeiffe* in Germany (1528) and "Swische talburn" in Scotland (1533) prove. France had already adopted the novelty in the 15th century, as Littré assures us, and by 1534, according to the 'Memoires' of Guillaume du Bellay, 2 *fifres* and 4 *tabourins* were allowed to a thousand men. The famous Suabian infantry of Maximilian did better still with a *Pfeffer* and *Trommelschläger* to each company, and it was there that the cadenced step to their music originated.

In England the fife had already made its appearance by 1510, as we know from Holinshed, and this for the court military music. Henry VIII sent all the way to Vienna for his fifers and drummers, for this was the fount of military music in those days. When the train bands of London were dressed in martial array in 1540, their *droumes* and *ffifers* were to the fore, and the former was a new word, the term *dromslade*, borrowed from the Dutch, having taken the place of *taborer*, the older English name for drummer. At Saint-Quentin (1557) a drummer and fifer were allotted to each company, although thirty years later Robert Barret, in his 'Theorike' (1598), advocated three of each. In any case, a fairly good band of drums and fifes could be heard when companies were mustered regimentally.

What they looked like in those days can be seen in a B.M. manuscript (c. 1540) reproduced by Galpin in his 'Old English Instruments of Music' (p. 245) and in Fronsperger's 'Kriegsbuch' (1566), their gaudy apparel, more showy even than that of an officer, being probably due to the fact that their person should be distinguished in battle. They were considered non-combatants, being hired professionals under a warrant, and their person was inviolable in warfare, it being considered wrong to harm them. What they played was of a simple character. Jehan Tabourot ('Orchésographie', 1588) suggests that it did not matter what the fifer played so long as he kept time with the drummer, while Markham ('Five Decades', 1622) thought drumming an unnecessary study, although he actually names an untraced book on this art by a certain Hindar. Yet neither of these authors needs to be taken too seriously in his statements, since

the former has preserved a deal of drum and fife music for us, while the latter testified that he knew of "no more sweet and solemn melody than that which the drum and flute [fife] afforded"

The 17th century brought the heyday of the drums and fifes which, with the resplendent and dexterous drum major, had now become an important factor in the "pomp of war". Nearly all the writers on military discipline at this period dilate on the value of this music, and a rather valuable corpus of the best that served the armies of Louis XIV has come down to us, some of it in four-part harmony. Little has been preserved from English sources save some airs for the exercises to be found in 'Mars: his Triumph' (1638), although 'The Earle of Oxford's Marche' in the 'Fitzwilliam Virginal Book' and 'The Flute and the Droomie' in 'My Ladye Nevells Booke' indicate the character of this type of music. By the close of the century, when the new oboe bands had completely captured the fancy of military men, the drum and fife bands faded out in the army, although they seem to have continued to hold their place in court military music. It was not until forty years later that the drums and fifes joined forces once more to become greater army favourites than ever.

Mersenne (1636) tells us that the French fife differed from that of the Germans in that it was much shorter and narrower of bore, thus giving a more acute and piercing tone. Of course Shakespeare wrote ('Othello') of the "ear-piercing fife" and of the "vile squealing" or "squeaking" (Robert's quarto) of "the wry-neck'd fife" ('Merchant of Venice'), which would seem to suggest that the English fifes were similar to the French, although iconography contradicts this. What means this gibe at "wry-necked musicians", as Barnaby Rich calls these fifers in his 'Aphorisms' (1618)? Fifers, marching abreast with their fifes in alignment, blew into their neighbours' ears, whereas by inclining the head obliquely to the right or left this discomfort to others was overcome somewhat.

Grose ('Military Antiquities', 1801) gives the Foot Guards the credit of reintroducing the fife into the British army about the year 1745, but the whole question has been dealt with at length by the present writer elsewhere.<sup>1</sup> We know from Parliamentary Reports that the Foot Guards had fifes in 1746, and that both the Royal Artillery and the 33rd Foot had them the following year. Only grenadier companies were allowed the instrument at first, so that there were only two per regiment, but the Royal Artillery at a review in Green Park in 1753 had a drum major, six fifers

<sup>1</sup> 'Handel's Kettledrums: Papers on Military Music' (1950).

and ten drummers. In the 1750s and 1760s, despite regulations, most regiments had from four to six fifers with twice as many drummers, and in 1811 the War Office made this latter proportion a regulation. So important had these bands become that a fife major was appointed (1748 in the Artillery) to supervise fifers, and indeed to control whole musical arrangements of the drums and fifes, leaving the drum major to attend to teaching the drum calls and taking disciplinary charge on the march. Even the cavalry adopted fifes for dismounted parades, keeping their trumpets for mounted work. The cavalry fife became one of the forerunners of their military band proper. We know a little about drum and fife music of those days from many sources, notably the fife and flute tutors, but especially from Walsh's 'Warlike Music' (c. 1760) up to Aird's 'Selection of Scotch, English, Irish and Foreign Airs' (c. 1778 and on).

The fife at this time was, and had been since its emergence in the 15th century, keyless, and had a cylindrical bore, both features remaining until the opening of the 19th century, although the flute had a conical bore until 1847. It was the same in Germany, as may be gathered from the works of Agricola (1528) and Praetorius (1614-20), and in France, as we know from Mersenne (1636) and Diderot's 'Encyclopédie' (1751-72). In 1810 George Miller of London produced a metal flute — a boon to regiments serving in equatorial climes. He also patented a conical-bore fife (flute) at the same time, and this latter came into fairly general use with drum and fife bands (*cf.* Welch, *op. cit.*, p. 238).

The instrument continued to be keyless, save here and there (*e.g.* in the Royal Artillery, which was not controlled by the War Office), until after the Crimean War when, in the general overhaul of military music, the keyed flutes were introduced. In Mar. 1858 the War Office ruled that drums and fifes of infantry regiments (except light infantry and rifles which had bugle bands) were to comprise in each battalion 8 B♭ flutes, 2 F flutes, 1 F piccolo, 1 E♭ piccolo and 12 drums, and this instrumentation has continued to be the norm down to the present day. In 1912 the drums and fifes of the Irish Guards comprised 10 B♭ flutes (6 firsts and 4 seconds), 6 F flutes, 2 piccolos (F and E♭), 1 triangle, 1 pair cymbals, 1 tenor drum, 8 side drums, 1 bass drum: total 30. Nowadays the bass flute in B♭ has a place in most bands of 24 or over.

It is not in the services alone that the drums and fifes are favoured. They are extremely popular in civil life, more so in Eire, with Scotland coming second. A good idea of the combination of modern bands of this sort may be obtained from Henry Potter's 'Band Guide':

Instruments	Performers		
E♭ or F piccolo	—	1	1
1st B♭ flutes	5	6	10
2nd B♭ flutes	2	2	5
3rd B♭ flutes	1	2	3
F flutes	3	3	5
E♭ flutes	—	1	3
B♭ bass flutes	—	1	2
Side drums	4	4	8
Tenor drums	—	1	2
Bass drum	1	1	1
Triangle	—	1	1
Cymbals	—	1	1
	16	24	42

Some of the writers on music of the 19th century were quite contemptuous of the military fife. Hugo Riemann, for example, said (1888) that "it is only in English military music that such old-fashioned methods of tuning are to be met with". How different was the outlook of Berlioz, who thought that the military flutes in F (E♭) and E♭ (D♭) could be "very serviceable in ordinary orchestras" and praised the former for "its more crystalline quality of tone". H. G. F.

**DRUMSLADE** (Eng., obs., also "dromslade"). A drum-beat. The word is probably a corruption of the German *Trommelschlag*. By a false application it was also used for a drum in the 17th century and for a drummer in the 18th.

**Drum, M.** See Barraine ('Mégaree', incid. m.)

**DRURY LANE THEATRE.** One of the historical theatres in London, long, though intermittently, associated with opera and other forms of stage music, and from the first one of the royal theatres. The present building, which only backs on to Drury Lane and has its front in Catherine Street, W.C.2, is the fourth on the site. The first theatre there<sup>1</sup> was built in 1663, by the "King's Company". It was burnt down in 1672, and the second theatre, built by Wren, was opened in 1696, with Colley Cibber as manager. Garrick became manager in 1747. This house was materially altered and enlarged in 1762-63, but pulled down in the summer in 1791. The third house was opened (for plays) on 21 Apr.

<sup>1</sup> There had been another theatre elsewhere in Drury Lane, the Phoenix, since 1616, but this had disappeared before the Theatre Royal was opened, having been suppressed during the Commonwealth.

1794 and burnt down on 24 Feb. 1809. The fourth building, still standing, but with the auditorium modernized in the 1920s<sup>1</sup>, was opened on 10 Oct. 1812.<sup>2</sup>

Among the eminent composers who were connected with this theatre must be mentioned, in the first place, T. A. Arne, who from the year 1738, when he wrote the music to Milton's 'Comus', until shortly before his death in 1778, produced a large number of operas and operettas there. In 1806 one of Bishop's first works, a pantomime-ballet called 'Caractacus', was brought out at Drury Lane. But Bishop, after the burning of the theatre in 1809, accepted an engagement at Covent Garden, where most of his operas and musical dramas were performed. Meanwhile foreign operas, as arranged or disarranged for the English stage by Rophino Lacy, Tom Cooke and others, were from time to time performed at Drury Lane; and in 1833, under the direction of Alfred Bunn, some English versions of Italian operas were produced with Malibran in the principal parts. Drury Lane was the last theatre at which she sang.

A few years later Bunn made a praiseworthy but not permanently successful attempt to establish English opera at this theatre. During this period Balfe's 'Bohemian Girl', 'Daughter of St. Mark', 'Enchantress', 'Bondman', etc., Wallace's 'Maritana' and 'Matilda of Hungary', Benedict's 'Crusaders' and 'Brides of Venice', were brought out at Drury Lane, for which they had all been specially written.

When Her Majesty's Theatre was burnt down (6 Dec. 1867), Mapleson took Drury Lane for a series of summer seasons. In 1870 the performances took place under the management of George Wood (of the firm of Cramer, Wood & Co.), who among other new works produced Wagner's 'Flying Dutchman'—the first of Wagner's operas performed in England. Until 1877 "Her Majesty's Opera", as the establishment transferred from Her Majesty's Theatre was called, remained at Drury Lane. In 1877, however, Mapleson returned to the Haymarket; and Drury Lane was not used for serious operas until the German season of 1882 under Richter, when 'Tristan und Isolde' and 'Die Meistersinger' were given for the first time in London. In the spring of 1883 Carl Rosa took Drury Lane and brought out Thomas's 'Esmeralda' and Mackenzie's 'Colomba'. Stanford's 'Canterbury Pilgrims' was given in 1884 and Goring Thomas's 'Nadeshda' in 1885. The successful career of Sir Augustus Harris as an

operatic manager began at Drury Lane, when in 1887 he introduced the brothers de Reszke and other notable singers to London audiences. After that single season he made Covent Garden the centre of his operations; but in 1892-93 Drury Lane was used for extra performances of German opera.

A regular German season was given at the same theatre in 1895, when the Ducal Company of Saxe-Coburg and Gotha gave a series of performances of comic operas of a more or less high class. Smetana's 'Bartered Bride' was the most important of the operas new to London, though it was introduced as if it were a German work.

In the spring of 1896 a series of performances of stock operas in English was given at Drury Lane before the beginning of the regular season at Covent Garden. In 1904 the Moody-Manners Company gave a series of operas in English at Drury Lane. Most important were the two seasons (1913-14) in which Sir Joseph Beecham introduced Russian opera with Shaliapin at its head, giving at Drury Lane the first performance in England of Mussorgsky's 'Boris Godunov' and other works.

During the war of 1914-18 Sir Thomas Beecham gave a notable series of opera in English, giving model performances of a number of masterpieces, including a lavish and exquisite production of Mozart's 'Figaro'.

By this time, however, the theatre had long been given over mainly to the performance of Christmas pantomimes and spectacular melodramas, to the production of which its enormous stage and elaborate machinery was specially adapted, and it has now succumbed to a change of fashion in entertainment of a popular order by indulging in long runs of expensively produced musical comedies and similar shows, usually American, and is thus lost alike to the serious arts of drama and of music.

**DRYSDALE, (G. J.) Learmont** (*b.* Edinburgh, 3 Oct. 1866; *d.* Edinburgh, 18 June 1909).

Scottish composer. He was educated at the Edinburgh Royal High School (1878-82) and then studied architecture, a career he abandoned for music. He had been organist at Greenside Parish Church and had given recitals at the Edinburgh International Exhibition (1886), but in 1887 he accepted the post of sub-organist at All Saints' Church, Kensington, London, and became a student at the R.A.M. (1888-92), where he studied under Frederic Corder (composition) and Kuhe (pianoforte), securing the Lucas Prize in 1890. His first important composition was a ballade for orchestra 'The Spirit of the Glen' (1889), which was played at St. James's Hall. The next year he submitted his prelude, 'Thomas the Rhymer' (1890), also performed at St. James's Hall. This was followed by an 'Overture to a Comedy', written in four days, now known as 'Through the Sound of Raasay', revived at Glasgow by Sir Ernest Bullock in 1946. In 1890 Drysdale won the Glasgow Society of Musicians Prize with his now popular overture 'Tam o' Shanter', which Manns conducted at Glasgow and at the Crystal Palace in 1891. It was this work that won the composer his first important public recognition although, strange to say, his native city did not hear it until 1894, when it was given by Henschel and the Scottish Orchestra. Then followed, in quick succession, a brave setting of Burns's 'Ode to Edinburgh' (1890) as yet unperformed, a fine dramatic cantata 'The Kelpie' (partly composed 1891), a dramatic scena for soprano and orchestra 'The Lay of Thora' (1892, the libretto by Granville Bantock) and the overture 'Herondean' (1893). The second of these had been partly performed in 1891, but the complete work was given by Kirkhope's Choir and the Scottish Orchestra at Edinburgh in 1894. The fourth had its initial hearing at a Stock Exchange Orchestral Society (London) concert in 1894, and was played later by Cowen and the Scottish Orchestra in 1900. A work of unique character and profound handling was 'The Plague', a one-act mystical play in which the spoken words and music synchronized. It was given by Forbes Robertson at Edinburgh in 1896. Two years later came the production of the light opera 'Red Spider' (1898), the librettist of which was the Rev. Sabine Baring-Gould. It had a fairly long provincial run. In 1904 Henry J. Wood introduced the 'Border Romance' for orchestra at the Queen's Hall, and later (1905) Cowen repeated it with the Scottish Orchestra. This was one of the items chosen by Wood to represent Scotland at the Festival of Empire Concerts at the Crystal Palace in 1911. In

1904 Drysdale was appointed Professor of Theory at the Glasgow Athenaeum School of Music, but as this position gave him little leisure for composing he resigned the following year. Meantime he had written a fine and impressive work, a ballad for chorus and orchestra, 'Tamlane', which was performed by the Clydebank Choral Society in 1905, but on a much grander scale by T. H. Collinson and the Edinburgh Royal Choral Society in 1913. Drysdale's last important composition was an opera 'Fionn and Tera' (libretto by the Duke of Argyll), but owing to the composer's early death it was left practically unscored, and its orchestration was completed by David Stephen. In 1912 Oscar Hammerstein placed this opera on his prospectus for the London Opera House. Unfortunately the failure of the impresario's first season led to the abandonment of his plans, and the work was shelved. A cairn to Drysdale's memory was unveiled by Sir Dan Godfrey on the Damhead Hill between Yarrow and Traquair (1937), which is the land of his ancestors. Godfrey, as conductor of the Bournemouth Orchestra, had done much to make his work known and appreciated in England.

Drysdale's music is far more Scottish idiomatically than that of Mackenzie or MacCunn, although every theme is delightfully original. He wrote the most exquisite haunting melodies, and his mastery of instrumental effect was evident from his earliest days. All his major works mentioned above deserve recognition to-day, although unfortunately only three have been published, 'Tam o' Shanter', 'The Kelpie' and 'Tamlane'. The first has almost a permanency in the Scottish repertoires. The two others were revived at Dunfermline (1939) and Edinburgh (1913) respectively, and they have been given a hearing in quite recent years in places so far apart as Brisbane and Moscow. Almost every composition by Drysdale, printed or manuscript, is to be found in the Drysdale Collection in Glasgow University Library, while smaller collections are available in the National Library of Scotland, Edinburgh Public Library and the Mitchell Library at Glasgow.

The following is a list of representative works published or otherwise available for performance:

#### STAGE WORKS

- 'Fionn and Tera' (opera, 2 acts).
- 'Red Spider' (romantic light opera, 3 acts).
- 'The Plague' (mystical musical play, 1 act).
- 'Hippolytus' (Gilbert Murray's translation from Euripides, 2 acts).

#### CANTATAS

- 'The Kelpie' (solo voices, chorus & orch.).
- 'Tamlane' (chorus & orch.).
- 'Ode to Edinburgh' (Burns) (baritone solo, chorus & orch.).
- 'The Lay of Thora' (soprano & orch.).

- \* 'The Scottish Tribute to France' (chorus).  
 \* 'The Proud Damozel' (chorus)  
 \* Barbara Allen' (chorus).

## ORCHESTRAL

- \* 'The Spirit of the Glen.' Ballad.  
 \* Thomas the Rhymer' Prelude  
 \* Tam o' Shanter.' Concert overture.  
 Overture to a Comedy ('Through the Sound of  
 Raasay').  
 \* Heronadean. Concert overture  
 \* Border Romance' Tone-poem.  
 Three Old Dances (also pf. solo)  
 Graceful Dance (also pf. solo)  
 Franco-Scottish March (arr. military band by W  
 Short)  
 Many pf. pieces, partsongs, solo songs and arrange-  
 ments of Scottish and English songs.

**DRZEWIECKI, Zbigniew** (b. Warsaw,  
 8 Apr. 1890).

Polish pianist and teacher. He completed his general education in Warsaw in 1909. Simultaneously he studied music with Becker, Konopasek and Oberfeldt. During the years 1909-14 he attended the Academy of Music in Vienna, specializing in pianoforte playing. His teachers there were Prohaska, de Conne, Aronson, Janoch and Mary Prentner. In 1916 he started his pianistic career with a pianoforte recital given in the Warsaw Filharmonia. The same year he also began his pedagogic career at the Warsaw Conservatory. He not only introduced to Polish audiences contemporary works by native and foreign composers, but has worked all his life for the recognition of works by the younger generation of Polish composers.

Drzewiecki is now (1951) rector of the State High School of Music at Cracow. Some of his pupils have won many prizes at international contests and have become concert pianists of a high standard. They include, to mention only a few, Bolesław Kon, Jan Ekier, A. Kagan and Halina Czerny-Stefańska, the first prize-winner at the 4th Chopin International Competition in Warsaw in 1949.

For many years he acted as chairman of the Polish section of the I.S.C.M. and took part in many international competitions either as chairman or as a member of the jury. He is permanent member of the editorial committee of the Polskie Wydawnictwo Muzyczne (Polish Music-Publishing Society). He was awarded many of the highest distinctions of the Polish State and is recognized as one of the greatest authorities on music in Poland.

C. R. H.  
**Drda, Jemś.** See Farkas (F., 'Fountain of St. John', cantata).

**DUB** (Instrument). See BABYLONIAN MUSIC.

**DUB.** An obsolete word for a beat or tap on a drum, also the sound of a drum in general. It is clearly onomatopoeic in this sense, but in another it became an alternative word for the labor.

**Du Bellay, Joachim.** See François (epigram for chorus & sigs) Lutyens (song with chamber m.)

**DÜBEN.** Swedish family of musicians of German and probably, more remotely, Bohemian origin. They are thought to be descended from Václav de Duba. The first member of the family of whom any record exists is

(1) **Michael Düben** (b. ?, c. 1536; d. Lutzen, c. 1600). He lived at Lutzen, first as a musician, "Ludi moderator", and then as an alderman.

(2) **Andreas Düben** (b. Lutzen, 27 May 1558; d. Leipzig, 19 Apr. 1625), son of the preceding. He was cantor at St Thomas's, Leipzig, from 1595

(3) **Andreas Düben (the elder)** (b. Leipzig, c. 1590; d. Stockholm, 1662), son of the preceding. He was a pupil of Sweelinck in Amsterdam from 1614 to 1620 and in 1621 went to Stockholm, where he became organist of the German church in 1625 and *hofkapellmästare* in 1640. Twenty dances for viols in a codex in the Uppsala Library are by him

(4) **Gustaf Düben (the elder)** (b. Stockholm, 1624; d. Stockholm, 19 Dec. 1690), son of the preceding. He was a member of the court chapel in 1647, and organist of the German church and *hofkapellmästare* in 1663. The most important composer of the family, he wrote church music, *concerti grossi* and symphonies for viols, also music for violins, etc. The great collection of sacred and secular 17th-century compositions in the Uppsala Library was made by Gustaf the elder, as also a manuscript collection of 220 dances for 4-6 viols, including some of his own.

(5) **Gustaf Düben (the younger)** (b. Stockholm, 6 Aug. 1659; d. Stockholm, 5 Dec. 1726), son of the preceding. He succeeded his father as *hofkapellmästare* in 1690, was raised to the rank of nobility in 1698 and became successively a court intendant, chamberlain (1712) and a Baron (1718). Of his compositions only an aria with instruments is known.

(6) **Andreas Düben (the younger)** (b. Stockholm, 28 Aug. 1673; d. Stockholm, 23 Aug. 1738), brother of the preceding. He was *hofkapellmästare* from 1701 to 1726. He also received the title of Baron and died as chamberlain. A ballet, arias, songs, minuets, etc. in the Uppsala Library are attributed to him.

(7) **Carl Gustaf Düben** (b. Stockholm, 1700; d. Stockholm, 1758), nephew of the preceding, son of (5). He was director of the court orchestra from 1741 until his death.

(8) **Karl Vilhelm Düben** (b. Stockholm, 2 Feb. 1724; d. Stockholm, 29 Dec. 1790),

cousin of the preceding, son of Joachim Duben (1676–1730), conductor of the court orchestra, member of the Academy of Music and its President in 1772–73, and grandson of Gustav (the elder) (4). He was appointed envoy to the Russian court in 1763 and held high office in the Treasury in 1769. K D.

**DUBISKA, Irena** (b. Inowrocław, 1899).

Polish violinist. She studied at the Warsaw Conservatory, which she left with a diploma and gold medal. She continued her studies with Huberman and Flesch. For many years she toured in the European countries, establishing her position in the musical world. She also ardently championed Szymanowski's works. Later she pursued a pedagogic career, and she has been teaching the violin and editing works for it. Since the second world war she has been domiciled in Warsaw, teaching at the State High Music School there. She must be credited with great achievements in the field of Polish chamber music. C. R. H.

**DUBLIN.** The capital of Éire possesses two Church of Ireland cathedrals, one Catholic pro-cathedral, five large theatres, numerous halls used for miscellaneous purposes, but no concert-hall suitable for the performance of choral and orchestral works. So long ago as Apr. 1742, at the first performance of Handel's 'Messiah' for the benefit of Mercer's Hospital, the ladies were requested "not to wear their hoops", so that there might be more accommodation, and even with this concession the New Music Hall in Fishamble Street (now occupied by Kennan's iron works) accommodated only 700. The present position (1953) is that concerts on a large scale are held in the Theatre Royal on Saturday afternoon or in the Gaiety Theatre on Sunday night. But on the initiative of The Music Association of Ireland a public company has now (1953) been floated to raise funds for the erection of a concert-hall.

**HISTORY**—In the 18th century Dublin's reputation as a musical centre was such that both Handel and T. A. Arne conducted performances of their works there and violinists such as Geminiani and Dubourg made Dublin their home. In the latter part of the century the city could boast ten music shops, some of them firms of music publishers, eight harpsi-

chord and pianoforte manufacturers, three firms of instrument makers and two firms of organ builders. Patronage of music by the Anglo-Irish nobility was at its zenith and led to a certain amount of creative activity, the chief composers being Dr. Philip Cogan, Lord Mornington—who was appointed to the newly created Chair of Music in Dublin University in 1764—and John Stevenson, who composed music for O'Keeffe's farces and other music for the Irish stage between 1781 and 1801, and was later to provide the accompaniments for Thomas Moore's 'Irish Melodies'.

With the passing of the Act of Union in 1800, however, and the abolition of the Irish Parliament, Dublin lost much of its significance as a political and social centre, and the patronage of music declined. In the 19th century the Irish capital offered so little to the professional musician that the more eminent talents which the country produced, such as Field, Balfe and Wallace, lived and worked abroad. But amateur music-making increased, owing chiefly to the efforts of the Robinson family. The Sons of Handel, a choral society, was formed by Francis Robinson in 1810, and his son Joseph founded the Antient Concerts Society (1834–63) which built the Antient Concert Rooms (now a cinema) in Great Brunswick Street for its performances. Visiting celebrities made their appearance from time to time—for instance Paganini played at a Music Festival held at the Theatre Royal in 1831, the conductors for the Festival being Sir George Smart and Ferdinand Ries. Beethoven's choral Symphony was first performed in 1856 at a concert of the Philharmonic Society (1826–66), and both Joachim and Rubinstein made their first appearances in Dublin at concerts of this Society. In 1876 Joseph Robinson founded the Dublin Musical Society, which performed the current choral and orchestral repertory with a choir and orchestra of about 350 in the Concert Hall at Earlsfort Terrace (built for the Exhibition of 1865 and now incorporated in the buildings of University College, Dublin). Composers included Dr. John Smith, Master of the King's Band of State Musicians in Ireland and Composer to the Chapel Royal, who wrote chiefly church music, and John Glover, who wrote three operas, one of them based on Goldsmith's 'The Deserted Village'.

Towards the end of the century the chief figures in the musical life of Dublin were Sir Robert Prescott Stewart, a prolific composer of organ and church music, and Michele Esposito, an Italian who was appointed professor of the pianoforte at the Royal Irish Academy of Music in 1882. Esposito attempted to provide a permanent orchestra for the city by founding the Dublin Orchestral

Society by public subscription in 1899, and with an orchestra of 70 players he continued to conduct the Society's concerts and also gave a series of Sunday concerts in the Antient Concert Rooms with a smaller orchestra, until the outbreak of war in 1914. Among other pre-war societies may be mentioned the Dublin Oratorio Society (1906-14) under Vincent O'Brien, which performed Elgar's 'Dream of Gerontius' in 1909, and the Orpheus Choral Society, founded in 1899 by Dr. James Culwick, organist of the Chapel Royal. In the years between the wars orchestral concerts were given for the Royal Dublin Society by Dr. John F. Larchet, then Music Director at the Abbey Theatre. In 1927 an attempt was made to revive the Dublin Orchestral Society under the joint conductorship of Esposito and Larchet, but the Society did not survive, and in the same year the Dublin Philharmonic Society was founded by Col. Fritz Brase, a dynamic personality, who had come to Dublin in 1923 as Director of the newly established Army School of Music. This Society made its début with a performance of Beethoven's choral Symphony to mark the centenary of the composer's death, and continued to give a series of concerts each season with an orchestra of some 75 players, the wind being recruited from the Army School of Music. Choral performances were also given under Turner Huggard until the cessation of the Society in 1936.

**CHORAL MUSIC.**—Of existing bodies the earliest is the Hibernian Catch Club, founded in 1679-80 by the vicars-choral of St. Patrick's and Christ Church Cathedrals. It claims to be the oldest surviving musical society in Europe. Monthly dinners are held from Dec. till May, to which members may invite guests and at which the vicars-choral or their substitutes provide the music. The existing records of the club date from 1770, when lay members were first admitted. Sir John Stevenson (who wrote the Charter Glee which is sung at each meeting) was knighted on the occasion of the visit of the Lord Lieutenant, Lord Hardwicke, to the Club in May 1803. Since 1922 Prof. G. H. P. Hewson has presided over Club meetings.

The University of Dublin Choral Society was founded in 1837, with Joseph Robinson as its first conductor. Originally only choristers of the cathedrals could be employed for the treble parts, and where boys' voices were inadequate the concerts had to be given outside the College walls. But in 1870 permission was granted to admit ladies as associates. Since 1903 an amateur orchestra has taken part in the performances of the Society. Three concerts are given during the session in the Examination Hall of the College, the present conductor being Joseph Grocock. The corre-

sponding University Society, the Music Society of University College, Dublin, was founded in 1917, and since it was taken over in 1936 by its present conductor, Dr. J. F. Larchet, a choral and orchestral concert has been held in the first term and an opera produced in the second term of each session.

Of the large choirs which give regular performances in Dublin the earliest is the Culwick Choral Society, a direct descendant of the Orpheus Choral Society referred to above, which for a generation devoted itself to the production of oratorio and other major choral works, but has latterly concentrated on a *cappella* singing. Of more recent origin is Our Lady's Choral Society, formed in 1946 from the combined Catholic church choirs of the archdiocese of Dublin, the first Irish choir to give performances in Paris and in Rome. For the Newman Centenary held in Dublin in 1952 Our Lady's Choral Society combined with the Hallé Orchestra under Sir John Barbirolli in a performance of 'The Dream of Gerontius', and in 1953, for the first Tóstal Festival, the choir, the Hallé Orchestra and Sir John Barbirolli went on tour to give performances of 'Messiah' at Cork, Limerick, Waterford and Dublin. Another choir of recent origin is that of the Thirteens Musical Society (1951), conducted by Michael O'Higgins, which has produced Mozart operas in Dublin and specializes in rare early and modern choral music.

A professional choir of 24 voices, the Cór Radio Éireann, was formed in 1943 to give regular broadcasts of choral music from Radio Éireann. In 1953 this choir was reconstituted as a full-time choir of ten singers working under a permanent conductor. The Radio Éireann Choral Society, formed in 1952 under Dr. Hans Waldemar Rosen, gives performances of choral works in conjunction with the Radio Éireann Symphony Orchestra.

**ORCHESTRAL AND CHAMBER MUSIC.**—From small beginnings, as a Station chamber ensemble in 1926, the Radio Éireann Symphony Orchestra expanded gradually during the 1930s and from 1941 to 1947 gave fortnightly public concerts each season, at first in the Mansion House and later in the Gaiety Theatre, under its then permanent conductor, Capt. Michael Bowles. On his resignation in 1948 public concerts were discontinued, but the orchestra was brought up to its present strength of 63 players and a series of guest conductors from abroad, including such conductors as Jean Martinon and Hans Schmidt-Isserstedt, appointed to direct the orchestra for a short period each. Since 1948 two orchestral concerts have been relayed each week from the Phoenix Hall, which has a seating-capacity of about 400, the public being admitted free of charge on application for

tickets of admission. Strengthened in recent years by the importation of a number of foreign players, the orchestra's standard of performance is now comparable to that of the best of the smaller English professional orchestras, and the enterprising programmes given include much contemporary music and occasional performances of new works by Irish composers. A permanent conductor and an assistant conductor are due to be appointed in the season 1953-54.

A second professional orchestra, the Radio Éireann Light Orchestra consisting of 23 players, gives studio and public performances of light music under its permanent conductor, Dermont O'Hara. The chief amateur orchestra is that of the Dublin Orchestral Players, conducted by Brian Boydell, which features a new work by an Irish composer at each of the four concerts it gives in the season.

Public support for chamber music is meagre, and the few active ensembles consist of members of the Radio Éireann Symphony Orchestra. Since 1886 an annual series of chamber-music recitals has been provided by the Royal Dublin Society. They are held on Monday afternoons and evenings during the season and are given by outstanding English and continental chamber groups and solo performers.

**OPERA.**—The foremost organization for the production of opera is the Dublin Grand Opera Society, which since 1941 has given two seasons of opera annually at the Gaiety Theatre and, as a rule, one in the provinces. The permanent Musical Director is Lt.-Col. James Doyle, Director of the Army School of Music. While the orchestra and chorus are local (the orchestra consists mainly of members of the Radio Éireann Symphony Orchestra) and local principals frequently appear, in recent years the Society has brought over complete casts from continental opera organizations. Thus in 1948 Debussy's '*Pelléas et Mélisande*' was given with a cast from the Paris Opéra-Comique under Roger Desormière, in 1950 '*Don Giovanni*' and other operas were given with a cast from the Hamburg State Opera, and in 1953 '*Tristan*' was produced with principals from the Munich State Opera.

**COMPETITIVE FESTIVALS.**—The chief music festival is the Feis Ceoil founded in 1897.<sup>1</sup> The Oireachtas, also founded in 1897 and held annually in the autumn, is a Gaelic festival of literature, music, drama and fine art, which includes competitions in the arranging of Irish folksong and the performance of traditional music. Other important festivals are the Father Mathew Feis, founded in 1908, and the Feis Atha Cliath, founded in 1904 for the promotion of Irish music and dancing.

<sup>1</sup> See FEIS CEOL.

**CHURCH MUSIC.**—Christ Church Cathedral and St. Patrick's Cathedral have a long and distinguished musical tradition, dating back to the early medieval period. Two noted madrigal writers of the English school were organists of Christ Church, namely John Farmer (1596-99) and Thomas Bateson (1608-30). At intervals from 1631 on Christ Church and St. Patrick's shared the services of the one organist, the morning service at Christ Church and the evening service at St. Patrick's being elaborate services at which the organist and principal members of each choir assisted, while the evening service at Christ Church and the morning service at St. Patrick's were simpler, so that only the assistant organist and a small choir took part. Sir Robert Stewart was the last organist to hold both positions. The present organist of St. Patrick's is Dr. G. H. P. Hewson who, like many of his predecessors, combines with this post that of the Chair of Music at Trinity College and the organist's post at the College Chapel.

The choir of the Catholic pro-Cathedral, Marlborough Street, formed in 1902 and consisting of at least eight men and twenty boys, owes its existence to the munificence of Edward Martyn of Tulyra Castle, Co. Galway, patron of literature and of ecclesiastical art. The deed of gift states: "The music to be sung shall be Gregorian and that of Palestrina or in the Palestrina style". No music composed later than the end of the 17th century may be sung unless it has been sanctioned by the Supreme Liturgical Authority of the Catholic Church. Vincent O'Brien, choirmaster of the Palestrina Choir since its inception, played a leading part in the musical life of Dublin until his death in 1946, when he was succeeded as organist of the Pro-Cathedral by his son, Oliver O'Brien.

**BROADCASTING.**—Since the inception of the Irish broadcasting service in 1926 the number of wireless licence-holders has increased from 10,000 at the end of the first year to 400,000 in 1953. Programmes are relayed on the Athlone, Dublin and Cork wavelengths for a total of 41½ hours of ordinary and 14½ hours of sponsored programmes per week. In the absence of a special building for broadcasting the main studios are incorporated in the top storey of the G.P.O., but programmes involving large forces are relayed from the Phoenix Hall or from the Light Orchestra's Studio at Portobello. The music staff consists of a Music Director, two assistant Music Directors, a conductor and assistant conductor of the Symphony Orchestra, a conductor of the Light Orchestra, a conductor of Cór Radio Éireann, an assistant for vocal programmes, an accompanist, three balance and control officers, a gramophone librarian and

an orchestral manager. The following Music Directors have held office: Dr. Vincent O'Brien (appointed 1926), Capt. Michael Bowles (1941), Fachtna Ó hAnnracháin (1947). Permanent units of the service are the Radio Éireann Symphony Orchestra, the Radio Éireann Light Orchestra and the Cór Radio Éireann.

**SCHOOLS OF MUSIC**—Degrees in Music are conferred by the University of Dublin (Trinity College, Dublin) and the National University of Ireland (University College, Dublin). The first graduate in music of Trinity College was probably Thomas Bateson in 1612, but no chair of music was created until Lord Mornington's appointment in 1764. The chair was vacant from 1774 to 1845, since which year it has been occupied successively by Dr. John Smith, Sir Robert Stewart, Dr. Ebenezer Prout, Dr. Percy C. Buck, Dr. Charles H. Kitson and Dr. G. H. Hewson. Candidates for degrees in music may sit for the examination without attending lectures in the College.

A Chair of Music was created at University College, Dublin, in 1913, since when three professors have held office: Rev. H. Bewerunge, Dr. Charles H. Kitson and Dr. John F. Larchet. The Dublin Corporation Professorship of Irish Music was held from 1914 to 1939 by Robert O'Dwyer. This chair has since been vacant, but a Department of Irish Folk Music was created in 1951, with Dr. Donal O'Sullivan as Director of Studies.<sup>2</sup>

Two state-endowed and two private schools of music provide courses in practical musicianship, the chief being the Royal Irish Academy of Music. This was founded in 1848, and in 1870 it was voted an annual grant of £150 by the Gladstone government, the grant being increased to £300 on condition that £100 should be contributed annually by private subscribers. This grant has been continued by successive Irish governments. The title "Royal" was granted in 1872. The Academy is governed by a board of twenty-four governors, consisting chiefly of nominees of the subscribers and of Dublin Corporation. There is no director, orders being carried out by a secretary under the direction of the board of governors. Local centre examinations are held in Dublin and some 215 centres throughout the country, and over 10,000 candidates are examined annually. Three diplomas are granted, namely the F.R.I.A.M. (*honoris causa* only), A.R.I.A.M. (Teacher's Diploma) and L.R.I.A.M. (Performer's Diploma). The Montague Reference Library was opened in 1939, and in 1945 the "Band Room" was converted into a concert-hall with a seating-capacity of 300. A Students' Musical Union has been active since 1906. Among the chief

names associated with the history of the Academy are those of Joseph Robinson, Sir Robert Stewart, Michael Esposito, Sir Hamilton Harty and Dr. J. F. Larchet.

The Dublin Municipal School of Music, founded in 1890 to make provision for the musical instruction of the working classes, has gradually expanded its scope, and with an enrolment of 1400 students the lack of accommodation in the present building is such that only a proportion of the applications for tuition each year can be accepted. The school grants an Advanced Teacher's Diploma (Dip. D.S.M.), is managed by a director and assistant director, and is under the control of the City of Dublin Vocational Education Committee.

The two private schools of music are the Leinster School of Music, founded in 1904, which holds local centre examinations in 131 centres in Dublin and the provinces, and grants the Diploma of Dip. L.S.M. (Teacher's and Performer's Diploma); and the Read School of Pianoforte Playing, founded in 1915.

The Army School of Music at Portobello Barracks, established in 1923, trains the officer bandmasters and bandmen for the Irish Army. The staff consists of a director, an assistant director and an instructional officer. Four bands are maintained, No. 1 Band being stationed in Dublin and the other three in the provinces. Since 1923 the successive directors have been Col. Fritz Brase, Col. F. C. Sauerzweig and Lt.-Col. J. M. Doyle.

**DEPARTMENT OF EDUCATION.**—Music is a compulsory subject in the primary schools, and the music staff of the Department of Education's primary branch consists of a head Organizing Inspector and four Organizing Inspectors of Musical Instruction. Though music has been an optional subject in secondary school examinations since 1879, an Inspector of Music for the Department's secondary branch was appointed only in 1948. Since 1946 the Department has organized a Summer School of Music in Dublin for part of July and part of Aug. each year, to which students from all over the country are admitted free of charge. The courses, given chiefly by English experts, include composition, choir-training, conducting, pianoforte and violin playing, singing and Irish traditional music.

**MUSIC COLLECTIONS.**—The chief music collections are those of the library of Trinity College, which includes the Prout Collection, and of the National Library, which includes the Joly Gift and the Plunkett Collection. Manuscript collections of Irish folk music are to be found in the libraries of the Royal Irish Academy and Trinity College, in the National Library and in the National Museum, which

<sup>2</sup> For details of the degrees of Trinity College and University College, Dublin, see *DEGREES IN MUSIC*.

also houses a noteworthy collection of harps, bagpipes and Dublin-made harpsichords and pianofortes. Manuscript and ediphone recordings of some 3000 folksongs have been made by the Irish Folklore Commission, which now possesses one of the finest collections of folklore in the world.

**ORGANIZATIONS.**—The Irish Musical Fund, a charitable fund founded in 1787 and incorporated by an Act of the Irish Parliament in 1794, is administered for the benefit of twenty professional musicians, mainly orchestral players, who are elected to membership of the fund for life. Apart from the Irish Federation of Musicians (1936), which is a trade union, and the Leinster Society of Organists and Choirmasters (1919), no organization representative of the teaching side of the profession exists in Dublin, though a Music Teachers' Association is active at Cork and negotiations are in progress (1953) for the founding of a national Music Teachers' Association. The Music Association of Ireland (1949), a non-professional organization, has promoted schemes for the encouragement of Irish composers, organized concerts and lectures, and made recommendations to the authorities concerned in matters of official musical policy.

An Arts Council was set up by the Government in 1951 for the promotion of the Arts in Ireland. Recommendations made by its Music Panel, and already put into effect, include the granting of a number of scholarships in music, the holding of a network of recitals in Irish schools and the giving of guarantees against loss in respect of enterprising performances held in Dublin and throughout the country.

**DUBOIS, Alfred** (b. Brussels, 17 Nov. 1898; d. Brussels, 24 Mar. 1949).

Belgian violinist. He studied at the Brussels Conservatoire under Alexandre Cornelis and Eugène Ysaye. In 1920 he obtained the Prix Vieuxtemps and the Prix de S.M. la Reine Élisabeth. In 1927 he embarked on his international career by appearing with the Stockholm Philharmonic Orchestra and at the Colonne concerts in Paris. The same year he became the violinist in the Trio de la Cour de Belgique, with which he made a European tour, playing in England, Spain, Italy, Switzerland, Germany, etc. In 1938–39 he was in the U.S.A., where he played as soloist and with the pianist Marcel Maas in New York, Washington, Boston and New Haven.

Dubois was appointed violin professor at the Brussels Conservatoire in 1927 in succession to Ysaye. Among his pupils may be mentioned Arthur Grumiaux (his successor at the Conservatoire), Noël Brunet, violin professor at

the Montreal Conservatory, and Jean Laurent, who holds a similar post at Antwerp

A. L. C.

**DU BOIS, Léon** (b. Brussels, 9 Jan 1859, d. Boitsfort, 19 Nov. 1935).

Belgian conductor and composer. He studied at the Brussels Conservatoire, among his masters being F. Kufferath for counterpoint and Gevaert for composition. In 1885 he gained the Belgian Prix de Rome. He was conductor at the theatres of Nantes (1889–90) and Liège (1891–92), and from 1892 to 1897 at the Théâtre de la Monnaie in Brussels. In 1899–1912 he was director of the Music School of Louvain and in 1912–26 of the Brussels Conservatoire. He wrote a treatise on harmony and among his compositions are the following:

- 'Son Excellence ma femme', opera (1884)
- 'La Revanche de Sganarelle', opera (1890)
- 'Smylis', ballet (1891)
- 'Le Mort', mumed drama (1894)
- 'Edénie', opera (1912)
- 'Vers la gloire', dramatic ode (1919)
- 'L'Aveugle-né', oratorio (1922)
- 'Atala', symphonic poem

Songs.

E. B.

**DUBOIS, (François Clément) Théodore** (b. Rosnay, Marne, 24 Aug. 1837, d. Paris, 11 June 1924).

French organist, teacher and composer. He went to Paris at an early age and entered upon a brilliant course of study at the Conservatoire, where he gained successively first prizes for harmony, fugue and organ, and finally, in 1861, under Ambroise Thomas, the Prix de Rome. On his return from Italy in 1866 he devoted himself to teaching and was appointed *maître de chapelle* of Sainte-Clotilde, where on Good Friday 1867 he produced an important and carefully written work, 'Les Sept Paroles du Christ', afterwards performed at the Concerts Populaires in 1870.

For some time he was *maître de chapelle* at the Madeleine, where he succeeded Saint-Saëns as organist in 1877. He succeeded Elwart as professor of harmony at the Conservatoire in 1871, and in 1883 was decorated by the Legion of Honour. In 1894 he was elected to the Institut in place of Gounod, and he was head of the Conservatoire from 1896 to 1905. His treatise on fugue, his 'Notes et études d'harmonie' and his 'Leçons de solfège' were well known to students.

Being unable at first to force an entrance into the great musical theatres, Dubois contented himself with producing, at the Théâtre de l'Athénée, a pleasing little work, 'La Guzla de l'Émir' set to the libretto previously used by Bizet, on 30 Apr. 1873. In 1878 he carried off, together with B. Godard, the prize at the Concours Musical instituted by the city of Paris, and his 'Paradis perdu' was performed, first at the public expense (27 Nov 1878) and again on the two following Sundays at the Concerts du Châtelet. His other works for the

stage are 'Le Pain bis' (Opéra-Comique, 26 Feb. 1879); 'La Farandole', ballet (Opéra, 14 Dec. 1883); 'Aben-Hamet', a grand opera (Théâtre du Châtelet, 16 Dec. 1884, in Italian); and 'Xavière', dramatic idyll in three acts (Opéra-Comique, 26 Nov. 1895).

Among Dubois's many concert works are 'Divertissement' and 'Pièces d'orchestre' (Concert National, 6 Apr. and 14 Dec. 1873), a 'Suite d'orchestre' (do., 8 Feb. 1874), 'Scènes symphoniques' (Concerts du Châtelet, 25 Nov. 1877) and overture 'Frithjof', based on Tegnér's epic poem (do. 13 Feb. 1881). A symphonic poem, 'Notre Dame de la Mer', was produced in 1897, and Dubois also set to music a Latin ode on the baptism of Clovis, for tenor and baritone, chorus and orchestra, performed at Rheims in 1899. His church music, 'Messe de requiem', 'Messe de la délivrance', motets 'O quam suavis' and 'Puer natus est nobis', was in its time very popular with choirmasters and organists.

**DUBOURG, George** (b. ? , 1799; d. Maidenhead, 17 Apr. 1882).

English violinist. He was a grandson of Matthew Dubourg and the author of a history of the violin which was originally published in 1836 and in 1878 reached a fifth edition. He was one of the most celebrated performers on the violin in his time.

W. H. H.

**DUBOURG, Matthew** (b. London, 1703; d. London, 3 July 1767).

English violinist, grandfather of the preceding. He was a natural son of Isaacs, the dancing-master, became a pupil of Geminiani's and first appeared as a boy at one of the concerts of Britton, the small-coal man, when he performed a solo by Corelli with great success, standing on a high stool. On 27 May 1714 he had a benefit concert at Hickford's Room. He visited Dublin in 1724, and on 17 June 1727 married Frances Gates at Stanmore (Middlesex). In 1728 he was appointed to succeed Kusser as conductor of the Viceroy's band at Dublin, in which capacity he set many odes for the celebration of royal birthdays. During his residence there he led the band at the performances given by Handel during his visit to Ireland in 1742, and also had the distinction of assisting at the first performance of 'Messiah'. Later he returned to London, and in 1752 succeeded Festing as leader of the king's band, though still retaining the Dublin appointment. In 1761 he was appointed Master of Her Majesty's Band of Musick at £200 a year. Geminiani was his guest at Dublin in 1761-62 and on many other occasions. Dubourg composed the birthday odes for Dublin Castle from 1728 to 1764; he finally left

Ireland in 1765. He was buried in Paddington churchyard.

Dubourg appears to have been a brilliant performer and fond of showing off his skill. Burney relates that on one occasion he introduced a cadenza of extraordinary length into the ritornello of an air. When at last he finished, Handel, who was conducting, exclaimed "Welcome home, Mr. Dubourg". A portrait of Dubourg, by Philip Hussey, was in the possession of Joseph Cooper Walker of Dublin. His published compositions are few and scattered through minor collections. Several are in John Simpson's 'Delightful Pocket Companion for the German Flute', c. 1746-47, and to Walsh's 'Musica bellicosa, or Warlike Musick' (about the same period), he contributed some 'Serenading Trumpet Tunes'. **Dubreuil, Ernest.** See Bizet ('Nicolas Flamel', lib.)  
**DUBS, Hermann** (b. Zurich, 23 Mar. 1895).

Swiss choral conductor. He studied conducting, organ and singing at Zurich with Andreac, Ochs, Isler and Messchaert, and in 1923 was appointed teacher of singing at the Conservatory. He became known in Switzerland and abroad by taking over, in 1922, the conductorship of the famous Hausermann private choir, one of the best chamber choirs in Switzerland, with which he gives performances of old masters (Monteverdi, Schutz) and modern works. K. V. F.

**DUC D'OLONNE, LE** (Opera). See AUBER.

**DUC, Philippe de** (b. ? , d. ?).

Flemish 16th-century composer. Nothing is known of his life except that he lived in Italy, probably at Padua, according to the dedication of his madrigals of 1586. The following three madrigal books were published: 'Di Filippo Duc, il primo libro de' madrigali a 4 voci con una serenata et un dialogo a 8 . . .' (Scotto, Venice, 1570); 'Le vergini di F. Duc fiamengo, lib. 1 a 6 voci con 1 dialogo a 8 v.' (Gardano, Venice, 1574); 'Di Filippo D. fiamengo il 1 lib. de madrigali a 5 e 6 voci' (Vincenzi & Amadino, Venice, 1586). Church music in manuscript is in the libraries of Breslau, Munich and Vienna (State Lib.). E. v. d. s., rev.

**DU CANGE, Charles (Dufresne) (Sieur)** (b. Amiens, 18 Dec. 1610; d. Paris, 23 Oct. 1688).

French musical scholar. He wrote 'Glossarium ad scriptores mediae et infimae latinitatis' (Paris, 1678, several editions; latest, 1882-87), a standard work on medieval musical terms and instruments. M. L. P.

<sup>1</sup> Often erroneously called Le Duc.

**DU CASSE, Roger.** See ROGER-DUCASSE.  
**DU CAURROY, (François) Eustache**  
 (Sieur de Saint-Frémin) (b Gerberoy nr. Beauvais, [bapt. 4 Feb. 1] 1549; d. Paris, 7 Aug. 1609).

French composer. He entered the service of the French royal house as singer in the Sainte-Chapelle about 1569, became a canon there and continued in office during the reigns of Charles IX, Henry III and Henry IV. In 1583 he is called Master of the Children of the Chapel, and later Master of the Music of the Chapel. From 1573 he was prior of Saint-Aioul in the diocese of Provins. The post of Surintendant de la Musique du Roi was created for him in 1599. He was buried in the church des Grands Augustins in Paris. A monument (destroyed in the Revolution) was erected to his memory by his successor Nicolas Formé, with an epitaph by his friend Cardinal du Perron.<sup>2</sup>

Du Caurroy was called by his contemporaries "Prince des professeurs de musique", a title he shared with Lassus and Palestrina. His compositions include 'Missa pro defunctis', performed at the funerals of the kings of France at the church of Saint-Denis until the 18th century and at Notre-Dame on All Souls' Day: one copy only exists, at the Bibliothèque Nationale in Paris; 'Preces ecclesiasticæ' (2 books, containing 25 compositions a 4, 5 and 6) (Paris, 1609). Published by his grandnephew André Pitart: 'Fantaisies' in 3, 4, 5 and 6 parts, a collection of 42 instrumental pieces on sacred and secular themes (Paris, 1610) and 'Mélanges de musique' (Paris, Ballard, 1610), from which Burney prints in his third volume a Noel in 4 parts. This work consists of 62 pieces a 4, 5, 6 and 7, containing chansons, psalms, motets, Noels, etc., composed for the service of the court (Ballard, 1610). As early as 1569 the music printers Le Roy and Ballard inserted 3 pieces by Du Caurroy in their 22nd and 23rd books of chansons. The collection 'Le Rossignol musical' (Phalèse, 1597) contains one. Like his contemporaries Le Jeune and Mauduit, he composed music to measured verses in imitation of Greek and Latin models.<sup>3</sup> Du Caurroy has been credited without proof, or any likelihood, with the airs 'Charmante Gabrielle' and 'Vive Henri IV'.

Modern editions of the 'Mélanges' and of 5 instrumental Fantasies were published by Henry Expert, of the 'Missa pro defunctis' by R. P. Martin. M. C. C. & M. L. P.

**DUCIS, Benedictus** (b. Constance, ?, d. Schalkstetten nr. Ulm, 1544)

German composer. He travelled much in the early 16th century, but was fundamentally a member of the small group of south German composers headed by Sixtus Dietrich and Leonhard Paminger. He has in the past been confused with Benedictus Appenzeller, while his frequent change of abode and occasional use of his German surname (Herzog) gave rise to further complications, only recently resolved by Dr Dénes Bartha.<sup>4</sup> Although a native of Constance, he first found renown as an organist and a singer at Antwerp. The Lady Chapel of Antwerp Cathedral provided him with ample opportunities for exercising his talent as a keyboard executant from the year 1514, and in the following year he was nominated principal singer of the brotherhood of St. Luke. Shortly afterwards he was released from his duties in order to travel to England, where he was appointed organist and choirmaster of the Chapel Royal in 1516. During 1517 and 1518 Ducis, who is mentioned in the State Papers as "Benedict de Opitus", seems to have employed his leisure hours fruitfully by importing wine and musical instruments, and by exporting wheat.

He returned to the Continent and came under the influence of the Reformation. From 1535 he was pastor at Schalkstetten near Ulm, where his three- and four-part settings of odes by Horace were published in 1539. No trace of this publication survives. Documents at Ulm refer to him as "Benedict Duch" and those of Schalkstetten as "Benedictus Herzog", yet after his death in 1544 his name was Latinized by Gesner (Bibl. Univ., 1545).

Ten of Ducis's German sacred songs are reprinted in Vol. XXXIV of D.D.T. His surviving compositions are as follows:

'Te Deum' a 4

Motets a 4 (Rhaw, 1538)

Dum fabricator mundi.

Beatus vir qui timet.

De profundis.

Dilexi quoniam.

Ingresso Zacharia.

Motets a 3

Clamabat Jesus.

**DUET** (Fr. *duo*, Ger. *Duett*; Ital. *duetto*)

A composition for two performers, singers or players with or without accompaniment, in which the interest of the writing is divided as equally as possible. Some writers have used the term "duet" for vocal and "duo" for instrumental compositions, but this is a wholly artificial distinction. Beethoven wrote 3 duos for clarinet and bassoon, published without opus number. Spohr's Duos for violin and viola retain this title, but generally instrumental duets resemble vocal ones in being written for a pair of instruments of the same kind. Sonatas for violin and pianoforte, cello and pianoforte, flute and harp, and so on, are not as a rule called "duets", not because of their form, but because of their instrumental disparity. On the other hand, while Ravel wrote a 'Sonata' for violin and cello, Kodály

produced a similar work entitled 'Duo'. The term is thus loosely applicable both to a medium and to a form.

In pianoforte music it is used in two ways: (1) for music for four hands with two performers at one piano; (2) for music for two pianos with one player at each.

The earliest examples of keyboard duet music are manuscript pieces by Nicholas Carlton and Thomas Tomkins for two virginals.<sup>1</sup> The earliest printed works of which we have any knowledge are Burney's four 'Sonatas or Duets for two Performers upon one Piano Forte or Harpsichord' published in 1777 and those published at Dessau about 1782 under the title 'Drey Sonaten fürs Clavier als Doppelstücke für zwey Personen mit vier Händen von C. H. Müller'; before this, however, E. W. Wolf, musical director at Weimar in 1761, had written one or more sonatas for two performers which were published after his death. The short compass of the harpsichord keyboard, which rarely exceeded five octaves, was ill adapted to the association of two performers on the same instrument, hence doubtless the small amount of music of the kind in that period.

According to Fétis, Haydn wrote a *Diversissement, à quatre mains*, which was never published, the two Sonatas, Opp. 81 and 86, published under his name being spurious. Mozart wrote 10 duets, two of which were originally written for a mechanical organ or musical clock in a Vienna exhibition, afterwards arranged for pianoforte, one by himself, the other by an unknown hand. Schubert's 'Grand Duo', Op. 140, and the 'Divertissement à la Hongroise', Op. 54, should be mentioned, as also Brahms's Op. 23, the variations on a theme by Schumann.

The first composition for two keyboard instruments with one performer at each is probably Giles Farnaby's little duet in the 'Fitzwilliam Virginal Book' (I, 202). The ninth of Couperin's 'Ordres' begins with an 'Allemande à deux clavecins'. J. S. Bach used harpsichords together, but generally in the concerto form. There are, however, two fugues in the 'Kunst der Fuge' for two harpsichords alone. The Sonata in F, published as his in B.-G., XLIII, was proved to be by Wilhelm Friedmann Bach. Mozart wrote a Sonata in D major and a Fugue in C minor for two pianofortes; and Clementi's two sonatas, both in B♭ major, are worth mentioning. Schumann's Variations in B♭ major, Op. 46, originally written for two pianos, two cellos and horn, Chopin's Rondo in C major and Brahms's Variations on a theme by Haydn (also for orchestra) should be mentioned. Later composers have been more productive in duets for two pianofortes than for one. They

<sup>1</sup> B.M. Add. MSS 29,996

are too numerous to be catalogued, but the names of Saint-Saëns, Parry, Rakhmaninov, Debussy, Reger, Bax, Milhaud, etc., come readily to mind. Arnold Cooke applied the principle of bitonality successfully to music for two keyboards, to which it is peculiarly suited.

A large quantity of orchestral and other music has been arranged for both forms of piano duet, the comparative facility in performance making such works more readily accessible to the amateur in that form. The study of orchestral music by means of such duets is especially popular in France, where almost every orchestral work of any importance is to be had arranged *à quatre mains*. The two-piano combination is particularly successful in representing works for piano and orchestra: all the best-known concertos are arranged for two pianos, and in the case of Chopin the arrangement is at least as effective as the original.

Organ duets are very rare. There are three by Samuel Wesley and other pieces by Hesse, Hopner and Julius André.

The vocal duet differs from a two-part song in that the interest is more evenly divided. It is generally accompanied. Morley's 'First Book of Canzonets to two voices' was published in 1595. The "chamber duet" (*duetto da camera*) became a species of some importance in the late 17th and early 18th century. See especially duets by Alessandro Scarlatti, Handel and by Steffani. These duets were often in several movements linked by recitatives, and almost invariably in the polyphonic style. The duet, of course, takes a prominent place in opera from about the middle of the 18th century onward, until it ceases to be a separate "number" and becomes merged in the general continuity of the music (Verdi, Bizet, Puccini, etc.) or dissolves into a musical dialogue in which the voices no longer sing simultaneously (late Wagner, early R. Strauss, Debussy, etc.).

**DUETTINO** (Ital. *dimn.*), a duet of short extent and concise form.

**DUFAY** (*du Fay, du Fayt, Doufayt*), **Guillaume** (b. prob. Hainault, c. 1400; d. Cambrai, 27 Nov. 1474)

Burgundian composer. He was a choirboy in Cambrai Cathedral, probably from 1409 onwards. Two of his teachers, Loqueville and Grenon, are known as composers. Both of them had first-hand knowledge of French music. The Bishop of Cambrai, Pierre d'Ailly, was Chancellor of the University of Paris. He played an important part at the Council of Constance and was accompanied

there by thirty-five members of the Cambrai clergy. As Carlo Malatesta of Rimini was also present, this assembly may have been the place where Dufay met Malatesta. There is no documentary evidence of the facts of Dufay's life at the time he composed his early works; but it appears that he spent a number of years in the South, probably at Malatesta's court. This may be assumed from his setting of Italian words and a number of dated pieces of music dedicated to members of the Malatesta family ('*Vasilissa ergo gaude*', in celebration of Cleopha Malatesta's marriage in 1419–20, '*Resvelles-vous*', on the marriage of Carlo Malatesta in 1423, and '*Apostolo glorioso*' for the consecration of the cathedral at Patras by Archbishop Pandolfo Malatesta in 1426).

For the next stages in Dufay's career evidence is found in archives. Haberl's research work was continued by van den Borren, Bax and Pirro (*see* Bibl.). In 1427 Dufay must have been at Bologna, possibly studying at the University, when he was granted the privilege of absenting himself from Saint-Géry at Cambrai. In the following year he entered the papal choir in Rome, which then contained a number of Netherlands musicians. He stayed there until 1437, apart from an interruption in 1434–35. In these years he also stayed with Louis, Duke of Savoy, whence he went on leave home to see his mother.

Dufay's post as a singer in the papal choir proved a great advantage to his clerical career. Under Pope Martin V (1417–31) he became in 1429 a chaplain of Saint-Fiacre at Laon and of Saint-Géry at Cambrai, two posts that did not require his residence in either place. In Apr. 1430 another living, that of Saint-Jean-Baptiste in the parish church of Nouvion-le-Vineux in the diocese of Laon, was added to these. Two more canonries, one at the cathedral of Tournai and one at Saint-Donatien, at Bruges, came his way between 24 Mar. 1431 and 22 Aug. 1431. Pope Eugene IV (1431–47) gave him a canonry and a living in the church of Lausanne—then in Savoy—for which he had to give up Saint-Pierre at Tournai. When in Savoy Dufay is mentioned as curate of Versoye on 12 Aug. 1434. Back at the papal chapel in June 1435 he received another living at Cambrai from Eugene IV. In 1438 Dufay was again in Savoy.

On 7 Apr. 1438 Dufay is named as one of the delegates of the Cambrai cathedral chapter who took part in the council of Basel. On 16 Oct. of the same year he was once more in Savoy. The duke's treasurer mentions that on that day Dufay and four of Amédée's chaplains left Le Bourget for Pignerol, where Louis of Savoy and his wife Anne of Cyprus

had gone for the winter. The following year Dufay is referred to as a canon of Saint-Donatien at Bruges.

The accounts of Cambrai Cathedral refer in 1440 to thirty-six lots of wine which were delivered to Dufay and one Jo. de Griboval for the celebration of the feast of John the Baptist. From then on the documents seem to suggest that Cambrai may be regarded as Dufay's more or less permanent residence. He was present at the meeting of the chapter on 27 July 1442. On 23 Oct. 1443 he sent two delegates to receive money at the bank of the Borromeo family at Bruges, transmitted to him by the Marquess of Ferrara. Dufay's mother died in 1444 while he was with her. On 2 and 30 May 1445 he attended meetings of the chapter, and on 26 May he received money for some of his works and was charged with the supervision of the copying of his music by Jean de Namps, work that went on until 1470. During 1444-45 he was in charge of the boy singers. In Oct. 1446 he went on a mission to the court of Burgundy. In 1448 he was cellarer. On 21 Apr. 1452 he received 60 écus, *propter qualitates et merita*, having enriched the services with his music. Towards the end of the year 1458 he returned from a journey, and he took up his position with the singers in June 1459, which he still held in 1460. His name appeared in various capacities in Cambrai cathedral documents each year from 1462 to 1467.

As an honoured member of his profession Dufay was free to be away from Cambrai occasionally. On 17 Oct. 1446 he is called *baccalaureus in decretis* (bachelor of canon law) for the first time in connection with his appointment as a canon of Sainte-Waudru at Mons. He attended a reunion of the clergy of this church in 1449, where he met his famous contemporary Binchois.

In 1450 Dufay is mentioned in the accounts of Louis, Duke of Savoy, as *cantor illustrissimus domini Ducis Burgundie*. He stayed in the Osteria del Capello at Turin from 26 May to 1 June, together with nine monks, at the expense of the Duke of Savoy, and in 1455 he was one of the singers of the chapel who received a new year's gift according to the custom of the court of Savoy.

Dufay was present at Cambrai when the dedication of the Cathedral was celebrated in 1472. The date of his will too is known, 8 July 1474, and a number of records are extant referring to its execution. His tombstone, originally at Cambrai and according to van der Borren in the Lille Museum in 1925, bears the epitaph:

Hic inferius jacet venerabilis vir magr. guillelmus du fay musici baccalaureus in decretis olim huius ecclesie choralis deinde canonicus et scilicet Waldevtrudis montani qui obiit anno dñi millesimo quadr. . . . xxvii mensis novembris.

In his will, which is printed by Haberl (see Bibl.), Dufay bequeaths to Charles the Bold four books "d'une grandeur de diverses chanteries", a small book with chansons and another book with hymns and the Mass 'Ave Regina Coelorum'. He also desires that, when he has received the last sacrament and is *in articulo mortis*, eight choristers of the Cathedral shall sing very softly by his bedside the hymn 'Magno salutis Gaudio', after which the altar boys, with their master and two choristers, shall sing his motet 'Ave Regina Coelorum'. This pious duty was, however, performed, not at his bedside, but in the chapel, after his death, *corpore presente*.

Dufay commanded the respect of the musicians of his time as well as the admiration of the musical amateurs. When on a visit to Besançon in 1458 he was chosen to settle a controversy concerning the mode of the antiphon 'O quanta exultatio'. Martin Lefranc in his 'Champion des dames', written about 1440 in Paris, names Dufay, together with Dunstable and Binchois, as the greatest composers of their time. As more 15th-century music comes to light, Dufay's greatness is more clearly revealed. After being regarded as the leader of the first Netherlands school of polyphonic music he is seen to-day as the outstanding composer between the Gothic and the Netherlands epoch. His early Mass in G (MS Bologna Q15) is most likely the first *ordinarium missae* composition of the 15th century. His later four-part tenor masses formed the pattern for the younger generation of Netherlands composers. He was also most certainly the originator of the faburden.

In Dufay's early works of about 1426 the melody in his chansons shows a tendency towards tonality, but the setting does not yet support this trend. Later on the tonic-dominant relationship becomes apparent in melody and harmony. Semitones leading to the tonic are effectively accompanied by the bass descending a fifth or ascending a fourth. As the tenor, according to the northern tradition, had to be a melodic counterpart to the *cantus*, the counter-tenor was formed into this lowest part in the chanson, or *cantilena*, as it is sometimes called.

Altogether Dufay's music followed the French tradition adapting to it Italian and English features: functional harmony and full-sounding chords were assimilated into the polyphonic texture.<sup>1</sup>

The motet in Italy from the time of Cicconia (1400) served as music for official ceremonies. Dufay kept to this tradition by composing motets for the enthronement of the pope, peace treaties, marriage and funeral services, and feasts of the saints. In these motets he made use of Italian features like duo-introductions

<sup>1</sup> See BURGUNDIAN SCHOOL.

in canon, imitations and functional harmony. To achieve this the counter-tenor became the lowest part, since the tenor with its Gregorian tune could not serve as a bass.

Dufay's work includes at least 7 masses, 35 fragments of masses, 2 Magnificats, 87 motets, 59 French and 7 Italian chansons

**DUFON (Du Fon), Jean** (b. Namur, [bapt. 21 Sept.] 1574; d. Namur, May or June, 1634).

Flemish singer and composer. He was sent to Spain as a choir-boy (*cantorcillo nuevo*) for the royal chapel at Madrid, where he arrived in 1586, just in time to have lessons from George de La Hèle before that master's death the following year. His later masters were Philippe Rogier and Guillaume Bosquer. On 4 Dec. 1593 he was admitted as an adult singer, but obtained leave a few days later for a visit to the Netherlands. In 1597 his 8-part motet 'Omnes de Sabat venient', for which he received 8 reals, was sung in the chapel. In 1607-8 he again had leave to visit his home,

and on 24 July 1610 he asked to be allowed to return there on account of infirmity. He went to live in his parental house at Namur, and although he moved to another later, he remained in his native town until his death.

The following works by Dufon are known: Mass 'Un jour laiment' (on a song by Lassus) and 13 chansons.

E. B.

**DUFRESNE, Charles.** See DU CANGE, SIEUR.

**DUGAZON, Gustave** (b. Paris, c. 1780; d. Paris, 1826).

French composer. He was the son of Louise Rosalie Dugazon and a pupil of Berton and Gossec at the Paris Conservatoire. At the age of eighteen he made his début as a dramatic composer, collaborating with Bertheau, Dubuat, Pradher and Quinebaud in a little opera, 'Le Voisinage' (Théâtre Favart, 24 Jan. 1800). Subsequently he wrote, with Pradher, 'Le Chevalier d'industrie' (1804) and, alone, 'Marguerite de Waldemar' (1812) and 'La Noce écossoise' (1814), and for the Opéra the ballets 'Les Fiancées de Caserte' (1817), 'Alfred le Grand' (1822) and 'Aline, reine de Golconde' (1823, partly adapted from Monsigny's and Berton's operas of that title), another ballet, 'Noémi', for the Théâtre de la Porte Saint-Martin and some miscellaneous vocal and instrumental music. He died at the end of 1826.

A. L.

**DUGAZON, Louise Rosalie** (b. Berlin, 18 June 1755; d. Paris, 22 Sept. 1821).

French singer, mother of the preceding. She was the daughter of François Jacques Lefebvre, a dancer at the Berlin Opera, who returned with his family to his native Paris in 1765. Two years later, at the age of twelve, she made her début as a ballet dancer at the Comédie-Italienne. Her voice was discovered by Grétry — who remained a great admirer of her throughout his life — and he wrote a little air for her in his 'Lucile' (5 Jan. 1769) in which she performed a small part. Mlle Lefebvre's official début as a grown-up singer took place on 19 June 1774, as Pauline in Grétry's 'Sylvain'; the first part she newly created was that of Narine in 'La Colonne', an adaptation of Sacchini's 'L'isola d'amore' (16 Aug. 1775). The next year she married the actor and writer Jean Baptiste Henri Gourgault, called Dugazon, and as Madame Dugazon (although separated from her husband after a few years) she continued to sing for more than a quarter of a century, creating over 60 new parts in the productions of the Comédie-Italienne (later Opéra-Comique or Théâtre Favart).

Next to her great predecessor, Madame Favart, Dugazon probably was the most famous and best-known singer of French *opéra-comique*. Contemporary accounts and memoirs in her praise abound, the poems addressed to her fill

a small volume and numerous paintings and engravings show her in her most popular parts, Dalayrac's Nina among them. The genres in which she excelled were known for a long time as "jeunes Dugazon" and "mères Dugazon". The last part she created was that of Bouzoula in Isouard's 'Le Médecin turc' (19 Nov. 1803). A few months later, on 29 Feb. 1804, she made her farewell appearance at the Opéra and retired from the stage.

**DU GRAIN, Johann Jeremias** (b. ?; d. Danzig, [buried 19] Jan. 1759).

German composer (P) of French origin. He lived at Elbing (formerly West Prussia) from before 1732 (when his first child was baptized there) until Oct. 1739, and then until his death at Danzig. He also sang and played clavier and organ, the latter at St. Mary's, Elbing (substituting for the regular organist, one Daniel Dibbe) and at St. Elizabeth's, Danzig. His extant works comprise a Passion according to St. Matthew and other vocal compositions. Du Grain was a composer of purely local importance, which would hardly warrant inclusion in this Dictionary were it not for the fact that his name has on one occasion been linked with Handel's. This connection has been much bolstered up by earlier writers; according to I. Leux (see Bibl.) the facts are simply as follows:

It was intended to celebrate the Elbing jubilee in 1737 by the production of an Italian opera on a local subject, called 'Hermann von Balcke'. For some reason this plan came to nothing, but a libretto had been printed beforehand, and a copy of this is preserved at Elbing and is the only remainder of the ambitious project. The names of Du Grain and Handel are mentioned in the libretto; Handel's "collaboration", however, was of a completely passive nature. Du Grain chose some airs (16 out of a total of 33) from various of Handel's London operas, the words of which approximately fitted the context, and set—or intended to set—the remaining airs and the connecting recitatives himself. The libretto was partly utilized for a school drama by one Georg Daniel Seyler (which contained no music at all), and in the end it was this that seems to have been produced at the jubilee. There is no question of the "Elbing councillors travelling from the Baltic coast to Aix-la-Chapelle to approach Handel" and similar anecdotes; in all probability Handel never knew about the project at all, or of the existence of a composer named Du Grain. Whether Du Grain ever wrote any new music for the

intended 'Herman von Balcke' is doubtful; certainly none has been found.

NEUBAUER, L., 'Der Komponist Jean Du Grain in Elbing' ('Mitteilungen des Westpreussischen Geschichtsvereins', 1915).

**DUHAMEL, Antoine** (b. Paris, 30 July 1925).

French composer. He is a son of the well-known writer Georges Duhamel. At the age of seventeen he began to compose; three years later he began studies under René Leibowitz. He has written a number of works in the twelve-note technique which show originality and sensitive handling of the means employed.

His chief works are:

#### COMPOSITIONS

Music for a Film, for flute, cello, pf., harmonium & perc.  
4 Songs for baritone & orch  
Quintet for wind & pf.  
Variations on a theme by Schoenberg for pf.  
Songs for voice & pf.

H. S. (ii).

**DUIFFOPRUGCAR (Tiefenbrucker), Gaspard (Caspar)** (b. ?, c. 1514, d. ?, c. 1570).

German musical-instrument maker. A native of Bavaria, he is said to have attracted the notice of François I and to have been persuaded by him to settle in Paris. He seems, however, to have worked continuously at Lyons. His viols were remarkable for their elaborate inlaid work. A notable example of his work is a bass viol, now belonging to the Brussels Conservatoire, on the back of which is a plan of the city of Paris made of different coloured inlaid woods. This instrument belonged early in the 19th century to J. B. Vuillaume of Paris, who ornamented some of his violins and violoncellos with inlaid work after the manner of Duiffoprugcar's viols. It is sometimes stated that Duiffoprugcar made violins, but this is an error. After his death the business was carried on for some years by his son John and other members of the family. A portrait of Gaspard was engraved at Lyons by Pierre Woëriot and published in 1562.

E. H. F.

**DUKAS, Paul** (b. Paris, 1 Oct. 1865; d. there, 17 May 1935).

French composer. He entered the Paris Conservatoire in 1882 and was a pupil of Mathias Dubois and Guiraud. He gained a second Grand Prix de Rome for his cantata 'Velléda'. At that time he had already composed two overtures, to Shakespeare's 'King Lear' and Goethe's 'Gotz von Berlichingen', which remained unpublished. These

were followed, after a period of fruitful study, by other works, songs, choruses, symphonic and dramatic sketches, all unpublished.

In 1892 an overture to Corneille's 'Polyeucte' was performed at one of the Lamoureux concerts. This work interpreted in a remarkable way the poetic substance of the tragedy. The influence of Wagner, so understandable at that period, could not obscure Dukas's striking qualities of delicacy, which had already attracted the attention of the discriminating and led them to consider Dukas as one of the young French musicians for whom a great future was in store.

There followed in 1896 the Symphony in C major, conducted at the concerts of the Opéra in Paris by Paul Vidal, to whom it was dedicated. It is distinguished by a youthful ardour that does not exclude a style of lofty feeling and a strong structure, in which some prolixity of development may be criticized. Without detracting from the beauty of the other movements, the *Andante* surpasses them by the quality of its emotion and the finished purity of its style.

'L'Apprenti sorcier', the most familiar of Dukas's works, which he conducted the following year (1897) at the Société Nationale de Musique, was very soon accepted in the concert repertoires of all countries. In England it was played for the first time in May 1899 at the London Musical Festival. It is a symphonic comment in the form of a scherzo on Goethe's mordant ballad, a work logically built up, carrying its sense within itself, well worthy, with its ironic rhythm, its furious animation and its brilliant instrumental writing, to remain one of the models of a difficult style.

In 1901 and 1903 there appeared two works which occupy an important place among modern compositions for the pianoforte; the imposing Sonata in E $\flat$  minor, which carries a hint of Beethoven, and the 'Variations, interlude et final' on a theme by Rameau, which has an altogether tender character, enticing, touching, nimble, showing a mastery of traditional forms united with brilliance of writing and depth of personal feeling. The same delicacy of language, the same fullness of poetic sentiment is found again in the shorter pieces composed for special occasions: 'Villanelle' (horn and pianoforte, 1906), for a competition at the Conservatoire; 'Vocalise' (1909) in the second volume of the 'Vocalises-Études' collected by Hettich in the Leduc edition; 'Prélude élégiaque' (pianoforte, 1909), on the occasion of the centenary of Haydn's death; 'La Plainte, au loin, du faune' (pianoforte, 1921), a striking homage to the memory of his friend Claude Debussy; 'Sonnet de Ronsard' (voice and pianoforte, 1924), written for the fourth centenary of the

poet's birth, full of subtle and flavoured archaism.

But it is, without question, in the sphere of dramatic music that Dukas gave the most complete expression to his art. After having undertaken the poem and the score of a Hindu drama, 'L'Arbre de science', he put it aside to devote himself altogether to 'Ariane et Barbe-Bleue', which Maurice Maeterlinck had conceived with him in view. This is a "conte lyrique" in three acts (Paris, Opéra-Comique, 10 May 1907), which gained a considerable artistic success. The character of Ariane symbolizes the liberating pity which struggles against the enslavement and feebleness of humanity, and endeavours to educate towards a higher consciousness those souls which are not yet sufficiently developed to understand its significance. Through the touching humanity of the principal figure, the variety of the successive scenes, the nature of the dialogue, the poem (although lacking the violent *coups de théâtre* dear to Italian realists) gives a great opportunity to the musician. And indeed the music becomes the inspiration of the drama, the soul and being of the work. It has a clarity and a rare depth, inspired by an emotion which is well balanced throughout. One may call to mind here in the first act the first chorus, the brilliant variations accompanying the rustle of precious stones which fall from the doors opened by Ariane, the striking colour of the underground song sung by Bluebeard's wives, the sudden apparition of Bluebeard himself; in the second act the poignant scene between Ariane and the imprisoned women, their deliverance, their ecstasy before the sudden glow of the daylight, before the beauty of the country and of the sea. Above all, in the third act, after the tragic return of the tyrant, the indescribable eloquence of Ariane's departure, where she sings with such dignity and serenity, with solemn and trembling feeling; while the wives, who dare not follow their liberator, choose rather to take up again the daily slavery of their existence. This is a profoundly moving scene, where the loftiness of the thought attains that equilibrium in which an art completely realizes its goal of human expression. One recognizes something of the spirit of 'Parsifal' recreated by a later technique, by an altogether individual temperament, strengthened by a profound knowledge of classical tradition, and of the most modern musical language current at that time, not forgetting that of 'Pelléas et Mélisande', of which from the first moment Dukas was a convinced admirer.

The "poème dansé" of 'La Péri', presented in Paris (1912) with the Russian dancer Trukhanova, then at the Opéra, has been played often at concerts. It represents under a new aspect a conception of the relationship

between music and dancing which approximates to that in the second version of the *Venusberg* in 'Tannhauser'. Inspired by a poetic oriental legend, preceded by a striking fanfare for brass instruments, the music unites once again the deep feeling and ardour of perception with the originality of a form which is always plastic and symphonic, the result of intense poetic feeling. The instrumentation of these works reveals the hand of a master: by turns light, subtle, lustrous, sumptuous, always solid and firmly built up. Thus the virtues of Dukas's spirit and art are maintained at an equal level and adapt themselves to different subjects.

From 1910 to 1913 Dukas was a professor of the orchestral class at the Conservatoire, and from 1913 till his death professor of composition there and at the École Normale de Musique. He was an excellent teacher who strove always to impart to his pupils a truth too often lost sight of, that form in art cannot exist as a separate entity, but must be a direct outcome of the creative impulse, and has no value apart from its appropriateness to the idea it seeks to express.

Dukas helped Saint-Saëns to finish 'Frédérigonde', the uncompleted opera of his master, Guiraud (Paris, 1895), of which he orchestrated the first three acts. He contributed to the modern edition of Rameau's works by editing 'Les Indes galantes', 'La Princesse de Navarre', 'Les Fêtes de Ramire', 'Nélie et Myrtille' and 'Zéphyre'. He revised 'Les Goûts réunis' (Couperin), the 'Essercizi per gravicembalo' (D. Scarlatti) and Beethoven's sonatas for piano, piano and violin, variations for pianoforte, violin Concerto and trios for Durand's edition. He made an arrangement of Saint-Saëns's 'Samson and Delilah' (4 hands) and of Wagner's *Venusberg* music (2 pianos, 4 hands). He was a music critic of authority, a notable writer: he contributed to 'La Revue hebdomadaire' (1892-1901), 'Gazette des Beaux-Arts' (1894-1902), 'Chronique des Arts' (1894-1905) and to the 'Quotidien' (1923-24). He also wrote numerous articles for the 'Courrier musical', 'Minerva', the 'Revue bleue', the 'Monde musical', 'Latinité' and the 'Revue musicale', proving the uncommon acuteness of his mind and the independence and liberality of his views. He was a member of the Conseil Supérieur de la Conservatoire; inspector of the Beaux-Arts (musical department) and an officer of the Legion of Honour. On the death of Vincent d'Indy, Dukas was elected president of the Union Syndicale des Compositeurs, and later he became a member of the Conseil des Émissions Radiophoniques. In 1934 he finally yielded to the entreaties of the members of the Académie des Beaux-Arts by occupying the chair left vacant by the death of Alfred

Bruneau. The heavy demands made on his energy, which, particularly in his last years, he was always ready to dispense in the service of others, affected his health, but he never failed in what he considered to be his duty. Nor did the hand of the artist falter. As his more intimate friends well knew, he put the best of himself into his compositions. That so small an amount should have survived is due to his severe and scrupulous self-criticism.

Dukas died suddenly of heart failure, leaving behind him, by his own wish, works few in number but all alike bearing the stamp of his sensitive and poetic nature. They refute the suggestion that he was primarily a technician and architect in music. As Paul Valéry truly said, in them may be found

quelques unes de ces vertus et de ces volontés qui sont, dans tous les arts, des modes de la grandeur de l'être et de la puissance de l'esprit. G. S., rev.

**DUKE, John Woods** (b. Cumberland, Maryland, 30 July 1899).

American composer. He studied composition with Strube at the Peabody Conservatory, Baltimore, for three years from 1915, and the years 1929-30 were spent in Europe, where he studied with Nadia Boulanger and Artur Schnabel. He has been since 1923 a member of the faculty at Smith College as Professor of Music. In his later years Duke has specialized in song-writing and has composed 60-70 songs, many of which appear frequently in American song recitals throughout the country. Among his other works are the following:

- 'Pole Star for this Year' (A. MacLennan) for unaccompanied chorus (1939).  
 Overture, D mi, for orch. (1928)  
 Carnival Overture for orch. (1941).  
 Concerto for pf. & stgs. (1938)  
 'Three Songs in Praise of Death' for voice & stg. 4tet (1935).  
 Trio for vn., viola & cello (1937).  
 String Quartet (1941).  
 Trio, D ma, for vn., cello & pf. (1943).  
 Fantasy, A mi, for vn. & pf. (1937).  
 Suite for unaccompanied cello (1934).

P. G.-H.

**DUKE, Richard** (b. ?; d. ?).

English 18th-century violin maker. He flourished about 1750-80 and has been con-

CIMBALOM (with sticks)

PANTALEONS

sidered one of the best of the Stainer and Amati copyists at this period. His high reputation among English violin makers is amply justified by the genuine examples of his work, but unfortunately it became the fashion to affix his name to a large number of spurious instruments of very poor quality. He worked, as his labels state, "near opposite Great Turn-Style, Holbourn, London". E. H. F.

**DUKE, Vernon.** See **DUKELSKY, VLADIMIR.**

**DUKELSKY, Vladimir** (b. Parfianovka nr. Pskov, 10 Oct. 1903).

American composer of Russian birth. He belongs to a family settled at Kiev. One of his grandparents was directly descended from the kings of Georgia; and another was Spanish. At six years of age he attempted to write a ballet. He studied composition in Moscow and Kiev under Glière and Yavorsky. He left Russia in 1920 and spent two years in Constantinople, after which he migrated to the U.S.A., where he became acquainted with George Gershwin, who influenced one side of his creative personality. His overture for N. Gumilev's drama 'Gondla' was produced at Carnegie Hall in New York. In May 1924 he returned to Europe with a pianoforte Concerto in C major, dedicated to Artur Rubinstein, which he played to Diaghilev, with the result that he was at once commissioned to write the ballet 'Zéphyre et Flore'. This was produced on 28 Apr. 1925. He then turned to a contrapuntal style and almost classical construction, despite the freedom of the part-writing.

Dukelsky returned to the U.S.A. in 1929 and settled there, becoming an American citizen. A prolific writer, he produced a steady stream of compositions, which include, besides those already mentioned, 3 songs (1920-23), 'Triolets for the North', song cycle to words by Feodor Sologub (1922), three Symphonies (1928, 1929, 1946), 'Dédicaces' for soprano, pianoforte and orchestra (1935), a ballet, 'Public Gardens' (1935), an oratorio, 'The End of St. Petersburg' (1937), ballet, 'Le Bal des blanchisseuses' (Paris, 1946), violin Concerto (1943), cello Concerto (1946), 'Ode to the Milky Way' for orchestra (1946) and chamber music.

Dukelsky has also composed a great deal of music in a lighter vein for revues, musical comedies and cinemas, employing for this type of music the pseudonym of Vernon Duke.

**DULCIMER** (Fr. *lympanon*<sup>1</sup>; Ger. *Hackbrett*; Hung. *cimbalom*, Ital. *timpanon*<sup>2</sup>, *salterio tedesco*). The prototype of the pianoforte, as the psaltery was of the harpsichord. These instruments were so nearly alike<sup>2</sup> that one description might serve for both, were it not for the different manner of playing them, the strings of the dulcimer being set in vibration by small hammers held in the hands, while in the psaltery the sounds were produced by plectra of ivory, metal or quill, or even the performer's fingers. It is also no less desirable to separate in description instruments so nearly resembling each other on account of their ultimate development into the harpsichord and pianoforte by the addition of keys.

Rumbault ('The Pianoforte', p. 23) derives "dulcimer" from "dulce melos". Perhaps the "dulce"—also used in the old English "dulsate" and "dulsacordis"—unknown instruments unless dulcimers—arose from the ability the player had to produce sweet sounds with the softer covered ends of the hammers, just as "piano" in pianoforte suggests a similar attribute. The Italian *salterio tedesco* implies a German derivation for this hammer-psaltery. The roughness of description used by medieval Italians in naming one form of psaltery *strumento di porco* (pig's head) was adopted by the Germans in their translation *Schweinskopf*, and in naming a dulcimer *Hackbrett*—a butcher's board for chopping meat.

The dulcimer is a trapeze-shaped instrument of not more than three feet in greatest width, constructed of a wooden framing enclosing a wrest-plank for the tuning-pins, round which the strings are wound at one end; a soundboard ornamented with two or more soundholes and carrying two bridges between which are the lengths of wire intended to vibrate; and a hitch-pin block for the attachment of the other ends of the strings. Two, three, four and sometimes five strings of fine brass or iron wire are grouped for each note. The dulcimer, laid upon a table or frame, is struck with hammers, the heads of which are clothed on either side with hard or soft leather to produce the *forte* and *piano* effects (see *PLATE 17*, Vol. II, p. 798).

The tone, harsh in the loud playing, is always confused, as there is no damping contrivance to stop the continuance of the sounds when not required. This effect is well imitated in various places in Schubert's 'Divertissement à la hongroise'. The compass of two or three octaves, from c or d in the bass clef has always been diatonic in England, but became chromatic in Germany before the end of the 18th century. English dulcimers have ten long notes of brass wire in unison strings, four or five in number, and ten shorter notes of the

<sup>1</sup> Cf. also the Celtic *tempan*.

<sup>2</sup> See *PSALTERY*.

same. The first series, struck with hammers to the left of the right-hand bridge, is tuned g, a, b, c', d', e', f', g', the F being natural. The second series, struck to the right of the left-hand bridge, is g', a', b', c'', d'', e'', f'', g'', the F being again natural. The remainder of the latter series, struck to the left of the left-hand bridge, gives d'', e'', f'', g'', a'', b'', c''', d'''. This tuning has prevailed in other countries and is old. Chromatic tunings are modern and apparently arbitrary. As in most medieval musical instruments painted ornamentation was freely used on the sound-board and on the outer case when one existed. The dulcimer and psalter appear to have come to Europe from the East, it may be through the Crusades, for the dulcimer has been known for ages in Persia and Arabia, and also in the Caucasus, under the name of *sanjir*. Its European use is now limited to the semi-oriental gypsy bands in Hungary and Transylvania and to the more genuinely Magyar folk musicians.

Carl Engel ('Descriptive Catalogue', 1874) points out the remarkable resemblance between an Italian dulcimer in the London Victoria and Albert Museum of the 17th century and a modern Georgian *sanjir*, and refers to the use by the translators of the English Bible of the word "dulcimer" as well as of the names of other instruments common in the Elizabethan epoch, to represent Hebrew musical instruments about which we have no sure knowledge.

A description of Pantaleon Hebenstreit's development of the instrument will be found elsewhere.<sup>1</sup>

There is a Concerto for cimbalom and chamber orchestra by Hugo Herrmann.

A. J. H., rev.

See also *Sanjir*.

**DULCITONE** (Fr. *typophone*). A keyboard instrument somewhat similar in effect to the Celesta, in which graduated steel tuning-forks are struck by hammers. The compass is usually five octaves from bass A. The same principle was employed in the 18th century by Charles Clagget in his Aulton or Ever-tuned organ.

J. A. F.-M.

See also *Tuning-Fork*.

**DULCKEN, Louisa** (born David) (b. Hamburg, 20 Mar. 1811; d. London, 12 Apr. 1850).

German pianist. She was a younger sister of Ferdinand David and became a pupil of Willy Grund, making her appearance in public at Hamburg as early as her tenth year. In 1823 she played in Berlin and in 1825 with her brother at Leipzig, always with the greatest success. In 1828 she married and left Germany for London, where she lived for the rest of her life. Her first public appearance there

was at one of Ella's *soirées* in 1829. At the Philharmonic she played a Concerto of Herz's on 1 Mar. 1830, and thenceforward she was one of the most prominent figures in the music of London. She was an executive pianist of the first order.

See also David (Ferd., brother). Regondi (tour with)

**DULEBA (Dulemba), Józef** (b. Nowy Sącz, 28 Dec. 1842; d. Warsaw, 1 June 1869).

Polish pianist. He was a pupil of F. Hollman and Lubowski. In 1858 he went to Paris and for two years studied under Marmontel and Maldan. He continued his studies under Mirecki at Cracow and Krejčí in Prague. There he made his début in 1863 and followed it with an extensive European tour, establishing himself firmly in the pianistic world. In 1867 he settled in Warsaw. On 11 May 1869 he was seriously wounded in a duel, and he died a fortnight later.

C. R. H.

**DULICHUS, Philipp** (b. Chemnitz, Dec 1562, d. Stettin, 25 Mar. 1631).

German composer. He was teacher of music in the Padagogium at Stettin from 1587 and held the degree Ph.D. of Chemnitz. His compositions seem to have been highly thought of by his contemporaries.

#### LIST OF WORKS

1. 'Cantiones quinque senis vocibus composita . . . Philippo Dulichio Chemnicensi Hermunduro, illustris Padagogi Stetinensis Musico. Stetini. Kellner. 1589.' Obl. 4to. Six partbooks in B.M.
2. 'Philomusis omnibus et singulis dominis et amicis suis colendis, hasce quatuor octavarum vocum cantiones sacras consecrat. Stettini. Kellner 1590.' Obl. 4to. Eight partbooks in Rostock Univ. Lib.
3. 'Harmoniae aliquot septenis vocibus composita. (1) Laudate Dominum. (2) Venite ad me. (3) Delectare a Domino. (4) Erravi sicut ovis. (5) Querite primum Authore P. D. Chem. illus. Pedag. Stet. Musico. Stettini. Andreae Kellner. 1593.' With 'Quatuor Cantionum. P. D. Chem.' Four motets for 8 v. (1) Exaltabo te. (2) Exaltate justi (3) Confitemini Domino. (4) Deus musicatur. Eight partbooks, obl. 4to, in the Zwickau Lib.
4. 'Sex cantiones sacrae quinque vocibus concinnatae et in lucem editae studio P. D. Chem. illus. Pedag. apud Stetinenses musici. Stetini. Kellner. 1593.' Obl. 4to. Five partbooks in B.M.
5. 'Fasciculus novus continens Dicta insigniora ex evangelis, dierum cum festorum tum Dominorum, intra Pentecostes et Adventus ferias contentorum desumpta et quinarum vocum concentu XII Glareani modis indubitatis attemptato, exornata studio P. D. Chem. Herm. illus. Pedag. quod Stetini est, Musici Stetini. In officina Kellneriana 1598.' Obl. 4to. Five partbooks in Brieg Gymn. Lib. Another edition was published in 1609. . . . ex evangelis totius anni desumpta quinque vocibus concinnata. Authore P. D. Stetini 4to.
6. 'Novum opus musicum duarum partium. Continens dicta . . . tum Dominorum praecipuorum totius anni, desumpta . . . accurate exornata. In Communem Ecclesiae Dei usum compositum, atq. jam primum editum a P. D. Chem. Herm. illus. Pedag. quod Stetini Pomeraniae est, musico. Stetini, in officina Myliana 1599' Obl. 4to. Five partbooks in B.M. This must have been a

<sup>1</sup> See PANTALEON, also SCHROETER.

- rival edition to that of 1598 (No. 5). Another edition was published at Leipzig, 1609 4to.
7. 'Hymenaeus VII vocum in solennia nuptiarum . . . Christophori Albini . . . compositus a P. D. illius Pädag. Stet. Musico. Stettini Typis Myliani' 14 Oct. 1605. 4to. Text 'Dilectus meus loquitur'. Three partbooks in Breslau Univ. Lib.
  8. 'Hymenaeus VII vocum sollemnibus nuptiarum . . . Guilhelmi Simonis . . . virginem Elisabetham . . . Frederici . . . filiam. Dicitur a P. D. illius Pädag. Stet. Musico. Stettini.' 18 Nov. 1605. Text: 'Ego flos campi & lilium'. Six partbooks in one vol. 4to in the Zwickau Lib.
  9. 'Prima pars Centuriae octonum et septenum vocum harmonias sacras laudibus sanctissime triados consecratas continentis accurata diligentia adornata . . . a P. D. Chem illius. Pädag. Stet. musico. Stettini Joh. Duberi.' 1607. 4to
  10. The same: 'Secunda pars. Stettini. Myliandrinis. 1608.'
  11. The same: 'Tertia pars Stettini. Myliandrinis. 1610.'
  12. The same: 'Quarta pars Stettini. Kelnnerianis 1612.' A complete set in eight partbooks of the four volumes is in the Berlin State Lib. Other editions were published at Leipzig and Danzig in (?) 1608, 1610, 1619
  13. 'Dictum Psalmi. 30 Stettini. 1611.' 4to Eight partbooks in the Archives of St. Mary's Church, Elbing
  14. 'Primus tomus Centuriae senarum vocum harmonias sacras laudibus sanctissime Triados consecratas continentis Stettini Georg Gretschui. 1630' 4to. Six partbooks in the Archives of St. Mary's Church, Elbing.

Vollhardt (p. 18) mentions the following manuscript motets as being in the Zwickau Library:

1. 'Deus parentum meorum' (a 8).
2. 'Quam magnificata sunt' (a 8)
3. 'Lobet den Herrn' (a 8)
4. 'Siehe wie fern und lieblich' (a 8)
5. 'Deus in adiutorium meum' (a 8).
6. 'Ehre sei Gott dem Vater' (a 7).
7. 'Zion spricht. der Herr hat mich verlassen' (a 8).

There are two copies of 'Quaerite primum regnum' (a 7) in the Breslau Town Library, MS 30 (Bohn) Dulichius's motet 'Exultate justi in Domino' (a 8) was included in the Bodenschatz collection 'Florilegium selectis. cantionum' (Leipzig, 1603) and again in the 1618 edition.

DULZIAN. See BASSOON. DOLCIAN.

DU MAGE, Pierre (b. ?; d. ?).

French 17th-18th-century organist and composer. The dates of his birth and death are unknown, and we have almost no information about his career except that he was organist of the collegiate church of Saint-Quentin in Paris between 1703 and 1713. He played at the inauguration of the new organ at Notre-Dame in Paris. Like so many of the organ composers of his time he was a pupil of Louis Marchand.

Du Mage published a 'Livre d'orgue' in 1708. While his work does not attain the subtle mingling of spirituality and emotionalism which characterizes the organ music of Couperin and Grigny, and to a lesser extent of Roberday, it contains many fine things. The movements using operatic and dance tech-

niques are relatively unconvincing, but those exploiting sustained dissonance and chromaticism are extremely powerful and impressive. Moreover, although not exactly liturgical in spirit, they create a feeling of solemnity and awe, if less immediately striking, they are more mature than the almost hysterically dissonant pieces in a comparable style by Marchand and Gigault.

Du Mage's volume is republished with an introduction in Guillemant's 'Archives des maîtres de l'orgue'.

W. H. M.

DUMANOIR, Guillaume (i) (b. Paris, 16 Jan. 1615, d. Paris, ?).

French violinist and composer. He was the son of a violinist, succeeded L. Constantin as *roi des ménestriers* on 20 Nov. 1657 and was himself followed in that post by his son (see below) in 1668. The degrading intrigues, connected with the revenues of the Confrères de Saint-Julien<sup>1</sup>, of which he was the head, attempting to compel dancing-masters to pay a tribute to the guild, which they resisted, caused him to write the coarsely-worded pamphlet 'Le Mariage de la musique avec la danse' (1664).<sup>2</sup> His dance music, which Louis XIV greatly appreciated, procured for him the appointment of ballet-master of the pages. The suites of the Cassel Manuscript signed "G. D.", which Écorcheville published as those of Dumanoir, are probably by G. Diesener; but some of Dumanoir's compositions are in the Uppsala library. A suite of 3 five-part airs, entitled 'Charivaris' and dated 1648, is also by him.

E. v. d. s.

DUMANOIR, Guillaume (ii) (b. Paris, ?; d. Paris, 1697).

French violinist and composer, son of the preceding. He followed his father as *roi des ménestriers* in the Confrérie de Saint-Julien in 1668 and presided over it until 1685. He engaged in a long quarrel with Lully on account of a privilege accorded to the latter to train orchestral musicians, which was decided by law in 1673 in Lully's favour. Dumanoir's subsequent renewed quarrels with the dancing-masters, in which he was equally unsuccessful, led to his resignation in 1685. Of a number of dances which have been preserved it is impossible to ascertain the authorship except in the case of the 'Charivaris' attributable to his father (see above).

**DUMB GIRL OF PORTICI, THE** (Auber). See MUETTE DE PORTICI, LA.

**DUMKA** (plur. **Dumky**). Little-Russian (Ukrainian) word, meaning "lament" or "complaint", introduced into the terminology of cosmopolitan music by Dvořák, in whose chamber music it is of frequent occurrence as the name of a movement of melancholy character in more or less slow tempo, alternating sometimes with quick sections. His Op. 90, a Trio for strings and pianoforte, is called 'Dumky' and consists of a series of short movements linked together by a common bond of poignant expression. In a footnote the term is explained as a Little-Russian word occurring frequently in popular literature and generally indicating a passionately emotional character. J. A. F.-M.

**DU MONT (de Thier),<sup>2</sup> Henry** (b. Villers-l'Évêque nr. Liège, 1610; d. Paris, 8 May 1684).

Walloon organist and composer. The family early moved to Maestricht, where he received his musical education, together with his brother Lambert, at the collegiate church of Notre-Dame, in 1621-26. In 1630 he was sent to Liège, where he studied organ and composition under Léonard de Hodimont and Lambert Pietkin. Soon afterwards he became organist and later choirmaster at his church at Maestricht, but in 1632 his brother replaced him in the former post. In 1638 he went to France and two years later he was organist at St Paul's Church in Paris, a post he held till his death. About 1652 he was appointed organist and harpsichordist to the Duc d'Anjou, Louis XIV's brother, and in 1663 he became chapel master to the king. He had returned to Maestricht at some time to be married, but his wife died and he received an ecclesiastical benefice. He was made a canon of Maestricht, but never resided there, having become a naturalized Frenchman.

Du Mont's works include 5 'Messes royales en plain chant', 5 books of 2-4-part motets with instruments (1652-86), 2-part motets edited by the elder Philidor (1690), 'Cantica sacra' for 2, 3 and 4 voices, 4-part airs, 3 books of 'Meslanges' (chansons, motets, magnificats, preludes for organ and for viols, and serenades), etc. E. v. d. s., rev.

**DUMP.** A piece of music of a melancholy cast, probably synonymous with "lament". In 17th- and 18th-century books of instrumental music the name is occasionally met with as a title to a piece; for example 'The Irishe Dumps' in the 'Fitzwilliam Virginal

Book'. The following is a late instance from S. Holden's 'Collection of Old Established Irish Slow and Quick Tunes', Vol. I:

It is named 'An Irish Dump'. An arrangement of this tune to words by Joanna Baillie was made by Beethoven. F. K.

**DUN, Finlay** (b. Aberdeen, 24 Feb. 1795; d. Edinburgh, 28 Nov. 1853).

Scottish viola player, singing-teacher, musical editor and composer. He studied abroad under Baillot, Crescentini and others, and played first viola in the orchestra of the San Carlo Theatre at Naples. On his return to Scotland he settled in Edinburgh.

Besides two Symphonies (not published), *solfege* and scale exercises for the voice (1829), Dun edited, with Professor John Thomson, 'Paterson's Collection of Scottish Songs' and took part also, with G. F. Graham and others, in writing the pianoforte accompaniments and symphonies for Wood's 'Songs of Scotland'. He was editor of other Scots and Gaelic collections. W. H. (ii)

**DUNAYEVSKY, Isaak** (b. Lokhvitsy nr Poltava, 30 Jan. 1900).

Russian composer. He was precociously gifted and at the age of four began to learn the pianoforte, adding the violin when he was eight. In 1910 he began to compose and was entered at the Kharkov College of Music (later Conservatory). There he studied violin under Akhron and composition under Bogatirev. After his graduation in 1919 he wrote a good deal of stage music for the Kharkov theatre, and later for Leningrad and Moscow, where he also wrote much dance music, which led to his development as a composer of light, satirical operas. In 1937 he was elected President of the Union of Soviet Composers at Leningrad, which assists and advises composers in their work while supervising it in order to make sure that it conforms to the type of art considered healthy by the authorities. Under his direction this organization secures performances of approved works by the Leningrad Philharmonic School, at factories, in the Red Army and in workers' clubs.

Dunayevsky was one of the first composers in the U.S.S.R. to use jazz (1933). He wrote music for many films, including 'The Merry

<sup>1</sup> For 'Trilby' see also NODDY.

<sup>2</sup> The old family name was de Thier, but Du Mont was adopted during his childhood.

Boys' and 'Circus'; the 'Song of the Fatherland' from 'Circus' is his most popular work. Simultaneously with his film music he wrote new operettas, among the best of which are 'The Golden Valley' and 'The Road to Happiness', numerous songs and choruses, among them 'Song of Stalin' for chorus and orchestra.

He is not an innovator in music. He is mainly concerned with making his music comprehensible and accessible to the masses, and attains great expressiveness by means of simple and tested methods. The source of his success lies in the lyrical melodiousness of songs on themes near to the people's heart and familiar to them. Hence also the popularity of his patriotic songs.

In 1936 he was awarded the Order of the Red Banner of Labour and the title of "Merited Artist of the U.S.S.R."

The following are Dunayevsky's chief works:

#### OPERETTAS

- 'To Ours and to Yours, or Share and Share Alike' (1924).
- 'Bridegrooms' (1926).
- 'The Knives' (1928).
- 'Polar Passions' (1928).
- 'Million Langours' (1932).
- 'The Golden Valley' (1937).
- 'The Road to Happiness' (1939).

#### BALLETS

- 'Rest of a Faun' (1924).
- 'Murzilka', children's ballet (1924).

#### FILM MUSIC

- 'The First Platoon' (1932).
- 'Twice Born' (1933).
- 'The Merry Boys' (1934).
- 'The Golden Lights' (1934).
- 'Three Friends' (1934).
- 'The Way of a Ship' (1935).
- 'Circus' (1935).
- 'The Children of Captain Grant' (1935).
- 'Beethoven's Concerto' (1935).
- 'Seekers of Happiness' (1937).
- 'The Happy Bride' (1937).
- 'Volga-Volga' (1938).

#### MASS-SONGS

- 'Song of Stalin' for chorus & orch.
- 'Soviet Fatherland'
- 'Kharkovka.'
- 'Lyric Song.'
- 'Komsomol Song.'
- 'Tractor Song.'
- 'Song of the Volga.'
- 'Song of Youth.'

#### ORCHESTRAL WORKS

- Ballet Suite
- Suite on Chinese Themes
- 'Rhapsody on Song-Themes of the Peoples of the U.S.S.R.' for jazz orch. (1931).
- 'The Music Shop' (1932)

#### CHAMBER MUSIC

- String Quartet.
- 'Requiem', for reciter & quintet.

**DUNCAN, (Robert) Todd** (b. Danville, Kentucky, 12 Feb. 1903).

American Negro baritone singer. He graduated from Butler University, Indianapolis, in 1925, received the M.A. degree from Columbia University in 1930 and later that of Doctor of Humane Letters from the University of Valparaiso, Indiana. After four years as instructor in English and music at the Municipal College for Negroes, Louisville, he became professor of voice production at Howard University, Washington, D.C., in 1930 and head of its Public School Music Department in 1931. His stage debut, as Alfio in 'Cavalleria rusticana' in New York with a short-lived opera company in 1934 led to his engagement for the part of Porgy in Gershwin's 'Porgy and Bess' (1935). The run of this opera, in New York and on tour, made him nationally prominent. In 1938-39 he acted in Edgar Wallace's play 'The Sun Never Sets' in London. He returned to the musical stage for Vernon Duke's 'Cabin in the Sky' (New York, 1940-41) and the 1942 revival of 'Porgy and Bess', and also sang Tonio ('Pagliacci') and Escamillo ('Carmen') with the New York City Opera in 1945. In Kurt Weill's 'Lost in the Stars' (New York, 1949-50) the leading part of Stephen Kumale ranks with Porgy among his most notable stage characterizations.

Since the early 1940s Duncan has also been active in the U.S.A. as soloist at orchestral concerts and as recitalist, and later abroad. He visited South America in 1945, Australia in 1946 and 1949, sang at the first Edinburgh Festival in 1947 and later made European tours. He is a singer and interpreter of a consistently high standard both in opera and on the concert platform.

F. D. P.

**DUNCAN, William Edmonstone** (b. Sale, Cheshire, 22 Apr. 1866; d. Sale, 26 June 1920).

English organist, composer and writer on music. He became an associate of the R.C.O. at the age of sixteen and obtained an open scholarship at the R.C.M. on the foundation of that institution in London in 1883. There he studied under Parry and Stanford, and after leaving the College he studied with Macfarren for some little time. He spent ten years in London, acting as music critic, etc., and later was for some time professor at the Oldham College of Music.

The most remarkable of Duncan's early compositions was an Overture, Op. 4, performed in London in June 1888. An ode for chorus and orchestra, 'Ye Mariners of England', had a great success when given by the Glasgow Choral Union in 1890; a Mass in F

minor was composed in 1892; in the same year an opera, 'Perseus', was written. Swinburne's 'Ode to Music' was set in 1893; Milton's sonnet 'To a Nightingale', for soprano and orchestra, in 1895. In that year a Trio in E minor was given at Oldham, and various other works show untiring ambition and much musical skill. Among his literary works on music of a useful, popular kind are 'The Story of Minstrelsy' (1907) and 'The Story of the Carol' (1911).

Duncker, M. W. See Beethoven ('Leonora Prohaska', *incid. m.*)

**DUNEDIN ASSOCIATION, THE.** A society formed in 1911 at Edinburgh, the chief objects of which were to promote interest in the best models of Scottish folksong and the works of modern Scottish composers. It met with a widespread approval with a membership of over a thousand and had among its early presidents Andrew Lang (1911), Sir James Donaldson (1912) and Sir George Douglas (1915), with Janey C. Drysdale, sister of Learmont Drysdale the composer, as one of the secretaries. Its operations included an intense propaganda, much of which was carried out through its excellent quarterly 'The Dunedin Magazine' (1913-1916), edited by the Rev. Dr. Lauchlan Maclean Watt. Its agitation for a Scottish College of Music led to its scheme being adopted by the Corporation of Edinburgh, but the first world war led to its abandonment. Its choral and orchestral concerts became an outstanding feature of Edinburgh musical life, especially because of the works of MacKenzie, MacCunn, Drysdale, William Wallace, McEwen, David Stephen, Helen Hopekirk, W. B. Mooney, Charles Macpherson, Edgar Barratt, Alfred Moffat, C. H. F. O'Brien and H. Sandiford Turner, which were performed. The removal of its principal supporters and officials from the capital during the troublous days of 1914-18 led to the gradual decay and final cessation of the association's activities in 1917.

R. G. F.

BRL.—'The Dunedin Magazine' (Edinburgh, 1913-1916).

**DUNHILL, Thomas (Frederick)** (b. London, 1 Feb. 1877; d. Scunthorpe, Lincolnshire, 13 Mar. 1946).

English composer, teacher and lecturer. He received his musical education at the R.C.M. in London, which he entered in 1893, studying the pianoforte with Franklin Taylor and composition with Stanford. In 1897 he was awarded a scholarship for composition, and several early works of his were performed at the College concerts. From 1899 to 1908 he was assistant music master to Dr. C. H. Eloyd at Eton College, at the same time holding other posts as teacher and examiner, notably of harmony and counterpoint at the

R.C.M. In 1907 he instituted a series of concerts, of which the special function was to revive works by young British composers which had already been played for the first time and then laid aside. His chamber concerts were continued in London through several years, and at them many of his own works were heard together with those of his contemporaries.

Dunhill first made his name as a composer of well-written concerted chamber music. Three Quintets — one in E $\flat$  major for violin, cello, clarinet, horn and pianoforte, one in F minor for strings and horn, and one in C minor for strings and pianoforte — are the work of a serious mind devoted to classical principles of structure. A Quartet in B minor, two Phantasy Trios (all for strings and pianoforte), a violin Sonata in D minor, Variations for cello and pianoforte, alike show his knowledge of what is suitable for expression in various forms of chamber music, knowledge which took literary form in his important book, 'Chamber Music' (1913).

From time to time Dunhill wrote charming songs, among which two to words by Yeats, 'The Cloths of Heaven' and 'The Fiddler of Dooney', are most widely known, and also children's cantatas, operettas and educational pieces. Later he turned his attention more to the orchestra, and two works deserve particular mention. A set of 'Elegiac Variations on an Original Theme', written in memory of Parry and produced at the Gloucester Festival of 1922, and a Symphony in A minor (four movements) produced at Belgrade by the composer during a continental concert tour, and in England at the Bournemouth Festival in Apr. 1923. A one-act opera, 'The Enchanted Garden', was awarded publication by the Carnegie Trust in 1925 and given privately at the R.A.M. in Mar. 1928.

The most popular of Dunhill's later compositions was the light opera 'Tantivy Towers', which had the advantage of a witty libretto by A. P. Herbert. It was produced in London, at the Lyric Theatre, Hammersmith, on 16 Jan. 1931 and after a successful run there transferred to the New Theatre in St. Martin's Lane. Altogether it ran for nearly six months. Dunhill's music has the attractive qualities of melody and rhythm essential to opera of this type. That he was a close student of the Gilbert and Sullivan operas had been declared by his 'Sullivan's Comic Operas' (1928), which is the only book on these famous works that enters critically into the style of Sullivan's music and is based on a study of the full scores. But 'Tantivy Towers' cannot merely be called "after Sullivan"; its music has character of its own. The hunt-supper scene, based on a skilful handling of the traditional melody 'John Peel', finds no prototype any-

where in Sullivan's operettas. On the other hand, a trio of footmen in the last act, expressing the horror in which gentlemen's gentlemen hold the crime of shooting a fox, is in the manner of Gilbert and Sullivan to the extent that the satire of the librettist gains humour by being allied with decorously serious music.

Another light opera, 'Happy Families', to a libretto by Rose Fyleman, was not given in London, but was produced for a short season at Guildford on 1 Nov. 1933 and repeated there in the following year. Dunhill later composed two ballets. The music for one of them, 'Dick Whittington', has been heard only in the form of a concert setting; the other, 'Gallimaufry', adapted from a story by Hans Andersen, was produced at Hamburg in the State Opera House on 11 Dec. 1937, under the title of 'Die Eiskonigin'. Ten performances were given there during the Christmas season. One more literary work has to be recorded, a short biographical study, 'Sir Edward Elgar', published in the autumn of 1938.

**DUNI, Antonio** (b. Matera, Basilicata, c. 1700; d. ?, after 1768).

Italian composer. He is said to have had a first appointment at the archiepiscopal court of Trier (about which no details are known), subsequently he went to Spain and his stay there can at least be verified and dated by two plays which show his name as composer: 'Locuras hay que dan juicio y sueñes que son verdad' by Antonio de Zamora, performed in Madrid on 23 Feb. 1726, and 'Santa Ines de Montepoluciano' by Manuel Francisco de Armesto, performed there on 25 Dec. 1727. If it is true that Duni later became a friend of Farinelli's and was through his mediation appointed *maestro de capilla* to the king and music teacher to the son of the Duke of Ossuna, he must have stayed in Madrid at least until 1740 or thereabouts. To Duni's Spanish period presumably belong the 'Cantate di camera' which he dedicated to John V, King of Portugal — though why they were published in London (by W. Smith, c. 1735) remains a puzzle; Duni's brother, who was in London about that time, may have brought the cantatas with him.

Duni reappears about 1753, as the conductor of a travelling opera company in northern Germany. An intermezzo, wholly or partly by him, called 'L' amor mascherato', was performed at Leipzig, Lubeck, Schwerin and other towns, and the score has been preserved at the Brussels Conservatoire. Subsequently he went to Russia, secured a post as singing-teacher at Moscow University and gave private lessons (1757). About 1765 he lived at Riga as a teacher again and in 1766 was

back at Schwerin applying for a post in the ducal orchestra there. He was probably still living in 1768, for Gerber records a 'Litania della Beata Virgine' for 2 voices, violins and organ as having been published at "Norby" (? Norimbergi = Nuremberg) in that year (no copy extant). One Mass, motets and other music for the church, chamber duets and symphonies have been preserved in various libraries.

A. L.

**DUNI, Egidio Romoaldo** (b. Matera, 9 Feb. 1709; d. Paris, 11 June 1775).

Italian composer, brother of the preceding. He studied at the conservatories of the Madonna di Loreto and of the Pietà dei Turchini at Naples and at the former had Francesco Durante for a teacher. His first opera, 'Nerone', was produced in Rome on 21 May 1735, and its success is said to have eclipsed that of Pergolesi's 'Olimpiade' — a much better work in Duni's own opinion. Various and contradictory accounts have been given of Duni's travels before his settling at Parma and ultimately in Paris. From the appended list of his operas, however, his movements become fairly clear. He went to London much earlier than is usually stated: his opera 'Demofonte' had three performances at the King's Theatre in May and June 1737, and the following year he published a volume of 'Minuetti et Contridanze', which he dedicated to Elizabeth Griffith, Lady Rich. From London Duni went to Leyden, where his name appears in the University registers under date of 22 Oct. 1738; the six Sonatas for two violins and cello published (? or reprinted) as Op. 1 at Rotterdam ("gravé par A. Magitto fils") probably came out during his stay in Holland. By Jan. 1739 he was back in Italy, and from then onwards, as far as is known, he devoted himself almost exclusively to writing operas. For a few years, about 1745, he held an appointment as *maestro di cappella* at San Nicola, Bari, from which period probably dates his only oratorio, 'Giuseppe riconosciuto', the score of which is at Naples. In 1748 he went to Parma by way of Genoa. The French taste which became more prevalent at that court when the Bourbon Don Philip (son of Philip V of Spain and son-in-law of Louis XV) succeeded to the Farnese dukedom made Duni try his hand at French *opéra-comique*, and his settings of Favart's 'La Cherceuse d'esprit' and 'Ninette à la cour' were the first outcome of his change of style. Of the former so far only an Italian translation ('La semplice curiosa', Florence, 1751), and of the latter only an undated score (under the title of 'Le Retour au village') is known, but it is likely that both pieces, in new settings by Duni, first appeared in French at the Parma court.

The great success which Anseume's 'Le Peintre amoureux de son modèle', with

Duni's music, achieved at the Foire Saint-Laurent in the summer of 1757 stimulated the composer to take up his permanent residence in Paris, and like Lully and many others before, and Cherubini, Spontini and many others after him, Duni completely assimilated the French style, so much so that he now figures alongside of the younger generation of Monsigny, Philidor and Grétry as one of the leading spirits of French *opéra-comique*. Nearly all the works he wrote in Paris from 1757 onwards were published, translated and imitated, and some, like 'La Fille mal gardée', 'Le Milicien', 'Les Deux Chasseurs et la laitière', 'La Fée Urgèle' and 'La Clochette' became international successes which kept the stage for many years.

The following is a list of Duni's operas (names of librettists in brackets):

- 'Nerone' (altered from Francesco Silvani), Rome, Teatro Tordinona, 21 May 1735.
- 'Adriano in Siria' (Pietro Metastasio), Rome, Teatro Tordinona, 27 Dec. 1735.
- 'La uranide debellata' (Apostolo Zeno & Pietro Pariati), Milan, Teatro Regio Ducal, Carnival 1736.
- 'Alessandro nell' Indie' (Metastasio), 1736 (doubtful).
- 'Demofonte' (Metastasio), London, King's Theatre, 24 May 1737.
- 'Didone abbandonata' (Metastasio), Milan, Teatro Regio Ducal, Jan 1739.
- 'Catone in Utica' (Metastasio), Florence, Teatro della Pergola, Carnival 1740.
- 'Baiazette' (Agostino Piovene), Florence, Teatro della Pergola, autumn 1743.
- 'Artaserse' (Metastasio), Florence, Teatro della Pergola, Jan. 1744.
- 'Ipermestra' (Metastasio), Genoa, Teatro del Falcone, Jan. 1748.
- 'Ciro riconosciuto' (Metastasio), Genoa, Teatro del Falcone, spring 1748.
- 'La semplice curiosa' (Italian version of Charles Simon Favart's 'La Chercheuse d'esprit'), Florence, Teatro del Gocomero, autumn 1751.
- 'L' Olimpiade' (Metastasio), Parma, Teatro Regio Ducal, Carnival 1755.
- 'Le Caprice amoureux, ou Ninette à la cour' (Favart), prob. Parma, 1756.
- 'La buona figliuola' (Carlo Goldoni), Parma, Teatro Regio Ducal, 26 Dec. 1756.
- 'Le Peintre amoureux de son modèle' (Louis Anseaume), Paris, Théâtre de la Foire Saint-Laurent, 26 July 1757.
- 'Le Docteur Sangrado' (Anseaume & Jean Baptiste Lourdé de Sarterre), with Jean Louis Laruelle, Paris, Théâtre de la Foire Saint-Germain, 13 Feb. 1758.
- 'La Fille mal gardée, ou Le Pédant amoureux' (parody, by Favart, Madame Favart and Lourdé de Sarterre, of 'La Provençale', an entry in Mouret's opéra-ballet 'Les Fêtes de Thalie'), Paris, Comédie-Italienne, 4 Mar. 1758.
- 'L' Embarras du choix' (parody of Dauvergne's opera 'Enée et Lavinie'), Paris, Théâtre de la Foire Saint-Germain, 13 Mar. 1758.
- 'Nina et Lindor, ou Les Caprices du cœur' (César Pierre Ruchelet), Paris, Théâtre de la Foire Saint-Laurent, 9 Sept. 1758.
- 'La Veuve indécise' (parody, by Jean Joseph Vadé, of 'La Veuve coquette', another entry in Mouret's 'Les Fêtes de Thalie'), Paris, Théâtre de la Foire Saint-Laurent, 24 Sept. 1759.
- 'L' Isle des foux' (Anseaume & Pierre Augustin Lefebvre de Marcouville), Paris, Comédie-Italienne, 29 Dec. 1760.
- 'Mazet' (Anseaume), Paris, Comédie-Italienne, 22 Sept. 1761.
- 'La Plaisance, ou Le Procès' (Favart), Paris, Comédie-Italienne, 19 May 1762.
- 'La Nouvelle Italie' (Jean Galli di Bibiena), with André

- Jean Rigade, Paris, Comédie-Italienne, 23 June 1762.
- 'Le Milicien' (Anseaume), Versailles, 29 Dec. 1762; Paris, Comédie-Italienne, 1 Jan. 1763.
- 'Les Deux Chasseurs et la laitière' (Anseaume), Paris, Comédie-Italienne, 21 July 1763.
- 'Les Rendez-vous' (Pierre Legner), Paris, Comédie-Italienne, 22 Nov. 1763.
- 'L'École de la jeunesse, ou Le Barnevelt français' (Anseaume), Paris, Comédie-Italienne, 24 Jan. 1765.
- 'La Fée Urgèle, ou Ce qui plaît aux dames' (Favart, after a story by Voltaire derived from Chaucer), Fontainebleau, 26 Oct. 1765, Paris, Comédie-Italienne, 4 Dec. 1765.
- 'La Clochette' (Anseaume), Paris, Comédie-Italienne, 24 July 1766.
- 'Les Moissonneurs' (Favart), Paris, Comédie-Italienne, 27 Jan. 1768.
- 'Les Sabots' (Jean Michel Sedaine, after a plan by Jacques Cazotte), Paris, Comédie-Italienne, 26 Oct. 1768 (previously performed at a private house at Auteuil).
- 'Thémire' (Sedaine), Passy, privately, Aug. 1770, Fontainebleau, 20 Oct. 1770; Paris, Comédie-Italienne, 26 Nov. 1770.

Of uncertain date is a setting of Metastasio's 'Demetrio', airs of which are extant. Duni's collaboration in 'La Rosière de Salency' (Favart, 1769) is doubtful. 'Le Retour au village', sometimes quoted as an independent work, is the title of the Vienna score of Duni's setting of 'Le Caprice amoureux' (see above, 1756). At his death Duni left an opera, 'L'Heureuse Espièglerie', which was not performed.

**DUNICZ, Jan Józef** (b. Lwów, 3 May 1910; d. Dora, 3 Apr. 1945).

Polish musicologist. After completing his general education at Lwów in 1928 and his musical studies at the Lwów Conservatory in 1930, he began further studies at the University of Lwów in musicology and the Polish language. The dissertation on Adam Jarzębski, the Polish 17th-century composer, with which he obtained his doctor's degree in 1937, was published at Lwów under the title of: 'A. Jarzębski and his Canzonas and Sonatas, 1627'. Later he published in the 'Rocznik Muzykologiczny' ('The Musicological Year-Book') studies on K. Pyrzyński (1935) and on J. Szczurowski (1936), both composers of the 18th century.

In 1939 Dunicz was nominated head of the section of the music schools in the Department of Arts of the Ministry of Education. During the second world war he taught music secretly first in a village near Skiermiewice and then in Warsaw. In 1944 he began to write a study on the chamber music of Chopin. In Apr. of that year he was arrested by the Gestapo and transferred to the concentration camp at Gross-Rosen. The International Red Cross announced after the war that he had died in the camp of Dora.

G. R. H.

**DUNIECKI, Stanisław** (b. Lwów, 25 Nov. 1839; d. Venice, 16 Dec. 1871).

Polish composer. He studied in Warsaw and Leipzig, finally in Paris under Berlioz (instrumentation). He wrote many *opere*

*buffe*, operettas and vaudevilles. His main works are

- 'Pokusa' ('Temptation') (his own libretto), prod. Lwów.  
 'Pazowie Królowej Marysieńki' ('The Pages of Queen Mary') comp 1864, prod. Lwów and within a year in Vienna.  
 'Doctor Randolfo' (1866), prod Cracow.

Duniecki acted as conductor at Černauti and then settled at Cracow to compose and teach music. He also wrote incidental music for a stage adaptation of Victor Hugo's 'Les Misérables' and many songs set to words by Mickiewicz, Zaleski and Heine. For reasons of health he went to Venice, where he died shortly after his arrival. C. R. H.

**DUNKELD ANTIPHONARY.** One of the few books of early church music of Scottish provenance that have been preserved. It is in the Library of the University of Edinburgh. From the watermark we learn that the paper is of early 16th-century Normandy make. This gives an approximate date. The manuscript is in two clear handwritings — one has preserved the whole of a Mass and the other is devoted to about thirty Latin anthems in praise of the Blessed Virgin Mary. On a blank page in the body of the volume the following inscription is found: "Robert Douglas with my hand at the pen, William Fischer". It has been assumed from this that Robert Douglas was the composer of all the music in the volume. So far no trace has been found of a Robert Douglas in any of the records of Dunkeld Cathedral. As for William Fischer, he may have been a scribe, or the music may have been the property of one William Fischer, a notary, who took the test in Edinburgh in 1681.

It is evident from the binding of the volume that it was arranged in its present condition many years after the music was composed. It looks as if what is left was rescued from a collection of the pieces saved from total loss only by careful binding. All the music seems to have been originally in five parts — treble, counter-tenor and three others, either tenor or bass. The Mass is complete, and rather more than half of the anthems are also in five parts, but only fragments are available of other hymns. How the University came to acquire the manuscript is unknown. The earliest information about it is found in a catalogue of the contents of the Library dated c. 1695, and among other titles is 'Music of the Church of Dunkeld — 5 vols. — gifted by . . .'. Then there is a blank. Obviously the cataloguer did not know who the donor was.

The vellum binding carries the title 'Antiphonarium ecclesie Dunkeldensis', and it seems reasonable to accept Dunkeld Cathedral as the original home of the music. Certainly, in the early years of the 16th century Dunkeld

kept up a musical service on a considerable scale.

Alexander Miln, in his history of the cathedral in pre-Reformation days, gives us some information on the singers and their duties. He tells us that one Young was "steady in the chant", Penecuick was a "pillar of the choristers", Stephan was "sublime in musical theory and in organ playing" and Martyn a "master of music". So the little Cathedral of Dunkeld in the early 16th century was as well equipped with a capable staff of singers as the larger cathedrals at Glasgow and Aberdeen, where music was fostered and musicians were encouraged. Like all the cathedrals and most of the collegiate churches, the Cathedral of Dunkeld had its "Sang Schule", where boys were trained in the service of the church. They were specially fostered by Bishop Lawder (1452-81), and each was paid £2.10.4. It might be expected that Gavin Douglas, as Bishop of Dunkeld from 1516 to 1522 and a poet of high ability and culture, would have fostered the practice of music at Dunkeld, but as he spent most of the time of his bishopric in London, he had no opportunity of giving the cathedral his patronage.

As has been said, the manuscript is in two different scripts, and possibly two composers were represented. The Latin hymns show evidence of the influence of the Netherlanders — that great school of composition which dominated music in western Europe during the second half of the 15th century. Several of the hymns are set to music written in five parts round a canon. For instance, this is the case with the 'Regina caeli' as well as in the favourite verses taken from the Song of Solomon, 'Descendi in hortum meum'. A rather naive device is employed in this latter hymn, where the "descent" into the garden is sung through a complete octave downwards, with a melody that is pleasingly varied in the distribution of notes of different duration. The Mass is less dependent on canonical devices than the hymns, but the use of imitation in the Kyrie is ably handled. Each of the three sections of the Kyrie is admirably organized. The Sanctus is also a finely conceived piece of music and the Osanna has moments of crisis that are marked by music of an expressive character. H. M. W.

**DUNKLEY, Ferdinand (Luis)** (b. London, 16 July 1869).

American organist and composer of English birth. He studied at the R.C.M. and T.C.M. in London, but in 1893 he emigrated to the U.S.A., settling first at Albany, N.Y. After holding various organist's and educational posts, at Asheville, N.C., New Orleans, Vancouver and elsewhere, he went to Seattle in 1912 and to Birmingham (Alabama) in 1920.

Eventually he returned to New Orleans, where he remained active past his eightieth birthday as organist, choirmaster and teacher. His compositions include choral works, church and synagogue music, orchestral works, chamber music and songs.

R. A.

**Dunlap, William.** See Carr (B., 'Archers', opera).

**DUNLOP, Isobel (Violet Skelton)** (b. Edinburgh, 4 Mar. 1901)

Scottish composer. She is a granddaughter of the late Professor Darcy Wentworth Thomson and claims descent from the poet John Skelton. She studied violin with Camillo Ritter, singing with Michael Poutatine of Malta and with Sir Donald Tovey and Dr. Hans Gál in Edinburgh and Sir George Dyson in London. Having taught at Westonbirt School and Downham School, Essex, she was from 1943 to 1948 Assistant National Officer for the Arts Council of Great Britain in Edinburgh. She has given recitals of her work in London (1931) and Edinburgh (1933) and has been represented in the programmes of the Edinburgh Festival.

Isobel Dunlop's works include the following:

Incidental music for John C. Woodiwiss's 'The Lundleys'.

5-part Anthem (James I of Scotland) for chorus & organ.

'The Spirit of Earth' (Mary Webb) for women's chorus & stgs.

'Such is the Beauty' (William Soutar) for unaccompanied chorus (4 movements).

2 Tone Poems (Humbert Wolfe) for contralto & stgs.

1. The Water Queen.

2. Viols.

'Ultima Thule' for narrator, contralto & orch.

Sonata for viola & pf.

5 Preludes for pf.

4 Songs for contralto & viola.

7 Songs (Soutar) for voice & pf.

Numerous other songs, part-songs, &c.

M. L.

**DUNN, Geoffrey (Thomas)** (b. London, 13 Dec. 1903)

English tenor singer and opera producer. He was educated at the City of London School and subsequently at the R.A.M., of which he became Licentiate (for singing) in 1928 and Associate in 1932. During his student days he took part in the Glastonbury Festivals and in London appeared at the Lyric Theatre, Hammersmith, in Sir Nigel Playfair's time. Subsequently he had a wide experience not only of work for the stage but in concerts, recitals, broadcasting and television. As a concert singer he has a voice somewhat limited in colour, and his interpretations are distinguished for their lively intelligence rather than for acute sensibility, but he has the scholar's approach to all music and possesses the uncommon ability of singing the English language naturally and well. His talent, however, is primarily dramatic and he excels in the character parts of comic operas — Riccardo in A. Scarlatti's 'Trionfo dell' onore' or Galanthis in Vaughan Williams's 'The Poisoned Kiss', for example — but he

will sustain heroic parts such as the leads in Mozart's 'Idomeneo' and 'La clemenza di Tito'. These titles are typical of the works in which he has been associated with amateur companies. By participation in those scattered operatic enterprises, professional and semi-amateur, on which English musicians have to rely for their acquaintance with operas outside the ordinary repertory, Dunn made notable contributions to English opera. He has made English translations of foreign opera texts as diverse as 'Il trionfo dell' onore', Handel's 'Xerxes', Wolf's 'Der Corregidor' and Rimsky-Korsakov's 'Mozart and Salieri', and has prepared acting editions of Purcell's 'Don Quixote' and of several one-act operas by Dibdin and other 18th-century English composers. The latter were undertaken for performance by the Intimate Opera which he founded in 1930 in collaboration with Margaret Ritchie and Frederick Woodhouse. He is the author of three original librettos for operas by Brian Easdale and Herbert Murrill.

Dunn is equally at home on the West End stage, and in his productions at the R.A.M. he has dealt with Wagner, Verdi and Puccini. His production of 'Don Giovanni' at Sadler's Wells in 1949 won special praise for paying attention in the first place to Mozart's music, at a time when operatic presentation in London seemed to make a point of disregarding the composers' intentions. To all his operatic enterprises, whether of translation, production or singing, he brings a ready wit and artistic discernment. In 1931 he was made responsible for the production of the operas given annually by the R.A.M., of which he is a professor.

F. S. H.

See also Corregidor (Wolf, trans.). Murrill ('Man in Cage', lib., 4 songs).

**DUNN, John** (b. Hull, 10 Feb. 1866; d. Harrogate, 18 Dec. 1940).

English violinist. He studied with his brother at first and later went to Leipzig for a finishing course under Schrädieck, Richter and Jadassohn. On his return to England he began to make a career as a virtuoso, and he continued for many years to make sporadic appearances, mainly in the English provinces. He was remarkable for his command of technique rather than for musicianship and taste, but with better fortune and greater opportunities he could easily have won as great a reputation as many of his more successful foreign rivals.

E. B.

**DUNOYER, Alard.** See GAUCQUIER.

Dunsany, Lord. See O'Neill (incid. m. for 2 plays).

**DUNSTABLE, John** (b. ?; d. London, 24 Dec. 1453).

English composer. Martin Le Franc, writing about Dufay and Binchois in 'Le Champion des dames' says:

Car ilz ont nouvelle pratique  
De faire frisque concordance

En haulte et en basse musique,  
 En fante, en pause et en muance,  
 Et ont prins de la contenance  
 Angloise et ensuy Dunstable  
 Pour quoy merveilleuse playssance  
 Rend leur chant joyeux et notable.<sup>1</sup>

Tu as bien les Anglois ouy  
 Jouer à la Court de Bourgongne,  
 N'a pas, certainement ouy  
 Fut il jamais telle besongne.  
 J'ay veu Binchois avoir vergongne  
 Et soy taire emprès leur rebelles  
 Et du Fay despiste et frongne  
 Qu'il n'a mélodie si belle.<sup>2</sup>

Dunstable seems to have already reached the height of his renown in 1437, when these verses were written, so that Wooldridge's guess of "c. 1390"<sup>3</sup> for the date of his birth is justifiable. Jules Combarieu<sup>4</sup> gives 1370, but without producing any authority for his estimate. In Apr 1438 Dunstable compiled some tables of latitude and longitude<sup>5</sup>, which are preserved in the Bodleian Library at Oxford. His connection with the town of Dunstable in Bedfordshire is not certain, although it is suggested by the fact that he is described in another astronomical treatise<sup>6</sup> as "musician to the Duke of Bedford". In this capacity he went, presumably, to live in France with the duke, who was the brother of Henry V (the "Roy Henry" of the Old Hall Manuscript), and with a few exceptions his works are preserved not in English but in continental libraries. He was buried in St. Stephen's Walbrook in the City of London, where the original epitaph was restored in 1904, as under:

Clauditur hoc tumulo qui coelum pectore clausit  
 Dunstable Joannes Astrorum conscius ille  
 Indice novit Urania abscondita pandere coeli  
 Hic vir erat tua laus, tua lux, tibi musica princeps,  
 Quique tuas dulces per mundum sparserat artes  
 Anno Mil C quater semel L tria jungito Christi  
 Pridie natalem, sidus transmigrat ad astra.  
 Suscipiant proprium civem coeli sibi cives.<sup>7</sup>

There is no reason to suppose that "Dunstable", as his name is usually spelt in the 15th-century manuscripts, was an expatriated Englishman trying to learn foreign methods. On the contrary, the writers of the time clearly looked upon him rather as a missionary, bringing certain important things to the knowledge of the Burgundian composers. In 1471 he is mentioned at the head of a list of fifteen eminent composers by John Hothby<sup>8</sup>: Dufay follows second and Lionel Power third, and there are at least four more Englishmen in the list. In 1477 Tinctor writes:

Facultas nostrae musices tam mirabile suscepit incrementum quod ars nova esse videatur, cujus, ut ita dicam, novae artis fons et origo, apud Anglicos quorum caput Dunstable existit, fuisse perhibetur, et huic contemporanei fuerunt in Gallia Dufay et Binchois.<sup>9</sup>

Other nearly contemporary references are found in Gaforius (1496)<sup>10</sup>, an anonymous writer of Seville (c. 1480)<sup>11</sup>, Eloy d'Amerval (1508)<sup>12</sup> and elsewhere.

There was, until recently, some difficulty in determining what grounds there were for Dunstable's fame, owing to the fact that up to the end of the 19th century very little of his work had been discovered or made accessible. So tantalizing was this lack of knowledge about his compositions, especially those existing in England, that it is not surprising to find that a certain amount of nonsense has been written about him from the time of Sebald Heyden (1540) and Morley (1597) through Marpurgh and Lustig down to Davey (1895) and Eitner (1900 onwards). These mistakes were corrected in detail by William Barclay Squire in former editions of this Dictionary, and we can now pass on to more constructive information, though the time is not yet entirely ripe for the fullest criticism, so few of Dunstable's works having been actually heard; which means that the present writer is aware that he may be qualifying for a place on the penitents' form alongside the names just given when another generation has elapsed.

As a composer Dunstable seems to correspond almost exactly to what is generally meant by the word "Renaissance". His writing is as a breath of fresh sunny air after the confined and jaded atmosphere of the scholastic musicians of the *ars nova*, with their isorhythmic and other formalities. Though well versed in isorhythm, he knew when to use it and when to lay it aside, with him the fully concordant harmony, the free unfettered melody, are the features which must be allowed fullest expression. As with all great masters, technique was his servant, not his master. The knowledge of how to use the six-three chord was one of his greatest contributions to the polyphonic art. Continental composers had used this chord, but rarely and, as it were, without any definite purpose in mind; but the English writers had been using it methodically for a century or more before Dunstable, and with a definite purpose: that of providing chains of sound which are suavely harmonious in themselves but look forward unresting to their close upon the final chord in root-position. In the hands of a master such as Dunstable the style of the English specimens of 1280-1300, formal to some extent because

it belonged to the age of the scholastics, is as wax ready to take the lovely forms which a skilled humanistic craftsman will turn out. And this process was carried onward by his junior associate Dufay.

Dunstable was among those who first began methodically to bind the five items of the Ordinary of the Mass into one whole. His compatriot Lionel Power, probably older than Dunstable, should perhaps be looked upon as the leader, so far as present evidence goes. The place which the Mass has taken in the history of musical composition is so great that any details in its musical development are of interest, though the process of determining this particular point is not as yet complete. At any rate it is clear that in at least two cases Dunstable paired the Gloria with the Credo, and the Sanctus with the Agnus, instead of leaving the numbers without any thematic connection. Machaut (1364) and possibly others had achieved the unified Mass at an earlier date, but these are sporadic appearances, not systematic.

The number of Dunstable's compositions which we possess is quite considerable. Many of them are to be found in six volumes of manuscript music discovered by Haberl at Trent, in a volume in the Estensian Library at Modena (Cod. vi. H. 15) and in manuscripts at Bologna (Licco Musicale, Cod. 37) and Aosta (Seminary Library).<sup>1</sup> The Modena manuscript contains thirty-one motets, copies of which (made by W. Barclay Squire in 1892), with copies and collations from the Trent and Bologna manuscripts, are now in the B.M.<sup>2</sup>

In 1900 Miss C. Stainer printed a thematic catalogue of forty-six entries, and eight more were added in 1936 by Manfred Bukofzer<sup>3</sup>; six others have recently been found in the Aosta manuscript, but evidence from this new source makes it more than likely that three works previously ascribed to Dunstable should go under the name of Benet. Those from the Trent manuscripts have been printed in D.T.O.4, and in all fifty-two have now been published from this and other sources. A definitive edition of 'Opera omnia' has been announced (ed. Manfred Bukofzer).

Dunstable's works are, with three exceptions ('Durer ne puis', 'Puisque m'amour' and 'O rosa bella'), Latin church music. The first of these chansons is provided with a tenor and contratenor by Binchois in the Escorial manuscript IV a 24, f. 6<sup>v</sup>; but in an Oporto manuscript<sup>4</sup> the same tune is given a different tenor and contratenor, all three under the name of Bedingham. 'Puisque m'amour' occurs in three manuscripts, one of them

English<sup>5</sup>, but only in the Trent codices is the name 'Dunstable' given. The chanson is followed there by an anonymous Gloria, Credo and Sanctus on the theme 'Puisque m'amour' which may possibly be by the same composer. 'O rosa bella', perhaps the best-known work under Dunstable's name, occurs in no less than fourteen sources, testifying to its well-deserved popularity: twelve of these are anonymous, one is ascribed to Dunstable<sup>7</sup> and one to Bedingham.<sup>8</sup>

If the real authorship of this undoubted gem was known in the 15th century, it is strange that thirteen out of fourteen scribes did not know it was Dunstable's. And when it is desired to hazard the name of some composer, a distinguished name such as that of Dunstable is more likely to be inserted than that of a lesser-known man, such as John Bedingham. In the present state of our knowledge, and seeing that 'O rosa bella' is not specially reminiscent of Dunstable's style (though we have only his sacred music to guide us), it would seem that the ascription is highly doubtful and that Bedingham has as good a claim, or even better, to the production of this masterpiece. Whoever wrote it, it is a treasure. A curious use (to which attention does not seem to have been previously called) was made of it by Tinctor<sup>9</sup>, who might at least have been supposed to know the authorship, but quotes it anonymously, showing how the first strains of 'O rosa bella' and 'L'homme armé' fit together. A. H.

**DUNSTAN, Ralph** (b. Truro, 17 Nov. 1857; d. Truro, 2 Apr. 1933).

English musical educationist and composer. He completed his musical studies by taking the Mus.D. degree, and he published many educational works on the teaching of sight-singing in which he was active. A more distinctive achievement, however, is his composition of a series of liturgical masses in modal counterpoint on the plainsong of the Vatican

and the Solesmes graduals. Ten of these, together with a 'Missa pro Defunctis', were published, and a copy was accepted by Pope Pius X. Dunstan was not a member of the Roman Communion; his interest in liturgical music was aroused by R. R. Terry's exposition of it at Westminster Cathedral, from which he set himself assiduously to study the style of the old polyphony based on a plainsong foundation.

**DUPARC, Elisabeth** (b. ? , d. ? , 1778<sup>1</sup>).

Italian singer of French origin, called "La Francesina". Her name does not appear in the available operatic chronologies of Italian theatres, either before or after her stay in London, where she first appeared in Nov. 1736. According to the 'London Daily Post' of 18 Nov. of that year she

had the honour to sing [with Menghi and Chiment] before her majesty, the duke, the princesses at Kensington, and met with a most gracious reception; after which the *Francesina* performed several dances to the entire satisfaction of the court.

The accomplishment of dancing, however, she does not seem to have kept up. Her début on the stage took place a few days later, 23 Nov. 1736, when she appeared (as Elisabetta du Parc) in Hasse's 'Siroe'; she next sang in Broschi's 'Merope' and Pescetti's 'Demetrio', and in the following season (1737-38) in Pescetti's 'Arsace', Handel's 'Faramondo' (3 Jan. 1738) and several other operas. In 1739 she took part in 'Acis and Galatea', 'Saul' and 'Israel in Egypt' (where she had the doubtful honour of singing the four Italian songs which Handel was compelled to insert in order to carry the oratorio over a third performance); and in 1740-41 she was the *prima donna* of Handel's last opera season at Lincoln's Inn Fields, singing Rosmene in 'Imeneo' (22 Nov. 1740) and the name-part in his last opera, 'Deidamia' (10 Jan. 1741), in which, according to Burney, "*Nascondi l'usignol*", which finishes the first act, is a light, airy, pleasing movement, suited to the active throat of the Francesina". In 1744 and 1745 she took part in Handel's 'Joseph', 'Belshazzar' and 'Hercules'; she had quitted the stage, "but constantly attached herself to Handel, and was first woman in his oratorios for many years" (Burney).

In 1737 her portrait was engraved by J. Faber in mezzotint from a painting by George Knapton. It is a half-length and represents a pleasant, intelligent woman; she holds a music book showing a page with the beginning, probably, of one of her favourite songs.

**DUPARC, (Marie Eugène) Henri (Fouques)** (b. Paris, 21 Jan. 1848, d. Mont de Marsan, 12 Feb. 1933).

French composer. He showed little disposition for music in his childhood, but while being educated at the Jesuit College of Vaugirard (Paris) he had César Franck as pianoforte teacher, who gradually developed his musical taste. He began to devote himself to serious harmony studies, and afterwards to composition under Franck; together with Arthur Coquard and Albert Cahen, he was one of the earliest of Franck's pupils. His first published works were pianoforte pieces, 'Feuilles volantes' (1869). Disposed to be excessively self-critical, he destroyed many compositions of value, including a Sonata for cello and pianoforte (1867), 'Poème nocturne' (1873) and 'Laendler' (performed by the Société Nationale, 24 June 1874). Among those which remain a symphonic poem, 'Lénore' (1875), one of the best models of its kind, was performed at one of Pásdeloup's Concerts Populaires, 28 Oct. 1877. It was arranged for two pianos and for four hands on one piano by Saint-Saëns and Franck respectively. A "nocturne" for orchestra, 'Aux étoiles', was issued in 1910, and later a motet, 'Benedicat vobis Dominus', for 3 voices, appeared. Duparc took an active part in the contemporary musical movement till 1885, in which year he was compelled by a strange mental breakdown to give up all compositions and leave Paris. He then lived in complete retirement in Switzerland, not insane, but utterly indifferent to the past, his work and his friends.

The fourteen songs on which his reputation rests were all composed during the years 1868-84, but were not published until some years later. Two of them, 'La Vague et la cloche' and 'La Vie antérieure', were designed originally for voice and orchestra; the others were set for voice and pianoforte, although Duparc later orchestrated the accompaniments of 'Chanson triste', 'Au pays où se fait la guerre', 'L'Invitation au voyage', 'Phidylé' and 'Testament'. Undoubtedly they are all masterworks and, to quote Julien Tiersot ('Un Demi-siècle de musique française', 1918), "he has given French song an impulse, an amplitude, a power not surpassed since". Duparc shares with his contemporary Fauré the distinction of creating, in collaboration with the *poètes du verbe* of the Parnassian and Symbolist schools, a characteristic form of French art-song in the *mélodie*. Among some general observations on the composer's style may be noted his frequent reliance on a pedal-point, real or implied, with which is to be associated a habit of pivoting the melodic line about the dominant of the key; a sensuous and vivid chromaticism strengthened with well-contrived internal counterpoints; the

brevity of his instrumental preludes and ritornelli and, despite the wide compass of so many of the songs, a splendid recognition of the varying qualities in the vocal tessitura. As Georges Servières said ('Guide musical', 1895), "The songs of M. Henri Duparc . . . are absolutely original, rich and abundant in strength, with a depth of sentiment rarely found in French music".

**DU PLESSIS, Hubert L.** (b. Malmesbury district, Cape Province, 7 June 1922).

South African pianist and composer. He studied music and literature at the University of Stellenbosch (1940-42) and received instruction in composition from W. H. Bell. He continued his musical studies at the Rhodes University College, Grahamstown, under F. H. Hartmann (formerly of the State Academy in Vienna). In 1946 he was appointed lecturer in music at Rhodes University and in 1951 he received a scholarship for the study of composition at the R.A.M. in London.

Up to the present Du Plessis has been mainly attracted to the intimate musical forms: pianoforte works, songs and chamber music. His compositions are of a high standard and many have been recorded by the South

<sup>1</sup> The manuscript of a second version of this song was lost.

African Broadcasting Corporation with the composer at the pianoforte. He composes in a modern but definitely tonal idiom, with emphasis on clear, linear design. His style is exceptionally concentrated and finely polished, with no unnecessary notes, and reveals strength of form and individual harmonies. His music is dynamic and fervent, but controlled and refined.

Du Plessis's most important compositions include:

- 'Two Ghostly Poems' (Beddoes) for chorus, stgs & harp (1952).  
Serenade for stg, orch (1952).  
String Quartet (1950).  
'Six Miniatures' for pf. (1948).  
Pf. Sonata (1952).  
Song Cycle (Hendrik Marsman) (1948).  
'Vreemde Liefde', song cycle in Afrikaans (1951).  
Also settings of various English, Dutch and German poems.

G. F. S.

**DUPLET.** In musical notation a group of 2 notes or chords occupying the time of 3 in any movement bearing a time-signature in which the numerator is 3 or a multiple of 3, e.g. 3, 6, 9, 12, etc. It is the exact opposite of the triplet occurring in any movement in simple or common time (i.e. under the numerator of 2 or its multiples). Duplets are usually written thus:

but since each note in such a group occupies exactly half as much time again as each in the normal grouping of 3, and thus has the value of a dotted note, there is no reason why the practice of many modern composers should not be universally adopted and duplets be written as follows.

E. B.

**DUPLEX COUPLER PIANOFORTE** (wrongly named). See EMANUEL MOOR PIANOFORTE.

**DUPLUM.** See NOTRE-DAME SCHOOL.

**DUPONCHEL, Jacques** (b. Douai, ?; d. ? Osimo, ?)

Flemish 17th-century organist and composer. He became a monk in the Franciscan order and in 1665 was *maestro di cappella* at the basilica of the Twelve Apostles in Rome. In 1671 he was organist to Cardinal Bicchi at Osimo and at the cathedral there in 1676. His published works are 'Psalmi vespertini una cum Latinis B.M.V.' for 3 voices and organ (Rome, 1665) — his first work, according to

himself; 'Messe a 3, 4, e 5 voci concertate con Vio. e ripieni a beneplacito', Op. 3 (Rome, 1676; later ed. Venice, 1685); 'Domine probasti' for 4 voices (in 'Salmi vespertini di Caiafaleri', 1683). He is highly praised by the compiler of the last-named work.

E. v. d. s., adds

**DUPONT, Auguste** (b. Ensival nr. Liège, 9 Feb. 1827; d. Brussels, 17 Dec. 1890).

Belgian pianist and composer. He was educated at the Liège Conservatory, and after several years spent in successful travel as a pianist he was appointed in 1850 a professor of the Brussels Conservatoire.

His works for the pianoforte were numerous. A 'Concertstück' (Op. 42) and a Concerto in F minor (Op. 49), both with orchestral accompaniment, are his most ambitious works. Among his solo pieces the best are 'Roman en dix pages' (Op. 48), a set of short pieces showing the influence of Schumann, and 'Contes du foyer' (Op. 12).

J. A. F.-M.

**DUPONT, Gabriel** (b. Caen, 1 Mar 1878; d. Vésinet, 3 Aug 1914).

French composer. He was the son of Achille Dupont, organist of Saint-Pierre, Caen. He was a pupil of Widor, won the second Prix de Rome in 1901 and gained his first success with the opera 'La Cabrera' (in 2 acts), which took, in 1904, the Sonzogno prize founded by the Milanese publisher. It was produced at the Teatro Lirico of Milan on 16 May 1904. The original French libretto by Henri Cain was translated into Italian by Amintore Galli.

Endowed with a fine dramatic temperament, Dupont also composed 'La Glu' to a libretto by Jean Richepin and Cain, founded on the former's novel and play. This was produced at Nice on 26 Jan. 1910. It was followed by 'La Farce du cuvier', libretto by Maurice Léna on a 15th-century play, produced at the Théâtre de la Monnaie in Brussels on 21 Mar. 1912. His last opera was 'Antar', a romantic story by Chekri Ganem, which was being rehearsed at the Opéra when he died and was not to receive its first performance there until 11 Mar. 1921, under Chevillard. Dupont's operas are full of life, movement and ardour, and keep a high musical level. The first act of 'Antar' is especially remarkable and representative of his noble and powerful art.

Dupont also wrote a string Quartet, songs, 'Poème d'automne'; symphonic poems: 'Hymne à Aphrodite' and 'Chant de la destinée', the subject of which is indicated by a single verse by Jules Laforgue, "Berce-moi, roule-moi, vaste fatalité . . ."

'Les Heures dolentes' (14 pieces for pianoforte, of which several are orchestrated) are, as it were, his last legacy to posterity. In this music he sought both a means of expressing

his emotions and something which might distract him from them during a period of painful illness and profound distress; and it is this which makes them a collection of poignant confidences.

F. R., adds.

BIBL. — DUMESNIL, M., 'Gabriel Dupont Musicien of Normandy' (M.Q., Oct. 1944).

**DUPONT, Henri-Denis** (b. Liège, 1660; d. Liège, 1 Sept. 1727).

Walloon theologian, organist and composer. He was musically educated as a choir-boy at the Cathedral of Saint-Lambert at Liège. He hoped to succeed Guillaume de Lexhy as organist there in 1680, but lost the post in favour of one Gottire, at whose death in 1685, however, he obtained it. In 1702 he became a canon of Saint-Lambert and in 1713 he was appointed choirmaster in addition to his organist's post, Jean Noel Hamal being among his pupils. He left a valuable library, and among his compositions were 10 anthems, responses in counterpoint for the feasts of the ecclesiastical year and a 'Te Deum pro Turcarum destructione' sung in 1696 to celebrate Prince Eugene's victory over the Turks at Belgrade.

E. B.

**DUPONT, Joseph** (b. Ensival nr. Liège, 3 Jan. 1838; d. Brussels, 21 Dec. 1899).

Belgian conductor, brother of Auguste Dupont. He was educated at Liège and Brussels, and attained great distinction as an operatic conductor. He held posts of this kind successively at Warsaw (from 1867), Moscow (from 1871) and Brussels. At the last-named he was professor of harmony in the Conservatoire and conductor to the Théâtre de la Monnaie as well as the Association des Artistes Musiciens from 1872. In the following year he succeeded Vieuxtemps as director of the Concerts Populaires. During the final seasons of Gye's management of Italian Opera in London Dupont conducted many of the most important performances given at Covent Garden.

J. A. F.-M.

**DUPONT, Jean Louis** ("Dupont le cadet") (b. Paris, 4 Oct. 1749; d. Paris, 7 Sept. 1819).

French violoncellist. He was the younger son of a dancing-master and first dancer at the Paris Opéra, and a pupil of his elder brother, Jean Pierre Dupont. He made his début at the Concert Spirituel in 1768. The arrival of Viotti in Paris in 1782 inspired Dupont to imitate the breadth and brilliancy of style of that great violinist, and thus to become the extraordinary player he was. About this time he made the acquaintance of Crosdill and at his invitation visited London for six months. On the breaking out of the Revolution he joined his brother in Berlin and entered the royal orchestra. It was either with him or his brother — probably with him — that Beethoven played his two Sonatas for

cello and pianoforte (Op. 5) at the Prussian court in 1796.

The younger Duport returned to Paris in 1806, ruined by the war. He gave a concert in 1807 with Isabella Colbran (the future wife of Rossini) which created great enthusiasm. He entered the service of the ex-king of Spain at Marseilles, but returned to Paris in 1812. At length fortune smiled on him. He appeared three times at the Odéon concerts during the winter of 1812-13; he was admitted into the private orchestra of Marie-Louise, then into that of the emperor, and at last became professor at the Conservatoire, until its suppression in 1815. He remained afterwards a member of Louis XVIII's orchestra.

In the evening of his life Duport composed a great deal, but the work by which he survives is his 'Essai sur le doigtier du violoncelle et la conduite de l'archet, avec une suite d'exercices' (English and German translations). A sentence from this work exhibits the modesty of a great artist:

Tout le monde connaît le coup d'archet martelé ou staccato; c'est une affaire de tact et d'adresse. Il y a des personnes qui le saisissent tout de suite, d'autres ne parviennent jamais à le faire parfaitement. *Je suis du nombre* [p. 171].

He is considered as the originator of the modern technique of his instrument. His cello, a Stradivari, became the property of Franchomme, who purchased it from his son for the enormous sum of 25,000 francs (£1000).

G., adds. M. L. P.

See also Nadermann (collab. in Nocturnes for cello & harp).

**DUPORT, Jean Pierre** ("Duport l'aîné") (b. Paris, 27 Nov. 1741; d. Berlin, 31 Dec. 1818).

French violoncellist, brother of the preceding. He was considered the best pupil of Berthaut and played with success in Paris at the Concert Spirituel in 1761. He was attached to the Prince de Conti's orchestra until 1769, when he travelled to England. In 1771 he went to Spain and finally, in 1773, on the invitation of Frederick the Great, settled in Berlin as first cellist in the royal orchestra, and after Frederick's death director of the court concerts.

After the battle of Jena Duport's post was abolished, but he continued to live in Berlin till his death. His pupil was the future king, Frederick William II. His compositions, which were not numerous, consist of music for his instrument. They include the Minuet on which Mozart wrote variations (K. 573) when he met Duport during his visit to Berlin in 1789. His tone on the cello was beautiful and he played the most difficult passages with ease; but he had not in his playing the large and expressive style which was so remarkable in his brother's playing. G., adds. M. L. P.

See also Mozart (pf. vars. on minuet).

**DUPRÉ, Marcel** (b. Rouen, 3 May 1886). French organist and composer. His family has been devoted to music for more than a century.

When he was ten years old (at the Festival of the Exhibition of 1896 at Rouen) he played from memory preludes and fugues by Bach, at the age of twelve he was appointed titular organist of Saint-Vivien, Rouen. In 1901 the first of his compositions was performed, a biblical oratorio 'Le Songe de Jacob'. He became the most brilliant pupil of his time at the Paris Conservatoire and gained the first prize for pianoforte playing in Diémer's class (1905); the first prize for organ playing in Guilmant's (1907); the first prize for fugue in Widor's (1909); the Grand Prix de Rome on 4 July 1914.

In 1906 Dupré was chosen by his master, Widor, to act as his assistant organist at Saint-Sulpice. From 1916 until 1922 he held with distinction the organist's post at Notre-Dame, during the enforced absence, owing to ill-health, of Louis Vierne. In 1920 Dupré set the seal upon his reputation by playing from memory, in ten recitals at the Paris Conservatoire, the complete organ works of J. S. Bach. These recitals were attended by a distinguished public and achieved a triumph. Ever since this début he has been in constant demand as an organ recitalist. His first London recital was at the Royal Albert Hall in 1920. With the exception of the war years of 1939-45 he has toured England almost every year since then. A close friend of Sir Henry Wood, to whom he dedicated his Symphony for organ and orchestra, Op. 25 (first performance Promenade Concert, 9 Sept. 1930), he was a frequent visitor to the pre-war Handel Festivals and Promenade Concerts, where his performance of the Handel organ concertos (in Wood's arrangement) and his improvised cadenzas were a feature.

In 1921 he repeated his Bach series in Paris at the Trocadéro (now the Palais de Chaillot) on the famous Cavallé-Coll organ (now rebuilt by Gonzalez), and also at Montreal. The success of his first trans-continental tour of North America that year led to his return in 1922 for a tour of ninety-four recitals and in 1923 for a tour of one hundred and ten. He again toured the U.S.A. in 1924, 1929, 1933, 1937, 1939, 1946 and 1948, combining recitals with master classes at the University of Chicago on the last two occasions. He toured Australia in 1939.

In Jan. 1926 Dupré was appointed professor of the organ at the Paris Conservatoire in succession to Eugène Gigout and in 1934 organist at Saint-Sulpice in succession to his old master, Widor. In 1947 he was appointed director of the American Conservatory at Fontainebleau.

As performer and teacher Marcel Dupré has exercised a greater influence than any organist of his day. With few exceptions the most distinguished French and American organists of this generation have studied with him. For some years his recital programmes have followed one general scheme: a work by Bach, a 19th-century work (Franck, Liszt, Widor, etc.), a work of his own and an improvisation to conclude.

He has few rivals in the field of improvisation, where his remarkable organ technique is at the service of a musical brain of a high order. He excels in the strict forms, such as fugue. For him improvisation is a musical science which can be imparted. He has expounded its principles in his 'Traité d'improvisation' and taught it successfully to many pupils. Improvisation has no doubt been the origin of many of his organ compositions, and these form the bulk of his work. The four movements based on plainsong themes which comprise the Passion Symphony, Op. 23, were first improvised at the Wanamaker Auditorium, Philadelphia. Dupré was afterwards persuaded by a number of American musicians to set down what he could remember of them.

The secularization of the organ in France, begun in the music of his ancient precursors such as Dandrieu and Daquin, and stabilized in the "symphonies" of his more immediate masters, Widor and Vierne, is apparent in Marcel Dupré's organ music. Most of this, even where it treats of religious subjects such as the 'Chemin de la Croix', Op. 29, is written in a concert or symphonic rather than liturgical or classical organ style. Such purely liturgical works as the 'Élévations' or 'Versets' are slight in comparison.

Except where it has an avowed educational intention (the 79 chorales, 'Le Tombeau de Titelouze') Dupré's organ music is of considerable difficulty. While the basis of his harmonic style is tonal, diatonic and chromatic dissonance are pushed to extreme limits in the works written after the Passion Symphony. In the matter of musical construction Dupré has always shown a masterly facility; two organ "symphonic poems" ('Évocation', Op. 37, and 'Vision', Op. 44) show him experimenting in a new mould.

## CATALOGUE OF WORKS

### CHURCH MUSIC

- Op.  
2. 'Deux Chœurs' (MS).  
9. 4 Motets.  
17. 'De Profundis' for solo voices, chorus, organ & orch.  
34 (No. 2). 'Ave, verum corpus.'

### CANTATA

4. 'Psyché' (for Grand Prix de Rome).

### ORCHESTRAL WORKS

- Op.  
14. 'Marche militaire' (MS).  
15. 'Orientale' (MS).

### PIANOFORTE AND ORCHESTRA

- 8 'Fantaisie', B m.

### ORGAN AND ORCHESTRA

- 19 (No. 2). 'Cortège et litanie'  
25 Symphony, G m  
31 Concerto, E m  
33. 'Verdun: poème héroïque', with brass

### ONE INSTRUMENT AND PIANOFORTE

5. Sonata for vn.  
10 2 Pieces for clar.  
13. 2 Pieces for cello.

### PIANOFORTE MUSIC

12. 6 Preludes.  
19. 4 Pieces.  
22 Variations, C# m

### ORGAN MUSIC

1. Élévation (for harmonium) (MS).  
7. 3 Preludes and Fugues (B m, F m, G m).  
16 Scherzo.  
18. 15 'Versets'  
19 (No. 2). 'Cortège et litanie'  
20. 'Variations sur un vieux Noël.'  
21. 'Suite bretonne.'  
23. 'Symphonie-Passion.'  
24. 'Lamento.'  
26. Symphony No. 2.  
27. 7 Pieces.  
28. 79 Chorales.  
29. 'Le Chemin de la Croix.'  
32. 3 'Élévations'.  
34 (No. 1). 'Angelus'  
36. 3 Preludes and Fugues (E m, A# m, C m).  
37. 'Évocation.'  
38. 'Le Tombeau de Titelouze.'  
39. Suite.  
40. 'Offrande à la Vierge', 3 pieces.  
41. 2 'Esquisses'.  
43. 'Paraphrase sur le "Te Deum".'  
44. 'Vision'  
45. 8 Little Preludes (for harmonium).  
46. 'Miserere mei'  
47. Psalm XVIII, 'Coeli enarrant gloriam Dei.'

### ORGAN AND PIANOFORTE

- 30 'Ballade.'  
35 Variations on 2 Themes.  
42. 'Sinfonia.'

### SONGS

- 3 'Marquise' (Armand Sylvestre).  
6. 'Quatre Mélodies' (Pierre Louÿs).  
11. 'Chansons à l'amie perdue' (Auguste Angellier)

### TRANSCRIPTIONS FOR ORGAN SOLO

- Mozart, Fugue, C m. (for 2 pfs).  
Handel, 16 Organ Concertos.

### TRANSCRIPTIONS FOR ORGAN AND ORCHESTRA (MS)

- Bach, Toccata, Adagio and Fugue  
Liszt, Fantasia and Fugue on 'Ad nos ad salutarem undam'  
Liszt, 'Saint François de Paule marchant sur les flots'.

### EDUCATIONAL WORKS

- 'Exercices préparatoires à l'improvisation.'  
'Traité d'improvisation.'  
'Cours analytique d'harmonie.'  
'Cours de contrepoint.'  
'Cours de fugue.'  
'Manuel de plain-chant.'  
'Données d'acoustique.'

BIBL.—DELESTRE, R., 'L'Œuvre de Marcel Dupré' (Paris, 1952)

**DUPREZ, Gilbert** (b. Paris, 6 Dec. 1806; d. Passy nr. Paris, 23 Sept. 1896).

French tenor singer and composer. He was the thirteenth of the twenty-two children of a Paris perfumer. His first appearance was in 1820 as a boy treble in the incidental music to Racine's 'Athalie', composed by Fétis and produced at the Comédie-Française. Having completed his studies under Choron at his Conservatory, he made his début (Dec. 1825) as tenor at the Théâtre de l'Odéon, where Castil-Blaze was producing his translations of the favourite operas of Rossini and Weber. His success was not great, and when the theatre closed in 1828 he went to Italy. At first he attracted little attention; but having altered his style and adopted the *voix sombre* he became speedily popular, and by his creation of the part of Edgardo in 'Lucia di Lammermoor' (Naples, 1835) he placed himself at the head of the French dramatic singers of his time.

After his return to Paris Duprez was engaged for the Opéra and made his first appearance (17 Apr. 1837) in Rossini's 'Guillaume Tell'. During the eight years he remained at this theatre he created the principal tenor parts in Halévy's 'Guido et Ginevra', Berlioz's 'Benvenuto Cellini', Auber's 'Le Lac des fées', Donizetti's 'Les Martyrs' and 'La Favorite', Halévy's 'La Reine de Chypre' and 'Charles VI', Donizetti's 'Dom Sébastien' and 'Lucia', Rossini's 'Otello' and Verdi's 'Jérusalem' (a translation of 'I Lombardi'), as well as playing the parts created by Nourrit in Auber's 'La Muette', Meyerbeer's 'Robert' and 'Les Huguenots', Halévy's 'La Juive' and Flotow's 'Stradella'. His physical appearance was against him, and he had a propensity to over-gesticulation; but in spite of these defects he made his way as a tragedian and was frantically applauded for his excellent declamation and the smoothness of his *canto spianato*. His two most serious faults were said to be the abuse of the *notes sombres*, so prematurely wearing to the voice, and a habit of dragging the time.

Duprez was professor of singing at the Conservatoire from 1842 to 1850, and in 1853 he founded an École Spéciale de Chant which turned out many dramatic singers. He composed an oratorio, 'The Last Judgment', a Requiem and other sacred works, romances, chamber music, two Masses and eight operas, of which the best are 'Joanita' (1851), 'La Lettre au bon Dieu' (1853) and 'Jeanne d'Arc' (1865), though none of the eight has any originality. He also published 'L'Art du chant' (1845) and 'La Mélodie' (1873), two methods which deserve to be better known. His 'Souvenirs d'un chanteur' (1888) and 'Récréations de mon grand âge' are very interesting.

G. G.

**DUPRIEZ, Christian** (b. Brussels, 1 Mar. 1922).

Belgian organist, pianist and composer. He is a son of the numismatist Charles Dupriez. He studied art and literature at first, and in 1939 obtained the Prix Littéraire de l'Union Cinquie Belge, but later took to music, studying at the Brussels Conservatoire. His works include a 'Symphonie intime' in three movements, a 'Marche perpétuelle' (funeral poem) and a 'Caprice symphonique' for orchestra, written in 1947-48, two 'Divertissements en non-stop' for chamber orchestra, a piano-forte Concerto, a 'Suite brève' for organ and a number of songs. Two works for piano-forte were orchestrated later, the 'Valse pour la grande amie' by Lucien Cailliet for radio transmission in America and the 'Tambourin pour servir de thrène à Maurice Ravel' by himself.

E. B.

**DUPUIS, Albert** (b. Verviers, 1 Mar. 1877).

Belgian conductor and composer. He was very precocious as a child and learnt piano-forte, violin and flute at the Music School of Verviers at an early age. Later he studied under d'Indy and Guilmant at the Schola Cantorum in Paris and took the Belgian Prix de Rome in 1903 with 'Les Cloches nuptiales'. He became choral conductor to the Concerts d'Harcourt in Paris and in 1908 director of the Verviers Music School.

Dupuis's principal works are the following:

#### OPERAS

- 'L'Idylle' (1896)
- 'Bilitis' (1899).
- 'Jean-Michel' (1903).
- 'Martille' (1906).
- 'Fidélaine' (1911).
- 'La Chanson d'Halewyn' (1913)
- 'Le Château de la Breteche' (1914).
- 'La Passion' (1915)
- 'La Délivrance' (1921)
- 'La Victoire' (1923)

#### ORATORIO

- 'La Captivité de Babylone' (drame biblique).

#### ORCHESTRAL WORKS

- Symphony.
- Symphonic pieces.
- Concertos for pf., vn., cello & horn.

#### CHAMBER MUSIC

- String Quartets.
- Pf. Trio.

E. B.

**DUPUIS, Sylvain** (b. Liège, 9 Oct. 1856; d. Bruges, 28 Sept. 1931).

Belgian conductor and composer. He came of a musical family and studied at the Liège Conservatory, taking the Belgian Prix de Rome in 1883 with 'Le Chant de la Création'. Having travelled in Italy, France and Germany he became in 1886 professor of harmony at the Liège Conservatory and the following year conductor of the choral society La Royale Légia. He also founded the Nouveaux Con-

certs, at which he conducted many new orchestral works by Belgian and foreign composers. In 1900 he was appointed conductor by the Théâtre de la Monnaie and of the Popular Concerts in Brussels, but he returned to Liège in 1911 as director of the Conservatory.

The following are Dupuis's chief compositions:

- 'Cœur d'Oignon', Walloon opera.
- 'Molna', opera.
- Cantatas: 'La Cloche Roland', 'Camoëns', 'Judas'.
- 'Macbeth', lyric episodes after Shakespeare for orch.
- Overtures and suites for orch.
- Concertino for oboe & orch.
- Instrumental pieces.
- Pf. works.

E. B.

**DUPUIS, Thomas (Sanders)** (b. London, 5 Nov. 1733, d. London, 17 July 1796).

English organist and composer. He received his early musical education in London as a chorister of the Chapel Royal under Bernard Gates and subsequently became a pupil of John Travers, then one of the organists of the Chapel Royal. He was elected a member of the Royal Society of Musicians on 3 Dec. 1758. He married on 16 July 1705 Martha Skelton of Fulham. In 1773 or earlier he was organist of the Charlotte Street Chapel, near Buckingham Palace.

On the death of Boyce in 1779 Dupuis was appointed his successor as organist of the Chapel Royal. On 26 June 1790 he accumulated the degrees of Bachelor and Doctor of Music at Oxford. He died from an overdose of opium at his house in King's Row, Park Lane, and was buried on 24 July 1796 in the west cloister of Westminster Abbey.

Dupuis published during his lifetime several sonatas and concertos for the pianoforte, some organ pieces, chants, anthems and glees. In the year after his death a selection from his cathedral music was published under the editorship of John Spencer, one of his pupils, to which his portrait is prefixed. W. H. H.

**DU PUY, Jean Baptiste Édouard** (b. Corcelles, Neuchâtel, 1770 or 1771; d. Stockholm, 3 Apr. 1822).

Swiss violinist, singer and composer. He studied in Paris with Francesco Chabran (violin) and Dussek (pianoforte) about 1783. In 1785 he was leader at the private theatre of Prince Henry of Prussia at Rheinsberg, and by 1793 he was in Stockholm, where he became a member of the Swedish Academy of Music in 1795. He was turned out for political reasons in 1799 and went to Copenhagen, where he earned a reputation both as a composer and a singer (he was the first to sing the title-part in Mozart's 'Don Giovanni' there in 1807). His stay in Denmark came to an end when Princess Charlotte Frederika of Mecklenburg (consort of Prince Christian Frederik, afterwards Christian VIII), whose singing-master

he was, fell in love with him. Both were exiled in 1809, and Du Puy then went to Paris; but in 1811 a change in the Swedish political situation enabled him to return to Stockholm, where he died as court conductor and professor.

Du Puy's works include several ballets; ballet music for Cherubini's 'Lodoiska' (1795); additions to Dezède's 'Les Trois Fermiers' (1797); parts of a pasticcio, 'Eremiten' (1798); music for Shakespeare's 'Hamlet' (1819) and incidental music for various other plays; hymns, etc., for state occasions ('Foreningen' [2 Jan. 1815] for the celebration of the union of Sweden and Norway; funeral music for Charles XIII [1818]). The opera 'Ungdom og galskab' ('Youth and Folly'), a Danish version of Méhul's 'Une Folie', was produced at Copenhagen in 1806 and given there more than 200 times until 1911. It was also performed in Sweden and Germany (Kiel, 1930). A second opera, 'Felicie' (also adapted from a French libretto), produced at Stockholm in 1821 and heard at Copenhagen in 1823, was much less popular.

**DUQUESNOY, Charles** (real name Charles-François Honoré Lanctin) (b. Beuzet, prov. of Namur, 1759; d. Brussels, 9 May 1822).

Netherlands tenor singer and composer. He learnt music as a choir-boy, showing himself exceptionally gifted, and in 1787 he joined the Théâtre Royal de la Monnaie at Brussels, where he sang tenor parts in opera and showed high merit as a singer. He changed his name at his family's desire. He developed a gift for composition, mainly of church music, though he also wrote for the stage. When the French revolutionary army invaded the southern Netherlands in 1794 he fled to Holland, where he lived at The Hague until 1795, shortly after the French had crossed the Dutch border. He then established himself at Hamburg, where, with the aid of a few musicians from the Brussels Monnaie theatre, he founded an opera-house for the numerous French emigrants.

In 1802, under the Consulate of Napoleon and after the promulgation of the "Concordat", Duquesnoy returned to his native country and became choirmaster at Aalst. In 1814 he was appointed to a similar post at the church of Saint-Michel and Sainte-Gudule at Brussels, where he exerted a great and lasting influence on the practice of liturgical music

in the Roman Catholic Netherlands, both as composer and as choirmaster. This influence was still felt after his death and even after the establishment of the independent kingdom of Belgium in 1830.

The largest part of Duquesnoy's works are kept in manuscript in the Library of the Koninklijk Vlaams Conservatorium at Antwerp and some are in that of the Brussels Conservatoire Royal de Musique. The following is a chronological list<sup>1</sup>:

- <sup>1</sup> 'Dixit', psalm and symphony, 1775 (A).
- <sup>2</sup> 'Ad te levavi', Psalm CXXII, 1775 (A).
- <sup>3</sup> 'Deus noster', with orch., 1775 (A).
- <sup>4</sup> 'Te Deum', with orch., 1778 (A).
- <sup>5</sup> Mass without orch., 1779 (A).
- <sup>6</sup> 'Regina coeli', oratorio, 1784 (A).
- <sup>7</sup> 'Almangor', ballet, 1787.
- <sup>8</sup> '1<sup>re</sup>, 12<sup>e</sup> et 13<sup>e</sup> Ode sacrée de J. B. Rousseau', 1787-89 (A).
- <sup>9</sup> 'Amymone', cantata, 1790 (A).
- <sup>10</sup> Mass with orch., 1790 (A).
- <sup>11</sup> 'Le Prix des arts, ou La Fête flamande', opera, 1791 (A).
- <sup>12</sup> 'Les Surprises de la baronne provinciale', opera, 1791.
- <sup>13</sup> 'Homage à Bruxelles' (? opera), 1793.
- <sup>14</sup> 'Prière à l'éternel', overture and chorus, 1794 (A).
- <sup>15</sup> 'La Fête des mariages, ou Le Tirage de la milice', opera, 1798.
- <sup>16</sup> 'Missa solennis', 1812 (A).
- <sup>17</sup> 'Cantique de Moïse', with orch., 1812 (A).
- <sup>18</sup> 'Missa cui titulus, Vivat Rex!', 1816 (B).
- <sup>19</sup> 'Alleluia', chorus, 1816 (B).
- <sup>20</sup> Mass, 1819-20 (A).
- <sup>21</sup> 'De profundis', 1821 (B).

The opera 'Le Mari garçon' and various religious works, undated, are also at Antwerp.

The 'Regina coeli and Psalm LXXXVI' (MS Bib. Nat., Paris, 1764), ascribed to Charles Duquesnoy by Eitner, is the work of a French contemporary composer named Duquesnoy, who was a music teacher at Noyon

**DUR** (Ger.). The German word for "major" in reference to keys; the equivalent of "minor" is "moll". These terms are derived from the Latin *durum* and *molle*. G.

See also Hexachord.

**DURÁN, José** (b. ?; d. ?).

Spanish (Catalan) 18th-century conductor and composer. He was conductor of the Opera at Barcelona and of the private band of the Marqués de los Vélez. His 'Antigono', a setting of Metastasio's libretto, was given at Barcelona on 10 July 1760. 'Temistocles' (1762), an arrangement in Spanish of Metastasio's play, was written in less than a month "owing to the non-appearance of what was expected from Italy". Durán presumably studied at Naples, since he is described in the libretto as "catalán, maestro de capilla napolitano".<sup>2</sup>  
J. B. T., adds.

**DURAND & CIE.** One of the principal French music-publishing firms. It came into existence on 30 Dec. 1869 by a partnership

between Auguste Durand and Schoenwerk for publishing and selling music. On the same day the new firm, Durand, Schoenwerk & Cie, acquired the catalogue and premises of the music publisher Alexandre Flaxland (formerly Martin), 4 Place de la Madeleine, Paris, a firm founded in 1847. On the admission of Auguste Durand's son, Jacques, to the board (20 Nov. 1891) the name of the firm was changed to A. Durand & Fils. On Auguste Durand's death the company was reconstituted (23 Dec. 1909) as Durand & Cie with Jacques Durand and Gaston Choissel as directors. René Dommange joined the board in 1921. The present directors (1954) of the firm, which was turned into a private limited company in 1947, are Mme Jacques Durand, René Dommange and Adrien Raveau.

Durand & Cie are the publishers of nearly all the works of Saint-Saëns and many by Bizet, Castillon, Chausson, Debussy, Dukas, Durufé, Fauré, Franck, Guy-Ropartz, d'Indy, Lalo, Messiaen, Poulenc, Ravel, Roger-Ducasse, Roussel, Florent Schmitt, Vierne and others. Many of these names figure as editors of the famous 'Édition Classique'.  
F. A. (ii).

**DURAND, Auguste (Frédéric).** See DURANOWSKI.

**DURAND, (Marie-) Auguste** (b. Paris, 18 July 1830; d. Paris, 31 May 1909).

French organist and composer. He was a fellow-student of Saint-Saëns and Franck at the Paris Conservatoire. Later he became organist of various Paris churches and the founder of the publishing firm bearing his name.  
F. A. (ii).

**DURAND, Jacques (Massacrie)** (b. Paris, 22 Feb. 1865; d. Bel-État, 22 Aug. 1928).

French music publisher and author, son of the preceding. He published 'Quelques Souvenirs d'un éditeur de musique', 2 vols., 1865-1909, 1910-24 (1925). He was the recipient of Debussy's 'Lettres à son éditeur' (1927), and himself wrote 'Éléments d'harmonie', 'Abrégé de l'histoire de la musique' and 'Abrégé historique et technique de l'édition musicale'.  
F. A. (ii).

**Durandi, Jacopo.** See Cherubini ('Armida abbandonata', lib.). Haydn ('Armida', lib.).

**DURANOWSKI (Durand), August Fryderyk** (b. Warsaw, 1770; d. Strasbourg, 1834).

Polish violinist and composer. His father, a French *émigré* named Durand, was a musician at the court of Prince Ogiński at Słonim and later at the royal court in Warsaw. He married a Polish girl and adopted a Polish version of his French name. His son was first his pupil, but later was sent at the expense of Prince Ogiński to Paris, where he became a pupil of Viotti in 1789. He soon accomplished

<sup>1</sup> (A) = MS at Antwerp; (B) = MS at Brussels.

<sup>2</sup> See Cotarelo y Morán, 'Orígenes y establecimiento de la ópera en España' (Madrid, 1917).

perfection in the technique of the violin. In 1794 and 1795 he travelled in Germany and Italy, meeting everywhere with sensational success. According to Fétis, Paganini confessed that his style and many of his virtuosic and popular effects were to a considerable extent derived from Duranowski, whom he had heard when young. There can be no doubt that Duranowski excelled in playing a melody on the upper strings with the bow while with his left hand he produced on the lower strings a peculiar kind of accompaniment with *pizzicato* notes.

At the height of Duranowski's career, which was impeded by irregular habits, he suddenly discarded the violin and volunteered for the French army, becoming adjutant to General Menou. Owing to some misconduct, he was imprisoned at Milan, but fortunately soon released by the general himself. He then quitted military service and returned to the violin. During the years 1810-14 he lived chiefly in Germany, but his restless nature forced him to move from one place to another. He gave a series of concerts at Dresden, Cassel and Leipzig as well as in Prague and Warsaw. For a short time he acted as principal violinist at the ducal court of Cassel and at Aschaffenburg. Finally he settled at Strasbourg as leader of the theatre orchestra, remaining there until his death.

Duranowski's numerous compositions include a violin Concerto in A major (Op. 8), 'Airs variés' for violin and orchestra, violin duets published in 5 series, the extremely difficult 'Six Études' (Op. 15), fantasies, caprices, potpourris and several German songs.

See also Franck (C, ded. of organ piece)

**DURANTE, Francesco** (b. Frattamaggiore nr. Naples, 31 Mar.<sup>1</sup> 1684; d. Naples, 13 Aug. 1755).

Italian composer. He studied at the Conservatorio di Sant' Onofrio, Naples, where his uncle, Don Angelo Durante, was principal teacher in 1690-99 and 1702-4. Villarosa and Florimo dispute the statement in Choron and Fayolle's 'Dictionnaire historique des musiciens' (1810) that Durante left the conservatory at an early age and went to Rome, where he studied for five years under Pasquini and Pitoni; but this story appears already in the 'Voyage pittoresque, ou Description des royaumes de Naples et de Sicile' (1781) by J. C. Richard de Saint-Non, who derived his information on the musicians of Naples from Piccinni, himself a pupil of Durante's. Furthermore, a letter from Girolamo Chiti to Padre

Martini<sup>2</sup>, dated 10 Sept. 1746, with reference to a mass performed in Rome, calls Durante "scolaro di Pitoni". There is therefore good reason to believe Villarosa and Florimo to have been wrong on this point, as they have been shown to be on so many others.<sup>3</sup> It seems possible that Durante's uncle, who was not only *maestro di cappella*, but also rector, of the Conservatorio di Sant' Onofrio from 1690 to 1699, may have gone himself for some purpose to Rome between 1699 and 1702, when he resumed teaching at the Neapolitan conservatory, and have taken his nephew with him. Such training under Pitoni in Rome would account for Durante's lifelong predilection for contrapuntal church music and his avoidance of the opera-house, unusual in a Neapolitan.

In July 1710, at the age of twenty-six, Durante became second master at the Conservatorio di Sant' Onofrio. Six months later, on 12 Jan. 1711, he resigned, and he took on no other teaching appointment at Naples until 1728. Nothing is known of his activities between those dates. There are persistent statements in the early biographical accounts that he spent some years in Germany. Thus A. Muzzarella in Vol. III of Martuscelli's 'Biografia degli uomini illustri del regno di Napoli' (1816) says Durante was for many years at Wittenberg, where he was much beloved and exerted a wide influence. The statement of Ginguené, in his life of Piccinni, that Durante returned from Saxony in 1744, and that occurring in connection with the biography of Pergolesi, who is said to have become a pupil of Feo when Durante was called by Charles VI to Vienna, can be shown to be chronologically impossible. Nevertheless they may be based on somebody's inexact recollections of actual events. For seventeen years we know nothing of Durante's life, and a prolonged stay at Wittenberg or elsewhere would do something, too, to account for his European celebrity in his time, which is not easily explicable if he spent all his days teaching at Naples.

The dates of his various appointments at the Neapolitan conservatories have been established by Di Giacomo. His first brief period as second master in his own old school has already been recorded. He was *maestro di cappella* at the Conservatorio dei Poveri from 1728 to 1739.

<sup>1</sup> Federico Parisini, 'Carteggio inedito del P. Giambattista Martini coi più celebri musicisti del suo tempo' (Bologna, 1888).

<sup>2</sup> Besides "establishing" the wrong date of birth, Villarosa says Durante studied under Greco at the Conservatorio dei Poveri di Gesù Cristo until it was disbanded, and was then sent to the Conservatorio di Sant' Onofrio, to complete his studies under Alessandro Scarlatti. Florimo pointed out that the Conservatorio dei Poveri was in existence up to 1744, when Durante was 60, but still maintained that Greco and Scarlatti were his teachers. Salvatore Di Giacomo has shown that Scarlatti never taught at either the Poveri or Onofrio conservatories.

<sup>3</sup> Not 15 Mar., as hitherto held. See the entry concerning Durante's baptism in the registers of the parish church of Frattamaggiore, reproduced in facsimile in Rocco Fimmano's 'Per la posa della prima pietra del monumento a Francesco Durante in Frattamaggiore' (Naples, 1930).

He became *primo maestro*, as Leo's successor, in the Conservatorio di Sant' Onofrio again in Jan. 1745 and taught there until 1755. He taught also at the Conservatorio di Santa Maria di Loreto from 1742 until 1755, holding the two appointments concurrently for the last ten years of his life.

There can be no doubt that Durante was a great teacher. His pupils include Vinci, Duni, Pergolesi, Guglielmo, Traetta, Sacchini, Piccinni and Paisiello. The last-named in his own old age, in an interview with one Agostino Gervasio, spoke with enthusiasm and love of his old master, although he had at that time few good words to say of anybody else.<sup>1</sup>

Durante seems to have been a man of the utmost integrity, at once simple and profoundly wise. We find him, in the records of the Neapolitan conservatories, called in to compose the differences between his more excitable colleagues. He was a great "character", who bore the sorrows and afflictions of his life with a positively superhuman equanimity. He was thrice married, the first time to a real termagant, who lived for nothing but the lottery. She tried his patience sorely, and he was obliged to work extremely hard, and even deprive himself of sleep at nights, in order to earn enough to enable her to satisfy her passion for gambling. He returned one day from a journey to find she had sold all his compositions in manuscript. He sat down calmly and began the long task of writing them out again from memory. At length death relieved him of this encumbrance, and after a short time he married his servant, a young girl, "di bellissime forme", whom he tenderly loved and with whom he was very happy until she too died. The strength of character he exhibited at this time was extraordinary. He arranged and himself conducted the music for the funeral ceremony in his home, after which, with tranquil resignation and without displaying any sign of emotion, he lifted the body from the bed where it lay and deposited it in the coffin. Then, having embraced his dead wife for the last time, he covered her face with a piece of fine linen and himself nailed down the coffin lid. He later married another of his servants.

His simple manners were endearing. Always rather slovenly dressed, he nevertheless attached considerable importance to his wig, on which a good deal of his dignity depended. In order not to disarrange it he would carry his three-cornered hat under his right arm and would often be seen to stop in the streets and purchase some fresh figs, which he put in his hat and consumed on the way to the conservatory. He seems to have been fond

of fruit: Paisiello records that he died "of a diarrhoea brought on by a feed of melons".

In his lifetime Durante's reputation as composer was very great. His manuscripts are found in all the important European libraries, with an exceptionally extensive collection in the Paris Conservatoire. Rousseau called him "the greatest harmonist of Italy, that is to say, of the world" — a tribute which to-day seems exaggerated. Durante had differences of opinion with Leonardo Leo over points of style and technique in church music, and the dispute was continued among their followers and pupils, who were known respectively as the "Durantisti" and the "Leisti". It is not easy to-day to discover wherein precisely their differences lay. Villarsosa says the points at issue were the "accompagnamenti della quarta del tono" and whether the fourth was a consonance or a dissonance. Edward J. Dent, one of the few modern musicologists who have studied the works of these two composers, characterizes them in this way:

Durante is sentimental; Leo is not. Durante's technical skill was no doubt quite as great as Leo's in the matter of counterpoint. But he has no great love for massive contrapuntal effects. His parts weave in and out on purely conventional lines, the same sequences and imitations are perpetually recurring, and his most individual moments are to be found in his somewhat sugary solos. When he is at his very best, he is most touchingly beautiful, and seems to foreshadow Mozart. But Durante could not keep his style up to a high level for any length of time, and soon sinks back to the commonplace. Leo hardly ever attempts the pathetic, and if he has a fault, it is dryness. But his sense of tonality and form is strong, his fugues may be devoid of sentimentality, but they are vigorous. . . . This difference of temperament between Leo and Durante caused the next generation of Neapolitan composers to fall into two groups, the "Leisti" and "Durantisti". The disciples of Leo aimed at richness of harmony, at part-writing and counterpoint — in short, at scientific composition, in the best sense of the word. Durante's disciples were all for clearness and facility.<sup>2</sup>

Durante's works include 3 oratorios: 'La cerva assetata' (Naples, 1719), 'Abigaile' (Rome, 1736) and 'S. Antonio di Padova' (Bologna, 1753)<sup>3</sup>; but of these only the librettos have survived. A catalogue of his compositions could be compiled only by collating the very numerous manuscripts in the great European libraries: it would include about 14 masses and about 50 motets, a *cappella* ("alla Palestrina") or accompanied, 6 secular solo cantatas, 18 duets for soprano and contralto, 8 *quartetti concertanti* for 2 vns, viola and figured bass, sonatas, divertimenti, fugues and parturas for cembalo (some of which have been printed in modern editions), a concerto for cembalo, violins and bass, an organ sonata, *solfeggi* and 12 'Madrigali col

<sup>1</sup> 'Leonardo Leo' (S.I.M.G. Leipzig, 1906-7). For further comparisons of the styles of Leo and Durante see Karl Gustav Fellerer, 'Der Palestrinastil und seine Bedeutung in der vokalen Kirchenmusik des achtzehnten Jahrhunderts' (Augsburg, 1909).

<sup>2</sup> Date given by Zorn in 'Saggio di bibliografia sugli oratori sacri eseguiti a Venezia' ('Accademie e biblioteci d'Italia', Rome, 1930-32).

<sup>3</sup> See Salvatore Di Giacomo, 'Paisiello e i suoi contemporanei', in 'Musica e Musicisti', Dec. 1905.

basso continuo, estratti dalle cantate di Scarlatti'. The only works printed in the composer's lifetime were the choruses for Annibale Marchesi's 'Flavio Valente' in his 'Tragedie cristiane' (Naples, 1729) and 'Sonate per cembalo divisi in studii e divertimenti' (Naples, 1732).

The songs 'Danza, fanciulla' and 'Preghiera' are 19th-century fabrications from 2 *soffeggi* by Durante, to which new words and more elaborate accompaniments were added (see Nos. 137 and 150 of 'Solfèges d'Italie', Paris, c. 1812). F. W. (u).

**DURANTE, Silvestro** (b. ?; d. ?).

Italian composer. He was *maestro di cappella* at the church of Santa Maria Trastevere in Rome in 1652, at that of "nella Consolazione" in 1664, and again at Santa Maria Trastevere in 1668-72. He wrote masses, motets and other church music. E. v. d. s.

**DURASTANTI, Margherita** (b. Italy, c. 1685; d. ?).

Italian soprano singer. Her first known appearance was at the Teatro San Giovanni Crisostomo, Venice, in 1709; she must then have already been a very accomplished singer, since she created the name-part in Handel's 'Agrippina' in that year. She continued as *prima donna* at the same theatre until 1712, appearing in seven operas by Antonio Lotti and a few others. Next she was at Naples, during the season of 1715-16, in Gasparini's 'Eumene' and in Alessandro Scarlatti's 'Carlo, re d'Allemagna' and 'La virtù trionfante'. In Apr. 1719, together with Vittoria Tesi, she went to Dresden and sang in Lotti's 'Teofane' (Sept. 1719). Handel heard her there and engaged her, together with Senesino and other Dresden artists, for the newly founded Royal Academy of Music in London. She made her début there on 2 Apr. 1720 as Romolo in Porta's 'Numitore' and sang the title-parts in Handel's 'Radamisto' (27 Apr.) and Domenico Scarlatti's 'Narciso' (30 May), and the next season (1720-21) leading parts in 'Astarto', 'Radamisto' (but this time she sang Zenobia, while her former part of Radamisto was taken by Senesino), 'Arsace', 'Muzio Scevola' and 'Odio e l'amore'.

The following quotation from 'The Evening Post' of 7 Mar. 1721 shows that she soon acquired favour at court:

Last Thursday, his Majesty was pleased to stand god-father, and the Princess and Lady Bruce godmothers to a daughter of Mrs. Durastanti, chief singer in the Opera-house. The Marquis Visconti for the King, and the Lady Litchfield for the Princess.

Durastanti did not sing in the season of 1721-22; she reappeared on 29 Dec. 1722 in a revival of Bononcini's 'Crispo'. In the next opera, which was Handel's 'Ottone' (12 Jan. 1723), a formidable rival arose in the person of Francesca Cuzzoni, who made her London début in the principal part of Teofane

(while Durastanti sang that of Gismonda). She continued, however, to sing through this and the next season, in spite of Cuzzoni, and performed in 'Conolano', 'Erminia', 'Flavio' and 'Farnace'. In 1724 she played Sextus in Handel's 'Giulio Cesare' and appeared also in 'Vespasiano', 'California' and 'Aquilio Console'. She took her leave of the public at her farewell performance in 'California', in a song written for her by Pope — some say at the desire of her patron the Earl of Peterborough (who at that time was already secretly married to Anastasia Robinson) — which ended with this couplet.

But let old charmers yield to new;  
Happy soil, adieu, adieu!

If she understood the meaning of the words, her modesty was astonishing.

It is not known where Durastanti spent the intervening nine years until her reappearance at the Haymarket on 30 Oct. 1733 in the title-part of 'Semiramide riconosciuta' (a pasticcio, perhaps with recitatives by Handel), in a company which included Anna Strada del Pò, the two sisters Maria Catterina and Maria Rosa Negri, Giovanni Carestini, Carlo Scalzi and Gustavus Waltz, assembled to help Handel to withstand the opposition of the "Opera of the Nobility" at Lincoln's Inn Fields. Durastanti sang her old part of Gismonda in a revival of Handel's 'Ottone' and created Tauris in his 'Ariadne in Crete' (26 Jan. 1734). This was her last season in London, or anywhere else as far as is known. It is not known when and where she died. J. M., adds. A. L.

**Durazzo, Giacomo.** See Gluck ('Innocenza giustificata', lib.). Traetta ('Armida', lib.). Wagenseil (G. C., 'Prometeo assoluto', lib.).

## DURCHGEHENDER VORSCHLAG

(Ger. = Passing Appoggiatura). See ORNAMENTA, A (v); C (u), a).

**DURCHKOMPONIERT** (Ger., lit. "through-composed"). A German term for which there is no generally accepted English technical equivalent, but which is adequately rendered by "continuously set". It designates adjectivally a song which is a musical composition with a shape of its own set to a poem in several regularly grouped verses, the verse-divisions being disregarded by the composer, whose music continues on its own lines and groups the words according to the musical exigencies. A song that is *durchkomponiert* is thus the exact opposite of a strophic song, where the same music is repeated for each verse of the poem. In Schubert's "Fair Maid of the Mill" cycle, where all the poems are in regular verse-groups, only the songs Nos. 1, 7, 8, 9, 13, 14, 16 and 20 are strophic; the others are "continuously set". E. B.

See also Song. Strophic Song.

**Dürer, Albrecht.** See Baudrier ('Melancholia'). Bausnern (opera on). Mohaupt ('Nürnberger Stadtpfeifer' for orch.). Mraczek ('Herr Dürers Bild', opera). Strong ('Sinttram', symphony).

**DUREY, Louis** (b. Paris, 27 May 1888).

French composer. He did not begin his musical studies until 1910, when he took private lessons in harmony, counterpoint and fugue from Léon Saint-Requier, one of the professors of the Schola Cantorum in Paris. Durey, although never entering any musical institution, studied seriously until 1914, when, on the outbreak of war, he enlisted in the French army. By that time he had already written some immature but promising works, including two unaccompanied choruses, sets of songs on poems by Paul Verlaine and Francis Jammes, and an 'Offrande lyrique' to words by Tagore.

It was not until 1916, when on leave, that Louis Durey found another opportunity for composition. The setting of three poems from the 'Voyage d'Urien' by André Gide, written at that time, marked a distinct advance in style and individuality. To this succeeded a pianoforte Trio and two pieces for four hands, 'Carillon' and 'Neige'. At this point the influence of Erik Satie and Stravinsky began to make itself felt in Durey's music, and he had by this time become drawn into the group of "Les Six", no doubt without being clearly aware of what was happening, as indeed was the case with this association as a whole, whose "members", though friends among themselves, never intended to form an artistic society and did not all share the same tendencies. What was rather Jean Cocteau's anti-romanticism, however, found expression in Durey's 'Scènes de cirque'. Before long he found it incompatible with artistic honesty to remain subjected to this influence. From that moment he ignored the doctrines laid down by Cocteau as resolutely as Cocteau defied academic principles, and he found that his style had become clarified by this temporary aberration and its attendant reaction. The immediate outcome of this phase was a string Quartet (1917), to which succeeded, in 1918, the 'Images à Crusoe', a song-cycle with accompaniment for several instruments to poems by Saint-Léger Léger. Both works represent the composer's art at its best.

The 'Images à Crusoe', which express Robinson Crusoe's disillusion with the affairs of men after his return from the desert island, were succeeded by several sets of songs of an idyllic character, including the 'Épigrammes de Théocrite' and the 'Trois Poèmes de Pétrone', and these were in their turn followed by a string Trio. Another important work is 'Le Bestiaire', where Durey set a number of diminutive poems on animals by Guillaume Apollinaire with a mixture of irony and poignancy which fits them perfectly.

In 1921 Durey seceded formally from the group of Les Six. Since 1923 he has lived in comparative seclusion in the south of France,

and little has been heard of him. In 1922 a second string Quartet was finished, and in 1923 a Sonatina for flute and pianoforte. Among Durey's unpublished works are an opera in one act, based on Mérimée's 'L'Occasion', incidental music for Hebbel's 'Judith', 'Éloges' for solo voices, chorus and orchestra, a 'Pastorale' for orchestra, a Quartet for wind instruments and several sets of songs and pianoforte pieces.

All these works are "early", for although Durey took to composition comparatively late, he withdrew from the musical scene, quite unaccountably, almost as soon as he had reached full maturity as a composer. When his music was new it seemed modern, not from any aggressive repudiation of established rules, but from a natural taste and a feeling for form which enabled him to dispense with them. Although he did not shrink from harmonic harshness and rhythmic complexities when he required them, his music is often almost classical in its simplicity and balance. Where he was at his best, his sensitive restraint was engaging and even touching, but it was sometimes carried to such lengths as to produce a feeling of emotional aridity. The undoubted poetry of his work is often ultra-refined and precious, and cannot appeal to humanity at large, but there is no telling how he would have developed had he continued to be productive. E. B.

**DUREZZA** (Ital., hardness). An Italian word for discord until the 17th century; later it ceased to be a specifically musical term, but may be used as a musical direction, *con durezza*, to indicate a harsh or unyielding manner of performance.

**Durfee (D'Urfe), Thomas.** See Akeroyde (6 plays, incid. m. & song-book) Ballad Opera. Beggar's Opera (source of tunes). Blow ('Royalist', song for). Clarke (J. 1, song from Ode, songs for 3 plays, incid. m. for 'Virtuous Wife' & 'Wife for any Man'). Courteville (2, 'Don Quixote', incid. m.). Eccles (2, 5 stage pieces). **DURIGO, Ilona** (b. Budapest, 15 May 1881; d. Budapest, 25 Dec. 1943)

Hungarian contralto singer. She was a pupil of Stockhausen at Frankfurt o/M. and of Bellwidt. For some time she was a teacher at the Conservatory of Budapest. Afterwards she achieved a great reputation in western Europe as an interpreter of classical oratorio and of Mahler's music, in which the immense tone she could produce served her well. For some years before her death she was connected with the Conservatory at Zürich. H. A.

**DURME, Jef van** (b. Kemseke - Waes, 7 May 1907).

Belgian composer. He studied harmony with Louis de Vocht and counterpoint with Alpaerts at the Antwerp Conservatory, and then went to Vienna for further studies, receiving advice from Alban Berg there. After that composer's death he wrote 'In Memoriam Alban Berg' for orchestra. Further works include the ballet 'De Dageraad' ('Dawn'), produced at Antwerp in 1936; oratorio 'De Vier Stonden', Symphony, 'Kamerconcerto' for chamber orch.; 'Trois Poèmes de Baudelaire' for voice & orch.; 2 string Quartets, Quartet for vn., viola, cello & pf.; 2 Trios for vn & cello & pf.; 2 Sonatas for vn. & pf.; pf. pieces, songs, etc. E. B.

**DURÓN, Sebastián** (b. Brihuega, New Castile, ?; d. ? Cambó, Pyrenees, ?).

Spanish 17th-18th-century composer. He received his first appointment at Las Palmas, where a portrait of him is said to exist in the church of SS. Justo y Pastor. In 1691 he was summoned to be master of the royal chapel in Madrid, which office he held until at least 1702, under Charles II and in the beginning of the reign of Philip V. Durón supported the unsuccessful claimant, the Archduke Charles of Austria; and when the war of the Spanish succession turned in favour of the Bourbons, he seems to have gone into exile. His will is dated Bayonne, 1715, and a codicil was added at Cambó in the Aug. of the following year.

Durón has been accused by the Spanish moralist Benito Gerónimo Feyjoo y Montenegro of having introduced Italian music and violins into Spain. Neither of these statements is strictly true. Viols (though *violines* perhaps here means "viols") had been in use in the royal chapel since 1633; and Durón's works for the stage seem rather more Spanish than Italian in character. Sometimes with spoken dialogue, sometimes apparently without it, they are primitive indeed when compared with those of his Italian contemporaries, especially Alessandro Scarlatti. The melodies seem much influenced by the rhythms of Spanish song, and Durón has a passion for odd turns of phrase and unexpected syncopation. Specimens of his work are printed by Pedrell ('Teatro lírico español') and Mitjana ('Encl. de musique: Espagne'). Genuine Italian opera made its first appearance in Madrid in 1703, under the Bourbon Philip V; the company was saved from ruin only by the personal interest of the king, while the public flocked to hear Spanish *zarzuelas* in the style of Durón, in which political allusions were easily detected between the lines of an apparently mythological story. At Barcelona, however, the Archduke Charles and his followers supported the Italian opera.<sup>1</sup>

<sup>1</sup> See ASTORGA.

Durón wrote, as far as is known, the following *zarzuelas*:

- 'Venir el amor al mundo', libretto by Melchor Fernández de León, 1680 (title of the score, in the Bibl. Nac., Madrid, 'Salir el amor del mundo')
- 'Veneno es de amor la embidia', lib. by Antonio de Zamora, performed Madrid, 17 Nov. 1697 (the score has the title 'Muerte en amor es la ausencia').
- 'Jupiter y Yoo, los cielos premian desdenes', lib. by Marcos de Launza, Conde de Clavijo, 12 May 1699
- 'Las nuevas armas de amor', lib. by José de Cañizares, 25 Nov. 1711.
- 'Apolo y Dafne' (lib. by Juan de Benevides), 'Selva encantada de amor' and 'La guerra de los jigates', the scores of which are also in the Madrid National Library, cannot be dated

The royal chapel in Madrid possesses sacred music by Durón, including a Requiem and a Litany, both for 8 voices.

J. B. T., adds. A. L.

**Du Rouillet, François Louis Gand Leblanc.** See Alceste (Gluck)

**DURUFLÉ, Maurice** (b. Louviers, Eure, 11 Jan. 1902).

French organist and composer. He was a pupil at the choir-school of Rouen Cathedral from 1912 to 1918, where he studied piano-forte, organ and theory with Jules Haelling, a pupil of Guilmant and organist of the Cathedral. In 1919 Duruflé went to study in Paris. He was an organ pupil first of Tournemire, then of Louis Vierne. In 1920 he joined the class of Gigout, gaining a *premier accessit* in 1921 and the *premier prix d'orgue* in 1922. His other professors at the Paris Conservatoire were S. Gallon (harmony), Estyle (accompaniment), Caussade (fugue) and Dukas (composition). In all these subjects he gained *premiers prix*. He won the first prizes offered by the Amis de l'Orgue, in 1929 for organ playing and improvisation, and in 1930 for composition (with his 'Prélude, adagio et choral varié', Op. 4). He was awarded a prize by the Fondation Blumenthal in 1936.

From 1919 Duruflé was assistant organist to Tournemire at the Paris church of Sainte-Clotilde. In 1930 he was appointed organist at that of Saint-Etienne-du-Mont, a post which he still occupies (although the west-end organ there has been virtually unplayable for twenty years — a fact which has played its part in stemming the flow of organ music from his pen). He relieved Vierne at Notre-Dame from 1929 to 1931. From 1942 he acted as deputy professor for Marcel Dupré's organ class at the Conservatoire and in 1943 succeeded R. Pech as professor of harmony.

Duruflé is an organ virtuoso and among the finest in Europe to-day. He has toured extensively as a recitalist, in his native country and abroad. He has visited London twice for the Organ Music Society (in 1938 and 1949). As organist to the Société des Concerts du Conservatoire he has performed frequently with orchestra.

Almost excessive conscientiousness makes

Duruflé one of the least prolific of composers: at fifty he has a list of only nine works. For him musical creation is the result of long, laborious perseverance, although his works do not lack spontaneity on that account. He writes with difficulty and is prone to revise and re-write his works many times before publishing them, a characteristic shared with his master, Dukas. The organ and the orchestra are his preferred media. He considers that those two inexhaustible sonorous worlds still offer possibilities, while he modestly regards himself "incapable of adding anything significant to the pianoforte repertory, views the string quartet with apprehension and envisages with terror the idea of composing a song after the finished examples by Schubert, Fauré and Debussy".

This timidity is confined to the man, for his music is as assured as it is finished. The main influences upon it have been Fauré, Debussy, Ravel, Dukas and plainsong, with which his practical liturgical work as an organist has brought him into close contact. This modal influence is evident even in a secular work such as the 'Trois Danses', Op. 6, first performed at the Colonne concerts in 1936 under Paul Paray.

After the second world war the firm of Durand, who publish all his music, commissioned a choral Requiem from Duruflé. At that time he was working on a suite of organ pieces on the plainsong themes of the Requiem Mass, so that some of this music was transferred to the Requiem, Op. 9, which is Duruflé's largest and most important work to date. It was first performed by Paris Radio in Nov. 1947 under Roger Desormière.

#### LIST OF WORKS

- Op.*  
 1. 'Triptyque' for pf. (1927).  
 2. Scherzo for organ (1926).  
 3. 'Prélude, récitauf et variations' for flute, viola & pf (1928).  
 4. 'Prélude, adagio et choral varié sur le thème du "Veni Creator"' for organ (1929).  
 5. 'Suite (Prélude, Sicilienne, Toccata)' for organ (1930).  
 6. 'Trois Danses (Divertissement, Danse lente, Tambourin)' for orch. (1936).  
 7. 'Prélude et fugue sur le nom d'Alain' for organ (1943).  
 8. Scherzo for orch. (1940).  
 9. Requiem for solo voices, chorus, orch. & organ (1947).  
 F. A. (ii).

**DUŠEK, František Xaver** (b. Chotěborky, Bohemia, 8 Dec. 1731; d. Prague, 12 Feb. 1799).

Bohemian pianist, teacher and composer. Count Spork had him educated in the Jesuits' seminary at Hradec Králové, but after a fall which crippled him for life he gave up other studies and devoted himself to music. His patron sent him first to Prague and then to Vienna, where, under Wagenseil's instruction, he became an excellent pianist. On his return to Prague he soon had numerous pupils and exercised a powerful influence on the taste of his time. Reichardt, in his letters (I, 116), speaks of him as one of the best pianists of that time (1773), "who, besides his excellent reading of Bach, possesses a peculiarly pleasing and brilliant style of his own". Among his best pupils may be numbered Koželuh (Kozeluch), Mašek, Vitásek and his wife Josepha. He was also esteemed as a composer of symphonies, quartets, trios, pianoforte concertos, sonatas, songs, etc., of which only a small part were published. Numerous orchestral and chamber works (114) are preserved in Prague, in the archives of Umělecká Beseda; also several in the collections of the Conservatory, the National Museum, the University Library, etc. In his compositions is reflected the gentleness of character which made him universally beloved. He was a kind-hearted man, and all artists, whether his own countrymen or foreigners, were sure of a kind reception at his house. His friendship with Mozart is well known, and it was in his villa and garden near Prague that the great composer put the finishing touches to the score of 'Don Giovanni'. In this very villa, Bertramka, at Smíchov, then in the outskirts of Prague, a subsequent owner erected a bust of Mozart, which was solemnly unveiled on 3 June 1876. Since 1929 the villa and garden have been owned and carefully preserved by a society called "Mozartova obec". C. F. P.

**DUŠEK, Jan Ladislav.** See DUSSEK.

**DUŠEK (born Hambacher), Josepha** (b. Prague, 6 Mar. 1754, d. Prague, 8 Jan. 1824).

Bohemian soprano singer, wife of František Dušek (see above). Her husband taught her music and she became a good pianist and composer, but above all a fine singer. Mozart, from his first acquaintance with her at Salzburg in 1777, where, in Aug., he wrote for her the recitative and aria 'Ah, lo previdi' (K. 272), looked upon her as a true and sympathizing friend. He wrote for her (3 Nov. 1787) at Prague the concert aria 'Bella mia fiamma' (K. 528). She sang in Vienna, Berlin, Weimar, Leipzig and Dresden, where the elector had her portrait painted life-size (1786) by A.

<sup>1</sup> Revision and orchestration of Op. 2.

Graff and dedicated to her. The picture has been lost. On her first visit with her husband to Vienna (Mar. and Apr. 1786) they gave no public performance, but were often invited to the houses of the aristocracy, especially to Prince Paar's, where Josepha sang with great success. They witnessed the downfall of the intrigues against Mozart's 'Figaro' in Vienna, and it was their partisanship and enthusiastic admiration of the work which prepared the way for its brilliant reception in Prague on 14 Oct. and that of 'Don Giovanni' on 29 Oct. 1787. Beethoven was in Prague early in 1796 and wrote his 'Ah perfido!' there. It was first sung by Dušek on 21 Nov. of that year, but it was dedicated to Countess Josephine Clary. Fétis's statement that she went to London in 1800 and died there arises from a confusion with the wife of J. L. Dussek.

C. F. P.

See also Mozart (2 concert arias written for D.).

**DUSHKIN, Samuel** (b. Suwałki nr. Warsaw, 13 Dec. 1896).

American violinist of Russian birth. He went to the U.S.A. at an early age, when he became naturalized as an American citizen. His exceptional talent for violin playing was discovered by the Music School Settlement of New York. It was developed by study with Rémy, Auer and Kreisler. Blair Fairchild brought him to Europe and watched over his career with a fatherly solicitude. Dushkin was quickly appreciated as a violinist of the first rank who adds to an impeccable technique a fine perception of the musical qualities of the very diverse styles, classical and modern, which he interprets. London knows his performance chiefly in recitals. Elsewhere, all over Europe, in America and in Egypt and Palestine, he has played concertos with leading symphony orchestras. He gave the first performance of Ravel's 'Tzigane' (Amsterdam, 1925) and of Stravinsky's violin Concerto (Berlin, 1931), and he has introduced many other new compositions for the violin, including those of Prokofiev, Gabriel Pierné and his friend Fairchild. Dushkin has made for his own use a large number of successful transcriptions of works by many composers, old and new.

See RING DES NIBELUNGEN, DER.

**DUSSEK (Dušek, Dusík, Jan Ladislav** (b. Čáslav, Bohemia, 12 Feb. 1760; d. Saint-Germain-en-Laye, 20 Mar. 1812).

Bohemian pianist and composer. His father, Johann Joseph Dussek (or Jan Josef Dusík) (1738-1818), a musician of considerable repute in his day, was organist and leading teacher at Čáslav, where he married the daughter of Judge Stěbeta, by whom he had three children, the eldest being Jan Ladislav.

Although the brother, František Benedikt (b. 1765; d. after 1816), and the sister, Veronika Rosalia, were more or less distinguished, the subject of this article is the only one of the three whose memory and works have come down to us. According to Dlabáček there were various modes of spelling our composer's patronymic, Dussek and Duschek being other varieties than those given above; but "Dussek" has long been recognized and is unlikely henceforth to be disturbed in its prerogative, notwithstanding that the father of the English Dussek signed "Jan Josef Dusík". When the son established himself in London, he altered the penultimate letter from *i* to *e* and pronounced his name "Dushek", for which we have the authority of Pio Cianchettini, whose father married Veronika Rosalia, already mentioned. Modern Czech authorities write the name Dusík.

Jan Ladislav Dussek began to study the pianoforte in his fifth year and the organ in his ninth, and in the capacity of organist soon gave valuable assistance to his father. From Čáslav he went to Jihlava (Iglau), where he was engaged as treble singer in the Minorite church, pursuing his musical studies with Father Ladislav Špinar and familiarizing himself with the "humanities" at the College of Jesuits, subsequently for two years continuing the same course of instruction at Kutná Hora, where he was appointed organist of the Jesuit church. Thence he removed to Prague, where he studied theology and took his bachelor's degree. A patron, Count Manner, an artillery officer in the Austrian service, took him to Mechlin (Malines), where he gave a concert, on 16 Dec. 1779. Tired of Mechlin, he left for Berg-op-Zoom, again accepting the post of organist at one of the principal churches. He went to Amsterdam about 1782, where he may be said to have laid the foundation of his brilliant reputation as pianist and composer. It is worth remarking that Dussek's last engagement as church organist was at Berg-op-Zoom and that this early acquaintance with the organ had much to do with the peculiar style of not a few of the slow movements to be met with in his finest sonatas — among which may especially be cited the *Adagio* of the 'Invocation' (Op. 77), his last great composition for the pianoforte. Dussek's brilliant success at Amsterdam soon obtained for him an invitation to The Hague, where he passed nearly a twelvemonth, giving lessons on the pianoforte to the children of the Stadtholder. Here he also devoted much time to composition, producing 3 concertos and 12 sonatas for pianoforte, with accompaniments of stringed instruments.

From The Hague Dussek, now aged twenty-three, proceeded to Hamburg, obtaining further instruction from Carl Philipp Emanuel

<sup>1</sup> The entry in the register was Wenceslaus Joannes.

Bach The advice and encouragement of this eminent master exercised a salutary influence on the young musician. A year later we find him in Berlin, astonishing the music-lovers of the Prussian capital with his pianoforte playing and also with his performances on the harmonica, the qualities of which, in agreement with one Hessel, the *son-disant* inventor, he travelled through various parts of Germany to exhibit, exciting the admiration of Gerber (at Cassel in 1785) both for the instrument and the performer.

From Berlin Dussek went to St. Petersburg, where he accepted the invitation of Prince Radziwiłł, at whose estate in Lithuania he remained more than a year. We next meet with him in Paris (towards the end of 1786) enchanting Marie-Antoinette with his playing; her tempting offers, however, could not dissuade Dussek from carrying out a long-considered project of visiting his brother František Benedikt in Italy. At Milan he earned new laurels as a performer, both on the pianoforte and the harmonica. After his return to Paris in 1788 the threatening circumstances of the time caused him to quit the French capital after two years. His next residence was London, where he made his first appearance at one of Salomon's concerts on 2 Mar. 1790. In London, where he remained for nearly twelve years, his genius was rapidly appreciated: he became a fashionable teacher and the centre of a circle of eminent musicians. One of the greatest compliments ever paid to Dussek, who could boast of many, was contained in a letter addressed from London to the elder Dussek (Dussik) at Čáslav by Haydn, then composing his imperishable symphonies for Salomon:

MOST WORTHY FRIEND — I thank you from my heart that, in your last letter to your dear son, you have also remembered me. I therefore double my compliments in return and consider myself fortunate in being able to assure you that you have one of the most upright, moral, and, in music, most eminent of men for a son. I love him just as you do, for he fully deserves it. Give him, then, daily a father's blessing, and thus will he be ever fortunate, which I heartily wish him to be, for his remarkable talents. I am, with all respects, your most sincere friend,  
 London, 26 Feb. 1792. JOSEPH HAYDN.

In 1792 Dussek married the daughter of Domenico Corri. "This lady", says Gerber, "was principal singer at the London professional concerts, he [Dussek] being concerto player to the same, and playing in a style of incredible perfection." The marriage brought about a joint speculation between Corri and Dussek and the establishment of a music shop, which ended in failure, so that in 1800, in order to elude his uncompromising creditors, the latter was obliged to leave the country surreptitiously, and once more seek shelter in his favourite Hamburg. The story of the northern princess who, at this juncture, became enamoured of him, carrying him off to a

retreat near the Danish frontier, where they lived together in seclusion for nearly two years, appears to be a myth. At all events we find in a correspondence to the 'Leipziger Musik-Zeitung' accounts of various concerts given by Dussek at Hamburg, in 1800 and 1801, with references to Steibelt, Himmel, Woelfl and John Braham, who, with Nancy Storace, sang at Ottensen, on the Elbe, in a concert at which Giornovich was violinist and Dussek pianist. In 1802, after appearing at the Concert Hall in Prague, where he played his Concerto in G minor, Dussek, accompanied by his sister, Veronika Cianchettini, visited Čáslav to see his father, whom he had not met for more than a quarter of a century, and after passing some months at home resumed his professional wanderings. In 1803, at Magdeburg, he became acquainted with Prince Louis Ferdinand of Prussia, with whom he lived for three years on terms of affectionate intimacy, to whom he gave advice both in pianoforte playing and composition and whose premature death, on the battlefield of Saalfeld, was the origin of the 'Élégie harmonique' (Op. 61). This was another turning-point in the pianist-composer's somewhat tortuous life and, for better or worse, it materially influenced his character. Much that is interesting with regard to the intercourse between Dussek and the prince may be read in the 'Leipziger Musik-Zeitung' (1807), in Ludwig Rellstab's 'Reminiscences of Berlin Music' in the 'Berliner Musik-Zeitung' (1850) and, most characteristic of all, in Spohr's autobiography.

The death of Prince Louis Ferdinand threw Dussek once more upon his own unaided resources. It says not a little for him that before thinking about future prospects he should have devoted time to composing the 'Harmonic Elegy' already mentioned, a fitting tribute to the memory of that royal friend whose close relations with him fully justified his giving expression to sentiments of deepest regret through the medium of the art they both so dearly loved. Nor could anything be more touching and appropriate than the few words which Dussek inscribed on the title-page of his Sonata:

L'auteur, qui a eu le bonheur de jouir du commerce très intime de S.A.R., ne l'a quitté qu'au moment où il a versé son précieux sang pour sa patrie

About the Prince von Ysenburg (or Isenburg), into whose service, after the death of his illustrious patron, Dussek entered as court and chamber musician, little is on record. In 1807, having resigned his situation with that prince, he entered the service of the Prince of Benevento (Talleyrand). Here his leisure was entirely at his own disposal. He would vouchsafe occasional instruction to favoured amateurs, such as Mlle Charlotte (Talleyrand's adopted daughter), the Duchesse de

Courland, Mlle Betsy Ouvrard (to whom the grand sonata called 'L'Invocation' is dedicated), etc.; he would also now and then give a concert, at which he produced his latest works, the rest of his time being exclusively devoted to composition.

With the Prince of Benevento, his latest patron, Dussek continued to reside until his last illness compelled him to seek another retreat, at Saint-Germain-en-Laye, where he died.

With regard to Dussek's style of playing, about which, of course, we can only gather a notion from the works he has left, many contemporaneous opinions could be cited, but perhaps not one more suggestive than that which J. V. Tomašek, himself a pianist and composer of eminence, gives in his 'Autobiography and Reminiscences':

In the year 1804<sup>1</sup> my countryman, Dussek, came to Prague, and I very soon became acquainted with him. He gave a concert to a very large attendance, at which he introduced his own Military Concerto. After the few opening bars of his first solo the public uttered one general Ah! There was, in fact, something magical about the way in which Dussek with all his charming grace of manner, through his wonderful touch, extorted from the instrument delicious and at the same time emphatic tones. His fingers were like a company of ten singers, endowed with equal executive powers and able to produce with the utmost perfection whatever their director could require. I never saw the Prague public so enchanted as they were on this occasion by Dussek's splendid playing. His fine declamatory style, especially in *cantabile* phrases, stands as the ideal for every artistic performance—something which no other pianist since has reached. . . . Dussek was the first who placed his instrument sideways upon the platform, in which our pianoforte heroes now all follow him, though they may have no very interesting profile to exhibit.

J. W. D., rev. G. Č.

Much of Dussek's music is justly forgotten, though it may be studied with profit by those who are curious about the ephemeral musical fashions of his time; but the later pianoforte sonatas at least deserve to be remembered for remarkable qualities which they exhibit side by side with certain conspicuous weaknesses in the handling of form. His pianoforte writing is as congenial to an instrument that was then an exciting new discovery for composers as is Clementi's, from which at the same time it differs radically in everything but an astonishing and varied effectiveness. The Italian's pianoforte music achieves surprising individuality in spite of a curious dryness and leanness, the Bohemian's by a peculiar richness of texture and abundant resourcefulness. The sonatas are very satisfying to play to oneself, though they will never again be performed in public except as occasional curiosities, and they confront the student of musical history with countless fascinating discoveries in the shape of passages that seem to belong to later composers who excelled in pianoforte writing. The Sonata in C minor, Op. 35 No. 3, might have been the direct model for

Beethoven's "Pathétique" (in the same key). The E $\flat$  major, Op. 75, seems to be full of Weber; the F $\sharp$  minor, Op. 61 ('Élégie harmonique sur la mort du Prince Louis Ferdinand de Prusse'), has a Lisztian pianistic effulgence in the first movement, not to mention that it out-jazzes jazz in the extravagance of its unceasing syncopations in the finale. And who, hearing Op. 77, in F minor ('L'Invocation'), would not guess Schumann to be the author of this passage.

or fail to say that the following from the same work:

could only be by Brahms? Nor are anticipations of Chopin difficult to find, and it is clear to those who know both Dussek and Dvořák that the former influenced this later compatriot of his. No. 6 in Dvořák's 'Stabat Mater', "Fac me vere tecum flere", for instance, sounds just like Dussek. E. B.

<sup>1</sup> Tomašek gives the wrong year: it should be 1802

There is much confusion in the opus numbers of Dussek's works, owing to the different systems adopted by French, English and German publishers. The following is an imperfect attempt at a complete list<sup>1</sup>:

## STAGE WORKS

- 'The Captive of Spilberg', musical drama (with Michael Kelly), prod London, Drury Lane Theatre, Nov. 1798.  
'Pizarro', incidental music for Sheridan's drama (with Kelly), prod London, Drury Lane Theatre, 24 May 1799.

## CHURCH MUSIC

Grand Mass for Prince Esterházy (mentioned by the Paris correspondent of the A.M.Z., 6 Nov. 1811)

## ORCHESTRAL WORKS

- Op.  
34. Serenade, E♭ ma.  
— Overture 'Feudal Times'.

## PIANOFORTE CONCERTOS

- 1 3 Concertos  
3 Concerto No. 1, E♭ ma.  
14. Concerto No. 2, F ma  
15 Concerto No. 3, E♭ ma.  
17 (Same as Op. 14.)  
20. Concerto No. 4 (MS in Brussels Conservatoire).  
22. Concerto No. 5, B♭ ma  
26 Concerto No. 6, E♭ ma  
27. (Same as Op. 14.)  
29. } Concerto No. 7, C ma. (also for harp).  
30 }  
40 'Concerto militaire', No. 8, B♭ ma  
49 } Concerto No. 9, G mi.  
50. }  
63 Concerto No. 10, B♭ ma. (2 pfs).  
66. Concerto No. 11, F ma  
70 Concerto No. 12, E♭ ma  
— Various concertos in MS (one at least for 2 pfs.).

## CHAMBER MUSIC

2. 3 Trios for vn., cello & pf., C ma, B♭ ma., E mi.  
21. Trio for flute, cello & pf., C ma.  
21. 3 Trios for vn., cello & pf., C ma., A ma., F ma.  
24. 3 Trios for vn., cello & pf., F ma., B♭ ma., D ma.  
29. 3 Sonatas for flute or vn. & cello, F ma., B♭ ma., D ma  
31. 3 Trios for vn., cello & pf., B♭ ma., D ma., C ma.  
34 2 Trios for vn., cello & pf., E♭ ma., B♭ ma.  
34 2 Sonatas for vn., cello & harp  
41. Quintet for 2 vns, viola, cello & pf., F mi.  
53. Grand Quartet for vn., viola, cello & pf., E♭ ma.  
56. Quartet for vn., viola, cello & pf., E♭ ma.  
60. 3 string Quartets, G ma., B♭ ma., E♭ ma.  
65 Trio for flute, cello & pf., F ma  
68 'Notturmo' for vn., horn & pf., E♭ ma.  
— 'Le Combat naval', sonata for vn., cello & pf. with drum *ad lib.*, D ma

## PIANOFORTE AND ANOTHER INSTRUMENT

4. 3 Sonatas (with vn.), F ma, E♭ ma., F mi.  
4. 3 Sonatas (vn.), G ma., D ma., C ma.  
5. 3 Sonatas (vn.), G ma., B♭ ma., A♭ ma.  
7. 3 Sonatas (flute), C ma., G ma., E♭ ma  
8 3 Sonatas (vn.), C ma., F ma., A ma ('La Chasse').  
12. 3 Sonatas (vn.), F ma., B♭ ma., C ma.  
13. 3 Sonatas (vn.), B♭ ma., D ma., G mi.  
14. 3 Sonatas (vn.), C ma., G ma., F ma.  
16. 3 Sonatas (vn.), C ma., G ma., F ma  
18. 3 Sonatas (vn.), No. 1, B♭ ma., No. 3, E♭ ma. (No. 2 pf. solo).  
19. 6 Sonatas (flute), D ma., C ma., F ma., A ma., C ma., E♭ ma.  
20. 6 Sonatinas (vn. or flute), No. 1, G ma., No. 2, C ma., No. 4, A ma., No. 5, E ma. (Nos 3 & 6 pf. solo).

<sup>1</sup> Taken from the fourth edition of this Dictionary, but grouped in categories.

## Op

- 25 3 Sonatas (vn or flute), No. 1, F ma, No. 3, G ma (No. 2 pf solo).  
28 6 Easy Sonatas (vn.), C ma., F ma, B♭ ma., D ma, G mi., E♭ ma  
30. 4 Sonatas (vn *ad lib.*, see Pianoforte Solo).  
36. Grand Sonata (vn.), C ma  
46. 6 Easy Sonatas (vn.), C ma, F ma., B♭ ma, C ma., D ma, G ma.  
51 3 Sonatas (vn or flute), G ma, D ma, E ma (? C ma)  
69. 3 Sonatas (vn.), No. 1, B♭ ma, No. 2, G ma (No 3 pf. solo)  
— 6 New Waltzes (vn or flute).

## PIANOFORTE SOLO

6. 'Six Airs varies' ('Petits Air connus'), E ma, F ma, A ma, D mi, G mi., G mi.  
9. 3 Sonatas, B♭ ma., C ma., D ma.  
10. 3 Sonatas, A ma, G mi., E ma.  
13. 'Rondo militaire'.  
16 '12 Leçons progressives', 2 books.  
17 3 Sonatas, C ma, F ma., G ma.  
18. No. 2, Sonata, A mi  
20 No 3, Sonata, F ma.  
20 No 6, Sonata, E♭ ma  
23 'The Sufferings of the Queen of France'  
23. Sonata, B♭ ma (ded to Mrs Chinnery)  
23 'Trois Airs varies', G ma, A ma, A ma  
24 Sonata (same as Op. 23, English ed.).  
25. No. 2, Sonata, D ma  
30 4 Sonatas, C ma, F ma, B♭ ma, G ma  
31. 3 Preludes  
33 'Il rivotato'  
35. 3 Sonatas, B♭ ma, G ma., C mi  
39 3 Sonatas, G ma, C ma, B♭ ma  
43 Sonata, A ma  
44 Sonata, E♭ ma ('The Farewell', ded to Clementi).  
45 3 Sonatas, B♭ ma, G ma, D ma  
47. 2 Easy Sonatas (Sonatinas), D ma, G ma  
50. } Fantasy and Fugue, F mi (ded to J. B. Cramer)  
55 }  
61 Sonata, F♯ mi. ('Élégie harmonique sur la mort du Prince Louis Ferdinand de Prusse')  
62. 'La Consolation', B♭ ma.  
69. No. 3, Sonata, D ma  
70 Sonata, A♭ ma ('Le Retour à Paris')  
71 Sonata, A♭ ma ('Plus ultra', ded. to "Non plus ultra" [Woelfl], the same work as Op. 70).  
71. 'Airs connus varies', 2 books.  
75. Sonata, E♭ ma  
76. Fantasy, F ma  
77. Sonata, F mi ('L'Invocation').  
— Sonata, F ma. ('La Chasse').  
— 8 Rondos  
— Rondos  
on 'L'Adieu', B♭ ma  
on 'Air russe', C ma  
on 'Alla tedesca', B♭ ma  
on 'L'Amusoir', F ma  
on the Countess of Sutherland's Reel, F ma.  
on the Favourite Hornpipe.  
on Lord Howe's Hornpipe.  
on 'My lodging is on'.  
on 'The Ploughboy'.

on 'To Carabo'.  
on Viotti's Polacca.  
on 'L'Élégante'.  
on 'La Matinée'.  
— 'Rondo mignon', C ma  
— Variations  
on 'Anna'.  
on 'Il pastore alpigiano'.  
on 'Partant pour la Syrie'.  
on 3 Scots airs.  
on 'Hope told a flattering tale' (Paisiello's "Nel cor più non mi sento").  
on a favourite German air.  
on 'Blaise et Babet'.  
on 'Fah la la'.  
on 'God save the King'.  
on 3 Parisian airs.  
— 2 English Airs and 2 Waltzes.  
— 3 Preludes, Book I.  
— The Naval Battle and Total Defeat of the Dutch Fleet by Admiral Duncan, 11 Oct. 1797.  
— 'A complete . . . Delineation of the Ceremony from St. James's to St. Paul's . . . 19 Dec. 1797.'

## PIANOFORTE DUET

- Op  
32 Grand Sonata, C ma.  
48 Grand Sonata, C ma.  
64 'Fugues à la camera', D ma., G mi., F ma.  
67 'Trois Sonates progressives', C ma., F ma., B♭ ma.  
72 Grand Sonata, E♭ ma.  
73 Sonata, F ma.  
74 Sonata, B♭ ma.  
— 'Grand Overture',  
— 'Sonate facile', C ma.

## TWO PIANOFORTES

38. Sonata, E♭ ma.  
— 'Deux Duos faciles', C ma., F ma.

## HARP MUSIC

- 6 Sonatas

## VOCAL WORKS

- 52 6 Canzonets with Italian and English words for voice & pf.  
— 6 Songs for voice & pf.  
— Song on 3 notes (B♭, C, D) for voice & pf.  
— 6 Canons for 3 and 4 voices.

## THEORETICAL WORK

'Instructions on the Art of Playing the Pianoforte'  
See also Cianchetti (sister, nephew & niece). Écosaise Kelly (M., collab. in 'Captivity of Spielberg', incid m.). Louis Ferdinand (friendship). Sonata, p 602.

**DUSSEK, Olivia** (b. London, 29 Sept. 1801; d. London, 1847).

English pianist, harpist, organist and composer, daughter of the preceding and his wife, Sophia Giustina, born Corri, who taught her the pianoforte and the harp, on both of which she became an excellent performer. She composed some songs and several pieces for both instruments. She married a man named Buckley and was organist of Kensington Parish Church from 1840. W. H. H.

See also Corri (4). Dussek (J. L.).

**DUSSEK, Sophia (Giustina)**. See CORRI (4).

**DUSTMANN, (Marie) Luise** (born Meyer) (b. Aachen, 1831; d. Berlin, 1899).

German soprano singer. She made her début at Breslau in 1849 and later settled in Vienna, where she became attached to the Court Opera and as professor of singing to the Conservatory. She also appeared as guest artist in Prague, Dresden, London, Stockholm, etc. She was a friend of both Brahms and Wagner. E. B.

**DUTILLEUX, Henri** (b. Angers, 22 Jan. 1916).

French composer. He studied at the Paris Conservatoire with J. and N. Gallon, Philippe Gaubert and Henri Büsser, and was awarded the Premier Grand Prix de Rome in 1938. In 1944 he was appointed Chef des Illustrations musicales of the French Radio and is now assistant secretary to the French section of the I.S.C.M.

Dutilleux's style displays the qualities and the limitations of intelligent and sometimes picturesque eclecticism. His elegant, lively and remarkably well constructed compositions include a Symphony (1949), a pianoforte

Sonata (1948), a Ballet, 'La Belle Époque', produced at the Vichy Opera in 1948, incidental music (Molière plays and 'Wuthering Heights' by M. de Villiers after Emily Brontë), chamber music and songs

F. E. G.

**DUTILLEU, Pierre** (b. Lyons, 15 May 1754; d. Vienna, 1797).

French composer. From about 1786 to 1791 he was in Italy, where he made a name with ballets (most of them performed at the Teatro del Fondo, Naples). In 1791 he was called to Vienna to succeed Cimarosa as court composer, and there he wrote for the Burg Theatre four operas, 'Il trionfo d' amore' (14 Nov. 1791), 'Nannerina e Pandolino' (15 Dec 1792), 'Gli accidenti della villa' (19 Sept 1794) and 'La superba corretta' (30 Apr. 1795). The third was the most successful, it was revived at Naples several times until 1814 and the score is preserved at the Conservatory there; some airs from it were published in André's collection 'Neue Theatergesänge'. Besides these operas Dutilleu wrote for Vienna some ballets, also a violin Concerto and 6 duets for violins (publ. Artaria, 1800, Op. 1). A. L.

**DUTKA**. See BAGPIPE (RUMANIA).

**DUVAL, ? (Mlle)** (b. ?; d. ?).

French 18th-century singer and composer. She is known only by a 4-act opera-ballet, 'Les Génies', which was produced at the Académie Royale de Musique in Paris on 18 Oct. 1736 and published in full score. In the libretto the author, Fleury, introduced Mlle Duval thus: "... le beau sexe me saura du moins quelque gré de faire connoître une jeune Muse qui possède un talent unique, qui donne un nouvel éclat aux grâces de son sexe ...". After Mme de La Guerre's 'Céphale et Procris' (1694), 'Les Génies' was the second opera by a woman composer to appear on the leading Paris musical stage.

A. L.

**Duval, Alexandre**. See Boteldieu ('Béniovski', lib.) Dalayrac ('Maison à vendre', lib.). Deshayes ('Bella', lib.). Hérold ('Gioventù di Enrico V', opera). Joseph (Méhul, lib.). Lortzing ('Zum Grossadmiral', opera). Méhul (uncid. m for 2 plays & 2 lib.).

**DUVAL (Du Val), François** (b. ?, c. 1673; d. Versailles, 27 Jan. 1728<sup>1</sup>).

French violinist and composer. He was musician to the Duke of Orleans and belonged to the royal chapel. His name figures at the court of Louis XIV among the *dassus de violon* of the Vingt-quatre Violons du Roy. To him is accorded the honour of being the first Frenchman to have dared to compose in the Italian style<sup>2</sup>, that is, to introduce sonatas for violin written with a *basso continuo*. Though Jean-Féry Rebel, his contemporary and com-

<sup>1</sup> From death certificate.

<sup>2</sup> Daquin, 'Lettres sur les hommes célèbres dans les sciences, la littérature et les beaux-arts ...' (1752).

rade, had written works of this description in 1695, these were not published until 1705, whereas Duval's 'Premier Livre de sonates et autres pièces pour le violon seul et la basse' appeared in 1704. His name therefore holds a place of some importance in the history of violin music in France. His first book of sonatas was published in Paris by Roussel in 1704, similar books came out in 1707, 1708 and 1715. A second book of 'Sonates à trios' was published in Paris in 1706, a sixth book for "violin et basse" appeared in Paris in 1718 and a seventh in 1720.<sup>1</sup>

Duval composed five other books of sonatas (1707, 1708, 1715, 1718) and one book for 2 violins and a bass (1706). He had the reputation of being a good player of Corelli's sonatas, which were beginning to be greatly appreciated in Paris. His music shows marked French characteristics in the variety and suppleness of rhythm and in the tendency to musical description. His violin technique is far more advanced than what is described in the methods of Dupont and Montéclair; his bowing is carefully indicated. In fact, it may be said of him that he occupies a distinguished rank among the earlier composers of sonatas in France.

**DUVERNOY, Frédéric** (b. Montbéliard, 16 Oct. 1765, d. Paris, 19 July 1838).

French horn player. He was self-taught and probably the first to break away from the established practice of his day, which was to divide horn players into two distinct categories: *cor-alto* and *cor-basse*. Duvernoy specialized in the medium register, and so a third category, the *cor-mixte*, came into being.<sup>2</sup> Duvernoy brought this technique to a high degree of excellence and was by many considered to be the leading player of his day.

In 1788 he joined the orchestra of the Comédie-Italienne in Paris, appearing in the course of the same year as a soloist at the Concert Spirituel. Two years later he became second horn at the Théâtre de Monsieur (Opéra-Comique) and joined the band of the National Guard. Entering the Opéra orchestra in 1796 he became "solo" horn in 1799, with Buch, Kenn, Vandenbroeck and Paillard composing the ordinary quartet. Some measure of his importance in the musical world may be gathered from the bill announcing the much publicized and several times postponed first performance of Spontini's 'La Vestale' for Tuesday 15 Dec. 1807. On this bill the words "M. FREDERIC DUVERNOY exécutera les Solos de Cor" are printed at the

<sup>1</sup> All the above are in the Bibliothèque Nationale in Paris.

<sup>2</sup> See HORN: The Hand in the Bell.

head of the list of the cast in type fully half as large again as that accorded to any other artist. Duvernoy retired from the Opéra with a pension in 1817.

Napoleon is said to have been a great admirer of Duvernoy's playing, and when the Chapelle-musique was re-established, after he had become emperor, Duvernoy was appointed first horn; he retained this post until the 1830 Revolution. He was a Chevalier of the Legion of Honour.

Duvernoy was one of the original staff of professors appointed at the Conservatoire in 1795, retiring in 1816. He composed a considerable quantity of jejeune music for horn, as well as a 'Méthode pour le cor' published about 1802. This last was completely overshadowed by that of Dommich, which appeared about five years later.

His nephew, Antoine Frédéric Duvernoy, also a horn player, was a member of the Opéra orchestra from 1831 to 1864. R. M. P.

**DUVERNOY, Victor (Alphonse)** (b. Paris, 30 Aug. 1842, d. Paris, 7 Mar. 1907).

French pianist and composer. He was a pupil at the Paris Conservatoire under Marмонтel, Bazin, and lastly Barbereau, and at first intended to adopt the career of a virtuoso, but afterwards devoted himself to composition and became master of a pianoforte class at the Conservatoire. Among his works may be mentioned, 'La Tempête' for solo voices, chorus and orchestra, which obtained the prize of the City of Paris in 1880; two operas, 'Sardanapale', given at the Lamoureux concerts in 1882, and in 1892 at the Théâtre Royal of Liège, and 'Hellé', given at the Paris Opéra in 1896; a lyric scene, 'Cléopâtre', a two-act ballet, 'Bacchus' (Paris Opéra, 26 Nov. 1902); symphonic pieces, an overture to Victor Hugo's 'Hernani', some chamber music, which gained the Prix Chartier, and many works for pianoforte alone or with orchestra. G. F.

**Duveyrier, Charles.** See Vêpres siciliennes (Verdi, lib.). Verdi (do)

**DUX** (Lat. = leader; Ital. *proposta*). An early term for the first subject in a fugue—that which leads—the answer being the *comes*, or companion (Ital. *risposta*).

**DUX, Claire** (b. Witkowicz, 2 Aug. 1885).

Polish soprano singer. She was a pupil of Teresa Arkel in Berlin and made her reputation in Germany, making her stage début at Cologne, as Pamina in Mozart's 'Magic Flute' in 1906. In 1911-18 she was at the Berlin Opera. She became known to London audiences when, in his spring season at Covent Garden in 1913, Beecham gave the first performance in England of Strauss's 'Rosenkavalier'. She was the Sophie in a brilliant cast which included Eva von der Osten and Paul Knupfer. Her success was emphatic,

her voice — a lyric soprano of charming quality — being heard to the utmost advantage in the trio. During the same season she sang, with equal success, as Eva in 'Die Meistersinger'. As Pamina at Drury Lane in 1914 she revealed herself as one of the best Mozart singers of her generation. After the first world war she sang mainly in America, where she married Charles Swift of Chicago. She was as much at home in the concert-room as on the stage. S. H. P., adds.

**DUYSE, Flor (Florimond) van** (b. Ghent, 4 Aug. 1843; d. Ghent, 18 May 1910).

Belgian musicologist and composer. He was the son of the poet Prudens van Duyse. Having learnt the violin from the age of seven, he entered the Ghent Conservatory when he was ten years old, gaining the harmony prize in 1859 and counterpoint prizes in 1861-62. Meanwhile, in 1860, an operetta of his, 'Teniers te Grimbergen', had been produced at Ghent, and several small vaudevilles followed at the Nationaal Tooneel at Antwerp. His *opéra-comique* 'Rosalinde' came out there in 1864. About that time he entered Ghent University, where he took a degree in law in 1867. While continuing to practise composition, he made a career for himself in the magistracy and also did admirable work as a musicologist.

The compositions by van Duyse include several operettas and comic operas, cantatas to Flemish texts, choruses with Flemish and French words; 'Triomfmarsch', 'Intermezzo' and 2 Suites for orchestra; songs to Flemish and French poems, settings of old songs, etc.

His musicological works are 'Het eenstemmig fransch en nederlandsch wereldlijk lied in de belgische gewesten, van de XI<sup>e</sup> eeuw tot heden' (1896), 'De melodie van het nederlandsch lied en hare rhythmische vormen' (1902), 'Een duitsch musyck-boek naar de uitgave van 1572' (1903) and 'Het oude nederlandsche lied' (1903-8). E. B.

**DVOŘÁK, Antonín** (b. Nelahozeves o/Vltava nr. Prague, 8 Sept. 1841; d. Prague, 1 May 1904)

Czech composer. He came of a simple stock of Czech tradesmen, for he was the eldest of the eight children of František Dvořák, who kept an inn and a butcher's shop at Nelahozeves. His musical gifts were evident from his earliest years. As a schoolboy of eight he played on the pilgrimages, at various festivals, in his father's band and took part in the choir of the parish church at Nelahozeves. When in his twelfth year he was sent to the neighbouring town of Zlonice, near Slaný, in order to learn German, he began to receive instruction in the rudiments of music from the local schoolmaster, organist and leader of his own

private band, Antonín Liehmann. From that time forward music was for Dvořák his own special element. Liehmann, who belonged to the famous type of Czech schoolmaster-musician, was above all an enthusiast, devoted to the diffusion of the art. He not only aided Dvořák's rare musical talent by giving him a sound foundation in that branch of his education, but also rescued this gift in time for its further development, when, on account of the impoverished conditions of life at home, Dvořák was threatened with the prospect of becoming assistant and successor to his father. Dvořák actually worked for a time in the butcher's business, but by 1857 he was able to get to Prague, there to continue his musical education at the Organ School, under the direction first of Karl F. Pitsch and then of Josef Krejčí. His masters were František Blažek (theory), Josef Foerster, senior (organ) and Josef Leopold Blažek (singing). At the Organ School, founded in 1830 by the Association for the Improvement of Church Music in Bohemia, Dvořák acquired not only a thorough training, mainly in the theory of music, but also a profound knowledge of the works of the old classical masters. At the same time he became acquainted with the later German romantic composers, especially Schumann and Wagner, through the orchestra of the Society of St. Cecilia, in which he acted voluntarily as a violinist, the conductor being that enthusiastic amateur and ardent admirer of the romantic school, Antonín Apt. On leaving the Organ School in 1859 Dvořák, having no other means of subsistence, entered a Prague concert band, directed by Komzák, as viola player, from which he was transferred to the orchestra of the Czech Provisional Theatre (Prague), where he was engaged until 1871, first under the conductorship of J. N. Mayr and later under the composer and creator of the Czech national school of music, Bedřich Smetana. The remuneration for this work was not very considerable and he was obliged to supplement it by giving private lessons.

Dvořák began to occupy himself with composition immediately after leaving the Organ School. From the first assiduous industry, great modesty and love of art upheld him in his work. For more than ten years only a few of his most intimate friends knew anything about his compositions; and yet already there were among these works some notable examples of chamber and symphonic music, masses, song cycles and even two operas, 'Alfred' and 'King and Collier' ('Král a uhlíř'). It is true that Dvořák's rich and robust musical nature has permeated these works with a joyous energy, but they still lack individuality and are influenced by the classics, especially Mozart and Beethoven; in some instances, too, they are reminiscent of Wagner and Liszt,

and yet withal they bear witness to a strong creative impulse. In the year 1873 Dvořák won his first great success with his 'Hymnus', from Hálek's poem 'The Heirs of the White Mountain'. In this work (published by Novello in London in 1885), which is a hymn to the suffering mother-country lit up by the halo of martyrdom, Dvořák, in grave, joyous and lofty accents, first gave some clear indication of his patriotic sentiments. Its success induced him to devote himself to composition and teaching. During 1874-77, moreover, he was employed as organist at St. Ethelbert's Church in Prague. At this time he married Anna Čermáková, the daughter of a Prague citizen, a good contralto singer, member of the chorus of the National Opera, with whom he lived happily until his death. Six children were born of the marriage. She died in 1931.

Bohemia was becoming conscious of Smetana, in whose works the Czech movement towards self-determination proclaimed itself eloquently. Dvořák, recognizing the originality and national feeling of Smetana's music, resolved to follow the same path in his own compositions. He began to turn to account his Czech nationality in his own works, as well as the clear-cut and characteristic stamp of his personality. Where formerly his artistic speech, under the influence of Wagner and Liszt, expressed a tempestuous ebullience, and was unequal and unnatural in construction, it was now clarified and simplified, returning again as regards form to classical models, while at the same time, like Smetana, he refreshed his musical thoughts at the rich sources of Czech national music. Henceforward Dvořák's works began to show the qualities which became typical of all his subsequent musical compositions: proportion and elegance of form, beauty, nobility and individuality of musical content. Among the works of this period the most striking are certain examples of chamber music: the Quintet for strings and double bass in G major, Op. 77; the pianoforte Trio in B $\flat$  major, Op. 21; the pianoforte Quartet in D major, Op. 23, the Serenade for strings, Op. 22 — all belonging to the year 1875, and the Symphony in D minor, Op. 18; then the operas 'King and Collier', now entirely reset to music, and the delightfully gay 'Pigheaded Peasants' ('Tvrdé palice'), penetrated by the folk-spirit, which dates from 1874.

The effort to refresh the melodic zone by the transplantation of new ideas grown in the soil of Czech national art strengthened Dvořák's intimate ties with folk-poetry. It was to folk-verse — to which he often returned in later works — that he wrote his first cycle of songs, and more especially the album of charming, fresh and original 'Moravian Duets' (1876), the starting-point of his great success abroad.

He strove also to develop new characteristic national forms in other branches of music, especially in his chamber and orchestral works; whereby he emphasized not only his national origin, but also his relation to the great Slavonic race. From the string Quartet in E major and the Symphony in F major (1875) onward, he began gradually to introduce into his movements the Ukrainian form of the *dumka*, and for the subject of his new opera, 'Vanda', neglected after its first performance<sup>1</sup>, he used a Polish legend. The most important works of this period were, however, his cantata, the 'Stabat Mater' for solo voices, chorus and orchestra, which Dvořák wrote under the influence of his grief at the loss of the first of his children (1876); the comic opera, 'The Cunning Peasant' ('Šelma sedlák') (1877), in which he follows on the lines of Smetana's national operas; the Symphonic Variations, Op. 78 (1877), and the pianoforte Concerto in G minor, Op. 33 (1876).

With the above works Dvořák at first only penetrated his own country, and even then they brought him but a poor return; nor was a publisher to be found. But in 1875 a few compositions, supplementing his petition for a State grant, which was assigned to him after public competition by the former Austrian Ministry of Culture, caught the attention of Brahms and the critic Eduard Hanslick in Vienna. Brahms in particular took a lively interest in Dvořák, and in 1877 he wrote to his publisher Simrock:

On the recent occasion of allotting a State grant, after several years, I took much pleasure in the works of Dvořák of Prague. I have recommended him to send you his 'Moravian Duets'. If you play them through, you will enjoy them as much as I have done. . . . Dvořák has written in all possible branches: operas, symphonies, quartets, pianoforte pieces. Decidedly he is a very talented man. Besides, he is poor. Please take this into consideration.

Simrock actually published the 'Moravian Duets', and with such success that not only this firm, but other German publishers invited Dvořák to send them new works. The bond of union between Dvořák and Brahms now developed into a warm personal friendship, broken only by the latter's death. The two artists had also much in common in their art and mutually influenced each other.

With the first success abroad there grew up in Dvořák the consciousness of a duty which he felt was owing to his country and to Czech art. In the works which immediately followed he adhered closely to the rich sources of Czech folk-music; not, perhaps, literally to the use of the folk-tunes, but to a reflection of them; just as Smetana wrote in their spirit, while artistically ennobling them. He also took great pains to show in his works all that is

<sup>1</sup> 'Vanda' was revived in Prague in 1929.

most remarkable and inherent in Czech folk-music. The Czech dances seemed to him the most characteristic of all. Therefore he wrote his first series of eight Slavonic Dances, Op. 46 (1878), in which he idealized the folk-dance characteristics. The Slavonic Dances appeared first in the form of pianoforte duets, which Dvořák afterwards scored for orchestra. He also interpolated into chamber and symphonic works some of the Czech dances and songs — chiefly the *furiant*, *polka*, *skočná* (reel) and *sousedská* (slow waltz or *stýrénne*): the string Quartet in E♭ major, Op. 51, with a *dumka* in the second movement; the string Sextet in A major, Op. 48, with the *furiant* in the scherzo; the 'Malíčkosť' ('Bagatelles') for harmonium, two violins and violoncello, Op. 47; the Symphonic Variations, Op. 78 (originally Op. 40); the violin Concerto in A minor, Op. 53; the Czech Suite in D major, Op. 39, consisting of prelude, polka, *sousedská*, romance and *furiant*, the Symphony in D major, Op. 60, with a *furiant* as scherzo, and other works (1878-80). Dvořák also turned repeatedly for inspiration to the Bohemian past, at this and at a later date, for example, in his three Slavonic Rhapsodies for orchestra, Op. 45; the Ten Legends, Op. 59, for pianoforte duet; the epic opera 'Dimitrij' (1882), to a libretto taken from Russian history; the dramatic overture 'Husitská' (1883), which celebrates in a lofty style the victory of the great national ideal of religious freedom, in which Jan Hus stood forth as leader, and for which the strong Hussite movement blazed up early in the 15th century. Later on Czech history formed the basis of the great national oratorio 'St. Ludmilla', on a poem by Jaroslav Vrchlický (1886).

Of the above-mentioned works the Slavonic Dances met with the greatest success from the beginning. The words of enthusiastic welcome accorded to them by the German musical critic Louis Ehlert gave the first impetus to their popularity in Germany and England, and made way for the success of other works by Dvořák. Prominent German and British conductors and virtuosi, such as Hans Richter, Hans von Bulow, Joseph Barnby, August Manns, Joachim, Becker's Florentine Quartet and others, became Dvořák's friends and shared in the performance and appreciation of his works. Those happy material conditions were now established which made it possible for Dvořák to devote himself to further creative work. His success in England was important and fruitful from an artistic point of view. It began at the end of the seventies of last century with the Slavonic Dances, which were soon followed by various chamber and orchestral works, and it reached a climax with the first performance of the 'Stabat Mater',

given on 10 Mar. 1883 by the London Musical Society at St. James's Hall under Joseph Barnby. The success of this work was so far-reaching that the English desired to make Dvořák's personal acquaintance. Dvořák acceded to their wish, and in Mar. 1884 conducted the 'Stabat Mater' at the Albert Hall; at the Philharmonic Society and the Crystal Palace he directed performances of his Symphony in D major, the 'Husitská' overture, a Slavonic Rhapsody, the 'Scherzo capriccioso' and other works, invariably meeting with enthusiastic ovations from the public and those who took part in the music. After this first great success Dvořák was invited by several other musical institutions to revisit England and compose important new works for them. In the autumn of 1884 he again conducted his 'Stabat Mater' and the D major Symphony, this time at the Worcester Festival on the occasion of the celebration of the eight-hundredth anniversary of the foundation of the cathedral. In Apr. 1885 he directed the performance of his new Symphony in D minor, Op. 70, composed for the Philharmonic Society, and again in May his pianoforte Concerto (Franz Rummel as soloist) and the 'Hymnus' ('The Hears of the White Mountain'), which Novello had already published. In Aug. of that year he took part in the Birmingham Musical Festival, for which, at the invitation of the committee, he had composed a new cantata, 'The Spectre's Bride', for solo voices, chorus, and orchestra (Op. 69), to words by the Czech poet K. J. Erben (also published by Novello). Sir Alexander Mackenzie introduced this work to London at one of Novello's Oratorio Concerts in St. James's Hall, 2 Feb. 1886. Dvořák visited England for the fifth time in the autumn of 1886, going first to the Leeds Festival, for which he wrote the oratorio already mentioned, 'St. Ludmilla', and then to London, where this work was thrice repeated, with what success is best seen by a quotation from one of the composer's letters home:

I am still in the greatest excitement, the result of the wonderful performance on the part of the orchestra, chorus and soloists of the first rank (Albani, Patey, Lloyd, Santley), and the splendid ovation on the part of the public. Was this truly English enthusiasm, the like of which I have not enjoyed for a long while? At the close of the work, after tempestuous applause and repeated recalls, I had to bow my thanks again and again. . . .

After an interval of a few years Dvořák revisited England in 1890, when he conducted his new G major Symphony, Op. 88, at a concert of the Philharmonic Society. He returned twice in 1891: first in order to receive in person the honorary degree of Doctor of Music, conferred upon him by the University of Cambridge (on which occasion he conducted on the preceding evening his G major Symphony and 'Stabat Mater'); and again later in the year,

when he directed, at the Birmingham Festival, the first performance of his most recent work, the Requiem for solo voices, chorus and orchestra, Op. 89. Every time that Dvořák visited England he met with the happiest appreciation, which had great significance both for himself and for Czech music. He was recognized there as one of the greatest creative musicians of the day; and because he received encouragement to compose new works on a large scale, England certainly had a most favourable influence upon his technical development, while the opportunity of handling great choral and orchestral masses enriched his command of sonority. That portion of Dvořák's music which originated immediately before these successful visits to England includes several works which show features otherwise extremely rare in Dvořák, the singer of life's joys. Some of these works are frank revelations of his persistent inward conflicts at this time, permeated by indignation, defiance and passionate doubt; some are steeped in calm resignation; and again others seem only the expression of an intrepid contest. These are the pianoforte Trio in F minor, Op. 65; the 'Scherzo capriccioso', Op. 66; the dramatic overture 'Husitská', Op. 67, the Symphony in D minor, Op. 70, written for England (1883-85). They reflect that struggle of conscience which Dvořák experienced at the time when his German friends pressed him to make a compact with the Teutonic world of music<sup>1</sup>, and would have rejoiced had he written an operatic work to a German text, which would have facilitated his success on the foreign stage; they are echoes of a time at which an effort was made to tempt or coerce him into settling in Vienna. To this pressure Dvořák did not succumb; but the traces of this inward discord are stamped upon the above-mentioned works, and also—even after his final victory—upon the closing movement of the Symphony in D minor.

If just at this time Dvořák composed works of such great dimensions as regards both form and content, and of such frankly patriotic interest as 'St. Ludmilla' and the overture 'Husitská', his subsequent creations manifest a welcome and vital breath of inward serenity and idyllic calm, as well as a more virile maturity. The compositions of this period speak to us again of a simple and sincere artist; quickly responsive to his emotional moods; with the soul of a child and the imagination of a poet; a distinctive artistic personality, who willingly celebrates in music life's joys and sorrows, and who is, above all, in

close contact with nature in his own land, especially in southern Bohemia. Here he bought himself in 1884 a small homestead called Vysoká, near the town of Píbram, where he lived and worked most happily when not in Prague. Among the works belonging to this period (after 1884) the following deserve mention: a number of songs in the folk style, Op. 73; four songs, Op. 82; 'Love Songs', Op. 83; a new series of 8 Slavonic Dances, Op. 72, first written for pianoforte duet and afterwards orchestrated, in which he idealizes some typical dances of the various Slavonic nations—Slovaks, Yugoslavs, Ukrainians, Poles, etc.; the little pictures for pianoforte duets called 'From the Bohemian Forest' ('Ze Šumavy'), Op. 68, and the charming 'Poetic Moods', Op. 85 (13 pieces for piano solo), the 'Romantic Pieces' for violin and piano, Op. 75; and the 'Terzetto' for 2 violins and viola, Op. 74. To this group belong also the string Quartet in C major, Op. 61; the pianoforte Quintet in A major, Op. 81; the pianoforte Quartet in E♭ major, Op. 87; the 'Dumky' Trio, Op. 90; the Symphony in G major, Op. 88; the three overtures—'Amid Nature', Op. 91; 'Carnival', Op. 92, and 'Othello', Op. 93; the joyous 'Te Deum', Op. 103 (1881-92), the simple and intimate Mass in D major, Op. 86, and the broadly planned and lofty Requiem, Op. 89. His very successful comic opera, a remembrance of his own childhood, may be added here: 'Jakobín', like 'Dimitrij', was composed to a text written by Marie Červinková-Riegerová, the daughter of a prominent Czech politician, Dr. František Ladislav Rieger.

In 1890 Dvořák added to his successes abroad a visit to Russia and a new concert tour in Germany and England. At this time he also received from the Czech University in Prague the honorary degree of Doctor of Philosophy, was elected a member of the Czech Academy of Art and Science and received from the Austrian Government the order of the Iron Crown of the Third Class. Early in 1891 he accepted the position of professor of composition, instrumentation and musical form at the Prague Conservatory, a step which proved to be highly beneficial to the future development of the modern school of Czech music.

Meanwhile the fame of Dvořák's name had reached overseas. A number of his more important works having found their way to various centres in U.S.A., American musical circles desired to follow the example of England and to make the personal acquaintance of the great Czech musician. At the invitation of Mrs. Thurber, the foundress of the National Conservatory of Music in New York, Dvořák, in 1892, accepted the directorship of this institution, and having obtained leave from

<sup>1</sup> He was more than once greatly annoyed with his publisher, Simrock, for persistently using German titles for his works and calling him "Anton" instead of "Antonín" on the title-pages.

the Prague Conservatory, migrated to America, where he met with a splendid reception and remained for three years, being greatly appreciated there as a teacher, as conductor of his own works and of course as composer. His aim of developing a national school of composition among his American pupils met—as may be well understood—with only partial success. In America his works were again received with enthusiasm. The series of works which originated in America is highly characteristic of Dvořák's art as a whole. In them he expresses, in the first place, the impression evoked by his visits to various parts of America; the great bustling cities, the wide and silent prairies; the cultivated and strenuous social atmosphere of New York and the life of the simple, intimate and far-away Czech colony at Spillville in Iowa State, where he spent his summer vacations. In an effort to emphasize the novelty of these impressions, and in order to give distinctive and characteristic expression to them, he chose for some of his compositions which originated in America themes which are built on certain typical features of the songs of the Indian and Negro races. Otherwise these works are pre-eminently manifestations of his own characteristic and exclusively national personality, and the assertion that Dvořák in making direct use of the tunes of America was trying to create "an American national music" is erroneous and without foundation. The first work which depicts the flood of his impressions in America is the Symphony in E minor, Op. 95, called 'From the New World', not only the most successful of all Dvořák's symphonies, but also one of the most famous in the symphonic literature of the whole world. It was first performed under Anton Seidl on 16 Dec. 1893 at a Philharmonic Society concert in New York. The intimate impressions of his sojourns at Spillville are reflected in the string Quartet (the so-called "Nigger" Quartet) in F major, Op. 96, and the Quintet in E♭ major, Op. 97 (1893). The remainder of the works Dvořák composed in America were primarily inspired by his great yearning for his native land, which is revealed in several of the works already mentioned and permeates deeply the whole cycle of 'Biblical Songs', Op. 99, and the Concerto for violoncello and orchestra, Op. 104 (1895). His joy at the prospect of returning to Bohemia is expressed in the little 'Humoresques' for pianoforte (of which No. 7, in G♯ major, has since been arranged for every possible instrumental combination and has become one of the most popular compositions in the world), and particularly in the string Quartets in A♭ major, Op. 105, and G major, Op. 106 (1895).

After his return home Dvořák again took up his post as professor of composition at the

Prague Conservatory. He was appointed director at the beginning of 1901 and held this position until his death. As regards his own music, he now devoted himself exclusively to symphonic poems and opera. The subject-matter for all these works he drew without exception from fairy-tale sources; his tie with the people was very close, and he was the first who succeeded in satisfactorily developing the Czech musical legend. The series of symphonic poems for orchestra based on the ballads of Karel Jaromír Erben includes 'The Watersprite' ('Vodník'), 'The Golden Spinning-Wheel' ('Zlatý kolovrat'), 'The Noon Witch' ('Polednice') and 'The Wild Dove' ('Holoubek') (1896), and these were succeeded by the 'Heroic Song', which has no programmatic intention. In the sphere of fairy-tale opera he wrote 'The Devil and Kate' ('Čert a Káča') (1898) and the remarkably poetic 'Rusalka' (1900), to a libretto by the dramatist Jaroslav Kvapil. This work is now of all Dvořák's operas the most favoured by the Czechoslovak public. Finally he composed the legendary-romantic 'Armida', the libretto of which, based on Tasso's 'Jerusalem Delivered', is by Jaroslav Vrchlický. Dvořák's artistic career was ended suddenly by his death on 1 May 1904. He was buried, as became one of the greatest sons of the Czech people, with every mark of respect on the part of the nation in the cemetery of the Vyšehrad at Prague.

**ESTIMATE OF DVOŘÁK'S ART**—Dvořák must be placed among the most richly gifted and versatile composers of the 19th century. Truly, like Haydn, Mozart and Schubert, he was of the race of those divinely blest and naively inspired leaders whose thoughts and emotions manifest themselves spontaneously in musical forms, and whose musical imagination gives itself out in an inexhaustible wealth of pure, fresh and fascinating ideas, in melody, harmony and rhythm. He seemed to be a late offspring of the masters just mentioned, and his nature, fundamentally simple and unsophisticated, was nevertheless innately intelligent, perceptive and witty, robust and fresh, tenderly emotional and gifted. He had an ardent love of nature, a firm and simple faith in God, a joyous optimistic outlook on life. Such was his disposition, which during his whole life always preserved the typical features of the simple peasant origin that coloured his personality and his work. In his art intuition gets the better of intellect. Dvořák's extensive life-work is therefore unequal; there is in it much that lacks weight and significance as compared with a large number of great works which are the pure manifestations of a strong and noble art; which in content, workmanship and form bear witness to an inspired creative spirit and to a

great mastery of technique — qualities which, taken together, have ensured him a prominent place in the musical history of the world.

Dvořák took the old classical masters as his chief models, although in youth he did not resist a passing admiration for the ideas disseminated by the neo-romantics, Wagner and Liszt. The foundations of Dvořák's art were then already laid upon the Beethoven tradition. Dvořák is indebted to Beethoven for the structural art of a work as a whole, for the detailed working of the motives which grow out of the more sustained, expressive themes and for his wealth of shifting and ever-new resources, rhythmic and melodic. The influence of Brahms, however, played its part in the purity of form and technical interest of Dvořák's later works. Brahms soon became Dvořák's staunch friend and appreciator, often acting as his adviser also, and it is partly owing to him that Dvořák was not only a gifted and spontaneous composer as regards melody and rhythm, but also an artist of refinement and culture, to whom fastidious purity of workmanship and definite design were of as much direct importance as the beauty and endurance of the musical content. Dvořák is also akin to Schubert in his natural gift of spontaneity, which permits him to evolve works on a great scale from flashes of passing fancy, apparently without much intellectual and creative effort.

It is also significant that, as regards the ideas and content of his music, Dvořák's individuality remains absolutely itself and bears the clear stamp of his nationality. The style of his melody and of certain works, which are frank confessions of his soul, show how the love of his land and people filled his whole vision. To this profound national consciousness Dvořák united a conscious racial attachment, he felt his equality and relationship with the great Slavonic family. In his work, which is first of all Czech — and often specifically Czech, even when the author shows himself distinctly "Slavonic" in a wider sense — there are manifestations of racial elements and forces. His musical spirit, like that of Smetana, dwelt chiefly in the fields and countryside of Bohemia. He loved its folk, their joys and sorrows, their songs and dances, echoing the glorious past and looking forward to a happier future.

Dvořák was one of the greatest masters of instrumentation, whether we point to his smaller works of chamber music or to his orchestral compositions. With comparatively simple means he derived a magical colouring from his instrumental palette; and his orchestral combinations glow with inspiration and echo a simple and natural beauty.

He expresses himself most fully and symmetrically when the wealth of his musical

inspiration is guided by his intimate feelings, unfettered by any programme or literary idea, in the kind of music now called 'absolute', especially in chamber and symphonic music, and in his sacred works. In this sphere he has produced masterpieces which are pure and lofty in style, polished and compact in form, sincerely felt, of fresh and original content; works of nobler significance than any others in this branch of Czech music. He belongs to those who have shown that the classic sonata form did not die out with Beethoven, but that it is of lasting value, thanks to the perfection of its formula, and that it may always continue to exist, renewed from time to time by fresh thoughts, musical and intellectual, without the help of a poetic or literary basis. Dvořák endows the individual movements of his sonata-form works with a wealth of beautiful music, the sincere expression of his spiritual moods, as manifested to his clear judgment, both human and artistic. We may read in them his attitude to humanity, nature, God and country. Most eloquent of all are the slow movements. The scherzo movements are also highly characteristic, especially those in which he idealizes certain typical Czech or Slavonic dances, which break away in a bubbling stream of rhythmic verve.

Coming to his orchestral music, the first place belongs by right to the symphonies (nine in all), which in themselves are admirably characteristic of Dvořák's musical development; if not as a whole, at least in some individual movement they bear witness to his remarkable grasp of symphonic form. The most important and successful of them is the last, 'From the New World'. The popularity of this work has eclipsed the world's interest in the rest of Dvořák's symphonies; unjustly, however, for several of them are by no means inferior in musical value.<sup>1</sup> How interesting in form, in its folk-spirit and in the virile serenity it exhales is the outline of the G major Symphony, Op. 88, with the wonderful variations in the finale. And, again, there is the passionately agitated Symphony, Op. 70, in D minor, with its Brahms-like austerity and strong inward utterance so characteristic of Dvořák. The joyous Symphony in D major, Op. 60, full of the fragrance and melody of the Czech fields and forests, full of light and cheerful courage, with the *furiant* in the scherzo, is a work of striking originality. With the symphonies may be honourably associated the concertos with orchestral accompaniment, of which the lyrical violin Concerto, Op. 53, and the romantic Concerto for violoncello, Op. 104, especially deserve to be reckoned among the most remarkable examples of the

<sup>1</sup> The D minor Symphony, Op. 70, at least, is now generally regarded as actually superior to the 'New World', in spite of the latter's indestructible popularity. —Ed.

concerto form. Two attractive and popular works are the *Serenades*: the first for strings, Op. 22, has an erotic and yearning character; the second is the humorous *Serenade* for wind instruments, cello and double bass, Op. 44.

In programme music of a symphonic kind Dvořák is at his happiest when the music does not strictly follow concrete descriptive lines, but approaches to some form such as the sonata or overture. First among such works ranks the well-known cycle of three overtures: 'Amid Nature', 'Carnival' and 'Othello', the fundamental idea which connects them all being shown in the original title which they bore in common — 'Nature, Life and Love' — and musically by the use of a theme that appears in each of the three works. The 'Carnival Overture', thanks to its sparkling and spirited rhythmic flow, is one of the most frequently performed of Dvořák's compositions. A work of impetuous temperament and vigour is the overture 'Husitská', which was a favourite with Bulow, just as Artur Nikisch loved to conduct the 'Scherzo capriccioso' and Hans Richter the Slavonic Rhapsodies. Rare musical charm, especially as regards effective orchestration, is contained in the symphonic poems on legendary subjects, Opp. 107-11, to which objection is made on account of their epic diffuseness and a superfluity of detail which arrests the progress of the tale; for pith and unity of form 'Holoubek' ('The Wild Dove') is far the best of them. The Slavonic Dances occupy a special place among Dvořák's orchestral works. Though originally written as pianoforte duets, they were first assessed at their true value in their well-known, highly-coloured and riotous orchestral version. With their luxuriant wealth of characteristic melody and fiery, pointed rhythms Dvořák pays tribute to Czech dance forms, frank Czech humour and folk merriment.

Much esteemed for its charm and purity of style is Dvořák's chamber music. In these works the various stages of his musical culture and the progress of his art as regards its structural side are most eloquently expressed. Among the works of the first order are the string Quartet in D minor, Op. 34 (with its very beautiful *adagio*); the Quartets in E $\flat$  major, Op. 51; C major, Op. 61; A $\flat$  major, Op. 105, and G major, Op. 106. Of works written for other instrumental combinations, now justly famous, we must select the spirited pianoforte Quintet in A major, Op. 81, the string Quintet in E $\flat$  major, Op. 97 (the "American"); the two pianoforte Quartets, the first in D major, Op. 23, and more especially the one in E $\flat$  major, Op. 87, the Sextet for strings, Op. 48, with its national colouring, and of the pianoforte Trios, particularly that in F minor, Op. 65, which in its impassioned subject-matter matches the Symphony in D

minor, Op. 70. Works of peculiar charm and loveliness are the "Dumky" Trio for pianoforte and strings, Op. 90, which unites in cyclic form a series of idealized dances under a general title; and the 'Mahčkosti' ('Bagatelles') for harmonium, two violins and violoncello, Op. 47.

The vocal and orchestral works on a large scale breathe throughout a sincere faith in the supernatural direction of the world, of nature and life, which is one of the most expressive features of Dvořák's temperament. They also contain a wealth of lovely Schubert-like melody, a touch of colour characteristic of his own artistic individuality and an affinity — especially in the choral numbers — with Handelian technical methods, although Dvořák contributes much that is new and entirely his own. In the 'Stabat Mater' and the Requiem great tenderness and poetical expression, depth and nobility of thought and beauty of sonority are the most characteristic qualities. The 'Stabat Mater' is the more serene and sustained, and laid out on a more unified plan; the Requiem, on the other hand, is more detailed in design, more romantic in its melodic material and modulations, more highly coloured and effective in its vocal and orchestral sonority. The great amplitude of conception of the oratorio 'St. Ludmilla' is perhaps the reason why the composer planned it in three parts. Its subject is the conversion of the Czech prince, Bořivoj, and his wife Ludmilla, at the time of the victory of the Christian faith over Czech heathendom, about A.D. 873. To this is wedded music of considerable beauty, in which lyrical scenes of great tenderness alternate with stirring drama. In style and structure it bears the strongest resemblance to Handel of all Dvořák's works. In spite of some archaisms in utterance this work is, however, purely Slavonic in feeling. Immeasurably more intimate and direct in its simplicity is the expression of Dvořák's religious sentiment in the little Mass in D major for mixed chorus and organ, an occasional composition. The same qualities characterize the 149th Psalm and the joyous, uplifting 'Te Deum' for solo voices, chorus and orchestra, with its poetical duet for solo soprano and bass. Later on, the ten 'Biblical Songs', Op. 99, also emanated from this sense of sincere humility before the greatness and goodness of God. These deep and noble utterances are the culmination of Dvořák's art as a song writer. Two important works for voices and orchestra, to secular words, are the cantata, 'The Spectre's Bride' and 'Hymnus' ('Heirs of the White Mountain'). The former is a musical setting of a poetic ballad by K. J. Erben. The score shows many characteristic and original passages both melodic and structural, and has charm of

feeling and tone-colour. Here and there, however, the considerable spinning-out of the music is at variance with the static structure of the individual parts. The 'Hymnus', a work of Dvořák's youth, overflows with frank and vigorous patriotic fervour. The weakest of his works is the cantata 'The American Flag', an occasional composition written to patriotic verses by J. Rodman Drake.

Dvořák's cantatas and oratorios soon made their way from end to end of the musical world, but his operas have not penetrated equally far. And yet here he shows himself vigorous and sincere. It is true that the dramatic side was not so strong in him as the absolute quality of his music, which often attains a climax to the detriment of the dramatic intrigue and expression. Nevertheless, in this aspect of his genius he shows evidences of a dramatic instinct, which intuitively led him to seize upon the significant moment in the development of an operatic plot. Besides which, Dvořák puts into his operas a wealth of fresh, characteristic and fascinating music, and it is by these works that he penetrates the hearts of his fellow-countrymen. The most successful, because its text is most felicitous, is the tragic fairy-tale 'Rusalka', the music of which is full of poetic feeling and enchantingly beautiful melody and sonority. Genuine humour and touching sentiment impregnate 'Jakobín'. Both works are popular in Czechoslovakia. Other operas of remarkable musical charm and refinement are the comic opera 'Šelma sedlák' ('The Cunning Peasant'), written to a libretto which is a not very successful imitation of 'Figaro', and the one-act opera 'The Pigeheaded Peasants', both subjects being borrowed from Czech rustic life. In serious opera there is the clear-cut design, the lofty pathos and beautiful music of 'Dimi-trij'. Two other serious operas by Dvořák — the historical 'Vanda' and the romantic 'Armida' — have fought in vain to maintain their existence, even in Czechoslovakia, owing to the poverty of their librettos. 'The Devil and Kate', on the other hand, a romantic comedy set to delightful music, has won some favour outside its own country.

Dvořák's minor works lose in essential significance by comparison with the series of compositions above mentioned, although they are numerous and some of them are valuable for their attractive qualities. Among the music for pianoforte duet the popular Slavonic Dances, which attracted attention even before they were arranged for orchestra, take the first place. Akin to these in form are the admirable cycle of ten 'Legends', Op. 59, and six sketches, 'From the Bohemian Forest', Op. 68. Of the music for piano solo, which consists partly of dance forms (the *furiant*, valse, mazurka, *dumka*) artistically treated and partly

of small mood-pictures, the most important works are the 'Poetic Moods', Op. 85 ('Poetické nálady'); while the most widely known, chiefly thanks to No. 7, are the 'Humoresques', Op. 101. The interesting 'Thema con variazioni', Op. 36, deserves mention. Of his songs, which culminate in the 'Biblical Songs', Op. 99, the 'Love Songs', Op. 83, with their poetical charm are specially noticeable; also the 'Songs in Folk Style', Op. 73, the songs to words from the MSS of Králové Dvůr (the Koniginhof Manuscript), Op. 7, the 'Three Modern Greek Songs', Op. 50, the 'Gipsy Songs', Op. 55 and, without doubt, the delightful 'Moravian Duets' for soprano and alto, with pianoforte accompaniment.

Dvořák has this significance for Czech music in particular: he completes the work of Smetana, who was both his predecessor and contemporary, and occasionally his guide. Together they laboured as the two great founders of the Czech school of national music, upon whose works, as upon an unshakable basis, is built all modern Czech music. Unlike Smetana, who grasped and invoked the whole spirit of the Czech people, making himself the singer of their past and the prophet of their victory and freedom, Dvořák in all his music is simply human, intimate and personal. If Smetana surpasses Dvořák in the great fundamental idea of his art as a whole, and in fusion between intellect and intuition, Dvořák, although his music is not always equally exemplary, commands a wealth of musical inspiration and creative versatility. Smetana's significance as the founder of Czech music is completed in Dvořák, who was the first to compose a national oratorio and utilize national fable for symphonic purposes. He was also the first to create works on a grand scale in which the mould of the old classic forms (the symphony, suite, concerto, chamber music, etc.) is filled with national material. With Czech speech, thought and sentiment, with Czech song and dance.

As a conductor Dvořák, who was merely engaged to conduct his own works, showed himself a musician of temperament, who knew how to exact obedience from his players and to stir the heart and awake the enthusiasm of his audience, both at home and abroad. As a teacher, however, he was of immeasurable importance and profit to Czech music; for here he displayed rare individual powers productive of great results. It is not a mere accident that two of the most distinguished personalities in the world of Czech music, Josef Suk (who married Dvořák's eldest daughter) and Vítězslav Novák, were both his pupils. In their work they carried on his traditions as a teacher among a younger generation of Czech musicians. o. š.

## SONGS

Op	Title	Words	Year of Composition
2	4 Songs (see also Op 83 and 'Cypresses' [see Chamber Music]) 1 Go forth my song, delay not 2 'Twas wondrous sweet that dream of ours 3 Nought to my heart can bring relief 4 Rest in the valley.	Gustav Pfleger-Moravský	1865 (rev. 1882)
5	'The Orphan'	Karel Jaromír Erben	1871.
6	'Four Serbian Songs' 1 Once fell a maid asleep 2 Warning. 3 Flowery Omens 4 No escape.	Serbian folk poems.	1872.
7	6 Songs. 1 The Nosegay. 2 The Rose 3 The Cuckoo 4 The Lark 5 The Forsaken. 6 The Strawberries	From the Königshof MSS	1873.
3	'Evening Songs' (see also Op 31) 1 The stars upon the firmament. 2 I dreamt that you had died 3 I am the knight of fairy-tale	Vítězslav Halek	1876.
9	4 Songs. 1 Therefore. 2 Consideration. 3 Quiet is the leave, evening song 4 Spring flew hither from afar.	Eliska Krasnohorska Krasnohorska. Halek. Halek.	1876 (some 1871)
31	'Evening Songs' (see also Op 3) 4 Visions of heaven I fondly paint. 5 'This would I ask of each tiny bird 6 Like to a linden tree I am. 7 All ye that labour come unto Me 8 All through the night a bird will sing.	Halek	1876.
—	'Hymnus ad Laudes in festo Sanctae Trinitatis' (with organ)	Liturgical.	1878.
50	'Three Modern Greek Songs'. 1 Kolias 2 Naiads. 3 Lament for a City.	Václav Nebeský	1878
55	'Gypsy Songs'. 1 I chant my lay 2 Haik how my triangle 3 Silent Woods 4 Songs my mother taught me. 5 Tune thy strings, O gypsy 6 Freer is the gypsy. 7 The cloudy heights of Tatras	Adolf Heyduk.	1880.
—	2 Songs. 1 Lullaby. 2 Disturbed Devotion.	Czech folk poems	1885.
73	4 Songs. 1 Good Night 2 The Mower 3 The Maiden's Lament 4 Loved and Lost	Czech folk poems.	1886.
82	4 Songs. 1 Leave me alone. 2 Over her Embroidery. 3 Springtide. 4 At the Brook.	Ottlie Malybrok-Snelet.	1887.
83	8 Songs (see also Op 2 and 'Cypresses' [see Chamber Music]) 5. Never will love lead us 6. Death reigns in many a human breast. 7 I wander oft past yonder house. 8. I know that on my love to thee. 9. Nature lies peaceful 10. In deepest forest glade I stand. 11. When thy sweet glances on me fall. 12. Thou only dear one.	Pfleger-Moravský.	1888.
99	'Biblical Songs': 1. Clouds and darkness. 2 Lord, Thou art my refuge. 3 Hear my prayer. 4 God is my shepherd. 5. I will sing new songs of gladness. 6 Hear my prayer. 7 By the waters of Babylon. 8. Turn Thee to me. 9. I will lift mine eyes. 10. Sing a joyful song.	Psalms xcvi, 2-6. Psalms cxix, 114, 115, 117, 120. Psalms lv, 1-2, 4-8. Psalms xxii, 1-4 Psalms cxliv, 9; Psalms cxlv, 2-3, 5-6. Psalms lxi, 1, 3, 4; lxxii, 1, 4-6 Psalms cxxxvii, 1-5. Psalms xxv, 16-18, 20. Psalms cxxi, 1-4. Psalms xcvi, 1, 4, 7, 8, xcvi, 12.	1894.
—	'Lullaby.'	F. L. Jelínek.	1895.
—	'The Smith of Lešetín.'	Svatopluk Čech.	1901.

## VOCAL DUETS

<i>Op.</i>	<i>Title</i>	<i>Words</i>	<i>Voices</i>	<i>Year of Composition</i>
20	4 Duets: 1. Destination. 2. The Farewell. 3. The Silk Ribbon 4. The Last Wish.	Moravian folk poems.	Soprano & tenor.	1875.
32	'Moravian Duets' 1. Watch, love. 2. Speed thee, swallow. 3. An my scythe were whetted. 4. Ere we part, love. 5. Small our hamlet. 6. The Forsaken Lassie. 7. Brooklet and Tears 8. The Modest Lassie 9. Ringlet and Wreathlet. 10. Show thy verdure. 11. The Captured Bride. 12. Consolation. 13. The Pleading Rose add The Soldier's Farewell.	Moravian folk poems.	Soprano & contralto	1876.
38	4 Duets: 1. The False Hope. 2. Never parted. 3. The Harvesters 4. Death in Autumn.	Moravian folk poems.	Soprano & contralto	1877
19	3 Sacred Duets (with organ). 1. O Sanctissima. 2. Ave Maria. 3. Ave Maris Stella	Liturgical.	Contralto & baritone.	1879.
—	'There on our roof.'	Moravian folk poem.	Soprano & contralto	1881.

**DVORSKY.** See HOFMANN, JOSEF.

**DWIGHT, John Sullivan** (b. Boston, Mass., 13 May 1813; d. Boston, 5 Sept. 1893).

American critic. He became a Unitarian minister after graduating from Harvard in 1832, but gave it up after a few years to devote himself to the Brook Farm community, where he taught music and the classics. In 1848 he returned to Boston and founded 'Dwight's Journal of Music', published 1852-81. It was a powerful force on the side of the best in music, conservative and unfriendly to the new developments of the period, but upholding ideals that needed to be upheld in the U.S.A. at that time. A memoir of him was published in 1899 by G. W. Cooke, who also edited Dwight's correspondence with George William Curtis.

R. A.

**DWORZACZEK, Alojzy** (b. ?, 1869, d. Poznań, 1931).

Polish composer of Bohemian origin. After completing his studies under S. Barcewicz (violin) and Z. Noskowski (composition) at the Warsaw Conservatory he became conductor of the choral society Lutnia at Łódź. From 1921 until his death he was chorus master at the Opera-House at Poznań.

He composed three operas: 'Maria', 'Boruta' and 'Zywila', the last of which, written in 1901 to a libretto by Mme B. Wilkoszewska, who adapted a poem by Mickiewicz, was produced at Poznań in 1926.

He also wrote many partsongs, solo songs, pianoforte pieces and some orchestral works.

C. R. H.

**DYBECK, Richard** (b. Odensvi, Västmanland, 1 Sept. 1811; d. Södertälje, 28 July 1877).

Swedish musician and antiquary. During his student years at Uppsala in 1831-34 he took an active part in the musical life of the University. He had a fine bass voice and was a member of a vocal quartet. After passing the entrance examination to the law courts in 1834 he was engaged in official duties in 1835-41, but finding the work uncongenial he retired in 1842 and devoted himself to antiquarian research and the collecting of folk-songs. From 1830 onwards he had travelled in Sweden as an antiquary, and he now began to publish his findings, musical and otherwise, in his journal, 'Runa' (1842-50 and 1865-76), as well as in separate pamphlets. In 1844, at the suggestion of J. E. Nordblom, he gave a concert in Stockholm on 18 Nov., at which his 'Sång till Norden' ("Du gamla, du friska, du fjallhoga Nord") was first sung in public and made so profound an impression that it was eventually adopted as the Swedish national anthem. (The word "friska" was then changed to "fria"). Dybeck had written the poem and had fitted it to a folk melody he had discovered in Västmanland. It is thought to be of German origin, though it had long been naturalized in Sweden. The song was first printed in J. N. Ahlstrom & P. C. Boman's

'Valda svenska fornsånger', 1845. Dybeck gave a series of concerts of folk music from 1844 to 1862. They were well attended and aroused great interest in the subject among the cultivated classes. He published several volumes of folksongs, 1846-56.

DYCK, (Sir) Antony van. See Gaultier (1, ? portrait of). Lanier (4, portrait of).

DYCK, Ernest (Marie-Hubert) van (b. Antwerp, 2 Apr. 1861; d. Berlaer-lez-Lierce, 31 Aug. 1923).

Belgian tenor singer. After studying law at the Universities of Louvain and Brussels he became a journalist at Antwerp and Paris. In the latter city he was taught singing by Saint-Yves Bax, and in June 1883 he sang at short notice at the Concours de Rome concerts in Vidal's 'Gladiateur' at the request of the composer's master Massenet, in place of Warot, who was ill. On 2 and 9 Dec. of that year he made his début at the Lamoureux concerts in Bach's 'Phœbus and Pan' cantata and in Beethoven's ninth Symphony. In 1886 he married the sister of the cellist François Servais. On 3 May 1887 he made his début on the stage as Lohengrin at the production at the Eden Theatre, Paris, but the opera was given only twice, owing to the overwhelming opposition in Paris to Wagner and his works at the time.

In 1888 van Dyck sang as Parsifal at Bayreuth with very great success, having previously studied the part under Mottl at Carlsruhe. Later in the year he was engaged in Vienna. On 19 May 1891, he made his London début at Covent Garden as Des Grieux in Massenet's 'Manon' with great success, and in the same season he sang Faust. In the autumn he sang as Lohengrin on the successful revival of that work at the Paris Opéra and in Jan. 1892 as the hero in Massenet's 'Werther' on its production in Vienna. He sang for several seasons at Covent Garden (title-part in Kienzl's 'Evangelimann' on 2 July 1897) and in Wagner operas in Paris, also in Brussels, the U.S.A., etc. In 1907 he was manager of a winter season of German opera at Covent Garden, where he gave a large repertory of Wagner and revived 'Fidelio', 'Der Freischütz', Nicolai's 'Merry Wives of Windsor' and Smetana's 'Bartered Bride', but the season was pecuniarily a failure. In 1908 he sang as Tristan and Tannhauser at the Paris Opéra, and as Siegfried on the production of 'Gotterdammerung' there.

He again appeared as Parsifal at Bayreuth in 1911 and in the first performance given at the Paris Opéra in 1914.

Van Dyck held a high position among the best Wagner singers, being particularly successful as Loge, Siegmund and Parsifal.

A C

DYER, (Sir) Edward. See Busch (W., song).

DYER, Louise. See LYREBIRD PRESS.

DYGAS, Ignacy (b. Warsaw, 28 July 1881, d. Warsaw, 17 May 1947).

Polish tenor singer. He began his studies in singing as a baritone. His teacher, Alexandrowicz, discovered however that he had tenor qualities and taught him accordingly. Dygas made his début as Jontek in Moniuszko's opera 'Halka' at the Warsaw Opera in 1905, and was pronounced a great success by the press. Two years later he went to Italy and sang in the opera-houses of Turin, Padua, Rome, Naples, Genoa and Milan; later he toured Spain, Russia and both Americas. In 1919 he was engaged as first tenor at the Warsaw Opera.

During and after the second world war he taught singing in Poland.

C. R. H.

DYGAT, Zygmunt (b. Cracow, 2 Oct 1894).

Polish pianist. He studied the pianoforte first with Mme Czopp-Umlauf at the Musical Institute of Cracow, attending at the same time the Faculty of the History of Art at the University (1914-17); afterwards he moved to Vienna and studied under J. Lalewicz at the Academy of Music (1917-1920), later with Paderewski at the latter's residence at Riond-Bosson near Morges in Switzerland (1928-32).

Since his début in 1919 Dygat has been frequently appearing on the concert platform in Poland, France, England, the Scandinavian and Balkan countries, and has twice toured the U.S.A. He settled in Paris. During the second world war he gave nearly 200 recitals for the Red Cross. He was awarded the Polish military Gold Cross of Merit with Bar, the French Resistance Medal and a Yugoslav distinction, Officer of St. Sava. Besides his concert activities he gives lessons in pianoforte playing.

C. R. H.

DYGON, John (b. ? Canterbury, c. 1485, d. ?, c. 1541).

English cleric and composer. He studied music at the choir-school of St. Augustine's Abbey at Canterbury and was probably a novice and choir-boy there already when his uncle, John Dygon, became abbot. He took the Mus.B. degree at Oxford on 28 Mar. 1512. He had become sub-prior by 1521, in which year his uncle sent him to Louvain to study with the Spanish humanist Juan Luis Vives, who returned to England with him in 1523 to become lecturer on rhetoric at Oxford. In 1528 John Vokes, who was by then abbot of

St. Augustine's, made him prior of the abbey, where he remained until it was closed in Henry VIII's dissolution of the monasteries in 1538. The deed of surrender is dated 30 July, and on 2 Sept. a grant of pensions was made to the abbot, prior and monks. A theory — for it is no more — that Dygon was identical with a John Wyldere or Wilbore or Wilborne, advanced by A. Hughes-Hughes in the second edition of this Dictionary is disputed by Flood (*see* Bibl.).

A 3-part motet by Dygon, 'Ad lapidis positionem', printed by Hawkins in his *History*, and another, 'Rex benedictus', are in the Royal Library at the B.M. H. C. C., rev.

BIBL. — FLOOD, W. H. GRATTAN, 'Early Tudor Composers' (Oxford, 1925)

Dyk, Viktor. *See* Zich (J., songs).

**DYKE, Spencer** (b. St. Austell, Cornwall, 22 July 1880; d. London, 13 Dec. 1946).

English violinist. He studied at the R.A.M. in London and in 1907 was appointed professor of the violin at that institution. He played frequently in public, giving recitals alone and with a quartet which he founded. Its other members in 1938 were Tate Gilder (second violin), Bernard Shore (viola) and Cedric Sharpe (cello). Dyke published a number of technical works and also some original compositions. F. B.

*See also* Spencer Dyke Quartet

**DYKES, John Bacchus** (b. Hull, 10 Mar. 1823; d. Titchhurst, Sussex, 22 Jan. 1876).

English composer. His grandfather was incumbent of St. John's Church, Hull. Dykes received his first musical tuition from Skelton, organist of St. John's there. In Oct. 1843 he went to St. Catherine Hall, Cambridge, where he very soon obtained a scholarship. He graduated as B.A. in 1847, and in the same year, having taken holy orders, obtained the curacy of Malton, Yorkshire. During his stay at Cambridge he pursued his musical studies under Walmisley and became conductor of the University Musical Society. In July 1849 he was appointed minor canon and precentor of Durham Cathedral. In the next year he proceeded M.A. In 1861 the University of Durham conferred on him the degree of Mus.D. and in 1862 he was presented by the Dean and Chapter to the vicarage of St. Oswald, Durham, whereupon he resigned the precentorship.

Dykes composed many services and anthems, and a large number of hymn-tunes, many of which became very popular. Among these may be noted 'Nearer, my God, to Thee', 'The day is past and over' and 'Jesu, lover of my soul'. He took an active part in the compilation of 'Hymns, Ancient and Modern'. Beyond his musical reputation he was much esteemed as a theologian. A memoir of Dykes, by J. T. Fowler, was published in 1897. He died in an asylum at Titchhurst and was buried

in the churchyard of St. Oswald, Durham, on 28 Jan. 1876

His son, John St. Oswald Dykes (b. 27 Oct. 1863), was a successful pianist, a pupil of Clara Schumann and a professor of the pianoforte in the R.C.M. from 1887. A Trio by him was played at the Popular Concert of 16 Jan. 1888.

W. H. H.

**DYLAN** (Opera). *See* HOLBROOKE.

**DYMEK, Zbigniew** (b. Warsaw, 29 Mar. 1896; d. Katowice, 20 Apr. 1948).

Polish pianist and composer. He was a pupil of Michałowski and Melcer at the Conservatory in Warsaw and afterwards of Mme Zur Muhlen in Petrograd. He also studied the theory of music under Paul Graener at Leipzig. In 1919 he won the first prize at the Paderewski Competition for Pianists at Lublin. He published some works for orchestra, pianoforte music and songs. C. R. H.

**DYNE, John** (b. ?; d. London, 30 Oct. 1788).

English alto singer and composer. He wrote many glees, one of which, 'Fill the bowl', obtained a prize from the Catch Club in 1768. In 1772 he was appointed a Gentleman of the Chapel Royal and in 1779 a lay vicar of Westminster Abbey. He was one of the principal singers at the commemoration of Handel in 1784. He died by his own hand.

W. H. H.

**DYPHONE**. *See* MACE, THOMAS.

**DYSON, (Sir) George** (b. Halifax, 28 May 1883).

English composer and educationist. He studied music at the R.C.M. in London, where he held scholarships for the organ and composition (1900-4). He won the Mendelssohn Scholarship and travelled mainly in Italy and Germany (1904-8). A product of his Italian sojourn was a symphonic poem for orchestra, 'Siena', suggested by the Palio race, a vigorous and picturesque work, produced at a concert of the Patrons' Fund in July 1907 and played several times in London since, though still unpublished. On his return to England Dyson held music masterships of increasing importance in public schools as follows: Osborne (1908), Marlborough (1911) and Rugby (1914). The next six years tested his capacities in other fields than that of music, and his 'Manual of Grenade Fighting', officially adopted by the War Office, is a permanent record of his occupations.

Returning to civil life, Dyson was appointed organist and head music master to Wellington College (1921), joined the teaching-staff of the R.C.M. and also began lecturing and writing on musical subjects. His book, 'The New Music' (1924), an examination of the modern technique in composition, is the outcome of essays published in 'Music & Letters' and lectures before the I.S.M., Royal Musical

Association and other bodies. In these several directions Dyson has exercised a strong educative influence, and his long experience of the needs and natures of boys in their schools, added to his own abilities as a musician, made his appointment to Winchester College (1924) peculiarly suitable. Up to that time his published compositions were few ('Three Rhapsodies' for string quartet, some church music, pianoforte pieces and songs).

Dyson spent thirteen years at Winchester as director of music at the College. Another valuable book, 'The Progress of Music' (1932), was written there. It is not a sequel to 'The New Music', but rather a discussion of the place of music in the social history of Europe. During that time he took a prominent place in the local musical life as conductor of the choral society and amateur orchestra of the town, and of the annual competition festivals to which assembled all the musical interests of the county. His life at Winchester was responsible for a new period of composition of which the cantata 'In Honour of the City' for chorus and orchestra (1928) was the first-fruits. In this, and still more strikingly in its successor, 'The Canterbury Pilgrims', which had its first performance at Winchester in 1931, Dyson gauged the taste of a public brought up in the oratorio tradition, and who in music look first for melodic charm and what may be called "singableness", and are but little concerned with those problems of modern technique which Dyson himself had discussed so ably in his book 'The New Music'. 'The Canterbury Pilgrims' adds piquant orchestral colour to decorate the pictures of the several characters of Chaucer, but the work is essentially vocal, both in its attractive solo songs and its boldly written choral numbers. It became very popular with English choral societies.

The Hereford Festival of 1933 produced another cantata, 'St. Paul's Voyage to Melita', which had such success that it has been frequently repeated at Three Choirs Festivals since and has made Dyson a composer much in demand at these festivals. 'St. Paul's Voyage' is a vivid treatment of the story of the storm and shipwreck described in the Acts of the Apostles. It is scarcely oratorio, since it has neither the epic quality nor the devotional commentary, both of which are traditional in the English oratorio form. The story is told by the chorus and the scenery painted by the orchestra; the words of St. Paul himself are assigned to the tenor solo. Another cantata, 'Nebuchadnezzar', produced at Worcester in 1935, leans more towards the manner of oratorio, since it culminates in a fine choral handling of the words of the Benedicite. A third choral work of the kind, 'Quo Vadis?', was written for the

Hereford Festival of 1939, where the first part was produced, the second following ten years later.

The invitation to write for the secular conditions of the Leeds Festival in 1934 turned Dyson's thoughts in another direction. He chose the Middle-English poem 'The Blacksmiths' (a remarkable study in alliterative verse of industrialism in the 14th century) and set it for chorus and orchestra, summoning to his presentation of it all the clamorous effects that the poem suggests and that a 20th-century technique makes possible. Two purely instrumental works must be noticed: a 'Prelude, Fantasy and Chaconne' for cello and orchestra, introduced at Hereford in 1933, Thelma Reiss playing the solo part, and a Symphony for orchestra, first given by the London Symphony Orchestra at Queen's Hall in the autumn of 1937. The latter is a work of importance as contributing to the line of symphonic development which English composers of the present day are pressing. It is a line quite distinct from that of exuberant orchestration as pursued by the later Austrians and also from the lusciousness of Elgar's personal style. In Dyson's case, too, there is little to suggest the influence of Sibelius. His Symphony is concise, subtle in its working-out of initial ideas and beautiful in its handling of certain essentially simple orchestral details.

In the autumn of 1937 Dyson was appointed to succeed Sir Hugh Allen as director of the R.C.M., and he took over his new duties there on 1 Jan. 1938. The appointment was remarkable since, for the first time, it brought to the R.C.M. as its director a former scholar, and one who owed his own musical education almost entirely to the institution. In his very first year's work there Dyson's powers of organization were very actively employed both in the remodelling of the curriculum and the rehabilitation of the equipment and of the building itself. He retired in 1952.

Dyson received the honour of knighthood in 1941.

## CATALOGUE OF WORKS

### CHURCH MUSIC

Morning and Evening Service, D ma. (1914-24).  
Morning and Evening Service, C ma. (unison) (1924).  
Evening Service, F ma. (1945).

### CHORAL WORKS

- 'In Honour of the City' (Dumbar) (1928).
- 'The Canterbury Pilgrims' (Chaucer [Prologue]) (1931).
- 'St. Paul's Voyage to Melita' (Acts xxvii) (1933).
- 'The Blacksmiths' (anon., 14th cent.) (1934).
- 'Nebuchadnezzar' (Daniel iii and Apocrypha) (1935).
- 'Three Songs of Praise' (1935)
  1. Praise (George Herbert).
  2. Lauds (George Gascoigne).

3. A Poet's Hymn (Robert Herrick).
- 'Three Songs of Courage' (1935)
  1. Valour (John Bunyan).
  2. The Seekers (John Masefield).
  3. Revelle (A. E. Housman).
- 'O praise God' (Psalm CL), coronation anthem (1935).
- 'Quo vadis', part 1 (words from many sources) (1938).
- 'Quo vadis', part 2 (1948).
- 'Four Songs for Sailors' (1948)
  1. To the Thames (John Denham).
  2. Where lies the land? (Arthur Clough).
  3. Sea Music (Longfellow).
  4. A wet sheet and a flowing sea (Allan Cunningham)

## ORCHESTRAL WORKS

- Suite 'Won't you look out of your window?' (after Walter de la Mare) for small orch. (1920)
- Symphony, G ma. (1937).
- 'At the Tabard Inn', overture to 'The Canterbury Pilgrims' (1946).
- 'Concerto da camera' for stgs. (1949).
- 'Concerto da chiesa' for stgs. (1949).

## SOLO INSTRUMENT AND ORCHESTRA

- Prelude, Fantasy and Chaconne for cello & small orch (1936).
- Vn. Concerto, E♭ ma. (1942).
- 'Concerto leggiero' for pf. & stgs. (1951).

## CHAMBER MUSIC

- 3 Rhapsodies for stg 4tet (1920).
- Songs, partsongs, instrumental pieces, etc

## LITERARY WORKS

- 'The New Music' (Oxford, 1924).
- 'The Progress of Music' (Oxford, 1932).
- 'Fiddling While Rome Burns', collected essays (Oxford, 1954).

H. C. C. adds.

**DZERZHINSKY, Ivan** (b. Tambov, 21 Apr. 1909).

Russian pianist and composer. He showed great musical ability at an early age, but did not begin to study music until he was nineteen, when he entered Gnëssin's music school in Moscow. After two years there he went to Leningrad in 1930, studying at the State School of Music until 1932 and under Riazanov at the Conservatory in 1932-34. Later he had much advice from Assafiev ("Igor Glebov") and Shostakovich, to whom he dedicated his first opera. During this time he began to compose under various contradictory influences, such as those of the French impressionists, Mussorgsky and Rakhmaninov. Later on he developed a style of his own and turned mainly to opera of a type designed to be easily understood by the musically un-

educated or half-educated and thus cultivating a kind of folk music of extreme simplicity, allied in his case, according to one non-Russian critic<sup>1</sup>, to a poverty of invention and workmanship not necessarily called for by popular art. His operas, however, have had an extraordinary success in his own country, partly perhaps because the first two are based on novels by Mikhail Sholokhov which have achieved great fame. The first, 'Quiet Flows the Don'<sup>2</sup> (more precisely 'The Quiet Don') was finished in 1934 and produced at Leningrad on 22 Oct. 1935. The second, 'Virgin Soil Uplifted', appeared in the same city on 23 Oct. 1937 and was published that year. The third, 'Volochayevko Days' (based on a film of the same name, libretto by Victor Gusev), was begun in 1938 and produced in 1940. His fourth opera, to a libretto based on Ostrovsky's drama 'The Storm', was finished in 1941, and during the second world war he wrote a fifth, in one act, 'The Blood of the People', the subject of which is guerilla warfare. This was produced at Tchkalov in 1942.

Apart from a good deal of incidental music for plays and film music, the following are among Dzerzhinsky major works:

## ORCHESTRA

- 'Russian Overture' (1939).

## PIANOFORTE AND ORCHESTRA

- 2 Concertos

## PIANOFORTE SOLO

- 'Poem of the Dnieper' (after Gogol and A. Bezimensky) (1932).
- 'Spring Suite' (1933)
- 7 Pieces (1935).
- 8 Preludes

## SONGS

- 'Three Lyric Poems'
- 'Two Songs of the North.'
- 3 Songs (K. Simonov)

- MOISENCO, RENA, 'Twenty Soviet Composers' (London, 1942)

<sup>1</sup> Gerald Abraham (see Bibl.).

<sup>2</sup> This is the title of the English translation of the novel.

# E

**E.** The name of the third degree of the natural scale of C. It represents the note in English and German which in French and Italian is called *Mi*.

The further nomenclature is as follows:

	English	French
E♭	E flat.	Mi bémol.
E♭♭	E double flat	Mi double bémol.
E♯	E sharp.	Mi dièse
E♯♯	E double sharp.	Mi double dièse.

	German	Italian
E♭	Es.	Mi bemolle.
E♭♭	Eses.	Mi doppio bemolle.
E♯	Eis.	Mi diesis.
E♯♯	Eisis.	Mi doppio diesis.

E is the tonic of the keys of E major and E minor, and the note bounding the scales of these two keys. In the modal system E is the final of the 3rd and 4th modes (Phrygian and Hypophrygian), the dominant of the 9th and 14th (12th) modes (Aeolian and Hypoionian) and the (theoretical) dominant of the 12th (rejected) mode (Hypolocrian). a. rev.

**E. T. P. A.** See MARIA ANTONIA WALPURGA.

**EADIE, Noel** (b. Paisley, 10 Dec. 1901; d. London, 11 Apr. 1950).

Scottish soprano singer. She studied the pianoforte before devoting herself to singing. She had lessons from Esta d'Argo and gave a London recital in 1924. The Queen in 'Die Zauberflöte', a part in which she was greatly to distinguish herself at Covent Garden, at Glyndebourne and in America, she first sang at Edinburgh at short notice with the British National Opera Company, without a rehearsal. She made her London début at Covent Garden in 1931, was engaged at the Chicago Opera in the next season and sang at Glyndebourne in 'Die Entführung aus dem Serail' in 1935 and in 'Die Zauberflöte' in 1936.

There was some reserve in the expression of Noel Eadie's singing, but the well-poised voice was an admirable musical instrument, equable and pure. No other Queen of Night of her generation caused the listener so few qualms; and though there may have been heroines more resourceful scenically in 'Die Entführung', her Constanze was surpassingly musical. R. C.

**EAGER, John** (b. Norwich, 15 Aug. 1782; d. Edinburgh, 1 June 1853)

English violinist and composer. Having learned from his father, a musical-instrument maker and organ builder, the rudiments of music, he was, at the age of twelve, taken under the care of the Duke of Dorset, an amateur violinist, who carried him to his seat at Knowle

where free access to the library enabled him to repair the defects of his early education.

His patron becoming insane, he established himself at Yarmouth as a violinist and teacher of music. On the appearance of Logier's system of instruction Eager became one of its warmest advocates. In 1803 he was appointed organist to the corporation of Yarmouth. He passed the remainder of his life in teaching, settling at Edinburgh in 1833. He is said to have possessed a knowledge of, and to have taught, nearly every instrument then in use. His compositions consist of a pianoforte Sonata and a collection of songs. W. H. H.

**EAGLES, Solomon.** See ECCLES.

**EAMES, Emma** (b. Shanghai, 13 Aug. 1865; d. New York, 13 June 1952).

American soprano singer. She was taken to Bath, Maine, at the age of five, and began her vocal training at Boston, becoming a pupil of Mathilde Marchesi in Paris, with whom she studied in 1886-88. She made her début as Juliet in Gounod's 'Roméo et Juliette' at the Paris Opéra in 1889, and remained there for two years, creating the part of Colombe in Saint-Saëns's 'Ascanio'. In 1891 she appeared for the first time in London, at Covent Garden, as Marguerite in Gounod's 'Faust', her later appearances there being as Elsa, Juliet, Mireille and Desdemona (in Verdi's 'Otello'). She afterwards added to her list of parts Micaëla, the Countess in 'Figaro', Eva, Elisabeth, Sieglinde, Tosca, Aida and Pamina.

Emma Eames made her first appearance in opera in America at the Metropolitan Opera House in New York in 1891, as Juliet. She sang there every year thereafter until her retirement from the stage in 1909.

In 1891 she married Julian Story, a painter, from whom she was divorced in 1907; and in 1911 she married Emilio de Gogorza, a baritone singer. The quality of her voice was much admired, but by some it was considered somewhat cold. Its higher notes were produced with ease and flexibility, and she showed a high command of the technique and graces of florid singing. Her temperament was not essentially dramatic and her command of the technique of acting was slowly gained. R. A.

**EAR.** See ACOUSTICS.

**EAR-TRAINING.** That branch of musical education which attempts to develop a positive awareness in the mind of the various pheno-

mena which constitute the mere material of music, the chief of which are time and rhythmic relationships, pitch relationships, whether simultaneous or in succession, tonality and modulation. It is concerned with the mind rather than the fingers, and with terminology and the symbols of notation only so far as these relate to mental conceptions of musical sound.

INTRODUCTION. — At the close of the 19th century the attention of the musical profession in Britain <sup>1</sup> was first drawn to the importance of mental training of this kind by Dr. F. G. Shinn in a paper read to the Incorporated Society of Musicians. The popular movement for musical education associated with the name of John Curwen had, from about 1850, made aural perception, whether of pitch, tonality, rhythm or harmony the very foundation of his method, but this movement remained apart from the normal stream of music teaching undertaken professionally. Moreover, it was chiefly concerned with vocal performance, which necessitates the cultivation of the mental ear, and not with pianoforte or other instrumental playing, which needs it far less. Hence, Shinn's paper marks the first notable acceptance of the need for ear-training by the professional teacher of music. For the systematic student of music Shinn wrote his two volumes entitled 'Ear Training'. It is now universally recognized that a high degree of practical skill as a performer does not necessarily imply or develop any aural awareness at all, and therefore, side by side with practical and theoretical studies, a systematic attempt to train the ear must be made. Ear-training is now an indispensable element in the curriculum of every reputable musical academy and teacher; and tests of aural perception form part of nearly every accepted musical examination, whether for small children or candidates for professional diplomas and university degrees.

On the level of the training of those who hope to become professional musicians not much in the way of special "methods" of ear-training is called for. What is mainly needed and provided in the higher reaches of musical education is regular and ample practice in writing down rhythms, melodies and harmonic progressions of graded difficulty. The minds of such students are naturally musical, their ears perceptive, and the relation between sound and notation is easily established. But classes in musical dictation are not really ear-training classes, and there are very large numbers of serious students of music, as well as children and amateurs, who require to have their mental ears awakened and developed. It is for these that ear-training caters.

**UNDERLYING PRINCIPLES.** — As to the methods employed, it must frankly be stated that there is not — nor can there be — any general agreement on either the mode of instruction or its successive stages. But there are three broadly defined elements invariably involved, and these must be taken into account whatever method is employed. They will here be dealt with serially, but it will be obvious that in many instances and in many ways they will overlap, and that by reader pupils the three processes will be simultaneously grasped.

(1) The power to hear the particular feature under examination. By "hearing" in this connection is meant a mental grasp of what has been sung or played. Whether in elementary or advanced work the teacher must be satisfied that the pupil has such a grasp before it can be profitable to go on to naming or writing; but it is only in very elementary work with young children, or with pupils whose faculty of hearing is under-developed, that much time need be spent on this stage. The most convenient evidence of that grasp is the ability to reproduce what has been heard by the singing voice, or by tapping or whistling.

As examples of this kind of work, a pupil studying rhythms which involve halves and quarters of beats must first be able to tap the rhythm of some phrase like this after hearing it:

If some aspect of pitch is being studied he must be able to sing or whistle a phrase containing the appropriate element—*e.g.* the sharpened fourth of the major key:

If an interval or chord is under examination he ought to be able to sing the constituent notes one after another :

And if a short chord progression is played he ought to be able to sing first the melody, then the bass, even if the latter is sung an octave higher.

<sup>1</sup> The subject is here treated from the British point of view merely because this represents the present writer's experience. Britain has, of course, no monopoly in ear-training. The teaching of *solfege* in France, for instance, is long-established and important.

With reference to Exx. 1 and 2 it must be remembered that with long phrases an element of memory is involved, which is no part of the training in recognition, though, of course, it has its own place in musical training.

This matter of mental grasp has been stressed notwithstanding its very obvious nature, because experience shows that fundamental lack of success in ear-training is often due to its neglect. The teacher may concentrate on what are wrongly regarded as faults in naming or writing, when the root of the matter is the pupil's inability to hold in the mind the effect concerned. It is an all too common experience to find a pupil struggling with pencil to write down some rhythm which he has not in fact grasped so far as to be able to tap it correctly. The importance of proving the mental grasp by audible reproduction is strikingly asserted in the relatively greater difficulty which pupils experience in harmonic ear-training when they cannot be assisted by developing the power of reproduction.

(2) The next basic stage is that of recognizing and hence of naming (*e.g.* a rhythmic pattern as a half and two quarter beats; a melodic phrase as made up of such and such degrees of the scale; a chord sequence as Ib, IIb, V; etc., etc.). Apart from the question of the accurate use of terminology, this stage involves the ability to associate effects with their names, and sufficient skill to classify the particular effect heard with one of those already studied and named. It is precisely at this stage of mental classification that many students falter in one or another of the various branches of ear-training. Much depends on the vivid way in which the teacher presents examples of each particular feature and succeeds in encouraging the pupil to fix its quality in the mind so that further examples may be readily recognized. Some points are recognizable with hardly any difficulty. An augmented triad, for instance, has a character which places it immediately beyond confusion with major, minor or diminished. On the other hand many will readily confuse a diminished with a minor triad. For every clear instance like the augmented triad there are probably a dozen difficulties, such as the common one (for beginners) in recognizing the rhythm group:

or the inability to distinguish between the first inversion of the triad on the leading-note and the second inversion of the dominant seventh. If the point can be instantly recognized after adequate presentation, well and good: if not, then the pupil must bring conscious analysis to his aid (which will depend as much on general as on musical intelligence). And it is the teacher's perception of the distinguishing feature, and his ability to focus attention on it, that will awaken the student's ear. For example, in the case of confusion between minor and diminished triads, an invaluable aid is to present the chord in question, let the student think about it and make up his mind, and then, before asking for his answer, to play the one with which he is likely to confuse it. The contrast will put beyond doubt what words could not explain. Again, with the diminished triad in close and root position, the teacher must try to get the pupil to grasp some characteristic, such as the tendency of the outer parts to rise and fall a semitone respectively:

and encourage him to supply the resolution mentally. With the rhythm group just cited (Ex. 5) the point to bring out is that it always presents a beat on which no note is struck, stressing the need to feel the beat inwardly. In every such case the teacher must bring his power of analysis, based on his own musical perception, to the aid of his pupil.

The most potent factor is the power of association. If a given feature can carry a constant association in the mind, the battle is won. Thus, for instance, many pupils learn the effect of the plagal cadence by association with "amen". For elementary work in rhythm and pitch valuable mnemonics are found in the rhythm-names invented by Aimé Paris and anglicized by John Curwen, and in the ancient sol-fa syllables derived from Guido d' Arezzo.

(3) The third stage, that of writing what has been recognized, implies knowledge of the appropriate written symbols usually studied as the "rudiments of music". Sometimes, therefore, the sequence of aural training may be conditioned by the stage reached in "rudiments".<sup>1</sup> Thus, a pupil may be able to grasp

<sup>1</sup> What the French call *sol-fa*, instruction in which is the first stage, and a very important one, in all French music teaching

to the extent of knowing that the rhythm breaks the beat into threes and that the triad is diminished in root position, but these elements cannot be introduced into his scheme because he has not made a study of the written signs and conventions involved in compound time, or the leading-note triad in a minor key. The issues thus raised can only be solved by each teacher in his own way; but it may be suggested that in many cases, instead of waiting until the symbols are to be dealt with as they arise by theoretical logic (*e.g.* major keys before minor), they may be introduced as the practical means of recording what has been aurally studied, and the necessary amount of theory (not, perhaps, complete) be introduced *passim*. Of course such a method is less possible with harmonic relationships than with rhythm and melody studies; but it is clear that aural training and "rudiments" should form part of a common scheme.

The problem now is to associate the appropriate written symbols with the sounds heard and recognized. In rhythm this presents no great difficulty and, indeed, the association just mentioned may with greatest advantage be built up directly between sound and symbol without much stress on the naming stage. It is no difficult task, on introducing some rhythmic group, to go direct to its representation in notation, so that recognition takes the form of writing. This may be done in rhythmic ear-training because it is possible to associate one type of effect with one set of symbols only, by treating a crotchet as the unit of beat in simple time and the dotted crotchet similarly in compound time. This is normally the accepted practice in written tests. Should it be necessary to write out a phrase in 12-4 or 3-2 time, the necessary conversion would not involve any aural capacity, but only the normal intelligence required in simple arithmetic.

The task of noting melodies and chords raises deeper problems, because, unless the pupil has "absolute" pitch (in which case he will not require such ear-training), he may recognize the mutual relationships of the notes involved, but be unaware of their actual pitch. His problems are made still more complex because the signs he uses will depend on this factor of pitch. He can no longer rely, as in rhythm dictation, on associating one type of symbol with one type of sound. His diminished triad may be any of the following, perhaps

Ex 8

In noting a melody, the leading-note-tonic progression may be

Ex 9

Therefore, although he may be told the key of the melody, or one of the constituent notes of the triad or interval, he must not only call upon his ear but his knowledge of rudiments. Work at this stage is particularly important, although to the tyro it may involve a fractious element; for it is a factor in building up the ability which is converse to writing down what is heard, namely hearing what is written down.

**DETAILED ASPECTS:** (a) Rhythm.—Turning from these general considerations, attention must be given to specific details relating either to rhythmic, melodic or harmonic relationships. In rhythm the first essential is a feeling for beats and accents. This is more fundamental than a knowledge of relative duration. The fact that all the quavers in each of the following phrases are equal in duration is not the element upon which the rhythmic character of each phrase depends:

Ex 10

It is their grouping into beats which is the distinguishing factor. When the metrical framework is grasped, rhythmic figures may be apprehended in relation to it. Once more, the actual theory of note-duration (two semi-quavers equal one quaver, etc.) is of minor importance to the ear; surer progress will be made by a study of patterns, *e.g.*

Ex 11

The notation "picture" of the pattern concerned can then be learned, and its arithmetical basis worked out afterwards. (Those who devise material for training their pupils in this work should take care to include many phrases beginning with an anacrusis and patterns incorporating rests — both matters of vital rhythmic significance.) It has already been stated that the pupil will normally regard the crotchet (simple time) or the dotted crotchet (compound time) as the unit of beat. Nevertheless, because it relates to the recording of aural impressions, it is also important that

he should learn that (a) and (b) of Ex. 12 may both be an equally accurate rendering into notation of the same impression, and at the same time he must grasp that (c) and (d) represent two different rhythms:

And yet (a) and (b) look different, while (c) and (d) appear alike.

After a vocabulary of patterns has been acquired, and phrases containing varied patterns can be confidently handled, aural awareness of details may well be encouraged by working out the differences between a simple phrase or pattern, and certain modifications of it, e.g.:

Finally, when a sound mastery has been achieved on this basis of beats and accents and common rhythmic patterns, and when some analytical skill has been developed by the last type of exercise, it will be possible to proceed to the less conventional patterns by a combined process of recognition and analytical consideration, dealing with phrases of this type, from the middle section of the opening chorus of Bach's 'Sleepers, wake':

There can be little hesitation in recommending that, even though his response may concern the rhythmic aspect alone, all the material presented to the pupil, whether for reproduction, recognition or writing, should take a melodic form. Quite apart from obvious musical considerations, the character of the "specimen" is much more easily called up in the mind for consideration.

(b) Pitch. — Aural training in pitch relationships is a more complex matter. Those born with that special faculty of the memory which it is convenient to call "absolute pitch" stand in no need of such training. There is one school of thought (not extensive) which bases its method of training pupils not so born on the attempt to inculcate that form of memory. As a group the followers of *Emile Jaques-Dalcroze* are the most successful exponents of it. It is

beyond doubt that the acquisition of this type of memory is of the greatest possible practical value to a musician; it is also equally beyond doubt (though the *Dalcroze* school would enter a reservation here) that such acquisition (as distinct from the possession of an inborn faculty) is hardly to be attained by very large numbers of people, even of much musical sensitivity. However that may be, the efforts of this method are directed towards the exact memorizing of the sounds of the twelve notes into which, by equal temperament, the octave is divided. While the relationship of one sound to another is not neglected, each sound must necessarily be considered as a thing in itself.

The chief difficulty experienced by many when attempting to recognize pitch is that of identifying the notes marked x in Ex. 15 (a), as identical with those similarly marked in 15 (b);

And yet very few, on the other hand, would fail to recognize in each a similar melodic pattern, even though the common sound does not occur in the same position. The other chief methods of pitch training, therefore, seize upon this evident faculty of grasping inter-relationships of pitch.

First may be considered the method which deals with this by means of interval classification. It would, of course, be possible to study from the start all possible intervals from seconds to sevenths in their appropriate varieties of major, minor, diminished, augmented and perfect, but it would probably not be fruitful for most beginners and should be postponed. The usual elementary method is to study those intervals which occur between the notes of the major and minor scales respectively, using the numerical designation only and ignoring for the time being their quality of major, diminished, etc.<sup>1</sup> Thus a study is made in turn of seconds (the successive degrees of the scale itself), thirds, fourths, etc., in sequential patterns, rising and falling. It is very important that a scheme of work on these lines should not be limited to the intervals occurring between the tonic and its octave, neglecting, for example, in major keys such intervals as .

<sup>1</sup> A more restricted method of pitch training is to recognize any interval within the major scale, reckoned upwards from the keynote, but this is of very limited value as a foundation for the perception of pitch relationship in melody.

Another method of training in pitch by means of relationships between sounds is the tonic sol-fa method. As far as these mental processes are understood at all, it seems clear that when hearing a melodic progression such as:

Ex 17

many would recognize the degrees of the scale rather than be aware of "falling sixth, rising second, falling third", etc. The tonic sol-fa method, regarding this as a mental process more naturally cultivated, makes a study of the aural function and effect of each degree of the scale, with the intent that each scale degree shall be recognized as such, irrespective of the "interval context". To assist in this process the ancient sol-fa syllables (in a slightly adapted form) are used as mnemonics for both recall and recognition.<sup>1</sup>

On a superficial view the gap between the two systems may be thought largely bridged when the practitioners of the "interval" method use the sol-fa syllables, as is commonly the case. Nevertheless, there is a fundamental difference between the "tonic sol-fa method" and the "interval method using sol-fa syllables", though details of the controversy are not appropriate here. However, there seem to be certain advantages in the tonic sol-fa method when it comes to modulation and chromatics within the classical tonalities. Both approaches, of course, eventually lead to the study of more recondite intervals (like the augmented sixth) and the aural classification of all usual intervals by the appropriate quality. And as both alike spring from the classical scales, it is obvious that this further study, purely of interval progression, is required to deal with the melodies of twelve-note music.

(c) Harmony — (i) Intervals. There are various forms in which harmonic relationships may be studied. One is concerned with intervals in isolation — the recognition of the minor third, augmented fourth and so on. A good deal of skill in identifying intervals may be developed without much consciousness of the *individual* sounds by concentrating on the special character of the *combination*. Thus, the "bare" or "empty" quality of the perfect intervals easily distinguish themselves from both thirds and sixths, and from the diminished fifth and augmented fourth, the harshness of the second and seventh place them in yet another category. Finer distinctions may be made by mentally contrasting the slightly "duller" effect of the perfect fourth with the somewhat "brighter" perfect fifth; the more "melancholy" minor third with the

"sweeter" major third; the greater "asperity" of the minor second and major seventh, as against the major second and minor seventh. The association of some such metaphorical imaginative attribute (perhaps suggested by the pupil himself) is a valuable aid to identification. A common difficulty is confusion between major and minor sixths, because they are inversions respectively of minor and major thirds. Probably nothing but accurate memory, fostered by concentration and frequent reminders, can help.

(ii) Triads. From intervals the next step may be to triads and their inversions — that is from two notes to three. First the distinction between major and minor must be made, followed by the addition of diminished and augmented, all in root position. After this comes the study of the first and second inversions. This is often a troublesome stage. Whereas some will add to a ready recognition of the difference between major and minor a similar ready identification of the special effect of first and second inversions, many find this extra factor a stumbling-block. It may be helpful to them if they are taught, by stages, to hum the arpeggios involved in the chords, e.g.

Ex 18

When asked to identify a triad, they may at first be allowed to hum the constituent notes.

(iii) Two-part counterpoint. After intervals, and concurrently with triads, simple two-part contrapuntal passages may be studied, in which the student will be able to draw partly on his skill in purely melodic relationships (by concentrating in turn on each voice independently) and partly on his ability to identify intervals. It is unlikely that he will proceed by identifying every harmonic interval as such, but at certain points they will probably strike his ear and provide a framework and a confirmation for what he has recognized in its "linear" aspect:

Ex 19

For instance, let us assume that he has noted correctly the upper part of this example, but that he is without his bearings for the lower part, even uncertain of its first note. In all probability the major third at (1) may be the first recognizable feature to help him. Noting this, and being aware that the lower voice approaches the G by step, he can now grasp the entry of that voice, and can perhaps complete its phrase by listening to its melodic movement, which he can also to some extent

<sup>1</sup> See TONIC SOL-FA.

confirm by the easily recognized sixths at (2) and (3). Many students require practice in the mere hearing of a lower voice. For them one helpful device, at least, is to play such a phrase as the lower part of Ex. 19 without drawing special attention to it, and for the next few moments to do something else. Then the complete example may be played, and the pupil asked to hum the lower part as well as he can, while both parts are played once more on the pianoforte.

(iv) Chord progressions. In the study of harmony to-day the importance of aural training requires no emphasis. At every point the recognition of chord progressions is intimately bound up with written work. And whatever diversity of view there may be concerning the study of melodic relationships, it is well-nigh universal to train pupils to identify the relationships and functions of chords within a key rather than the notes or intervals constituting the chords. The fact that in the following example it is not the chord of F which is being studied at (1) and (2) but, in the case of (1) the sub-dominant chord and in (2) the dominant chord, affords some reinforcement of the case for melodic ear-training based on the character of the degrees of the scale rather than intervals:

Ex 20

IV V I      Ib V VI

The study of chord progressions begins with the recognition of cadences in root position, perfect, plagal, imperfect and interrupted in both major and minor keys. In such recognition the imaginative factor (finality, surprise, expectation) is linked with consideration of the quality of the chord — major or minor — and the movement of the treble and bass. Longer passages confined to root positions will require even more careful attention to the last two factors. Passing to inversions of the triads, the individual effect of the cadential six-four and the auxiliary six-four are usually easy to memorize and identify; but the first inversion calls for very careful attention to its effect compared with that of the same chord in root position.

As a basis for recognizing and writing simple chord progressions there is obviously great value in the aural study of each individual chord: for example, the first inversion of the diminished triad or the inversions of the dominant seventh. But chord recognition also requires the study of progression to and from another chord in relation to a given tonality. Not only is this the obvious goal of harmonic

ear-training, but ready recognition of chords as individuals may actually be developed through it. A student whose ear is not naturally ready may be encouraged to build up his aural store of impressions by a process of rationalization which depends on knowledge of the rudiments of music. Though it may appear to abandon the educational principle that sounds ought to precede theory in music, nevertheless many students find that progress for them begins when an aural impression can be knit to an already clearly formulated intellectual conception. To take, as a hypothetical instance, the case of a teacher helping such a pupil, the passage given in Ex. 21 may be tackled by either of the following ways, or a combination of them:

Ex 21

(1) The tonic chord having first been sounded, and the key named, it may be assumed that such a pupil will note down the treble part without much difficulty, and also, on the basis of previous work, that he will identify the cadence. He now has a skeleton consisting of melody, bass of the 1st, 4th and 5th chords, and the description of them as I, V, I. He is puzzled by the 2nd and 3rd chords, but on further listening he is able to distinguish the bass notes correctly. He must now reason as follows: treble and bass of the 2nd chord form a perfect fifth, which must mean a triad in root position — in this case IV, which he knows to be a minor triad in a minor key. His rationalization of this promotes his aural attention to this chord on a further hearing, when his deduction is confirmed by the ear. Similarly the next chord, probably more of a puzzle to him, can be worked out to be IIb, and as his theoretical knowledge tells him that this is the first inversion of a diminished triad, his aural classification of it is again assisted when the passage is once more dictated.

(2) Another student, also able to write down the melody and name the 1st, 4th and 5th chords, is very weak in hearing the bass. At the outset the fact that he sees on paper the downward fifth of the perfect cadence bass (he is one of those who recognize the cadence by its "flavour" more than anything else) helps him genuinely to hear that bass progression at a further playing of the example. Of the 2nd chord, he is certain that it is minor. What minor chords can harmonize the melody note? (I [Ib]; IV [IVb].) As it is clearly a different harmony from the first chord, it must be IV or IVb, with either G or Bb in the bass. Noting this on paper, the visual image helps him to

judge whether the bass moves up a fourth or a sixth, but he is still uncertain and provisionally selects B $\flat$ . Then, giving his attention to the next chord, which his ear quite fails to recognize, he considers the possible harmonies for the melody note. In due course, after eliminating unlikely possibilities such as some form of dominant harmony, which is used in the next chord, he arrives at I1b, which he knows to be a recognized approach to the cadence. He also knows that it is the first inversion of a diminished triad, and considers that this accounts for the puzzle to his ear. His bass now runs

Ex 22

Listening once more, with ears sharpened by the knowledge of how the second bass note is both approached and quitted, he makes his choice between G and B $\flat$  and completes his example accordingly.

Much practice with passages of similar vocabulary enable both, in their different ways, to rely progressively less and less on the rationalizing process and more and more directly on the store of aural experience which is meanwhile being built up.

CONCLUSION. — A course of aural training can attempt to teach the ear to classify the various phenomena presented to it, but it cannot and does not pretend to train taste. At the same time any expression of artistic judgment depends for its validity in the first instance, at least, on the degree to which the mental ear grasps the sounds by means of which the composer communicates his imaginative conception. A well-trained ear is therefore requisite for the true appreciation of music, but by no means necessarily implies good taste. By selecting examples from standard music the teacher can, however, enlarge the field in which his pupil's taste is learning to exercise itself. This principle has been widely applied in relation to school children, and two important books, by Chamberlain and Macpherson & Read, are based upon it.

There is a regrettable though understandable tendency for ear-training to assume the form of diligent practice of the tests required for specific examinations, with a resultant danger (and it must be remembered that it is not the intention of the examination that this should be so) that there may arise an academic code unrelated to the music normally played, sung or heard by the pupil.

For the adult public of the sort which attends lectures on the appreciation of music there is a great need for some scheme of training in listening, less formal and analytic than that required of music students, directed towards a

conscious awareness of musical sounds — to feel a modulation, hear melodies in combination, perceive a phrase extension or recognize a new harmonization. This is a branch of ear-training of fundamental importance to "the intelligent listener" which is as yet relatively undeveloped.

**EARSDEN, John** (b. ? ; d. ?)

English 16th-17th-century composer. With George Mason he wrote the music for 'Ayres that were sung and played at Brougham Castle . . . in the King's Entertainment', the words of which were written by Thomas Campian and published with the music in 1618.

E. H. F.

**EASDALE, Brian** (b Manchester, 10 Aug. 1909).

English composer. He was educated at the Westminster Abbey Choir School (1920-25) and the R.C.M. in London (1925-33), under Armstrong Gibbs and Gordon Jacob for composition, and Edward Mitchell for pianoforte. While there he won the Cobbett and Foli prizes for composition. He wrote an opera, 'Rapunzel', as early as 1927, and incidental music for Browning's 'Pippa passes' at the Old Vic School in 1928. His 'Five Pieces for Orchestra' were given in Vienna in 1936 and his pianoforte Concerto was broadcast in 1937. In 1936 he began writing music for G.P.O. documentary films and in 1937 he became, with Benjamin Britten, musical director of the Group Theatre, until 1939. From 1940 to 1942 he served in the Royal Artillery, then with the Public Relations Film Unit, India (1942-45), and later as musical director of Information Films of India (1945-46). He returned to England in 1946 and became musical director of Archers Film Unit (1947-1949). He has written many notable film scores, including 'The Red Shoes' and

'Gone to Earth' (on Mary Webb's novel). In 1950 his opera 'The Corn King' (1935) was given in London, at the Paddington Hall Theatre, and he was commissioned by the English Opera Group to write 'The Sleeping Children', which was produced by the Group at the Festivals of Cheltenham and Liverpool in 1951.

Easdale's principal works are as follows:

#### OPERAS

- 'Rapunzel' (after Grimm) (1927)
- 'The Corn King' (libretto by Naomi Mitchison, on her novel) (1935).
- 'The Sleeping Children' (libretto by Tyrone Guthrie) (1951)

#### BALLET

- 'The Phoenix'

#### INCIDENTAL MUSIC

- Shakespeare's 'Merchant of Venice'
- Shakespeare's 'Hamlet'
- Eugene O'Neill's 'Mourning Becomes Electra'

#### ORCHESTRAL WORKS

- 'Five Pieces for Orchestra'
- 'Dead March.'
- 'The Sixth Day'
- 'The Phoenix.'
- 'Bengal River.'

#### PIANOFORTE AND ORCHESTRA

Concerto

#### VOICE AND ORCHESTRA

5 Poems for speaker & small orch

#### CHAMBER MUSIC

String Trio

#### PIANOFORTE SOLO

Sonata  
Sonatina.  
17 Preludes

#### SONG CYCLES

- 'Songs of Absence'
- 'Leaves of Grass' (Whitman).
- Song Cycle (D. H. Lawrence).

C. M. (iii)

**EAST (Easte)<sup>1</sup>, Michael** (b. London, c. 1580; d. ? London, 1648).

English composer. He was probably the son of the music printer Thomas East. When he was invited to contribute to 'The Triumphes of Oriana' in 1601 he must have been quite young. His madrigal was sent in too late to be included in the body of that work, but it was added as an extra number at the beginning. His will, dated 7 Jan. 1648, was proved P.C.C. on 9 May 1648. He was organist of Lichfield Cathedral and took the degree of B.Mus. at Cambridge in 1606. His son, Michael, continued to live in the Close at Lichfield. The latter also had a son named Michael, aged four years in 1650.<sup>2</sup> From the dedication of his sixth set of books we gather that Williams, Bishop of Lincoln, had granted him an annuity to mark his appreciation of one of East's motets. In 1604 he published a set of madrigals, which was followed in 1606

by a second set, the preface to which is dated "From Ely House in Holborne", whence it may be inferred that he was then a retainer of Lady Hatton, the widow of Sir Christopher Hatton. In 1610 he published his third set of books, which was rather different in character from the first two; the vocal compositions were classified under various heads, namely, 'Pastorals', 'Neapolitans', 'Anthems' and 'Madrigals', and there were included 8 Fantasies for viols. The fourth set of books bears the date 1619, whereas the fifth set is dated 1618. The fourth consisted mainly of madrigals, but included also some anthems. The fifth contained 20 three-part madrigals, but no more than the opening phrase of the words was printed in any of the partbooks. The sixth set of books was published in 1624, and consists solely of anthems with one secular song printed on the fly-leaf; and the seventh set of books (1638) was devoted entirely to instrumental music, for, although it included some numbers "that may be as well sung as plaid", there are no words to them. East was an industrious composer, but neither his madrigals nor his fantasies for viols were characterized by any marked individuality. Peacham mentions East in his short list of good English composers<sup>3</sup>, and North includes him among composers of fantasies.<sup>4</sup> E H F

#### SACRED MUSIC

Evening Service (M and N D. only) PH

#### ANTHEMS

- 'Awake and stand up.' PH
- 'As they departed.' Durh., B M, Add. MSS 30,478-79 (Tenor cantoris part only).
- 'Blow out the trumpet.' PH.
- 'Haste thee, O God'
- 'But let all those' (2nd part) } Add. MSS 29,366-68
- 'O clap your hands' (for Ascension Day) } PH; Add. MSS 29,372-77.
- 'God is gone up' (2nd part).
- 'O Lord, on whom I do depend' PH
- 'Rise, O my soul' (a 5) Add. MSS 17,792-96.
- 'Sing we merrily' (a 6). Add. MSS 17,792-96. Ch. Ch. 56-60 (Bass part wanting).
- 'When Israel came out of Egypt' and 'What aileth Thee?' Durh., Add. MSS 29,372-77. (Both these anthems are included in the Third Set of Books, 1610.)

J M. (ii).

The following are East's madrigals:

#### IN MORLEY'S 'THE TRIUMPHES OF ORIANA' (1601-3)

- 'Hence, stars, too dim of light' for 5 voices.

#### FIRST SET OF MADRIGALS (1601)

##### FOR THREE VOICES

- 1 O come again, my lovely jewel
- 2 In the merry month of May (Pt. 1).
- 3 Corydon would kiss her then (Pt. 1).
- 4 Young Cupid hath proclaimed.
- 5 To bed, to bed, she calls
- 6 O do not run away.

<sup>1</sup> 'Compleat Gentleman' (1634), p. 103

<sup>2</sup> 'Memories of Musick' (1728), ed. Rimbault (1846), p. 84.

<sup>3</sup> Republished in 'The English Madrigal School', Vols. XXIX-XXXI.

<sup>1</sup> The name is also found spelt Este or Est.

<sup>2</sup> Dom. State Papers, Interregnum G. 220, Nos 125, 127, 131. Communicated by Mr. C. S. Emden.

- 7 In an evening late.  
8. Alas, must I run away?

## FOR FOUR VOICES

9. O stay, fair cruel.  
10. My hope a counsel.  
11. Pity, dear love.  
12. Mopsa, leave off to love.  
13. Sweet love, I err.  
14. In vain, my tongue.  
15. When on my dear I do demand  
16 Joy of my life.

## FOR FIVE VOICES

- 17 All ye that joy in wailing.  
18 My prime of youth (Pt. i).  
19 The spring is past (Pt. ii).  
20 Fair is my love.  
21. Sly thief, if so you will believe (Pt. i).  
22. What thing more cruel? (Pt. ii)  
23 Ye restless cares  
24 You mournful gods.

## SECOND SET OF MADRIGALS (1606)

## FOR THREE VOICES

- 1 I do not love my Phyllis.  
2. See Amaryllis shamed.  
3 Why smilest thou?  
4 How merrily we live.  
5 Follow me, sweet love.  
6 Round about I follow thee.

## FOR FOUR VOICES

- { 7 In dolorous complaining (Pt. i)  
{ 8. Since tears could not obtain (Pt. ii)  
{ 9 Why runs away my love? (Pt. i)  
{ 10 Why do you seek by flight? (Pt. ii)  
11 Farewell, false love.  
12 So much to give.  
13 Sound out, my voice (Pt. i)  
14. She that my plants (Pt. ii)

## FOR FIVE VOICES

- 15 Why smilest thou?  
16 Dear, why do you joy?  
17 Now Cloris laughs (Pt. i)  
18 Forsaken Thyrsis, sighing (Pt. ii).  
19 I fall and then I rise again.  
20 What doth my pretty darling?  
21 Hence, stars, too dim of light  
22 O metaphysical tobacco.

## THIRD BOOK (1610)

## FOR FIVE VOICES

- 61 Come life, come death.

## FOR SIX VOICES

- 15 Poor is the life  
18 Dainty white pearl  
19 Say, dear, when will your frowning?  
20 Lo, here I leave my heart  
21 Life, tell me.  
22 Now must I part.

## FOURTH BOOK (1619)

## FOR FOUR VOICES

1. Thyrsis, sleepest thou?  
2 I did woo her.  
3 Why are our summer sports?  
4 Dear love, be not unkind.  
5 When as I glance.  
6. Your shining eyes.  
7 When I lament.  
8 Farewell, sweet woods.

## FOR FIVE VOICES

- 9 To hear men sing.  
12. I heard three virgins (Pt. i).  
13. What heart such doubled force (Pt. ii).

## FOR SIX VOICES

- 17 Quick, quick, away, despatch (Pt. i).  
18 No haste, but good (Pt. ii).  
19 Fly away, care.

<sup>1</sup> The missing numbers are other works, such as anthems, fantasies for viols, etc.

23. Weep not, dear love  
24. Your shining eyes

**EAST (Easte, etc.), Thomas** (b. ?; d. London, Jan. 1609).

English musical typographer, publisher and composer, probably father of the preceding. He is famous as the publisher of the Elizabethan madrigalists. Arber's 'Stationers' Registers' show that he was made a freeman of the Company on 6 Dec. 1565 and that he issued a book of 'Christmas Recreations' [sic] in 1576. The first music printed by him was Byrd's 'Psalmes, Sonets and Songs of sadnes and pietie', which was entered at Stationers' Hall on 6 Nov. 1587 and issued without date, being brought out in a dated edition in 1588, he then "dwelling by Paules Wharf" and describing himself as "the Assignee of W. Byrd"; i.e. assignee of the patent granted to the latter for the exclusive right to print music and ruled music paper.

In the following year East removed to Aldersgate Street, where he published at the sign of the Black Horse. In 1592 he edited 'The Whole Booke of Psalmes, with their wonted tunes, in four parts'. The composers employed by him to harmonize the tunes were ten of the most eminent men of the day: Richard Allison, E. Blancks, Michael Cavenish, William Cobbold, John Dowland, John Farmer, Giles Farnaby, Edmund Hooper, Edward Johnson and George Kirbye. Two other editions of the work appeared in 1594 and 1604. This collection was the first in which some of the tunes were called by distinctive names—"Glasenburie", "Kentish" and "Cheshire"—and was also one of the first to appear in score, instead of in separate partbooks. In 1600 he described himself as "The Assignee of Thomas Morley" and in 1609 as "The Assignee of William Barley", having acquired the interest in the patent granted to Morley in 1598 and by him assigned, or perhaps only licensed, to Barley. An example of this monopoly music-paper, stamped T. E., is to be seen in Thomas Hunt's autograph of his service (about 1600) in the library of St. Michael's, Tenbury (Tenb. MS 786).

East died before 17 Jan. 1609, when his successor, Thomas Snodham, obtained what would be now called his "copyrights". His widow, Lucretia East, died in 1631, having bequeathed £20 to purchase a piece of plate to be presented to the Stationers' Company. The most important works printed and published by East were:

1588. Byrd's 'Psalmes, Sonets and Songs'.  
Yonge's 'Musica Transalpina'.  
1589. Byrd's 'Songs of Sundrie Natures' and 'Cantiones Sacrae', bk. i.  
1590. Watson's 'Madrigals'.  
1591. Damon's 'Psalter' (2nd ed.).  
Byrd's 'Cantiones Sacrae', bk. ii.  
1592. 'The Whole Booke of Psalmes.'

- 1593 Morley's 'Canzonets'.  
 1594 Morley's 'Madrigals'.  
 Mundy's 'Songs and Psalmes'.  
 1595 Morley's 'Ballets and two-part Canzonets'.  
 1596 Kirby's 'Madrigals'.  
 1597 N. Patrick's 'Songs of Sundry Natures' and  
 'Musica Transalpina', and ed.  
 1598 Wilbye's '1st set of Madrigals'.  
 Weelkes's '1st set'.  
 Morley's 'Madrigals' and 'Canzonets' from  
 Italian authors, also a selection from Lassus.  
 1600 Dowland's '2nd book of Ayres'.  
 1601 Jones's '1st book of Ayres' and the 'Triumphes  
 of Orana'.  
 1603 Bateson's '1st book of Madrigals'.  
 Weelkes's '2nd book' (1600).  
 Byrd and Ferrabosco's 'Medulla Musicke'.  
 Robinson's 'Schoole of Musicke'.  
 1604 Michael East's '1st set of Madrigals'.  
 Francis Pilkington's '1st book of Songs or Ayres'.  
 1605 Byrd's 'Gradualia'.  
 1606 Danyel's 'Songs'.  
 1607 Youll's 'Canzonets'.  
 Croce's 'Musica Sacra'.

'The Whole Book of Psalms' was published in score by the Musical Antiquarian Society in 1844, edited, with a Preface, by Edward Rimbault. W. H. H., adds.

**EASTCOTT, Richard** (b. Exeter, 1740; d. Livery Dale, Devon, 1828).

English clergyman, musical historian and composer. He was the author of 'Sketches of the Origin, Progress and Effects of Music, with an Account of the Ancient Bards and Minstrels', a well-executed compilation published at Bath in 1793, which was so favourably received as to call forth a second edition in the same year. He also published six pianoforte sonatas and some songs. At the time of his death he was chaplain of Livery Dale. He was the early patron of John Davy. W. H. H.

**EASTERN CHURCH MUSIC.** Under this head will be found a discussion of the following branches of the music of the near-eastern Christian Church:

THE SYRIAN CHURCH

MELCHITES

THE ARMENIAN CHURCH

THE COPTIC CHURCH

THE ETHIOPIAN CHURCH

THE SLAVONIC CHURCH.

This is preceded by an introduction connecting this subject with the music of the Greek Church, which may be studied in greater detail in the article on BYZANTINE MUSIC.

The transition from homophony to polyphony in western music is usually looked upon as an advance from a primitive form of musical expression to one more highly developed. This view was until recently so widely accepted that even in a work as outstanding as Guido Adler's 'Handbuch der Musikgeschichte' (1930) it was possible to head the first chapter 'Die Musik der Natur- und orientalischen Kulturvolker' ('Music of Primitive and Oriental Cultures'). This is tantamount to placing the music of the East on the same level as that of the truly primitive

racers purely on the grounds that its roots are extra-European and that it does not admit of harmonization. To say that European music represents an advance on that of the East is only partially true. It is only necessary to discuss music with orientals in order to learn that to their ears our melody is weaker and less expressive than theirs. This may be readily understood. With the transition from homophony to polyphony the creative intensity hitherto concentrated upon a single voice is dissipated among several. A melody accompanied by other parts in counterpoint receives from them, indeed, an enhancement to its beauty, as a jewel does from its setting; but the melody itself, in order to blend with other melodies, must submit to certain limitations. It can no longer expand in complete rhythmic freedom, but must be bounded by the bar-line, thus losing much of its former flexibility and power of development. Something of the musical sensibility of the East is preserved for us in Gregorian chant. The reform of choral practice which originated at Solesmes<sup>2</sup> has opened the way to a better understanding of its character, both artistically and scientifically, and it is not too much to say that Gregorian chant is now heard and valued in a completely different way from what it was in the days when the only valid standards of beauty were those of the classical and romantic traditions. It is only necessary to compare the beginning of the Kyrie 'Cunctipotens Genitor Deus', as given in the so-called 'Medicea' edition<sup>3</sup> and its transcription in modern notation with the Solesmes version given in

Ky - ri - e

Ky - ri - e

the 'Liber usualis Missae et Officii'<sup>4</sup> and its transcription in the 'Paroissien roman' to see that the heavy, unvocal phrase of the earlier version has been transformed into the beautiful flowing melody that the best of the medieval manuscripts have preserved for us:

Ky-ri - e

Trans.

<sup>2</sup> See Vol. VII, p. 874.

<sup>3</sup> Pustet Press, Ratisbon, issued before the Solesmes reform.

<sup>4</sup> Desclée & Co., No. 780, 1929.

<sup>1</sup> Dated that year, but not issued till 1603.

Even a few decades ago it was still possible to hear the Gregorian melodies accompanied on the organ with harmonies suited to the taste of the later romantic period. Gradually a simpler style of accompaniment began to prevail, as may be seen in the opening of the hymn 'Ave maris stella' as harmonized by Dom L. Perosi <sup>1</sup>:

This in turn was finally succeeded by the discreet arrangements of the Solesmes school, of which an example is given below in the opening of the 'Asperges me' as harmonized by Dom J H Desroquettes and H. Potiron <sup>2</sup>:

To-day it is possible in many places to do without the organ altogether and perform the Gregorian melodies unaccompanied, without

letting the congregation feel either a sense of monotony or a void. On the contrary, it is recognized that this, the original way of performing Gregorian music, is also the most beautiful.<sup>3</sup>

The eastern church possesses, unfortunately, no editions of its melodies to set beside those of the Gregorian music made by the monks of Solesmes and of Byzantine church melodies given in the 'Monumenta Musicae Byzantinae'.<sup>4</sup> In the case of the Gregorian and Byzantine melodies it was possible to refer back to the medieval manuscript sources and so establish a link with past traditions and with the age in which these melodies were born and flourished. To do the same for the music of the eastern church — Syrian, Armenian, Coptic, Ethiopian — has been impossible so far, and probably will prove possible only in the case of the Armenian church melodies, of which a large number of manuscripts are preserved. All that has been available hitherto, both for this and for the other eastern churches, has been transcriptions of the melodies in the form in which they are sung to-day. These transcriptions, moreover, were for the most part made by musicians who took little account of the problems that occupy present-day scholars, and who in turning the melodies they heard into European notation followed their own individual systems and theories.

Gregorian chant is the bridge by which one may arrive at an understanding of eastern church music. Those who have had the opportunity of hearing it will, however, perceive an essential difference between eastern church music and plainsong. This lies in the peculiar way of singing it, which is disturbing to ears accustomed to European music; for while Gregorian chant is sung in the familiar manner, Eastern church music is sung in a nasal voice, with apparently impure intervals and many ornaments. The nasal style of singing is regarded as beautiful by the oriental, and it is a mistake to see in it merely a "decadent phase" of the art of singing, as it is described in so many travel books. The "impure" intervals show themselves to be characteristic of a scale system far richer and more variable than that known to the West to-day. Finally, the aesthetic parallel to the ornaments may be seen in the rich decoration applied to all eastern works of art. They represent a principle of construction based not on symmetry but on a melodic line which renews itself in a perpetual flow of exuberant arabesques.

<sup>1</sup> Published in the 'Rassegna gregoriana', Rome, 1902.

<sup>2</sup> See 'Accompagnement du Kyriale Vatican', par le R P Dom Jean Hébert Desroquettes et Henri Potiron (Paris, 1929), and the numerous examples given in the 'Revue grégorienne', Tournai.

<sup>3</sup> See the two albums of records issued by His Master's Voice 'Chant grégorien', consisting of 43 selected Gregorian melodies sung by the choir of the Benedictine monastery of Solesmes, with an introduction by Dom J Gajard, O.S.B. (W 1115-26, 1930). See also Preface to 'A Plainsong Hymnbook', published by the Proprietors of 'Hymns A and M', 1934.

<sup>4</sup> See Vol. V, p. 860

These peculiarities once accepted and acknowledged, eastern church music may be appreciated without further difficulty. It must, however, be realized that in this as in all other aspects of eastern Christianity the present conditions are but a shadow of their former splendour, and that only through the medieval manuscripts is it possible to gauge the wealth and magnificence of the past. It would, for example, be impossible, without knowing older versions, to form any idea of the original aspect of the 'Censing Hymn' of the Armenian monastery of San Lazzaro by studying the melody (as quoted below) in the rhythmic and melodic form and with the banal harmonies given to it by Pietro Bianchini in the collection 'Les Chants liturgiques de l'Eglise arménienne' (1877).

("O Christ our Lord, who by Thy Blood hast rendered Thy Church more luminous and more splendid than Heaven . . ."). And what is true in one case is true in innumerable others: wherever these church melodies have been transcribed by musicians with insufficient knowledge the result of their activities has only been the publication of a distorted version.

As the eastern church has none of the centralized exclusiveness of the western, so too her music has from the earliest times fallen into a number of clearly defined sections which again divide up into sub-divisions.

In the East the character of each nation is reflected and preserved in its liturgy. Corresponding to each of the racial languages (which also became cult languages) — Greek, Syrian, Chaldean, Armenian, Coptic, Ethiopian and Slavonic — there were, and still are, distinct styles of church music. These are in part the creation of the country in which they are sung, and even where the melody is an importation it undergoes in each country certain modifications through the influence of the national style. In considering such "migrant" melodies it must be remembered

that the transformations effected by each country are far more radical than in the West, but that on the other hand the folk melodies of the different countries themselves remain unaltered for far longer than do western folk-songs. If this were not so, the task of tracing traditional sources in regions swept for centuries by successive waves of conquest and destruction — Persian, Arab, Seljuk, Mongol, Ottoman — would be an impossible one. But the East possesses a miraculous power of allowing the most fiercely contrasted elements to exist alongside each other, and thus Christianity and its liturgical usage was able to preserve itself from complete annihilation by the dominant culture of Islam.

There is a deplorable scarcity of manuscript sources of the finest period of eastern church music. The Byzantine hymns are the only ones preserved in numbers which at all correspond to those of our Gregorian manuscripts. Next in order come the Armenian manuscripts with notation-signs.

Besides these there exist a certain number of Ethiopian musical manuscripts and a few isolated examples in Syrian notation. Each of these groups developed its own notation during the Middle Ages, and hitherto it has proved possible to decipher only the Byzantine manuscripts. The music of the eastern church is thus known to us almost exclusively in its present-day form, and only by comparing individual melodies that appear to be related is it possible to reach any conclusions as to the common origin of many of these melodies.

The melodies of each of these national churches discussed below have their own individuality of expression. The music of the Armenian church excels in melodic exuberance and wealth of ornamentation. That of the Syrian church has a richly varied scale system, strongly influenced by the music of Persia and Arabia. The standard of church music in Abyssinia<sup>1</sup> is to-day considerably lower, but that country's religious poetry, and such information as has come down to us regarding its music, makes it clear that it stood formerly on a much higher level. Coptic music, on the contrary, has an extraordinary richness and expressive power. The melodies of the Greek church are definitely hybrid in character. Even during the period of the Byzantine empire the Greek language was a means of uniting the most widely divergent elements. So too the melodies to which the Greek hymns are sung are drawn from every region of the former Byzantine empire, and many are actually borrowed from foreign countries or imitate the style of other nations. In the later Middle Ages melodies were composed in the Bulgarian (*българска*), Frankish (*φραγκικόν*)

<sup>1</sup> See Ethiopian Church, p. 868, below.

and Persian (*μερσικόν*) styles, and Turkish influences may also be traced.

It is nevertheless most probable that certain of the melodies used in the Mass, either throughout the eastern church as a whole or in certain of its branches, have a common origin and are descended from the earliest Christian times; they may even perhaps be traced back to the melodies sung in the Temple at Jerusalem. This supposition is strengthened by the results of comparative research on the various eastern liturgies.

The study of eastern church music is as yet only in its earliest stages. The difficulty of the task lies in the fact that it is impossible to study the music apart from the text of the poems to which it is set, or from the liturgy of which both words and music form an integral part. It is, however, a task which must be accomplished if the eastern sources of European music are to be discovered, even as the origins of music in the Mediterranean and western spheres cannot be rightly understood without an appreciation of the part played therein by Gregorian chant.

**THE SYRIAN CHURCH.**—The oldest Syrian liturgy is very closely connected with that of Palestine. Hence, too, Syrian religious verse is akin to that of Palestine in form and structure, and the main feature of the ancient Syrian hymns sung at Antioch, as of those sung in Jerusalem, is that they are sung antiphonally between one or more leaders and the choir as a whole. The most important types of verse sung in the Syrian church are: (1) the *Madhrāshā*, a kind of choral lyric, chiefly of a homiletic nature, in which long verses alternate with a shorter refrain; (2) the *Sogitha*, a hymn-like type of poem in which the verses are linked by an acrostic.

Syrian Christian culture began to flower in the third century and continued until the seventh. Towards the West the spread of the Syrian church was barred by the hegemony exercised by Greek civilization in the big towns along the coast. Notwithstanding this, the church of Edessa was connected with Syrian churches in the south of France, whither many Syrians had emigrated in the early years of the Roman empire. In Italy the Syrians had penetrated as far as Verona, and at Ravenna all the bishops from Apollinaris to Peter (396–

425) — that is, in the first four centuries of the Christian era—were Syrians. Syrians were also to be found on the Rhine, in Germany and in Great Britain. Through this westward penetration the Syrian version of the New Testament scriptures influenced the Latin translation of the Bible, as Syrian church music influenced that of the West.

On the other hand Syrian culture, and with it the liturgy and its accompanying hymnody and music, was free to spread eastwards without hindrance. Within the first centuries of the Christian era it had swept across Mesopotamia and into the Persian interior, and later the Nestorians carried the Syrian church as far as Turkestan, India and China. Until about 1900 nothing was known of the Nestorian hymns and their manner of intoning the Gospels in the service; but expeditions to Chinese Turkestan in the first decade of the present century resulted in the discovery of many fragments from the New Testament and of Manichaean hymns, written in Syriac characters in the Soghdian language. These texts reveal a system of dots, which distinctly regulates intoning or cantillation in the same way as the system of ekphonic notation regulates intoning in the Byzantine church. These dots are placed on, above or below the lines and are frequently doubled, as may be seen in the following example (St. John ix, 36):

pačagnī qatāraṭ' chōnē' qaṭ payām  
*answer gave this, who healing*

bīrdārat, āṭ vānō pačqvādarat. qē  
*has found and so he spoke. Who*

chaṭī manā chēpatāvaṇṭā qāṭ varnām  
*is it O my Lord that I confide*  
 par vne.  
*in him?*

In this type of enunciation, which marks the transition from intoning to actual singing, the vowels are lengthened — as in the Byzantine texts — or certain syllables, like "yga", are inserted; for this too there are parallels in the Byzantine liturgical texts, as also in the folk-songs of the Tartars, Caucasians and other races.

From the earliest times the Syrians knew the system of the *Oktoechos*, or classification of melodies into eight groups, *i.e.* according to eight modes. The Byzantines took over this classification from them. These eight "Echoi" are generally regarded in theoretical books as being the equivalents of the so-called ecclesiastical modes according to which the Gregorian melodies are classified, and in which pieces mostly of a liturgical character have been composed from the Middle Ages down to our own day. But the cadences alone should

make it obvious to every musician who studies the psalm-tones of the western church that the essential element is not the *scale* but the cadential formula. The process should be regarded as having taken place in the reverse order from that which is generally accepted as correct. The primary fact is the existence of melodies containing certain definite melodic formulas; these formulas were then grouped together and the groups were in their turn concentrated into eight main groups. This was the case both with the Gregorian melodies and those of the eastern church. It was not till later that the *echoi* came to be regarded by the medieval theorists of western Europe as being equivalent to the Greek scales and were taken as a basis for the construction of new melodies, which were then regarded as belonging to one of the eight "Tones".

According to the traditions of the church the *Oktoechos* was introduced by St. John of Damascus. In actual fact, however, the Syrian *Oktoechos* may be traced back to Severus, the monophysite Patriarch of Antioch (512-19), who grouped the words of the church hymns according to the melodies to which they were to be sung. This *Oktoechos* received its definite form from Jacob of Edessa (674-75). The investigation of the past history of Syrian church music has not gone beyond the sphere of conjecture, for no manuscripts with neums or other decipherable notation signs are known to exist.<sup>1</sup>

The Syrian church music of to-day (the melodies of which have been transcribed by two French Benedictine monks, Dom J. Jeannin and Dom J. Puyade), possesses a melodic formula for each of the eight modes. The formulas for the first and second *echoi* are these:

<sup>1</sup> Thibaut alone, in his outstanding book 'Origine byzantine de la notation neumatique de l'Eglise latine' (Paris, 1907), reproduced a page from a Syrian hymnary with neums and announced the existence of other manuscripts of the same kind.

In order to show how these formulas are related to the melodies themselves, a melody in the first mode is here quoted:

The words to which this melody is sung are in praise of the Virgin. The Syrian melodies, for the most part, appear to have been originally diatonic, like the one quoted above. But with the advance of the Arabs and, later, of the Turks, the chromatic element found its way in, as it did in the Byzantine church. It often happens that an interval which is sung diatonically throughout the major part of a melody is in one or two places chromatically inflected.

The melodies of the Syrian church are rich not only numerically but also in form and expression. They may be clearly distinguished from the far simpler ones of the Maronites and Chaldeans and from the even richer hymns of the Christian Arabs, whose melodies, even of a liturgical character, such as 'Tantum Ergo', have almost the exuberance of secular song.

**MELCHITES.**—The name "Melchites" denotes those who adhere to the imperial dogma of Chalcedon as distinct from their monophysite and maronite opponents in the East. Most eastern Christians, indeed, used the opposition aroused by the Council of Chalcedon as a pretext for ranging themselves on the side of the schismatics, more from hatred of Byzantine rule than from religious motives. One group of Melchites was formed by the Greeks of the Egyptian and Syrian colonies, another by the native population of Syria and Palestine. The orthodox Melchites were organized in three patriarchates, those of Antioch, Jerusalem and Alexandria; the Catholic (united) Melchites split off from them later. The centre of their spiritual and liturgical activities is Hama in Syria, where the Metropolitan of Laodicea, Germanos Moaqqad, founded a missionary society and printing-press in 1903. The melodies used in the Mass were published in 1926 by the Archimandrite of the Catholic Melchites, A. Attié. It is regrettable that the character of the melodies has been so distorted by European influences and amateurish harmonization that their original form can only with difficulty be reconstructed. In a few melodies, notwithstanding — the Cherubikon, the Praefatio and the Kinonikon — the original form, in all its melodic richness, may be discovered even here. It is probable that some of the melodies, like so many of the later Byzantine melodies, originated in the 16th and 17th centuries; others, especially the syllabic hymns, must have come into being earlier, for they show a marked relationship to Byzantine hymns contained in manuscripts of the 12th and 13th centuries.

**THE ARMENIAN CHURCH.**—Armenia is a country whose inhabitants are musically gifted to an unusual degree. Music thus holds an important place both in the past and present history of the nation. Her folksongs, words and music alike, are of such power and beauty that they enthrall even the European listener;

they include love-songs of great intensity, peasant ploughing-songs and threshing-songs, songs of village life and dancing-songs.

Armenia is one of the first countries into which Christianity found an entrance, and in A.D. 300 it was adopted as the state religion. Tradition has it that it was Mesrob who, by inventing a new style of writing of his own, freed Armenia from the Syrian influence which had prevailed till then. The language of the liturgy was Old Armenian, which is used in the churches to this day. The Psalms and the Lessons (Pericopes), which were taken from the Prophetologium and from the Gospels, were intoned in a half-singing manner (cantillation) which could on occasion rise to real singing. The following tetrachords were used:

There are various opening and closing formulas, the latter being classified into those for the lessons from the Prophetologium and those for the Gospel lessons. There are also formulas for the various prayers that occur in the liturgy. The following is an example of an opening formula for the Gospel lesson:

To record these formulas the Armenians — like the Byzantine church — used their own system of neums, the so-called ekphonic notation, which is found in the medieval codices and has been handed down verbally from one generation to another until the present day.

The music of the Armenian church — that is, the music of its hymns and songs — is known to us only in its present form, for it has hitherto proved impossible to decipher the medieval Armenian notation. This notation too is clearly related to the Byzantine, but is more complicated. The music of the Armenian liturgy consists of the Mass and the hymns sung at the Hours. These hymns held a place of great importance in the religious life of the Armenians; the hymnary, which took its present form in the last thirty years of the 16th

century and the beginning of the 17th century, contains 1166 songs. It is remarkable that by no means all the festivals and anniversaries of the present ecclesiastical year have their special song. In its original form, indeed, the hymnary was actually poor in songs for Sundays and saints' days. But Nerses Shnorhali (1102-73), Armenia's greatest poet (who lived at a time of national revival, during the rise of a new kingdom in Cilicia under the Rubenides dynasty), increased the size of the hymnary by a fifth, enlarging all sections considerably. After Nerses and until the 14th century the final additions were systematically made to the hymnary, which began to take on its present form. In the settings of these hymns Armenia possesses a school of church music which ranks among the most beautiful of all the known oriental styles. This music is of the utmost expressiveness, and in wealth of invention the only school which can compare with it is the Byzantine, which in many ways it excels.

It must, however, be made clear at this point that it is impossible to speak of Armenian church music as a general term. There are several centres which have given birth to distinct types of music: such are Edjmiadzin, Calcutta, the monastery of San Lazzaro at Venice, that of Saint Mechithar in Vienna and other places. The term "Armenian music" as used here denotes the music of the central church of Edjmiadzin, which may be found in M. Ekmalian's collection 'Les Chants de la sainte liturgie' (in Armenian and French, Leipzig, 1896).

In the Armenian liturgy, as in the Byzantine, a single hymn has often more than one melody, so that in both cases a distinction must be made between simple song (*σύντομον μέλος*) and expanded coloratura song (*ἀργὸν μέλος*); but among the different types of Armenian melody there are many intermediate stages. A single example of the highly ornamented coloratura melody is given here:

It is the opening of the melody of the 'Robing Hymn', which stands at the beginning of every hymn collection, as being the hymn with which High Mass opened. The hymn 'horhurd horin' ('O deep marvel'), written by Vartapet Khatjatur of Taron in 1191, is that sung while the priest is being robed for the Mass.

It is deeply to be regretted that it has hitherto proved impossible to decipher the Armenian notation found in the medieval manuscripts, for without a knowledge of the melodies preserved in these manuscripts it is impossible to say how far those of to-day differ from those of the flowering period of Armenian church music. The present Armenian notation is indeed derived from that of the Middle Ages, but originated in the 18th century, at which period the knowledge of the old notation was already lost.

The purest source of Armenian church music is undoubtedly the music in use at Edjmiadzin, which is also used at Tiflis and Erivan. The collections of liturgical melodies issued by the Armenian religious communities living in Europe contain versions that differ widely from the traditional forms. The melodies of the Mechitharists in the monastery of San Lazzaro at Venice — the monastery in which Byron learned Armenian — show Turkish influence and are also influenced rhythmically by their European environment. Those of the Armenian colony at Calcutta have no long tradition behind them; they are derived from those in use at Djulfa in Ispahan, for there has always been a close relationship — which subsists to this day — between the Armenians living in Persia and those living in

India The use and understanding of the Armenian melodies at Djulfa was revived by one Bishop Thaddaeus, who came out to Djulfa from Edjmiadzin about 1850. He found that the old melodies, thanks to the isolated position of the colony, had been preserved in their purest form, but that, owing to lack of interest, they were in danger of being forgotten. From Bishop Thaddaeus Amy Abgar learned the melodies and later wrote them down, harmonized them and published them at Calcutta.

The most important figure in modern Armenian church music is the late Komitas Keworkian, who was Choragus at Edjmiadzin. Not only did he give a new impulse to research work on the Armenian church melodies and their notation; his chief work, indeed, was to collect, write down and harmonize Armenian folksongs, and his lecture tours in Europe created a widespread interest in Armenian music. In 1919 he became mentally afflicted — the result of the sufferings endured by his country during and after the first world war — and he died a few years later. His folksongs were published in Paris by a Comité des amis du Rév. Père Komitas.

THE COPTIC CHURCH.—The Christian inhabitants of Egypt are known as Copts. The name is an Arabic corruption of "Egyptians" (Qibt=[Aḡ]yptios). The southern part of Egypt, and in particular the Thebais (in Arabic, the Said), may be regarded as the home of Egyptian Christianity. Here, too, arose a national Egyptian literature, and it was the centre from which spread the use of the Egyptian language in the service of the Christian faith. After the conquest of Egypt by Alexander the Great the impact of Hellenic influences had been felt less strongly in southern Egypt than in other parts of the country, and the transformation of the Egyptian form of worship into a mystery religion permeated with Greek conceptions had also met with resistance in that region. For this very reason the Christian message found fewer obstacles in its way, and the first converts to the new faith were made as early as A.D. 200. Services were held in the vernacular, and this stimulated a

rich flow of popular religious poetry. As the old hieroglyphic writing was too difficult for the people, Greek characters were introduced, augmented by a few signs to denote sounds that did not exist in Greek.

The national contrast between Greeks and Egyptians found its expression in the new religion also. Under the Patriarch Dioskoros of Alexandria (444-51) the Coptic church took on a monophysite character, thereby cutting itself off from the ruling Greeks, the MELCHITES (see p. 865 above). Antipathy to the Greeks was so strong that the Copts favoured the Arab invasion of 641. Their hopes proved illusory, however: from that time onwards their situation grew steadily worse, and Coptic culture was almost entirely wiped out; it flowered again about the year 1000, but only for a brief period. Since the conquest of Egypt by Napoleon the position of the Copts has improved once more. A knowledge of these facts is necessary to an understanding of the state of Coptic church music.

The melodies of the Coptic church — as far as may be seen from those which have been preserved — fall into three classes; strictly liturgical melodies, hymns and religious folksongs. A large number of these hymns and songs are preserved in a series of manuscripts. Most of them are preceded by a few words which are to be regarded as indicating the melody to be used, as was also the custom in the Greek school of hymn-writing. The hymns are strophic and their melodies are based on the eight modes.

As far as one may judge at present the Coptic melodies are not recorded in any notation, so that it is possible to judge this music only in the form which is present to-day. It is unusually rich and expressive, and is handed down orally from one generation to another. The singers in the Coptic churches are almost all blind, because — according to the explanation offered by the Copts themselves — it is felt that only a blind man can possess the memory and the inner understanding to learn and retain the hundreds of melodies and perform them rightly.

Even in the liturgy of the Mass singing plays a far more important part than in the Byzantine or the Roman church. The very words of consecration ("take, eat . . .") which in the Byzantine and in the Latin Mass are spoken softly, are in the Coptic Mass sung with a loud voice; this may be seen in the following example, taken from P. L. Badet's collection of Coptic melodies:

ou - ôm é - vol enk -  
 -hetf ti - - ron:  
 — phai ghar pé  
 pa - sô — ma  
 e - tou na - fach é - gén  
 thi - nou nêhnan-ke-mich  
 en - sé - tif êp-chô é - vol  
 ên - té ni - no - vi  
 phai a - ritf é - pa -  
 - erph - mé - - vvi.

The lack of any written record of Coptic music brings with it the danger that the melodies may be lost. At present there are a few old singers still living who can remember and sing correctly all the melodies of the Coptic church. It is obvious, however, that such oral tradition may easily be destroyed by external events. It was for this reason that, as early as 1899, P. Badet attempted to write down the melodies by ear. Between 1929 and 1931 a Copt from Cairo, Ragheb Muftah, together with Ernest Newlandsmith, made excursions into every district and had the melodies collected by Newlandsmith; the collection is in seven manuscript volumes. As, however, transcriptions made by ear must

always reflect the musical idiosyncrasies of the individual transcriber, it is most desirable that gramophone records of these melodies should be made. Nine records of Coptic church melodies were made at the Congrès de Musique Arabe in 1932, under the direction of E. von Hornbostel and Curt Sachs.

A simple form of ekphonic notation did in fact exist for the reading of the Epistle and Gospel. Examples of it were published by W. Crum in the Catalogue of the Coptic Manuscripts in the collection of the Rylands Library (Manchester, 1909). This ekphonic system is distinguished from all other known systems of the same kind by the fact that the signs may be doubled and multiplied — a feature which is found nowhere else — e.g.:

ΛΕΓΟΝΤΕΣ, ΠΕΜΕΝΕΣ, ΠΡΟΣΚΥΝΗΣΟΜΕΝ

The doubling of the sign of the oxeia coincides with the tonic accent of the word over which it is placed.

THE ETHIOPIAN CHURCH.—Little has been known hitherto about the church music of Ethiopia. The earliest reference given in European sources is to be found in Athanasius Kircher's 'Musurgia universalis' (1680); this contains one or two hymns, which, however, are completely distorted by an incongruous rhythmic and polyphonic adaptation. There is also an account of it in Vol. XIV of Villoteau's 'Description de l'Égypte', with several examples and a table of the notation signs to be found in Ethiopian manuscripts. On this account are based the descriptions by Fétis and Ambros.

There are three modes in Ethiopian music, *ézel*, *áraráj* and *geéz*, which are always mentioned in the old accounts. The meaning of these names has not been discovered; it is not even known for certain whether they really refer to modes. Fétis, in Vol. V of his 'Histoire de la musique', deduces, from the melodies which were sung to him the following three scales:

geéz  
 ézel  
 áraráj

The last of these, however, should, on a correct interpretation of the melodies, run thus.

The founder of Ethiopian music is reputed to have been Saint Jarēd, whose life is surrounded with legends. He is said to have made songs "the like of which was not to be found in the East or in the West, neither among the Romans, nor the Greeks, nor the Syrians, nor the Egyptians". The priests who sang the songs composed by Jarēd — so runs the chronicle of the saint's life — sang with a loud voice until they were hoarse and until their knees shook and their hands grew sore with clapping. A curious usage persists to this day in the performance of Abyssinian church music: priests and deacons form a circle, in the middle of which two couples, or alternatively three priests, perform a kind of dance. Behind them stands a deacon beating a drum, the rhythm being thus strengthened by the drum-beats and by the hand-clappings of the priests. Reading such stories in the legends of the Ethiopian saints, it is easy to understand why in the early days of eastern Christianity, especially in Egypt and Syria, so many of the more austere monks wished all music to be forbidden in the services of the church.

The following melody, which is one of those sung on Good Friday, shows the ecstatic nature of Ethiopian religious music. It was transcribed by Villoteau:

Ethiopian notation is said to have been introduced, no earlier than the middle of the 16th century, by two priests, Azaj Gera and Azaj Ragueb. It is a combined system of letters and signs. The tables given by Villoteau, Fétis and Lussy deal with the letters alone; there is no doubt, however, that the neums are of equal importance. Perhaps the religious cleavage which is reflected in the Abyssinian Mass, and which had its origin in the clash of two evangelizing forces, the Syrians and the Copts, finds its expression in this double system of notation also.

The great age of Ethiopian religious poetry was the 7th century. There are collections of hymns, some derived from the psalms, some in praise of the Virgin Mary: that containing the major hymns is called *Degguā*, while that which comprises the festal hymns for the whole year is called *Meērāf*. The *Mawāsēet* corresponds to the antiphonarium of the Roman church. The *Malkēa Maryām* (portrait of Mary), a collection of six-line verses in honour of the Virgin, came into being about the year 1500.

**THE SLAVONIC CHURCH.**—It is an indisputable fact that the church melodies of the Russian and the Balkan peoples are Byzantine in origin. Detailed demonstration is not yet possible, for the necessary research work on the hymns and liturgical melodies of Bulgana, Serbia and Russia is as yet barely begun. But as early as 1907 A. Preobrazhensky had laid before the Society of Lovers of Ancient Literature the results of his investigations, which showed the existence of a striking similarity between the notation signs which accompany Byzantine hymns of the 11th century and those written above the translations of the same hymns into Russian. Later researches by Russian scholars have confirmed Preobrazhensky's conclusions. The names of certain Russian neums, such as *kryuk*, *paraklyt*, *tchamilo* and others, are taken directly from the Greek names for the same notation signs. The oldest form of notation, found in manuscripts dating from the 11th century to the 14th, was one which indicated the rhythm and the up and down movement of the melody without defining the exact intervals. From it was gradually evolved a script which diverged increasingly

from that found in the Byzantine manuscripts.

Later, in the 14th and 15th centuries the so-called *kryuky* notation, which can be traced back to the manuscripts of the 11th century, became prevalent in Russia. The number of notation signs, of which there had hitherto been 86, was reduced by half, and those of intermediate pitch were made to indicate a definite pitch by the addition of letters of the Slavonic alphabet. But the first notation to acquire a permanent validity was that formed by combining the *kryuky* notation with the use of red letters — a development effected by the singer Shaidurov of Novgorod at the end of the 16th century. This notation persisted — despite the reforms undertaken by Mesenez in 1668 — until the introduction of western notation in the 18th century.

The beginnings of Christianity in Russia may be traced back to the year 988, when the Archduke Vladimir adopted the new religion and had it preached throughout the country by Greek bishops. According to his chroniclers, he also brought a choir of singers with him from Constantinople to Kiev. But it was not until the reign of his son Yaroslav (1016–54) that Christianity became widespread among the people. Until after 1200 the services were sung by two alternating choirs, of which the first sang the hymns in Greek and the second repeated them in the Slavic tongue, using the same melody.

The question whether the Byzantine hymns were brought to Russia direct from Constantinople by way of Greece or, as the Chronicle of Joachim relates, were introduced by the Metropolitan Michael of Bulgaria and Bulgarian monks is still unanswered. At present the latter view seems the more probable of the two, since it appears that the Bulgarians played a far greater part in the spreading of Christianity than has hitherto been supposed. The fact that a certain group of hymns bears the name “Bulgarika” also points in the same direction.

The oldest Russian liturgical books containing melodies date from the 11th century and, in common with those of the Byzantine church, bear the names *Mnkyds*, *Trods*, *Stkhiraria* and *Irmologia*. The Russian liturgical hymn-books contain three types of melody: (1) melodies based on the Oktoechos, (2) the “threefold” chant, and (3) “demonic”<sup>1</sup> chant. Each of these three types had its own notation.

According to O. von Riesenmann, to whom we are indebted for the best existing account of ancient Russian church music, the earliest theorists divided the scale which formed the basis of all the melodies into four “regions”, each consisting of three tones:

<sup>1</sup> The meaning of the term “demonic” is obscure and has been given varying interpretations by Russian scholars.

In the 15th century the text of the Russian hymns began to be altered by the interpolation of extra syllables. This did not at first affect the melodies, but later they too were expanded by the addition of grace-notes and ornaments. This process continued until the 17th century, by which time the words of the hymns had been rendered unintelligible by the melodic ornaments and the interpolated syllables. Tsar Alexey Mikhailovich therefore set up a commission in 1655 to revise the hymns, but it was not until 1668 that the revision was actually carried out by a second commission, headed by Alexander Mesenez. The reforms were opposed by the *Raskolnky* (“Old Believers”), and thus arose a schism in the Russian church which was to have its influence on future developments. The *Raskolnky* rejected not only the reforms in the prayer- and hymn-books commanded by the Patriarch Nikon, but also the accompanying innovations in the notation-system, especially the introduction of the five-line staff. For this reason the *kryuky* notation has survived to this day among certain sects.

About the middle of the 17th century polyphonic singing was officially adopted by the Russian church, probably under the influence of Poland. From south-west Russia, where it had found an entry as early as the 16th century among the “Community of Brothers”, this new form of singing penetrated to Kiev and thence throughout the entire country. The reign of the unison cantilena was thus brought to an end, and the music of the Russian church, hitherto so conservative, opened its gates to western practices.

The Serbs did not receive the melodies of the Greek church direct from Constantinople, but from the Near East by way of Mount Athos. We know that the place held by Constantinople in the history of art has been the subject of fierce controversy, and that it has been questioned whether she was indeed, as she was so long held to have been, the artistic centre of Balkan civilization. These controversies are no longer of any importance, since it has been recognized that, while the influence of the East was incontestably very strong, each country absorbed this influence in a different way. It made itself felt very strongly in the Serbian liturgy, especially in its music.

In the 12th and 13th centuries there was a strong religious and spiritual relationship between Serbia and the East, which was maintained chiefly by monastic pilgrimages. The route followed by the monks led them, however, not through Byzantium but through the monasteries of Mount Athos, where that of Chilandari had been the most important Serbian centre ever since Stefan I Nemanja retired to Mount Athos in 1195 and founded a monastery there. Parallels in the field of architecture and of miniature painting point to the existence of a monastic tradition in music also, extending from Syria and Asia Minor to Mount Athos and thence northwards. This explains why the Serbian melodies — which are grouped according to the so-called *Oktoich* — reveal the impress of a formal scheme native to the Near East far more strongly marked than that of the Byzantine forms. The scheme is that discovered by Idelsohn<sup>1</sup> in the Arab melodies and called by him the *Maqam* style; this means that each melody consists of a number of short melodic formulas or groups of notes, which continually recur either unaltered or with variations. Here are some examples of such formulas<sup>2</sup>:

These formulas occur in the majority of melodies and so determine their character. Groups of them are united to form a main group, the "Hlas", which became identified with the "Echos" ("Mode", according to

<sup>1</sup> A. Z. Idelsohn, 'Die Maqamen der arabischen Musik' (S.I.M.G., XV, 1-63).

<sup>2</sup> Cf. E. Wellesz, 'Die Struktur des Serbischen Oktoechos' (Z.M.W., II, [1920], 140-48).

the teachings of the Greek theorists). For a period of eight weeks each successive week is given up to the singing of melodies in *one* of the eight "Hlasy", which together form the "Osmohlasnyk" or *Oktoechos*.

An analysis of the second melody in Tone I of the Serbian *Oktoechos* reveals the structure shown in the example given below. The

Roman numerals denote the sections which form the complete melody. The letters show the subdivisions of the melody; these are given according to the text, so that in many places the melodic phrase appears broken, according to modern ideas.

This formal scheme originated in the East. Up to now we have been able to detect the presence of the formulas as the basis of melody construction only in the hymns of the Serbian and Ruthenian churches. It will be necessary to extend investigations to the chants of all the churches of the Balkans and to the Russian orthodox church in order to see whether the same principle can be found in other cases. Not until this line of research has been developed will it be possible to determine the relationship of the sacred melodies of the Balkan peoples and of the Russian church to those of the church of Byzantium. And then, and only then, will it be possible to write in full the history of the music of the eastern church

**EASTON, Florence (Gertrude)** (b. Middlesbrough-on-Tees, 24 Oct. 1884).

English soprano singer. She studied in London at the R.C.M. and in Paris. In spite of her English origin, her career has been made principally in the opera houses of Germany and America; before the 1914-18 war she made only two London appearances, at Covent Garden, the more important being as Madame Butterfly in 1909. From 1907 to 1913 she was attached to the Royal Opera in Berlin, and from 1914 to 1916 to the Hamburg Municipal Theatre. In 1916 she sang at Chicago, and the following year saw the beginning of her long and fruitful association with the New York Metropolitan Opera, which lasted without interruption until 1929. Her pure tone, sound technique and admirable musicianship singled her out even among the brilliant assembly of star singers collected by Gatti-Casazza, and it is doubtful whether any manager has ever possessed a more useful member of his company. Perhaps the most versatile operatic singer since Lilli Lehmann, her repertory (ranging from Brünnhilde to Car-

men) is enormous, and her enunciation in four languages exceptionally clear; she could appear at a moment's notice in well over a hundred parts, including sometimes several in the same opera (e.g. in 'Der Rosenkavalier' and 'Die Walküre'). Between 1928 and 1931 she made a number of appearances at Covent Garden, notably as Turandot and Isolde, and in 1934 she sang as a guest artist at Sadler's Wells in the part of Tosca. She reappeared at the Metropolitan in 1936.

D. S.-T.

**EASTON, Robert** (b. Sunderland, 8 June 1898).

English bass singer. He was educated at Bede. He possesses a well-trained voice of considerable flexibility and resonance, and is well known for his appearances in oratorio at all the leading English musical festivals, his singing of the bass music in Haydn's 'Seasons' was especially memorable. He is also well known at Covent Garden, where he has frequently appeared during the seasons of international opera, making a particularly favourable impression in the Wagnerian parts of Titus and Fafner.

D. S.-T.

**Eaton, Robert (Rev.)**. See Collins (H. B.)

**EATON, Sybil (Evelyn)** (b. Ketton, Rutland, 17 Feb. 1897).

English violinist. She was educated privately and studied the violin with Kienle, Oliver Williams, Editha Knocker and Carl Flesch. She made her début in 1917 and has since frequently given recitals and played in Promenade Concerts and at the Albert Hall. She is an enthusiastic admirer of modern British music. In 1933 she became a professor of the R.C.M. in London and in Jan. 1940 she was the first music traveller for C.E.M.A. (now Arts Council). She was made a music traveller to the Rural Music Schools Association in 1943.

M. K. W.

**EAU MERVEILLEUSE, L' (Opera)**. See GRISAR.

**EBDON, Thomas** (b. Durham, 1738; d. Durham, 23 Sept. 1811).

English organist, conductor and composer. It is presumed from the circumstance of the name and date "T. Ebdon, 1755", still remaining, carved on the oak screen which divides the choir of Durham Cathedral from one of the aisles, that he received his early musical education in that church as a chorister, and probably, after the breaking of his voice, as an articulated pupil of the organist. In 1763 he was appointed organist of Durham Cathedral, which office he held until his death, forty-eight years later. In 1783 he was associated with M. Hawdon as conductor of the Newcastle Subscription Concerts; in 1786 he was associated with Meredith and in 1790 with Charles Avison, junior, and Hawdon. Ebdon's published compositions comprise two harpsichord sonatas (c. 1780), six glees, a

march for the installation of a grand provincial master of Freemasons and two volumes of cathedral music, the first of which appeared in 1790 and the second in 1810. Besides these he left many anthems, etc., in manuscript, the last of them bearing the date of June 1811.

W. H. H.

**EBELING, Christoph Daniel** (b. Garmissen, Hildesheim, 20 Nov. 1741; d. Hamburg, 30 June 1817).

German musical historian. He was professor at the Hamburg College and the Academy of Commerce from 1772. He established subscription concerts in 1775 and 1776, translated Handel's 'Messiah' and Burney's diaries, and wrote articles on musical subjects, a short history of the opera and a 'Divertissement zu den Poeten nach der Mode' for 4 voices with instruments.

E. v. d. s.

**EBELING, Johann Georg** (b. Lüneburg, [bapt. 11 July] 1637; d. Stettin, 1676)

German composer. He was director of the music at the St. Nicholas Church of Berlin in 1662 and in 1668 professor of music at the Caroline "Gymnasium" at Stettin. He composed church music, and some chorales of his are favourites, e.g. 'Warum sollt ich mich denn gramen'. He published 'Archaeologiae Orphicae sive antiquitates musicae' (Stettin, 1675) and 'Pauli Gerhards geistliche Andachten, bestehend in 120 Liedern mit 4 Singstimmen, 2 Violinen und Generalbass' (Berlin, 1666-67); a reduction of the latter into two parts (1669).

E. v. d. s.

**EBER (Eberus), Paul** (b. Kitzingen, 8 Nov. 1511; d. Wittenberg, 10 Dec. 1569).

German composer. He wrote a book of Christmas songs, 'Cantilenae aliquot piae et suaves, 4 et 5 voc.' (1570) and a German augmented version (1570); also a 4-part song in Figulus's 'Weihnachtslieder' (1575). He was a collaborator in 'Cantilenae latinae' (1591).

E. v. d. s.

See also Brahms (motet).

**EBERHARD VON FREISINGEN** (b. ?, d. ?).

German 11th-century theorist. He wrote 2 treatises on the organ, 'De mensura fistulorum' and 'Regulae ad fundendas notas, id est organica tintinnabula'. Both are reproduced in Gerber, II, 279.

E. v. d. s.

**Eberhart, Nellie Richmond.** See Cadman (lib. & songs).

**EBERL, Anton** (b. Vienna, 13 June 1766; d. Vienna, 11 Mar. 1807).

Austrian pianist and composer. His theoretical studies were slight, but his first opera, 'La Marchande de modes' (Leopoldstadt Theatre, Vienna, 1787), is said to have pleased Gluck so much that he advised the young composer to devote himself seriously to music. His friendship with Mozart was also of

great service to him. His melodrama 'Pyramus and Thisbe' was produced at the court theatre in 1794, on his return from his first professional tour; but he soon undertook another in Germany, in company with Mozart's widow and Lange the singer. In 1796 he was appointed *Kapellmeister* at St. Petersburg, where he remained for five years, greatly esteemed. On his return to Vienna he produced at the court theatre (May 1801) a romantic opera 'Die Königin der schwarzen Inseln', which was, however, only a partial success. In 1803 he went again to Russia, and in 1806 he travelled to all the principal towns of Germany, where the brilliance and fire of his playing were universally acknowledged. He returned to Vienna and died there suddenly.

Though his work has now entirely vanished from the concert-room, Eberl must in his day have been a very considerable person. It is well known that several of his pianoforte works were long published (and popular) as Mozart's — viz. the fine Sonata in C minor (finally published with his own name as Op. 1 by Artaria), Variations on the theme 'Zu Steffen sprach', Variations on 'Freundin sanfter Herzenstriebe' and on 'Andantino von Dittersdorf'. His Symphony in E $\flat$  major would actually appear to have been played in the same programme with Beethoven's "Eroica" Symphony<sup>2</sup>; and the two are contrasted by the reviewer to the distinct disadvantage of the latter.

The following works by Eberl may be mentioned as having been important in their time:

Wedding Cantata 'La gloria d' Imeneo', Op. 11.

5 Symphonies (1783-85)<sup>1</sup>

Symphony, D mi.

Pf. Concerto, C ma., Op. 32

Pf. Concerto, E $\flat$  ma., Op. 40

3 Pf. Trios, Op. 8, ded. to Grand Duke Pavlovich.

3 String Quartets, Op. 18, ded. to Tsar Alexander I.

Pf. Quartet, C ma., Op. 19, ded. to Empress Maria Theresa.

Pf. Quartet, G mi., Op. 25.

Trio for clar., cello & pf., Op. 36

Sextet, E $\flat$  ma., for clar., horn, stgs. & pf., Op. 47.

Pf. Quintet, Op. 78.

'Variations sur un thème russe' for cello & pf., Op. 17.

'Grande Sonate caractéristique', F mi., for pf., ded. to Haydn.

'Grande Sonate', Op. 27, ded. to Cherubini.

6 Songs, Op. 4.

He also published many smaller pianoforte pieces for two and four hands, and left in manuscript symphonies, serenades, concertos for one and two pianofortes, chamber music and several operas besides the three mentioned above.

**EBERLÉ, Oscar (i)** (b. Crossen, Holland, 5 June 1841, d. Rotterdam, 8 Dec. 1901).

Dutch violoncellist. His first lessons he got from his father, and at the age of 14 he became a member of the Bilsse Orchestra at Leignitz. Here he remained for five years and then became a pupil of F. W. L. Grutzmacher with whom he studied for two years. He then obtained an engagement as member of the orchestra of the German Opera at Rotterdam, in which city he remained for the rest of his life. Ten years later, in 1867, he became teacher of cello at the "Toonkunst" Music School in Rotterdam, and after this did much work as soloist in various places in Holland. He was later elected an honorary member of the Maatschappij tot bevordering van Toonkunst and of the Leyden Students' Musical Corps. A monument to his memory was erected in the cemetery at Crooswijk near Rotterdam by subscription among his pupils and admirers. Among his pupils are Jacques van Lier, Anton J. Bouman and his son.

H. A.

**EBERLÉ, Oscar (ii)** (b. Rotterdam, 18 July 1883).

Dutch violoncellist, son of the preceding. He succeeded his father as teacher at the Rotterdam Music School (later Conservatory). As a youth of 17 he was already a member of the Concertgebouw Orchestra, afterwards playing in the orchestras at Coblenz and Baden-Baden. On settling at Rotterdam again he formed a pianoforte trio with Anton Verhey and Louis Wolff. He also enjoyed great popularity as a soloist.

H. A.

**EBERLIN (Eberle), Johann Ernst** (b. Jettingen nr Gunzburg, Bavaria, 27 Mar. 1702; d. Salzburg, 19 June 1762).

German organist and composer. He was the son of the land-steward to Baron von Stain. In 1725-29 he was fourth organist at the cathedral of Salzburg and in the latter year became chief organist. He was court organist to Archbishop Franz Anton, Graf von Harrach, as early as the time of his marriage, which took place in 1727 at Seekirchen on the Wallersee, near Salzburg. He was also carver (*Truchsess*) to the archbishop.

Among the best known of Eberlin's many works are 'IX toccate e fughe per l'organo' (Lotter, Augsburg, 1747), dedicated to Archbishop Jacob Ernst. They passed through many editions and are also printed in Commer's 'Musica sacra', Vol. I. Nägeli's edition contains only the nine fugues. The last fugue, in E minor, was published (in E $\flat$  minor) as Bach's in Griepenkerl's edition of Bach's works (Book IX, No. 13), an error which has since been corrected. Six preludes and fugues are in Part xii of the 'Trésor des pianistes'. Haffner published Sonatas in G and A, and Schott two motets, 'Qui confidunt' and 'Sicut

Mater consolatur', for three voices, with clavier accompaniment. To Leopold Mozart's collection for the *Hornwerk* at Hohen-Salzburg, 'Der Morgen und der Abend' (Lotter, 1759), Eberlin also contributed five pieces. Q.-L. gives a list of his church compositions in manuscript in the libraries of Berlin, Vienna, Salzburg, Munich, Ratisbon, and Fétis cites the Latin dramas he composed for the pupils of the Benedictine monastery at Salzburg (1745-60), of which, however, the words only are extant. Proske's library contains the autographs of 13 oratorios, including the 'Componimento sacro' performed with great success at Salzburg in 1747. The Vienna Philharmonic Society (Gesellschaft der Musikfreunde) possesses a copy of a Mass and a fugue for two choirs with double orchestra. He wrote 2 German and 3 Italian operas for Salzburg.

Eberlin's strict writing was so much prized by Mozart that about 1777 he copied thirteen of his pieces (mostly church music in four parts), together with some by Michael Haydn, into a manuscript book which he kept for his own instruction, and which still exists. He afterwards (1782), however, wrote to his sister that Eberlin's fugues could not be ranked with those of Bach and Handel — "All honour to his four-part pieces; but his clavier fugues are merely extended Versetti". Marpurgh was the first to proclaim his merit<sup>1</sup>, and says that he wrote as much and as rapidly as Scarlatti and Telemann.

G. F. P., adds.

**EBERS, Carl Friedrich** (b. Cassel, 25 Mar. 1770; d. Berlin, 19 Sept. 1836).

German musician. He was the son of a teacher of English at Cassel and grew into a man evidently of great ability, but as evidently of little moral stability, taking any post that offered and keeping none, doing any work that turned up to keep body and soul together and at length dying in great poverty. He was at Schwerin in 1793 and at Strelitz in 1797. Some of his arrangements have survived, but his compositions — four operas, cantatas, symphonies, overtures, dance music, music for wind-instruments and, in short, pieces of every size and form — have all disappeared from the musical repertory. A little drinking-song, 'Wir sind die Könige der Welt', hit the true popular vein and maintained itself rather longer.

His arrangement of Weber's clarinet Quintet (Op. 34) as a pianoforte sonata called forth a vigorous protest from the composer in the A.M.Z. of 11 Dec. 1816. Ebers wrote an impudent rejoinder in the next number of the paper. Both documents were given in translation in the first edition of this Dictionary.

G. & H. G. C.

**EBERUS, Paul.** See EBER.

<sup>1</sup> 'Kritische Beiträge', III, iii, 183 (Berlin, 1757).

**EBERWEIN, Traugott (Maximilian)** (*b.* Weimar, 27 Oct. 1775; *d.* Rudolstadt, 2 Dec. 1831).

German violinist and composer. At the age of seven he played in the court orchestra of Weimar, where his father was engaged. In 1797 he entered the service of the Prince of Schwarzburg-Rudolstadt, but it was not till 1817 that he became his *Kapellmeister*. In the interval he travelled much, making the acquaintance of Adam Hiller and Zelter in Berlin, and of Beethoven and Salieri in Vienna. He was a man of some influence and position, and one of the original founders of the musical festivals in Germany. His works, more numerous than original, include eleven operas, of which 'Claudine von Villa Bella' (1815) and 'Der Jahrmart von Plundersweilen' (1818) (texts by Goethe) enjoyed some celebrity; three cantatas; a Mass in A♭ major, his best work; a Symphonic-concertante for oboe, horn and bassoon; concertos, quartets and songs.

He set poems by Goethe as songs which were preferred by the poet to those sent to him by Schubert, which he ignored — a reflection on Goethe as a critic of music rather than a recommendation of Eberwein as a composer. It must be borne in mind, however, that Goethe was personally acquainted with Eberwein, whereas nobody had heard of Schubert as far away from Vienna as Weimar at the time (June 1825) he sent the songs.

M. C. C., adds.

**EBNER, Wolfgang** (*b.* Augsburg, c. 1610; *d.* Vienna, 12 Feb. 1665).

German organist and composer. He was organist at St. Stephen's Cathedral, Vienna, from 1634, in the court chapel from 1 Aug. 1637 and *Kapellmeister* at St. Stephen's from 1663. Of his compositions, which were greatly valued in his time, but little has survived. He wrote Variations on a theme by the Emperor Ferdinand III for harpsichord, a Sonata for 2 violins and viola da gamba, a motet, and some ballet airs for 4 viols and harpsichord.

E. v. d. s.

**EBOROWICZ, August** (*b.* ?, 1818; *d.* Warsaw, 20 Oct. 1869).

Polish teacher and composer. He was one of the first teachers appointed to the staff of the newly reopened Music Institute<sup>1</sup> in Warsaw by Apolinary Kański in 1861. Of all his compositions one only remains, a miniature piece for the pianoforte entitled 'La Mazovienne', which was published in Warsaw.

C. R. H.

**ECCARD, Johann** (*b.* Muhlhausen, Thuringia, 1553; *d.* Berlin, autumn 1611<sup>2</sup>).

German composer. He was a pupil of David Koler in the court chapel school at Weimar from 1567 to 1571, when he was paid three florins "zu endlicher Abfertigung".<sup>3</sup> He probably went that year to Munich to study under Lassus; Stobaeus ('Preussische Festlieder') refers to him as a pupil of the "world-famed" Orlando. Eccard had returned to Muhlhausen in 1574. In 1578 he was musician in the household of Jacob Fugger of Augsburg; for in dedicating his 'Newe deutsche Lieder' (1578) to the three brothers Fugger, he says:

Also hab' ich verschieuer Zeit, in des . . . Herrn Jacob Fuggers, meines gnedigen Herrn, E. G. gebruder dienst etliche deutsche Lieder. . . .

This is dated from Augustae Vindelicorum, 1578. Similarly a manuscript Mass in the Munich Library is dated "de Jacobi Fuggeri Musico, 1578".

By 1581 Eccard was settled at Königsberg; in that year he published there his five-part music to some wedding-hymns, in conjunction with the *Kapellmeister*, Theo. Ruccio, and in the following year the five-part music to Psalm CXXXIV.<sup>4</sup> Eccard was appointed vice-*Kapellmeister* and *Musicus* by the Margrave Georg Friedrich of Brandenburg-Ansbach, and later, in 1604, he succeeded Ruccio as *Kapellmeister*. On 4 July 1608 Eccard was summoned to Berlin to be *Kapellmeister* to the Elector Joachim Friedrich of Brandenburg; the latter died on 18 July and was succeeded by Johann Sigismund, who in a letter on the following 11 Sept. confirmed the appointment on the grounds that Eccard was greatly famed and his equal not easily to be found, that he was an old, peaceful and quiet man, and that the salary, considering his attainments, was not too high!<sup>5</sup>

Eccard's treatment of well-known chorales in his great work, 'Geistliche Lieder' (1597), as well as of the fine chorales of his own composition, causes him to stand out prominently among his contemporaries. This work, consisting of motets for five voices, was undertaken at the request of the Margrave Georg Friedrich; Eccard himself thought it the first real attempt to produce a cantional written not only with religious but with musical and artistic aims: "Darin nach musikalischer Art, was anmuthiger und der Kunst gemasser enthalten ware". Among his chorales which became a permanent part of church-song were the three, first published in 1574 ('III Odae'); the four

<sup>1</sup> An engraved portrait dated 1634 is inscribed "Natus anno 1553, obiit 1611".

<sup>2</sup> E. Pasque's MS, 1892, published in 'Monatshefte', 1897.

<sup>3</sup> Joseph Müller, 'Musikalische Schätze' (1870).

<sup>4</sup> L. Schneider, 'Geschichte der Oper' (1852), App., pp. 23, 25.

<sup>5</sup> The Warsaw Conservatory founded by Elsner in 1821 was closed down by the Russian authorities, then the occupants of partitioned Poland, in 1831. The school was reopened by Kański in 1861 under the name of Musical Institute, but it soon reverted to its original name.

which appeared in 'Dreissig geistliche Lieder' (1594), 'Es ruhm die heilige Schrift', composed for a wedding-hymn in 1591; and 'Nachdem die Sonn' beschlossen', from the 'Gebeten' (1600). Zahn<sup>1</sup> gives twenty melodies with their sources and the various publications in which they subsequently appeared. There have been many reprints of Eccard's sacred songs; Winterfeld, who considered that the characteristic strength and feeling in these compositions fully equalled anything produced by his Italian contemporaries, printed altogether forty-six of them.<sup>2</sup> Ten of Eccard's compositions, including 'O Freude über Freude' for double choir, are in 'Musica sacra', Vols. V and VI, edited by A. Neithard for the use of the Berlin Cathedral Choir; eleven are in F. Wullner's 'Chorübungen der Münchener Musikschule' (1893-1895), others in Commer's 'Geistliche und weltliche Lieder' (1870), Nos. 5 and 6; in Reissmann's 'Allgemeine Geschichte der Musik' (1863), Nos. 10 and 11, in Bishop's '12 Corale' (1844), No. 11. One set to the English words, 'When Mary to the Temple went', edited by Otto Goldschmidt in the 'Bach Choir Magazine', has a quaint simplicity which is very pleasing. G. W. Teschner (1860-90) reprinted both the 'Geistliche Lieder', two vols., and the 'Preussische Festlieder', two vols.

On the other hand Eccard's secular works, comparatively limited in number, have been carefully edited by Eitner, in the 'Publicationen alterer praktischer und theoretischer Musikwerke', Vol. XXI (1897). He notes approvingly that Eccard differs from his contemporaries inasmuch as he always marks the necessary sharpening or flattening of notes.

#### LIST OF COMPOSITIONS

1. 'III Odae Lud. Helmboldi, Latinae et Germanicae . . . in 4 Stimmen componiret, durch J. a Burck, & Johannem Eccardum, Mulhusinum' (Mühlhausen, Georgium Hantzsch, 1574). Obl. 4to. Discantus and Bassus in Brief Gymnasialbibl. Three of the Odes were set to music by Eccard:—(1) 'Age nunc, parve puer.' (3) 'Das noch viel Menschen' (4) 'Ihr Alten pflegt zu sagen.' They were included in Helmbold's 'Crepundia sacra' (1578, later editions in 1589, 1596, 1608 and 1626). A. Prüfer reprinted it in 'Untersuchungen über den ausserkirchlichen Kunstgesang' (Leipzig, 1890).
2. 'Neuwe teutsche Lieder, mit vieren und funff Stimmen, gantz lieblich zu singen, und auff allerley musikalischen Instrumenten zu gebrauchen, mit besonderm Fleiss und Observation componiret durch Johannem Eccardum Mulh. des wohlgebornen Herrn Jacobi Fuggers Musico' (Mühlhausen, G. Hantzsch, 1578). Obl. 4to. Twenty-four compositions, two only being to sacred words. Five partbooks in Uppsala Library.
3. 'Neuwe Lieder mit 5 und 4 Stimmen, gantz lieblich zu singen, und auff allerley Instrumenten zu gebrauchen. Durch Joh. Ecc. Mulh. F.D.

<sup>1</sup> 'Die Melodien der deutschen evangelischen Kirchenlieder' (1889-93).

<sup>2</sup> 'Der evangelische Kirchengesang', Vols. I & II (1843).

[Fürstlicher Durchlaucht] in Preussen Musicum und Vice Capellenmeister componirt, corrigirt und in Druck verfertigt' (Königsberg, Georg Osterberger, 1389). Obl. 4to. Dedicated to the Burggrafen, Bürgermeister, etc., of Danzig. Twenty-five compositions, fifteen secular, ten sacred. Five partbooks in Berlin State Lib. etc. Reprinted in score by Eitner, 1897 (see above).

4. 'Epigrammata in honorem nuptiarum . . . per Th. Riccium 6 vocibus' (1586). Obl. 4to. Includes 'Virgo boni patris' by Eccard.
5. 'XX Odae sacrae Lud. Helmboldi Harmonicus numeris, pro vacatione versuum ornatae & compositae 4 vocibus a Joh. Ecc. Mulh. illius Principis ac Domini, D. Georg. Frid. Marchionis Brandenburgensis Chori musici Vicemagistro Impensis Hyeron. Reinhardi Mulhusini' (1596). Sm. 8vo. One volume in Zwickau Ratsschulbibl. Another edition in 1626, possibly an earlier one in 1574.
6. 'Dreissig geistliche Lieder . . . mit 4 Stimmen auff besondere darzu von L. Helmboldo verordnete Textus . . . und ausgegangen von J. a Burck' (Mühlhausen, Andream Hantzsch, 1594). 12mo. Nos. 11 'Zu dieser österlichen Zeit', 13, 'Gen Himmel fahrt', 15 'Der heilig Geist', 20 'Übers Gebirg Maria' were by Eccard. An earlier edition probably published in 1583, later editions in 1609 (Erfurt) and 1626.
7. 'Der erste Theil geistlicher Lieder auff den Choral oder die gemeine Kirchen-Melodey durchaus gerichtet, und mit funf Stimmen componiret durch Joh. Ecc. Mulh. F. D. zu Preussen, etc. Musicum und Vice Capellenmeister' (Königsberg, G. Osterberger, 1597). Obl. 4to. 'Der ander Theil geistlicher Lieder', etc. (1597). Obl. 4to. Vol. I contains twenty-three and Vol. II twenty-nine compositions, the melodies are in the decant. The five partbooks of each vol. in Frankfurt Gymnasialbibl., etc.
8. 'Echo nuptialis magnifico . . . Andreae Fabricio, etc. A. Johanne Eccardo Mulh., etc. Ex officina G. Osterberger' (1597). Obl. 4to. 'Echo a 8 voci'. The eight voice-parts in B.M.
9. 'Vierzig teutsche christliche Liedlein L. Helmboldi . . . in 4 Stimmen abgesetzt, die ersten 22 durch J. a Burck, die letzten 18 durch Joh. Ecc. Mulh. Auff neu zusammen gedruckt zu Mulhausen' (A. Hantzsch, 1599). 8vo. Four partbooks in Hamburg Munic. Lib., etc.
10. 'Gebeten umb ein gnediges gluckseliges Neues Jahr zu Ehren unser gnedigsten Herrschaft der Hertzoge in Preussen, etc. Mit 5 Stimmen componirt durch Joh. Eccard' (Königsberg, G. Osterberger, 1600). 4to. Text. 'Nachdem die Sonn' beschlossen'. Five partbooks in Königsberg Univ. Lib.
11. 'Geistliche Lieder auff gewöhnliche preussische Kirchen-Melodeyen durchaus gerichtet, und mit 5 Stimmen componiret. Durch Joh. Ecc. Mulh. Thuringum, und J. Stobaeum', etc. (Danzig, Georg Rheten, 1634). Obl. 4to. 102 compositions, fifty-seven by Eccard, which include his fifty-two geistliche Lieder, publ. 1597. Five partbooks in Königsberg Univ. Lib., etc.
12. 'Erster Theil der preussischen Festlieder, von Advent an bis Ostern mit 5, 6, 8 Stimmen. Joh. Ecc. Mulh. Thur. und J. Stobaeus etc.' (Elbing, Wendel Bodenhausen, 1642). Obl. 4to. 'Ander Theil . . . von Ostern an bis Advent mit 5, 6, 7, 8 Stimmen' etc. (Königsberg, J. Reusner, 1644). Obl. 4to. Sixty-one compositions; thirteen in Vol. I and fourteen in Vol. II are by Eccard; they include (in Vol. I, No. 25) No. 7 of the 'Neue Lieder' (1589); and 'Der heilig Geist', 'Zu dieser österlichen Zeit', from 'Dreissig geistliche Lieder' (1594). Six partbooks of each vol. are in Elbing Marienkirche Lib., etc. The first edition is said to have been published at Königsberg, 1598.

There are forty-seven small works by Eccard in the Königsberg Univ. Lib. with four exceptions all wedding-hymns (some of them composed 'nach Villanellen Art'), for 4, 5, 6 or 8 voices, published at Königsberg between 1585 and 1609 (Jos. Müller, Cat.) There are two in the Breslau Munic. Lib.; 'Tris me exilarant' for 6 voices (1585, one partbook missing), and 'Honorabile est inter omnes' for 5 voices (1610, Bohn Cat.).

- Some of these were later fitted with sacred words and included in the 'Preussische Festlieder' (1642-1644).
- 'Odorum sacrum' Six vols (Mulhausen, 1626). A collected edition of Heimbold's works included — Vol. IV, 'Odae sacrae' (1596), Vol. V, 'Dreyssig geistliche Lieder' (1594), Vol. VI, 'Crepundia sacra' (1577).
- 'Geistliche Lieder Matthaum Pfeilschmidt' (1608). Some five part Chorales.
- 'Geistliche u. trostliche Lieder Michaelum Weyda' (1643). Several melodies.
- 'Cantionale sacrum' (Gotha, 1646-48, later ed. 1651-1657). One composition.
- 'Preussische Kirch- und Fest-Lieder' (J. Reinhard, 1653). Forty-three melodies with figured bass, which included seventeen of those published in 1634.
- 'Christlich . . . Gesangbuch' (Erfurt, 1663). Three melodies.
- 'Passionale melicum Martino Jane' (Gorlitz, 1663). One melody.
- Joh. Crüger's 'Praxis pietatis' (Peter Sohren, Frankfurt, 1668).
- Four melodies with figured bass. Another edition, 1693, has one.
- 'Preussisches Kirchen- Schul- u. Haus-Gesangbuch' (1675, and again 1690), has five melodies. Another edition (1702) has eight.
- 'Musikalischer Vorschmack' (Peter Sohren, 1683). Four melodies with bass.
- 'Neue christliche Lieder' (H. G. Demme, Gotha, 1799). Nos. 33 to 44, melodies by Eccard, Burck, etc.
- 'Dr. Martin Luther's deutsche geistliche Lieder' (C. v. Winterfeld, Leipzig, 1840). Nos. 6, 9, 13 from 'Geistliche Lieder' (1597), Vol. II.

## MANUSCRIPTS

- In the Augsburg Munic. Lib: MS 26 (1578), two motets a 5 voci, 'Vultum tuum deprecabuntur' and 'Terroribus est locus iste'. A Kyrie a 4 voci. MS 28 (1579) Missa a 5 voci, 'Mon cœur se recommande a vous'. This Mass is also in the Munich Court Lib (Mus. MS 57) dated 'Auctore Joanne Eccardo, Mulhussino, de Jacobi Fuggeri Musico 1578', which is altered in another handwriting to 1598. From this MS the Kyrie, Sanctus and Agnus Dei were scored and published by F. Wüllner, 'Chorubungen der Munchener Musikschule' (1895).
- In the Breslau City Lib, MSS 12, 17, 18, 20, 32 and 137 contain many of the 'Geistliche Lieder', publ. 1597. In the Königsberg Univ. Lib. Motets: a 5 voci, 'Divitias quaerant alii' (with continuo) and 'Kein edler Ding' (Discantus missing); a 6 voci, 'Gott ist mein Heil' (two copies) and 'Nuper saevus amor' (Discantus missing). Masses: a 5 voci, 'Domine ad adjuvandum' and 'Veni sancte spiritus', a 6 voci, 'Domine quid multiplicati'. Also compositions in MSS 66, 67, 69, 75-79 and 394.
- In the Liegitz Konigl. Ritter-Akademie Bibl. in MSS 15, 18, 19, 20 and 23, are fifteen different 'Geistliche Lieder' for 4 and 5 voices.
- Q.-L. also gives a large number of MSS in the Berlin State Lib., a five-part motet (Codex 96) in the Nuremberg Lorenzkirche Lib.; and 'O Freude über Freude', for double choir (MS 278, No. 10, in score), in Dresden Court Lib.

ECCLES. English family of musicians.

(r) **Solomon Eccles (or Eagles)** (b. ? 1618; d. London, 11 Feb. 1683), musician and shoemaker. He was descended from three generations of musicians, was from about 1647 a teacher of the virginals and viols, a pursuit from which he for some years derived £200 a year (see his 'Musick-Lector'); but, embracing the tenets of Quakerism about 1660, he abandoned his profession, broke all his instru-

ments and burned them, together with his music books (the value of the whole being more than £24), on Tower Hill, and adopted the trade of a shoemaker.

His vagaries during the early part of Charles II's reign, and particularly during the great plague of 1666, when he ran naked through the town with a brazier of burning brimstone on his head, point to a deranged intellect. In 1667 he published a curious tract entitled:

A Musick-Lector, or, The Art of Musick . . . discoursed of, by way of dialogue between three men of several judgments, the one a Musician . . . zealous for the Church of England, who calls Musick the gift of God, the other a Baptist who did affirm it to be a decent and harmless practice, the other a Quaker (so called) being formerly of that art doth give his judgment and sentence against it, but yet approves of the Musick that pleaseth God.

From this work the foregoing particulars are gathered. He accompanied George Fox to the West Indies in 1671 and organized Quakerism there. He was in New England in 1672, and was prosecuted in 1680 at Barbadoes for seditious words. He is supposed to have resumed his profession and contributed several ground basses with divisions thereon to 'The Division Violin'. He also wrote music for Aphra Behn's 'The City Heiress' and Otway's 'Venice Preserved', both produced at the Dorset Gardens Theatre in 1682. He was buried at Spitalfields.

(2) **John Eccles** (b. London, 1668<sup>2</sup>, d. Kingston-on-Thames, 12 Jan. 1735), composer, son of the preceding. He learnt music from his father, and about 1690 he became engaged as composer for the theatre, in which occupation he continued for nearly twenty years. In 1700, after the death of Staggers, he was appointed master of the King's Band of Music, in fulfilment of the duties of which office he composed numerous birthday and New Year odes. He had been a member of the band since 1694. He gained in 1700 the second of the four prizes given for the best compositions of Congreve's masque 'The Judgment of Paris'; the first being awarded to John Weldon and the third and fourth to Daniel Purcell and Godfrey Finger. The score of Eccles's music for this piece was printed. At about this time he published three volumes of 'Theatre Music' (the 2nd and 3rd are dated London 1699 and 1700 respectively) containing arrangements of a large number of tunes, but without giving the names of the plays to which they belonged. In 1701 he set the ode written by Congreve for the celebration of St.

<sup>1</sup> Act-tunes of both are preserved (B.M., Add. MSS 29283-5).

<sup>2</sup> The dates of the original productions of 'The Spanish Friar', 'The Lancashire Witches' and 'The Chances', 1681-82, were given in previous editions of this Dictionary as those at which Eccles wrote music, instead of the dates of later revivals. This led the editors to affirm that Eccles could not have been born in 1668 and to give his birth-date as 'c. 1650'.

<sup>3</sup> Durham Cathedral Library, Mus. Cat. 78.

Cecilia's Day in that year; and in 1702 he wrote music for the coronation of Queen Anne.<sup>1</sup> About 1710 he published a collection of nearly one hundred of his songs, comprising many of those which he had written for a great number of dramatic pieces. The freshness and flow of Eccles's melodies rendered his songs universal favourites. In the latter part of his life he gave up all professional pursuits, except the annual production of the birthday and New Year odes, and retired to Kingston-on-Thames for the diversion of angling, to which he was much attached.

W. H. K., adds

The following is a list of stage works for which Eccles wrote music:

#### MASQUES AND OPERATIC PIECES

(The years indicated are those of performance)

- 'The Rape of Europa by Jupiter' (author unknown), 1694.
- 'The Comical History of Don Quixote' (Durfey, after Cervantes), Parts I and II, with other composers, 1694. (Eccles does not seem to have had a share in the third part of 1695.)
- 'The Taking of Namur' (Motteux), 1695.
- 'The Loves of Mars and Venus' (Ravenscroft, this masque forms part of his comedy 'The Anatomist, or The Sham-Doctor'), with Finger, 1696.
- 'Hercules' (Motteux, this masque forms Act 3 of his 'The Novelty'), 1697.
- 'Ixion' (Ravenscroft, this masque forms part of his tragedy 'The Italian Husband'), 1697.
- 'Europe's Revels for the Peace' (Motteux, with other composers, 1697.
- 'The Judgment of Paris' (Congreve), 1701.
- 'Acus and Galatea' (Motteux, also referred to as 'The Mad Lover'), 1701.
- 'Wonders in the Sun, or The Kingdom of the Birds' (Durfey), 1706. (Eccles had only a small share in this "comick opera", which seems to have consisted largely of ballad airs.)
- 'The British Enchanters, or No Magick Like Love' (Lord Lansdowne), 1706. (The instrumental music was by Corbett, but at least one song, if not the whole vocal music, was composed by Eccles.)
- 'Semele' (Congreve; no performance recorded; libretto published 1710<sup>2</sup>; Eccles's score preserved in R.C.M.).

#### INCIDENTAL MUSIC

- 'Distress'd Innocence, or The Princess of Persia' (Settle), 1690.
- 'Alphonso, King of Naples' (Powell), 1690.
- 'The Lancashire Witches' (Shadwell), revival, ? 1691.
- 'The Chances' (George Villiers, Duke of Buckingham), revival, ? 1692.
- 'The Richmond Heiress' (Durfey), 1693.
- 'She Wou'd if She Cou'd' (Etheredge), revival, ? 1693.
- 'Love Triumphant' (Dryden), 1694.
- 'The Ambitious Slave' (Settle), 1694.
- 'The Married Beau' (Gowenlock), 1694.
- 'The Villain' (Porter), revival, ? 1694.
- 'Love for Love' (Congreve), 1695.
- 'The She-Gallants' (Lord Lansdowne), 1695.
- 'Pyrrhus, King of Epirus' (Hopkins), 1695.
- 'She Ventures and He Wins' ('Ariadne', pseud.), 1695.
- 'The Lover's Luck' (Dilke), 1695.
- 'Cyrus the Great' (Banks), 1695.
- 'The Spanish Friar' (Dryden), revival, ? 1695.
- 'Troilus and Cressida, or Truth Found Too Late' (Dryden), revival, ? 1695.
- 'Don Carlos' (Otway), revival, ? 1695.

- 'The Husband his own Cuckold' (John Dryden, jun.), 1696.
- 'The Royal Mischief' (Mary de La Rivière Manley), 1696.
- 'Love's a Jest' (Motteux), 1696.
- 'The City Bride' (Harris), 1696.
- 'The Country-Wake' (Doggett), 1696.
- 'The City Lady' (Dilke), 1697.
- 'The Unnatural Brother' (Filmer), 1697.
- 'The Intrigues at Versailles' (Durfey), 1697.
- 'The Provok'd Wife' (Vanbrugh), 1697.
- 'Thyrsus' (Oldmixon), forms Act 1 of Motteux's 'Novelty', see also 'Hercules', above, 1697.
- 'The Innocent Mistress' (Mary Pix), 1697.
- 'The Italian Husband' (Ravenscroft, some songs besides the masque of 'Ixion' for which see above), 1697.
- 'The Deceiver Deceiv'd' (Mary Pix), 1697.
- 'The Pretenders, or The Town Unmask'd' (Dilke), 1698.
- 'The Man of Mode, or Sir Fopling Flutter' (Etheredge), revival, ? 1698.
- 'Women Will Have Their Wills' (unidentified comedy), 1698 or 1699.
- 'Rinaldo and Armida' (Dennis), 1699.
- 'Justice Busy, or The Gentleman Quack' (Crowné; probably identical with 'The Morose Reformer'), 1699.
- 'The Beau Defeated' (Mary Pix), 1700.
- 'The Way of the World' (Congreve), 1700.
- 'The Fate of Capua' (Southerne), 1700.
- 'Altemura' (Roger Boyle, Earl of Orrery), 1701.
- 'The Fickle Shepherdess' (altered from Randolph's 'Amyntas'), 1703.
- 'Love Betray'd, or The Agreeable Disappointment' (Burnaby), 1703.
- 'As You Find It' (Charles Boyle, Earl of Orrery), 1703.
- 'The Fair Penitent' (Rowe), 1703.
- 'The Libertine' (Shadwell), revival, ? 1703.
- 'The Self-Conceit, or The Mother Made a Property' (unidentified comedy), ? 1703.
- 'The Stage-Coach' (Farquhar), 1704.
- 'The Metamorphosis, or The Old Lover Out-Witted' (Corey, after Molière), 1704.
- 'The Biter' (Rowe), 1704.
- 'The Virtuous Wife' (Durfey), revival, ? 1705.
- 'The Adventures of Five Hours' (Tuke), revival, ? 1707.
- 'Aureng-Zebe' (Dryden), revival, ? 1708.

#### OF UNCERTAIN DATE

- 'The Match at Bedlam' (unidentified comedy, one song published, n.d.).
- 'The Midnight Mistakes' (unidentified comedy; one duet published, 1704).
- 'The Surpris'd Lovers' (unidentified comedy; one song published, 1706).

#### REVIVALS

- 'The Duchess of Malfi' (Webster, one duet published, 1704).
- 'Hamlet' (Shakespeare; one song published, n.d.), prob. c. 1695.
- 'Harry the Fifth' (? Shakespeare or ? Roger Boyle, Earl of Orrery; one duet published, 1704).
- 'Macbeth' (Shakespeare; various scores extant, date of revival at which Eccles's music was used not yet satisfactorily established; prob. c. 1695).

See also Finger (collab.). Franck (W., collab.). Judgment of Paris (2nd prize for).

(3) **Henry Eccles** (b. London, c. 1670; d. ? Paris, ? 1742), violinist, brother of the preceding. He was a player of considerable ability and a member of the King's Band from 1674 to 1710. Conceiving himself neglected in England, he went to Paris, where he was admitted a member of the French king's band. In 1720 he published there, in two books,

<sup>1</sup> The autograph score of Queen Anne's Coronation Ode is at Tenbury.

<sup>2</sup> This is the libretto afterwards used, with alterations by Pope, by Handel.

'Twelve Solos for the Violin'. The first book of these sonatas contains adaptations from Giuseppe Valentini's 'Alletamenti' (Op. 8) <sup>1</sup>, which Eccles laid under contribution for his slow movements, supplying only the perfunctory quick ones himself. He was living in Paris in 1735, and Mendel's 'Lexikon' gives 1742 as the date of his death but without giving any authority W H H, adds

The following is a list of Eccles's thefts (works numbered Roman, movements Arabic).

Sonata	I	$\frac{1}{2}$ = Valentini, 'Alletamento' IV	$\frac{1}{2}$
		(transposed)	
	I	$\frac{3}{4}$ = Valentini, " "	III $\frac{3}{4}$ 5
"	III	3 = " "	IX $\frac{1}{2}$ 3 5
"	IV	$\frac{1}{2}$ 3 = " "	VI $\frac{1}{2}$ 5
"	VIII	$\frac{1}{2}$ 5 = " "	XII $\frac{1}{2}$ 3 5
"	IX	$\frac{1}{2}$ 3 = " "	I $\frac{4}{5}$
"	X	$\frac{4}{5}$ = " "	II $\frac{5}{8}$
"	XII	3 = " "	VII $\frac{3}{8}$
and XI		2 = Bonporti's fourth 'Invenzione' (from Op. 10) 4th movement	F W. (ii).

See also Bonporti (plagiarism from).

(4) **Thomas Eccles** (b. London, c. 1672; d. ?), violinist, brother of the preceding. He studied the violin under his brother Henry and became an excellent performer. Being idle and dissipated, he gained a scanty and precarious subsistence by wandering from tavern to tavern in the city and playing to such of the company as desired to hear him.

(5) **Henry Eccles** (b. ?, d. ?), violinist, ? uncle of the preceding. He was a violinist in the King's Mask, etc., in 1674 and later; the name occurs in 1785 as that of a "base", and in 1689 he was appointed to the private music.

W. H. H., adds.

**Ecclesiastes.** See Bacon (E, choral work) Bantock ('Vanity of Vanities', choral work).

**ÉCHAPPÉE** (Fr.). See ORNAMENTS, C (ii). **Echegaray, José.** See Serrano y Ruiz ('Irene de Oranto', opera).

**ÉCHIQUEUR.** See CHEKKER.

**ECHO.** The organs built immediately after the Restoration generally contained what was then a novelty in England, called the Echo. This consisted of a repetition of the treble portion of a few of the leading stops of the organ, voiced softly, shut up in a wooden box, placed in some remote part of the organ case — usually behind the desk-board — and played upon by a separate half-row of keys. The "echo effect" enjoyed great popularity for many years and exercised an influence on much of the contemporary music both for voices and instruments. Purcell in some of his anthems exhibited a predilection for the loud and soft contrast, not to mention his echo choruses in 'Dido' and elsewhere; while most of the pieces written for keyed instruments abounded in imitations of it up to the time of Handel, whose concertos, suites, etc., gave fresh impetus to the popular taste. The *écho*,

very popular in old French organs, was used more freely and ingeniously than was the Echo by English composers. Modern echo organs are often placed at a distance from the main body of the instrument, with which they are connected by electricity. At St. Paul's Cathedral in London, where it is played from the solo manual, and used to accompany the voice of the priest at the altar, it is called the "Altar Organ".

E. J. H., adds

See also Organ Stops

**ÉCHO ET NARCISSE** (Opera). See GLUCK.

**ECK, Franz** (b. Mannheim, 1774, d. Strasbourg, 1804).

German violinist. He was a pupil of his brother, J. F. Eck, and entered the court orchestra at Munich while very young; but, driven from that city by a love-affair, he travelled in 1802 through Germany and gained a great reputation as a performer. The Duke of Brunswick was at that time looking out for a master on the violin for Spohr, then eighteen, in whose rising talent he took a lively interest. He invited Eck to Brunswick and confided to him the technical education of the future great musician. They at once set out on a tour of Russia, Spohr getting instruction at the places where the journey was broken, but otherwise profiting chiefly by hearing his master. In his autobiography he speaks very highly of Eck as a violin player. He describes his style as powerful without harshness, exhibiting a great variety of subtle and tasteful *nuances*, irreplicable in his execution of difficult passages and altogether possessing a great and peculiar charm in performance. Nevertheless Eck was not ashamed to pass off unpublished compositions by his brother and other composers under his own name, a fact which confirms the low estimate of his general character to be gathered from Spohr's narrative. On arriving at St. Petersburg in 1803 he met with great success, and was appointed solo violinist to the court, but, becoming involved in a scandalous affair, he fell into disgrace and was transported by the police over the Russian frontier. His health broke down and he became insane. After living in the care of his brother at Nancy he appears to have died in a lunatic asylum. P. D.

**ECK, Johann Friedrich** (b. Mannheim, 1766; d. Bamberg, c. 1809).

German violinist, brother of the preceding. He was the son of a horn player in the Mannheim court orchestra. A pupil of Danner, he soon rose to be one of the best violin players in Germany. Reichardt of Berlin speaks of him as having all the qualities of a really great player — large tone, perfect intonation, taste and feeling, and adds that, with the single exception of Salomon, he had never heard a better violinist. From 1778 to 1788 Eck was

<sup>1</sup> See Andreas Moser, 'Musikalische Criminalia' ('Die Musik', Mar. 1923).

a member of the orchestra at Munich, and afterwards he conducted the Opera of that town. In 1801, however, having married a lady of rank and wealth, he quitted Germany and spent the rest of his life in Paris and in the neighbourhood of Nancy. Eck published four concertos for the violin and a Concertante for two violins.

P. D.

**ECKARDT, Johann Gottfried** (b. Augsburg, c. 1735; d. Paris, Aug. 1809).

German pianist, composer and painter. He lived in Paris from 1758 and was one of the group of German musicians, including Schobert and Honauer, who made the French capital their headquarters in the middle of the 18th century. Eckardt was a great pianist who was placed by many (Burney, Baron Grimm, etc.), above Schobert, who was his rival. Schubart speaks about his brilliance, power and endurance; he was able to play several concertos and sonatas one after another without tiring, which very few could do at that time (1784). He also composed a number of sonatas and variations, and was, moreover, the first miniature painter of his time.

Mozart as a boy must have known and admired Eckardt's compositions, for he used a movement from one of his sonatas in the third (K. 40) of the four composite keyboard concertos of 1767.

E. v. d. s., adds.

**ECKELT, Johann Valentin** (b. Werningshausen nr. Erfurt, May 1673; d. Sondershausen, 18 Dec. 1732).

German organist and composer. He was a pupil of Pachelbel and became organist at Wernigerode in 1697 and at Sondershausen in 1701. He was famous as an organ virtuoso, and as a composer he left in manuscript a Passion music, cantatas and organ works, including a valuable collection of organ pieces by 17th-18th-century masters; also several theoretical treatises. E. L. Gerber acquired his extensive library, containing numerous manuscript notes, for use in the compilation of his dictionary.

E. v. d. s.

**ECKERBERG, (Axel) Sixten (Lennart)** (b. Hjaltevad, Ingatorp, Jönköpings län, 5 Sept. 1909).

Swedish conductor, composer and pianist. He studied at the Stockholm Conservatory in 1927-32: conducting with O. Morales, counterpoint with E. Ellberg, pianoforte with L. Lundberg and O. Wibergh, and organ with O. Olsson. From 1932 to 1934 he held a Jenny Lind stipend and went abroad to study pianoforte with Emil von Sauer in Vienna and I. Philipp in Paris, and conducting with Weingartner at Basel and Kabasta in Vienna. He was appointed conductor of the Göteborg Radio Orchestra in 1937 and of the Göteborg Orchestral Society in 1939, and has appeared as solo pianist in Sweden, Germany, Paris and London.

His compositions include 2 Symphonies (1941 & 1945), symphonic poem 'Sub Luna', 2 Suites for orchestra, 'Från Sommen' and 'Sommarmusik', 2 Concertos for pianoforte and orchestra (1943 & 1949), and songs

K. D.

**ECKERT, Carl (Anton Florian)** (b. Potsdam, 7 Dec. 1820; d. Berlin, 14 Oct. 1879).

German violinist, pianist, composer and conductor. He owed his education to the poet F. Forster of Berlin, who had him taught by Greulich, H. Ries and Rungenhagen. By the age of ten he had completed an opera, 'Das Fischermadchen', by thirteen an oratorio, 'Ruth'. In 1839 he became a pupil of Mendelssohn at Leipzig. His oratorio 'Judith' was performed by the Sing-Akademie in Berlin in 1841, and in the following year the King of Prussia sent him to Italy for two years. On his return he composed an opera, 'Wilhelm von Oranien', which was successfully performed in Berlin (1846) and at The Hague (1848). In 1851 he became accompanist to the Théâtre-Italien in Paris, then accompanied Henriette Sontag on her tour in the U.S.A., returning to Paris in 1852 as conductor of the Italian Opera. In 1853 he was called to Vienna to take the direction of the Court Opera, a post which he filled with great distinction, and in 1860 he went to Stuttgart as *Kapellmeister* in Kucken's place. This, too, he threw up in 1867; but in 1869 he was suddenly appointed to the head directorship in Berlin in place of Dorn, who was pensioned to make way for him. Eckert was a far better conductor than a composer. He left three operas, much church music, a Symphony, a Trio, many pieces of smaller dimensions, including songs and a cello Concerto.

M. C. C.

**ECKHARDT-GRAMATTÉ, S. C. (Sophie Carmen)** (b. Moscow, 6 Jan. 1902).

Austrian pianist, violinist and composer of Russian birth. She studied the pianoforte at the St. Petersburg Conservatory under her mother, a pupil of A. Rubinstein's, and later at the Paris Conservatoire. Until she was thirty she pursued a virtuoso career, travelling all over Europe and to the U.S.A. as pianist and violinist. She then began to study composition with Max Trapp in Berlin and from that time devoted herself to creative work. Settling in Vienna, she married an art critic and took to music-teaching, though most of her time is given up to composition. Already before her studies in Berlin she had written solo works for her two instruments, but later she cultivated mainly symphonic and chamber music that shows a lively mind at grips with modern tendencies and using high technical accomplishments in exploiting the resources of a new and musicianly polyphony. She is a member of the committee

of the Austrian Section of the I.S.C.M. and in 1947 gained a second prize offered by the Vienna Gesellschaft der Musikfreunde for a pianoforte Concerto, written in 1946. Her other works include:

- Symphony in G ma (1940)  
 'Capriccio concertante' for orch (1940).  
 Concertino for strg orch. (1947)  
 Strg. Quartet No. 1 (1939).  
 Strg. Quartet No. 2 (1943).  
 4 Duos for strgs (1943-44).  
 'Grotesques Stuck' for pf. & several insts (1946)  
 Quartet for flute, clar, basset horn and bass clar (1946)  
 Strg Trio (1947)  
 Trio for oboe, clar & bassoon (1947)  
 "Ruck-Ruck" Sonata for clar. & pf. (1947)  
 3 Suites for unaccomp. vn. (1920-26).  
 Concerto for unaccomp. vn (1925).  
 10 Caprices for unaccomp. vn. (1920-34)  
 4 Suites for pf. (1920-28)

H R.

**ÉCLAIR, L'** (Opera). See HALÉVY.

**ÉCOLE D'ARCUEIL.** The "School of Arcueil", named after the Paris suburb in which Erik Satie lived for many years, was a group of composers who gathered round him as disciples from 1923 onwards—later than the group of "Les Six" which was also influenced by him to some extent. Among the members of the École d'Arcueil were Henri Cliquet-Pleyel, Roger Desormière, Maxime Jacob and Henri Sauguet.

**ECONOMIDIS, Philoktitis** (b. Athens, 23 Oct. 1889).

Greek conductor. He studied at the Athens Conservatory under A. Marsick and later in Vienna, Munich and Berlin. In 1910 he was appointed professor of theory by the Athens Conservatory and in 1918 he became professor of harmony and counterpoint. He was director of the Piraeus Conservatory from 1924 to 1930 and of that of Athens from 1930 to 1939.

In 1921 Economidis founded the Athens Choir, which under his direction has given first performances in Greece of a considerable number of great choral works by old and modern masters. In 1926-43 he was conductor of the Symphony Orchestra of the Athens Conservatory and since 1943 he has been Director-General of the State Orchestra. He has appeared as guest conductor in Berlin (1937 & 1940), Rome and Naples (1940), London (1949) and other European musical centres.

S. M.

**ÉCORCHEVILLE, Jules (Armand Joseph)** (b. Paris, 18 Mar. 1872; d. Perthes-lès-Hurlus, 19 Feb. 1915).

French musical historian. He was a pupil of César Franck in 1887-90 and of Hugo Riemann in 1904-5. He took his doctorate at the Sorbonne, 25 May 1906, with two theses on musical history. Meantime he had formed, in Mar. 1904, with Lionel Dauriac and J. G. Prod'homme, the Paris section of the International Musical Society. This soon gave him

scope to found the 'Bulletin français de la S.I.M.', a successor of the 'Mercure musical', and at that time the most important musical review in France. Écorcheville died on the battlefield on 19 Feb. 1915.

He made his mark by his brilliant literary studies informed with complete musical perception. French musical history owes much to him, in the first place for his books, and also for numerous articles in the 'S.I.M.' (on 'The Ornaments', 'The History of the Lute', 'The Publication of Old Musical Texts', etc.) and in most of the musical publications of Europe. As director of the S.I.M. and president of the French section of the S.I.M. he exercised a distinct and vital influence on the contemporary music movement. He also collected a musical library, of which certain sections (lute and the French violin school) contain very rare documents. It was disposed of on 26-29 May 1920 M. L. P.

## WORKS

- 'Vingt Suites d'orchestre du XVII<sup>e</sup> siècle français' 2 vols. (Paris, 1906), thesis for doctorate  
 'De Lull à Rameau, 1690-1730. L'esthétique musicale' (Paris, 1906), thesis for doctorate  
 'Cornielle et la musique' (Paris, 1907)  
 'Actes d'état civil de musiciens insinues au Châtelet de Paris. 1539-1650' (Paris, 1907).  
 'Catalogue du fonds de musique ancienne de la Bibliothèque Nationale' (Paris, 1910-14)  
 BML.—Catalogue of rare and valuable books, containing the musical works of J. Écorcheville, with an introduction by Henry Prunières (Paris, 1920).  
 'Le Tombeau de Jules Écorcheville suivi de lettres inédites' articles by L. Laloy, L. de La Laurencie & E. Vuilleumoz (Paris, 1916).

**ÉCOSSAISE** (Fr. fem. = Scottish; Ger. *Schottisch* [wrongly *Schottische* in Eng.]).

Authorities differ about the question whether the Écossaise and the Schottisch are, or are not, one and the same kind of dance under French and German names; also whether the name may justifiably be taken to imply a Scottish origin. The modern view is that the dance has nothing to do with Scotland, but was, as its French name suggests, originally a French dance derived from the French idea of what a Scottish dance might be, rather than a Scottish dance transplanted. The modern Écossaise is certainly a species of *contredanse*, and so is the Schottisch, which was first danced in England in 1848, when it was also known as the "German Polka", which suggests that its German origin is earlier. On the other hand the Schottisch does not seem to have been danced in Paris under that name, as Cellarius ('La Danse des salons', Paris, 1847), does not include it among the dances he describes; whereas the name of the Écossaise was known in France from the early 18th century. This does not, however, rule out the conjecture

<sup>1</sup> It was entitled successively, 'Mercure musical et Bulletin français de la S.I.M.', 15 Jan. 1907, 'Bulletin français de la S.I.M.', 15 Jan. 1908; 'Revue musicale S.I.M.', 15 Nov. 1909.

that the two things were essentially the same. The music of both the Écossaise and the Schottisch is in quick 2-4 time, but this Écossaise, dating from the beginning of the 18th century:

begins on the beat, while the following Schottisch, to which the dance was introduced in England:

has an up-beat.

Schubert wrote a number of Écossaises for the pianoforte, which will be found in his Opp 18, 33, 49 and 67. Beethoven also wrote in this form (see Vol. VI of the Collected Edition). There are three examples in Chopin's pianoforte works (Op. 72 No. 3). The final rondo (labelled "scherzo") in Dussek's Sonata 'Le Retour à Paris' (Op. 70) is in the rhythm of a Schottisch, not unlike that of Ex. 2 above.

**EDDA**, The. See Cornelius ('Gunlod', opera). Leif (oratorio). Reinthaler (opera).

**EDDY**, Clarence (b. Greenfield, Mass., 23 June 1851; d. Chicago, 10 Jan. 1937).

American organist and composer. He studied the organ first under Dudley Buck at Hartford, Conn.; in 1871 he went to Berlin and became a pupil of Haupt and Loschhorn. On his return to America in 1874 he played church organs and became prominent as a teacher. He gave organ recitals in many cities of the U.S.A. and also in Europe. In 1876 he published a translation of Haupt's 'Theory of Counterpoint and Fugue'. He composed several pieces for the organ.

R. A.

**EDELING**, Johann (b. Falken nr. Eisenach, c. 1750; d. Weimar, ?).

German clarinettist and composer. He was clarinettist in the Weimar court orchestra. His only published work is the incidental music for Friedrich Justin Bertuch's tragedy 'Elfride', consisting of introduction, inter-

ludes, a ballad and pantomime music (vocal score published by Reilstab, Berlin, 1789). Bertuch's play was first performed at Weimar in 1773, but Edeling's music seems to have been written for a revival in 1787. Gerber also mentions symphonies and other instrumental works by him.

A. L.

**EDELMANN**, Johann Friedrich (b. Strasbourg, 6 May 1749; d. Paris, 17 July 1794).

Alsatian composer. He went to Paris about 1770 and soon became a fashionable composer, especially of harpsichord and chamber music. Mozart mentions him in his letter to his father, dated Augsburg, 14 Oct. 1777: "... and finally I played at sight all the music he had, including some very pretty pieces by a certain Edelmann". Of his vocal music an oratorio, 'Esther', was sung at the Concert Spirituel in Paris on 8 Apr. 1781 and a lyric scene, 'La Bergère des Alpes', at the Concert des Tuileries on 20 July of the same year, followed on 24 Sept. 1782 by two one-act operas at the Académie Royale de Musique, 'Le Feu' and 'Ariane dans l'isle de Naxos'; the latter kept the stage until 1825, was published in full score and performed in Russia as well as probably at New York in 1791. A *melodrame-pantomime*, 'L'Amour enchaîné par Diane', was given at the Opéra on 2 June 1783 and revived as 'Diane et l'amour' at the Théâtre des Jeunes Éléves on 6 Mar. 1802. Finally Edelmann reset an old libretto, 'Alcione', for the Opéra in 1786, but did not succeed in having it produced. A thematic catalogue of Edelmann's instrumental music (one symphony and 23 sonatas) will be found in D.T.B., Vol. XV (1916), and in the same volume two of his sonatas (Op. 2 No. 1 and Op. 4 No. 1) are reprinted. During the Revolution Edelmann got entangled in politics and ended his life on the guillotine; Gerber, in his 'Neues Tonkünstler-Lexikon', gives a full account of this story, in which Edelmann appears to have played a rather discreditable part.

**EDGAR** (Opera). See PUGGINI.

**EDGCUMBE**, Richard, Earl of Mount-Edgcumbe (b. ?, 13 Sept. 1764; d. Richmond, Surrey, 26 Sept. 1839).

English musical amateur and composer. His opera 'Zenobia' was produced at the King's Theatre, London, in 1800, and he was also the author of 'Musical Reminiscences of an old Amateur, chiefly respecting the Italian Opera in England . . . from 1773 to 1823' (W. Clarke, London, 1823, 4th ed., 1834). This deplors the decay of music, particularly of singing, refers enthusiastically to singers such as Pacchierotti and Marchesi, and is full

of curious information and anecdotes about Billington, Grassini, Catalani and other musical personalities of the period. J. M. (ii).

**EDINBURGH.** The name of the capital of Scotland is now associated throughout the world with an annual International Festival of Music, which, in range and in quality, is second to none. This sort of mammoth festivalizing is a peculiarly 20th-century activity. Yet, contrary to popular belief, Edinburgh has always managed to provide her citizens with music-making of a kind and quality which could stand comparison with that provided by any other British city. In one branch of the art only has Edinburgh been consistently deficient — in opera. Until well into the 19th century, Scottish Presbyterianism took a poor view of the theatre — “the Devil’s playhouse”, as a celebrated divine called it. But perhaps it is hardly surprising that in a country which allowed its conscience to strangle its native drama in the late 16th century and, with very little modification, maintained the stranglehold until the 20th century, should remain more or less hostile to the foreign influence of opera even to this day. To the douce Scots imagination opera has always seemed a bastard form, possibly adequate for foreigners, but beneath the notice of the respectable and godly. Even to-day itinerant opera-companies visiting Edinburgh (or Glasgow for that matter) can be sure of an audience only if they play half a dozen or so universally established favourites.

The unsettled nature of civil affairs in Scotland, right up to the rising of the '45, retarded the country’s musical life, even in the capital city. From old diaries, memoirs and family papers it is possible to glean stray bits of information relating to musical activities of one sort or another. But such information is too fragmentary to enable one to form any accurate picture of the precise nature and scope of these activities. In any case, church music of other than the simplest sort was effectively discouraged by the Reformers. And such music-making as existed among the ordinary folk went “underground”, while the concerts organized by the court at Holyrood were of a spasmodic nature, and given before a private audience. Indeed it was not until the beginning of the 18th century that Edinburgh’s musical life began to recover from that chilling blight with which the Reformation affected all the arts in Scotland.

There were private concerts given in Edinburgh during the last decade of the 17th century, in 1705, and — if Allan Ramsay’s poem ‘The City of Edinburgh’s Address to the Country’ is to be believed — in 1718. By 1721 a Music Club was in existence, of which Ramsay was an enthusiastic supporter. From his poem ‘To the Music Club’ we

gather that the performers would habitually

Mix Cowdenknowe’s and Winter Night’s are long.

This mixture of Italian music with Scots song apparently persisted throughout the programmes of Edinburgh concerts for the greater part of the century. The first sizeable musical society in Scotland, The Musical Society of Edinburgh, was established in 1725. At first it met in the Cross Keys tavern kept by “Pate” Steil, a fiddler and maker of instruments as well as a publican. By 1728, however, this accommodation had apparently become inadequate, and the Society moved to St. Mary’s Chapel in Niddry’s Wynd. There it remained and expanded, giving concerts at times also in Taylor’s Hall, Cowgate, and in the Assembly Rooms, Assembly Close (called the “New Concert Hall” to take the anti-theatre clergy off the scent!) until, in 1762, the Society, still further expanded, moved to its most famous home, St. Cecilia’s Hall. There it flourished until it was finally disbanded in 1801.

The programmes of these concerts included works by Corelli, Handel, Gemuniani and later Haydn, Mozart, Vanhal and Stamitz, as well as works by such native composers as Thomas Erskine, Earl of Kellie. Among the Scots musicians who distinguished themselves in a practical way were the violinists Adam Craig and William McGibbon. Edinburgh’s passion for music — a passion strongest in the aristocracy who were the mainstays of 18th-century concert-giving in Scotland — went, however, hand in hand with a passion for foreign musicians. And the roll of 18th-century musicians taking part in the Musical Society’s concerts includes the names of Schetky, Reinagle, Giornovich, Stabellini, Corri, Puppo, Cramer, Urban and a host of other imported foreigners, many of whom followed the example of Schetky and took a keen interest in the social and civic life of the city of their adoption. Of the famous musicians from the south who visited Edinburgh the most conspicuous were Thomas Arne and the male mezzo-soprano Tenducci.

When the Musical Society had to be wound up in 1801, a quieter period followed. Until 1815 concert-giving seems to have been sporadic. Of course, the truth is that the nature of the Edinburgh audience was changing. Concerts were ceasing to be exclusively entertainments for the aristocracy, most of whom in any case were moving out of their towering “lands” in the Old Town into the spacious squares and streets of the New. St. Cecilia’s Hall (in Niddry’s Wynd) was therefore no longer in the fashionable area. It still stands, shorn of much of its glory, an inferior dance-hall, threatened with destruction because it “abuts” on to the street — and on

the plans of some sacrilegious town planner! However, it was privately purchased in 1952, and in spite of the planners' threats to its ultimate future, is to be restored to its former perfection.

The Edinburgh Festival of 1815 was held at the end of Oct., and was therefore located in the New Town — in the beautiful Assembly Rooms in George Street (which 20th-century musical visitors know as the home of the Festival Club); the Music Hall at the back was not added until 1843. For this Festival, among the directors of which were Sir Walter Scott and Henry Mackenzie ("The Man of Feeling"), there was employed an orchestra of 62, a choir of 58, two well-known conductors of the day and a leading team of soloists. The programmes — there were two concerts a day, one in the morning, one in the evening — included Beethoven's Symphony No. 1, Mozart's No. 39 and the No. 8 of Haydn's "London" Symphonies, as well as Haydn's 'Creation' and Handel's 'Messiah'.<sup>1</sup>

These concerts no doubt showed the good folk of Edinburgh standards of performance of which they had hitherto never dreamed. For not only was the 19th-century Edinburgh audience different in composition from its 18th-century predecessor, but the 19th-century performers were all professional. In the old Music Society days the soloists and the leaders were extremely professional musicians, but the rank and file were amateurs — members of the Society for the most part. With 1815 the era of the professional concert had begun in Edinburgh. The Festivals of 1819, 1824 and 1843 confirmed this pattern of music-making, the last Festival being organized in honour of the opening of the Music Hall.

Other concerts were also given in the Assembly Rooms, as well as, of course, in Corri's Concert Rooms, which stood at the head of Leith Walk, where, until burnt down in recent years, the Theatre Royal later flourished.

A great step forward was taken in 1858, when the Edinburgh Choral Union (now the Edinburgh Royal Choral Union) was founded. This body not only rendered service in a vocal capacity, but was also responsible for organizing regular orchestral concerts on a scale hitherto unknown in Edinburgh.

These Choral Union Concerts were the beginning of a winter orchestral season which has continued, under altered conditions, but with a break during the years of the 1914-18 war, to the present day. These orchestral concerts were at first six in number; two

choral concerts were instituted in 1874, in conjunction with the Glasgow Choral Union. For the first three seasons all the concerts, orchestral and choral alike, were directed by the Choral Union's own conductor, Adam Hamilton. In the fourth season, 1877-78, Hans von Bulow became conductor of the orchestral programmes, the Union's conductor, as before, continuing to direct the choral works. In the following season Julius Tausch conducted the orchestral concerts, to be succeeded a year later by August Manns, whose connection with the orchestral concerts in Edinburgh and Glasgow continued until the advent of the Scottish Orchestra, in 1893, brought a new order of things into being. Meanwhile, however, the Choral Union, while assuming the increased liability involved in an improving orchestra and an increasing number of concerts, was not receiving a commensurate amount of support from the public. The seasons 1885-86 and 1886-87 were financially so disastrous that the Union abandoned an enterprise which had begun to prove beyond their resources. Fortunately a public-spirited music-lover, Robert Roy Paterson, then head of the music-selling firm of Paterson & Sons, stepped into the breach. Assuming liability for the Edinburgh concerts, he made a cautious beginning in the winter of 1887 with a series of four programmes, afterwards increased by degrees, until there were latterly twenty-four weekly concerts over the season. The history of these concerts was practically that of the Scottish Orchestra. In 1950, however, the difficulties of keeping up present-day standards which faced a part-time orchestra such as the Scottish Orchestra proved so immense that a Committee was forced to transform it into a Scottish National Orchestra<sup>1</sup> established on a basis of permanency. This should result in the provision of still more regular and extensive orchestral fare to Edinburgh music-lovers.

Launched about 1906, as a sequence to some earlier concert work, the Edinburgh Classical Concerts, which were organized by J. R. Simpson, of the music-selling firm of Methven Simpson, contributed importantly to the musical enlightenments of Edinburgh. They were discontinued on the outbreak of the first world war. During their course, however, placing a wide interpretation on the term "classical", they introduced much of the best music with which the Edinburgh public had hitherto been unfamiliar and introduced it under the best possible conditions. The Classical Concerts in particular educated the public in the appreciation of art song and of modern French music. The crowning achievement of the Classical Concerts was a Beethoven Festival, lasting a week, which was given in

<sup>1</sup> Dr. Henry Farmer suggests that this may well have been a complete performance of 'Messiah'. The evidence he produces in his 'History of Music in Scotland' is certainly impressive. If he is right, the Festival of 1815 must have sponsored the first complete performance of Handel's masterpiece in Scotland.

<sup>2</sup> See SCOTTISH NATIONAL ORCHESTRA.

1913, and for which the Hallé Orchestra, conducted by Michael Balling, was engaged. Balling had first become known to the Edinburgh public as the conductor of Wagner's 'Ring', organized in 1910 by Ernst Denhof, at that time a pianoforte teacher in Edinburgh, but who took up the cause of opera in English, and on a fine scale, with an enthusiasm which no discouragement could subdue.

Thus far the principal musical undertakings of earlier years in Edinburgh, some of the institutions fortunately still extant, have been noted. There are a few others still to be mentioned. Among them are Mr. Kirkhope's Choir, averaging some 200 voices, carried on by an enthusiastic amateur with a remarkable gift for choral training; and Mr. Moonie's Choir, instituted by James A. Moonie, a local teacher of singing, in 1896. The Kirkhope Choir, starting from small beginnings in the mid-1870s, continued in existence until about 1914. The Moonie Choir is still active under the direction of W. B. Moonie, Mus.B., a son of its founder.

After the first world war Edinburgh had the inestimable benefit of the presence of Sir Donald Francis Tovey in its midst as Reid Professor of Music. He did much to stimulate public interest in music, and under his baton the Reid Orchestra, recruited largely from theatres and picture-houses, performed many rarely heard classical works. Incidentally it was for these Reid Concerts in Edinburgh that most of Tovey's famous 'Essays in Musical Analysis' were originally written as programme notes. The Reid Orchestra went out of existence just after the second world war.

At the present time (1954) there are numerous choral societies active in Edinburgh, a society for the production of "grand opera", at least one amateur orchestra; and a group of artists connected with the Saltire Society who specialize in producing Scottish music and verse.

During the winter months Edinburgh enjoys a weekly lunch-hour concert, held in the Scottish National Gallery. She also contrives to present a winter series of chamber-music concerts, but, as in all Scottish cities, chamber music has a hard struggle to attract more than the devoted few.

Edinburgh's most considerable achievement is, of course, the Edinburgh Festival, dealt with below. So far this magnificent importation of foreign talent has had little effect on Edinburgh's native musical life during the rest of the year, except perhaps to depress it with lack of support, due to the amount Edinburghians spend during the three feverish Festival weeks.

**EDINBURGH FESTIVAL.** Started in 1947 under the title of International Festival of Music and Drama, with the Lord Provost of Edinburgh as Chairman and the Glyndebourne Society Ltd. undertaking the artistic management, this venture proved so successful that it at once became one of the most important annual artistic events in the British Isles — and one not to be accused of insularity. The Arts Council of Great Britain and the Corporation of the City of Edinburgh were both associated with the Festival from the first.

For the opening Festival, which lasted from 24 Aug. to 13 Sept. 1947, an enormous programme was arranged, beginning with a service in St Giles Cathedral. Twenty concerts were held in the Usher Hall, eight in the afternoon and twelve in the evening, and almost every morning chamber music, recitals or concerts for chamber orchestra were held in the Freemasons' Hall. Three theatres, moreover, were busy each night except on Sundays with opera, drama and ballet. At the King's Theatre the Glyndebourne Opera gave nine performances of Mozart's 'Figaro' and as many of Verdi's 'Macbeth'; at the Royal Lyceum Theatre the Old Vic. Theatre Company performed Shakespeare's 'Richard II' and 'The Taming of the Shrew' and Louis Jouvet's company from the Paris Théâtre de l'Athénée gave Molière's 'L'École des femmes' and Giraudoux's 'Ondine'; while at the Empire Theatre the Sadler's Wells Ballet had a continuous run of Tchaikovsky's 'Sleeping Beauty'.

The orchestras engaged were (in that order) the Orchestre Colonne of Paris, under Paul Paray, the Hallé Orchestra of Manchester under John Barbiroli, the Liverpool Philharmonic under Sir Malcolm Sargent, the Scottish Orchestra under Walter Susskind, the Vienna Philharmonic under Bruno Walter and the B.B.C. Scottish Orchestra under Ian Whyte. The Jacques Orchestra was in charge of the chamber-orchestral morning concerts, and chamber music was given by the Czech Nonet, the Menges Quartet, the Galvet Quartet, the Robert Masters Quartet and the Carter Trio (with Leon Goossens). There were also three chamber concerts held at the Usher Hall, the artists being Artur Schnabel, Joseph Szigeti, William Primrose and Pierre Fournier. These also appeared as soloists at orchestral concerts, and among the other individual artists engaged were Robert Casadesu, Bernard Michel, Michelangeli, Cyril Smith, Kathleen Ferrier and Peter Pears. Lotte Lehmann, Aksel Schjötz and Todd Duncan gave song recitals, and the Glasgow Orpheus Choir had one evening to itself.

There were, moreover, outdoor displays of Scottish piping and dancing, and various exhibitions were held of art, crafts and in-

dustrial design. Many tours were arranged for visitors both in the city and in the adjacent countryside.

Programmes for the later years of the Edinburgh Festival cannot here be outlined in detail; but the first is shown as being representative of a venture since continued annually on similar lines.

E B

**Edison, Thomas Alva.** See Gramophone (invention).

**ÉDITION MUTUELLE.** See CASTÉRA.

**EDMUNDS, Christopher (Montague)** (b Birmingham, 26 Nov. 1899).

English organist and composer. He received his musical education at Birmingham University and the Birmingham and Midland Institute School of Music, under Bantock. Later he was appointed a professor there and since 1945 has been principal. He took his D.Mus. at Manchester University in 1936. He is also a member of the Panel of Examiners of the T.C.M. in London. In 1942 he was commissioned by the B.B.C. to write a miniature concerto — the 'Romance' for pianoforte and orchestra. He has written four operas, all unpublished, three of them to texts after Maurice Baring, of which the best-known is 'The Blue Harlequin'. Other larger works, also in manuscript, are two Symphonies (No. 1 for string orchestra, No. 2 for full orchestra), pianoforte Quintet; two string Quartets, pianoforte Trio; violin Sonata. His published works include several small cantatas, choruses, partsongs, music for pipes and recorders, and an organ Sonata. C. M. (iii).

See also Bantock Society.

**EDUARDO E CRISTINA** (Opera). See ROSSINI.

**EDUCATION.** See TEACHING OF MUSIC.

**ÉDUCATION MANQUÉE, L'** (Opera). See CHABRIER.

**EDVINA (Marie Louise Lucienne Juliette Martin)** (b. Quebec, ?; d. London, 13 Nov. 1948).

French-Canadian soprano singer. She was educated at the Convent of the Sacred Heart at Montreal and went to Paris in 1906, where she studied for two years under Jean de Reszke. She had been twice married before that, first to James Buxton and after his death, in 1901, to the Hon. Cecil Edwardes, who was killed in 1917 fighting in the first world war. In 1919 she was married to Nicholas Rothersay Stuart-Wortley.

Having decided to devote herself to singing, she adopted the professional name of Edvina. She appeared for the first time in public at a concert in Paris in 1907 and made her stage debut in London, at the Covent Garden Opera, on 15 July 1908, as Marguerite in Gounod's 'Faust'. Despite lack of experience she made a favourable impression and did even better the following season in Charpentier's 'Louise',

proving herself as the heroine not only an artistic singer but an intelligent and clever actress. Until 1914 she appeared regularly at the Royal Opera and by degrees added Mélisande, Thais and Tosca to her repertory. Her voice during this period acquired increasing roundness and power, together with a more assured mastery of such florid effects as modern romantic opera demands. She sang with success at Boston, U.S.A., during the opera seasons 1911-13, and in 1915 joined the Chicago company, besides later on heading concert tours in the U.S.A. and Canada.

H. K., rev.

**EDWARDE, Martyr** (b. ?; d. ?).

English 16th-17th-century composer. Of his work two motets — 'Terrenum sitiens regnum' and 'Totius mundi domine' — are in the library of Peterhouse College, Cambridge. The latter is only imperfectly preserved. J. M. (ii).

**Edwardes, Richard.** See Ireland (J., song).

**EDWARDS, Frederick George** (b. London, 11 Oct. 1853; d. London, 28 Nov. 1909).

English organist and writer on music. He was educated at the R.A.M. and pursued the career of an organist, holding several London appointments, notably those of Christ Church, Westminster Bridge Road (1876-81) and the St John's Wood Presbyterian Church (1881-1905). His first contribution to 'The Musical Times', the paper with which he was to be so closely identified, was in 1891. In 1897 he became its editor, an appointment he held until his death. He contributed to the 'Dictionary of National Biography' and wrote much on church music. In 1896 he published 'The History of Mendelssohn's "Elijah"', with an introduction by Sir George Grove. H. C. C.

**EDWARDS, H. (Henry) Sutherland** (b. Hendon, Middlesex, 5 Sept. 1829, d. London, 21 Jan. 1906).

English historian and man of letters. His musical works comprise 'History of the Opera . . . from Monteverdi to Verdi . . .', 2 vols. (1862); 'Life of Rossini' (1869); 'The Lyric Drama . . .', 2 vols. (1881); 'Rossini', a smaller work, for the 'Great Musicians' series (1881); 'Famous First Representations [sic]' (1887); 'The Prima Donna', 2 vols. (1888). Edwards passed much time abroad as special correspondent, and his book 'The Russians at Home' (1861) contains many notes on Russian music. For many years he acted as critic to the 'St. James's Gazette'.

G.

**EDWARDS, Julian** (b. Manchester, 11 Dec. 1855; d. Yonkers, N.Y., 5 Sept. 1910).

Anglo-American conductor and composer. He studied in London under Oakley and Macfarren, and at the age of twenty-two became an operatic conductor. He emigrated

to the U.S.A. in 1888 and became an American citizen. He worked mainly in the theatre as a conductor of operetta and produced many successful works of that kind, as well as two serious operas, 'King René's Daughter', after Hertz's play (1893), and 'The Patriot' (1907), which failed, however, to make a name for him in that line. Other works were the sacred cantatas 'The Redeemer', 'Lazarus', 'Mary Magdalen' and 'The Lord of Light and Love', a secular cantata, 'The Mermaid', and a number of songs.

Edwards's operettas are the following

- 'Corinna' (Sheffield, 1880).
- 'Victoria' (Sheffield, 1883).
- 'Brian Boru' (New York, 1906).
- 'Madeline, or The Magic Kiss'.
- 'The Wedding Day'.
- 'Princess Chic'.
- 'Dolly Varden' (after Dickens's 'Barnaby Rudge').
- 'The Gay Musician'.
- 'When Johnny comes marching home.'
- 'Jupiter'.
- 'Friend Fritz' (after Erckmann-Chatrian's novel).
- 'The Goddess of Truth.'
- 'The Jolly Musketeer.'
- 'The Belle of London Town.'
- 'Motor Girl.'
- 'The Girl and the Wizard'.
- 'The Palace of the King.'
- 'The Maid of Plymouth.'
- 'The Land of Heart's Desire'.

All but the first two were produced in the U.S.A.

E. B.

**EDWARDS, Richard** (b. nr. Yeovil, c. 1522, d. London, 31 Oct. 1566).

English poet, playwright and composer. He was educated under George Etheridge, "one of the most excellent vocal and instrumental musicians in England", a distinguished physician of Thame, Oxon., Regius Professor of Greek at Oxford in 1553 and living in 1587. On 11 May 1540 Edwards was admitted a scholar of Corpus Christi College, Oxford. He was made a Fellow of his college on 11 May 1544 and took the B.A. on 3 Nov. In 1546, when Wolsey's former Cardinal College was converted into Christ Church College, he became a student there and in 1547 graduated M.A. By 1553 he was in London and became a Gentleman of the Chapel Royal on Queen Mary's coronation on 17 Sept. of that year, and on 27 May 1560 received the post of Deputy Master of the Children, becoming Master on 26 July 1561, in succession to Richard Bower. During Mary's reign he composed a Mass and several motets, including 'Terrenum sitiens regnum' <sup>1</sup>.

Flood (see Bibl.) mentions various minor church appointments held by Edwards. As a Master of the Children with a gift of poetry and drama as well as music, he produced various plays at court, including 'Appius and Virginius' early in 1563, which occasioned Barnaby Gooch's eulogy of him <sup>2</sup> as a playwright far surpassing Plautus and Terence and

not likely to be equalled by any future poet. Edwards was admitted a member of Lincoln's Inn on 25 Nov. 1564, and at Christmas that year he produced a play with music of his own, 'Damon and Pithias', acted by his own choir-boys, the "Children of the Quene's Chappell". It was one of the earliest music-dramas and contained "Loth am I to depart" accompanied on the regals. At Candlemas following (2 Feb. 1565) came another play, 'Misogonus', for which he received 53s. 4d., and on the same day the next year he was given 40s. for yet another dramatic piece.

Edwards was the compiler of and chief contributor to the collection of poems entitled 'The Paradise of Dainty Devices', which was not, however, published until 1576, ten years after his death. He was also the author of the play called 'Palamon and Arcite' acted before Queen Elizabeth in the hall of Christ Church, Oxford, on 2 and 4 Sept. 1566. This performance so pleased the queen that she sent for the author and "gave him promise of reward". But unless this was very promptly fulfilled, it must have been profitless to him, for he died in the following month. The only extant play is 'Damon and Pithias', published in 1571. Few examples of his skill in composition remain. He wrote music for Surrey's 'Ye happy dames' and contributed a setting of the metrical version of the Lord's Prayer to Day's Psalter of 1563. His song 'When griping grief' is quoted by Shakespeare <sup>3</sup>, and another is 'Soul-knell'. In 1567 Dr. Thomas Twyne, a Fellow of Corpus Christi College, Oxford, wrote an epitaph on Edwards in which he called him "the flower of all our realm and Phoenix of our age".

W. H. H., rev.

Edwards is best known to musicians by his madrigal 'In going to my naked bed', of which the words (published in the posthumous 'Paradise of Dainty Devices') as well as the music were written by him. The composition appears in the Mulliner manuscript of c. 1560<sup>4</sup>, where the music is written in short score with no more than the opening phrase of the words. The composer's name is here given with the music. The tenor and bass parts, also without words, are to be found in the B.M., Add. MSS. Another of Edwards's compositions in the Mulliner book (No 76, fol. 77b) is 'O the silly man', which contains a very early example — not later than 1558 — of the chord  taken unprepared.

**EECKEN, Simon van der.** *See* QUERCU.

**EEDEN, Gilles van den** (b. ? , d. Bonn, [buried 20] June 1782).

German organist and composer of Netherlands descent. He was probably a son or nephew of Heinrich van den Eede(n), who in 1695 was court musician to the Elector of Cologne at Bonn. In 1722 the name occurs again as that of a vocalist, but the first certain mention of Gilles is in 1728, when he represented to the elector that he had been employed as organist for a year and a half without pay, on which the sum of 100 florins was allotted to him, increased, on his further petition (5 July 1729) to 200 florins.<sup>1</sup> He thus entered the elector's service before Beethoven's grandfather. In 1774 he was composer to the electoral court at Bonn. In 1780 we find him as teacher to the boy Beethoven, then aged ten; but when the teaching began or of what it consisted beyond the organ is not known. There is reason to believe, however, that Beethoven had no instruction in composition before he came under Neefe. He often spoke of his old teacher, with many stories which have not been preserved.<sup>2</sup> G.

**EEDEN, Jan van den** (b. Ghent, 28 Dec 1842, d. Mons, 4 Apr. 1917).

Flemish composer. He studied at the Conservatories of Ghent and of Brussels, gaining at the latter the Belgian Prix de Rome in 1869 with a cantata, 'Faust's laatste nacht'. After travelling in Germany, Austria, Italy and France he became director of the music school at Mons in 1878 in succession to Huberti.

He wrote two operas, 'Numance' (Antwerp, 1898) and 'Rhéna' (Brussels, 1912), cantatas 'Jacoba van Beieren', 'Jacob van Artevelde', 'Brutus', 'Het Woud' and 'De Wind', an oratorio, 'Het laatste oordeel' ('The Last Judgment'); a piece for 3 voices, 'Judith'; a symphonic poem 'De strijd in de XVI<sup>e</sup> eeuw' ('The Fight in the 16th Century'), a Scherzo, some suites, a 'Marche des esclaves' for orchestra; many songs and part songs, etc.

BIBL.—BERGMANS, PAUL, 'Notice sur Jean van den Eeden' (Brussels, 1924).

**EFFINGER, Cecil** (b. Colorado Springs, 22 July 1914)

American oboist and composer. He was educated in the public schools and attended Colorado College, receiving his B.A. degree in 1935. He began to learn the violin at the age of eight, but later the oboe became his principal instrument. In 1932 he attended the National Music Camp with a Presser Scholarship. From 1934 onwards he studied harmony and counterpoint for two years with

Frederick Boothroyd, the English organist and conductor of the Colorado Springs Symphony Orchestra. Composition he studied with Bernard Wagenaar at Colorado Springs in 1938 and with Nadia Boulanger at Fontainebleau in 1939, where he won the Stoval composition prize.

Effinger has held posts as Instructor in Music at Colorado College (1936-41) and at Colorado School for the Blind (1939-41), first oboe in the Colorado Springs Symphony Orchestra (1932-41) and Denver Symphony Orchestra (1937-41), leader and commanding officer in the 506th Army Band (1942-45) and a teaching appointment in France at the Biarritz American University (1945-46). Later he was Assistant Professor in Music at Colorado College in 1946-48, music editor of the 'Denver Post' in 1947-48, and he became Assistant Professor of Music at the University of Colorado in 1948.

Effinger's output is unusually large and includes numerous transcriptions for band and for orchestra and about two hundred dance-band arrangements (1934-38). The following is a list of only a selection of his works:

#### CHORAL WORKS

- 2 Motets (extracts from Psalms) for men's chorus (1942)
- 'The Old Chisholm Trail' (traditional) for chorus & orch. (1945)
- Psalm LXXXI for chorus with orch. or organ (1946).
- 'Time' (Shelley) for unaccomp chorus (1947).

#### ORCHESTRAL WORKS

- 'Western Overture' (1942).
- Prelude and Fugue (1942).
- Suite for stgs. (1943).
- Little Symphony No. 1 (1945).
- 'Variations on a Cowboy Tune' (1945)
- Symphony No. 1 (1945).
- 'Interlude on a Blues Folk Tune' (1946)
- 'Tennessee Variations' (1946)
- Symphony No. 2 (1947).
- Suite (1948).
- 'Lyric Overture' (1949).
- Symphony No. 3 (1950)
- Little Symphony No. 2 (1950)

#### SOLO INSTRUMENTS AND ORCHESTRA

- Prelude and Toccata for oboe (1940).
- Concertino for organ & small orch. (1943).
- Suite for cello & chamber orch. (1945)
- Pf Concerto with chamber orch. (1948)
- 'Pastorale' for oboe & stgs. (1948)

#### MILITARY BAND

- 6 Military Marches (1942)
- Suite (1944).
- Chorals and Fugue, F ma. (1949)
- Improvisation for clar. band (1950).

#### CHAMBER MUSIC

- String Quartet No. 1 (1943).
- Introduction and Allegro for flute, vn, viola & cello (1944).
- String Quartet No. 3 (1944).
- Quintet for woodwind (1947).
- String Quartet No. 4 (1948).
- Divertimento for vn, viola & pf. (1950).

#### ONE INSTRUMENT AND PIANOFORTE

- Sonata for viola (1944).
- Suite for cello (1945).
- Also pieces for violin, oboe, clar. & horn

## PIANOFORTE WORKS

Prelude and Fugue, D $\flat$  ma. (1944).  
 3 Pieces (1945-47).  
 Sonata No 1 (1946)  
 'Little Suite' (1947)  
 Sonata No 2 (1948)

P. G.-H

**EFFREM, Muzio (Mutio)** (b. ?; d. ?).

Italian 16th-17th-century composer. He was a Neapolitan and for twenty-two years in the service of Gesualdo, Prince of Venosa; in 1617 at the court of Mantua; in 1622 at the grand-ducal court at Florence; in 1623 again at Naples. He published in 1626 the 6-part madrigals by Gesualdo. Effrem is known chiefly by his criticism of Marco da Gagliano's 6th book of madrigals. Of his own compositions only some madrigals are known. In 1617 he took part in the composition of 'La Maddalena', text by G. B. Andreini.

E. v. d. s.

See also Gagliano (M., controversy)

**EGENOLF, Christian** (b. Frankfurt o/M., 22 July 1502; d. Frankfurt, 9 Feb. 1555).

German music printer. He was one of the earliest practising that craft. He published an edition of Horace's odes set to music by Tritonius, also 'Gassenhawerlin' and 'Reuterhedlin' (1535).

E. v. d. s.

**EGERTON, Julian** (b. London, 24 Aug. 1828; d. Bilsington, Kent, 22 Jan. 1945).

English clarinettist. He was for many years a member of H.M. Private Band, to which he was appointed at the age of twenty-two. He was in addition principal at the Richter concerts from their inception in 1879 and at many of the provincial festivals till his retirement at the age of seventy. The features of his playing were the delicacy and finish of his execution, charm of style, and the extraordinary beauty of his tone. He was professor at the R.C.M. in succession to Lazarus from 1894 till 1910 and at Kneller Hall from 1889. He played by preference on a pair of simple-system clarinets made of ebonite by Fieldhouse of London.

F. G. R.

**EGGAR, Katharine E. (Emily)** (b. London, 5 Jan. 1874).

English composer. She was educated privately and at Bedford High School, and began to study the pianoforte with Elizabeth Foskett and H. A. Harding. Later she was a pupil successively of Karl Klindworth in Berlin, Arthur de Greef in Brussels and Edward Dannreuther in London. Composition she studied under Frederick Corder, and she took the A.R.A.M. and L.R.A.M. She was one of the founder-members of the Society of Women Musicians and has been chairman of its Council since 1948.

Katharine Eggar has written articles for various musical periodicals, lectured to the Royal Musical Association, of which she is a member, and contributed articles to Cobbett's

'Cyclopedic Survey of Chamber Music'. Her compositions include the following.

## CHAMBER MUSIC

Quintet for 2 vns, viola, cello & pf  
 'Rhapsodic Impression' for flute, viola & pf  
 'My soul is an enchanted boat' (Shelley) for mezzo-soprano, stg 4tet & pf  
 2 Songs for 3 women's voices with pf, 4tet  
 1. Autumn Leaves.  
 2. May Wind

## VIOLONCELLO AND PIANOFORTE

Sonata.

'Lachrymae' by William Byrd (arr.)

## FLUTE AND PIANOFORTE

Idyll

## PIANOFORTE MUSIC

'Moonrise.'  
 'Sun in Springtime.'  
 'The Old Castle'  
 'The Wishing-Well'  
 'Tarantella'  
 'Duets for Fun' (for a child and a pianist).

## SONGS

'If thou wilt ease my heart.'  
 'Remember me, my dear'  
 'Curtsy to the Moon'

## VOCAL DUET

'Slayer of the Winter' for soprano, baritone & pf.

E. B

**EGGE, Klaus** (b. Granskerad, Telemark, 19 July 1906).

Norwegian composer. He studied in Norway with Fartein Valen and also in Germany. From 1935 to 1938 he edited the Oslo periodical 'Tonekunst'. Since 1945 he has been president of the Norwegian Composers' Society in succession to Arne Eggen. His works include a Symphony, a pianoforte Concerto, sonatas for violin and pianoforte and for pianoforte solo ('Draumkvædsonate') and a Trio for violin, cello and pianoforte. He is an ardent student of Norwegian folk music.

J. H. (ii).

**EGGEN, Arne** (b. Trondhjem, 28 Aug. 1881).

Norwegian organist and composer. He studied at the Christiania and Leipzig Conservatories and later held various organ posts in Norway. From 1927 to 1945 he was president of the Norwegian Composers' Society, where he was succeeded by Klaus Egge. Among his works are the melodrama 'Liti Kjersti' (after Hans Andersen's 'Liden Kirsten') and the opera 'Olav Liljenkrans'. An opera on Shakespeare's 'Cymbeline' was produced at Oslo in Dec. 1951. He has been active in the collecting of folksongs.

J. H. (ii)

**EGGERT, Joachim (Georg) Nicolo** (b. Gingst, Rugen, 22 Feb. 1779; d. Thomestorp, Östergötlands län, 14 Apr. 1813).

Swedish composer of German birth. He studied violin in 1791-94 with an organist, Dammas, of Halberstadt and with Kahlow, a violinist and composer at Stralsund, and theory

in 1800-2 with F. G. Fischer, a pupil of Kirnberger. In 1802 he was for a short time director of music at the court theatre of the Duke of Mecklenburg-Schwern. He intended to try his fortune in Russia, but as his plans did not materialize he settled in Stockholm in 1803 where he already had musical connections. He was appointed violinist in the royal orchestra (1803-8) and was commissioned to compose music for special occasions. He was deputy conductor to Haefner (1808-10), after which date he also conducted operas and orchestral concerts.

Eggert was the first to perform Mozart's 'Magic Flute' in Sweden (1812) and was also responsible for introducing the Viennese classics, especially Beethoven's works, to Swedish audiences. Among his pupils were the Swedish composers Erik Drake, Ludwig Passy and Martin de Ron. In 1807 he was elected a member of the Academy of Music. During 1811-12 Eggert collected and noted down folksongs in the province of Östergötland and became interested in a project for using native folk instruments in a Swedish national opera. He made his home at Follingsö (Östergötland) with Erik Drake from 1812 until shortly before his death the following year.

Eggert's compositions, which show the influence of the early German romantic school, comprise two dramas with music: 'Morerna i Spanien' ('The Moors in Spain'), produced 6 May 1809 and performed forty times, and 'Svante Sture och Marta Leijonhufvud', 1812, performed forty-two times; 5 symphonies; 10 string quartets; a Sextet each for strings and wind; 7 cantatas and many songs.

**EGK, Werner** (b. Auchsesheim nr. Augsburg, 17 May 1901).

German composer. He comes of old Swabian-Bavarian peasant stock, which manifests itself in the exuberance and vigour his music displays. Apart from his contemporary and compatriot Carl Orff, he is the only modern German composer who has not succumbed to the German contrapuntal school once headed by Paul Hindemith, nor has he ever drawn on the resources of the "neo-baroque" school. He has, however, absorbed the harmonic and rhythmic innovations of Stravinsky and the modern French school, and his astounding gift of orchestration

and sense of the theatre are reminiscent of Richard Strauss. Rhythmic poignancy and ingenuity in harmonic colouring characterize his style. He often gives his melodic material a folksong-like flavour, and his immense interest in the problems of musical form leads him to many interesting experiments.

Egk is mainly self-taught; he received his early training at Augsburg and later on at Munich, but at that time his leanings towards the fine arts and literature were as strong as those towards music. A stay of a few years in Italy made him finally decide in favour of music. After short periods spent at Munich and Berlin he settled down in a suburb of Munich, devoting all his time to composition. In 1949, after an acrimonious controversy following the banning of his ballet 'Abraxas' by the Bavarian Ministry of Education, on moral grounds, he became director of the High School for Music in Berlin, but he resigned in 1953.

Egk began his career by writing works commissioned for broadcasting, among them 'Columbus', a radio opera which he rewrote for scenic performance in 1941. His first opera, written in the manner of a "number" opera, 'Die Zaubergeige' of 1935, is based on a puppet play by Count Pocci; it was an immense success in Germany mainly on account of its popular melodic material, which abounds in catching tunes presented in a novel manner, apart from a libretto full of theatrical effects.

Egk's instinct for the theatre again manifests itself in his second opera, 'Peer Gynt' (1938), the libretto of which, based on Ibsen, he wrote himself. In this work he moved away from the popular idiom of 'Die Zaubergeige'; the melodic element still dominates the music, but the expression has become more refined and has acquired a higher degree of intensity. The writing is extremely colourful harmonically as well as rhythmically, and his scoring is of the highest perfection. 'Joan von Zarissa', first produced in 1939, is a *Tanzspiel* (a play for dancers) based on the Don Juan theme. Singers are employed merely to act as narrators and commentators, and the scenes are connected by elaborate choruses in the manner of medieval French chansons.

Egk's next stage work, 'Circe', was begun during the war years and first performed in 1948 by the Municipal Opera of Berlin. The libretto, again by the composer, is based on Calderón and the work is a curious mixture of *opera buffa* and *seria*, of musical farce and mythological opera, a combination of "opera" and musically illustrated "drama". The most liberal use is made of the possibilities these contrasts offer; the style — tonal in principle — is picturesque, but little attempt is made to create a homogeneous work. All

the operatic forms are represented with the exception of big arias. Though the opera is full of ingenious devices and humorous ideas, and though Egk shows his masterly hand at vocal and orchestral writing, the weakness which lies in the lack of the musical characterization of the central figures of Circe and Ulysses cannot be entirely concealed.

In 1948 'Abraxas', a ballet in five parts after Heine's dance-poem 'Dr. Faust', was produced at Munich. This aims at creating a new German ballet art based on the classical ballet, and it takes its inspiration from the great examples of French ballet dancing. The musical forms are closely related to those of the suite of the 17th century, and Egk follows the form-building technique employed by pre-classical composers, not the classical principle of thematic development. Harmonically the idiom employed in 'Abraxas' is modern to a much larger extent than in most of Egk's earlier works. Orthodox tonality, which had dominated most of his previous output, now gave way to bitonality or polytonality. Of Egk's orchestral works the most important are the 'Orchestersonate' of 1948 and the 'Französische Suite' after Rameau of 1949.

BIBL.—LAUX, KARL, 'Werner Egk' in 'Musik und Musiker der Gegenwart', I, 73-89 (Essen, 1949).

## CATALOGUE OF WORKS

### OPERAS

- 'Die Zaubergeige', libretto by Ludwig Andersen after Count Pocci (1935).
- 'Peer Gynt' (libretto by the Composer, based on Ibsen's drama) (1938).
- 'Columbus' (revision of broadcast opera of 1933) (1941).
- 'Circe', libretto by the Composer on Calderón's 'El mayor encanto amor' (1948).

### BALLETS

- 'Joan von Zarissa' (1939).
- 'Abraxas', after Heine's 'Dr Faust' (1948).
- 'Der Sommertag' (on music by Clementi & Kuhlau) (1950).

### RADIO MUSIC

- 'Weihnacht' (1929).
- 'Die Zeit im Funk (Lehrstück)' (1929).
- 'Trebitch Lincoln' (1930).
- 'Der Lowe und die Maus' (after Aesop), for narrator, chorus & orch. (1931).
- 'Der Fuchs und der Rabe' (after La Fontaine), for narrator, solo, voices, chorus & chamber orch. (1931).
- 'Columbus', radio opera (1933).

### CHORAL WORK

- 'Furchtlosigkeit und Wohlwollen', oratorio (1930)

### ORCHESTRAL WORKS

- 'Georgica', 3 peasant pieces (1934).
- Olympic Festival Music (1936).
- 'Orchestersonate' (1948).
- 'Französische Suite', after Rameau (1949).

### VIOLIN AND ORCHESTRA

- 'Geigenmusik' (1936).

### VOICE AND ORCHESTRA

- 'Quattro canzoni' for tenor (1933).
- 'Natur, Liebe, Tod (Göttinger Kantate)' for bass (1937).
- Variations on an old Viennese song for coloratura soprano (1937).

## PIANOFORTE MUSIC

Sonata (1947).

### SONGS

'Temptations of St. Anthony' for voice and stig. 4tet.

K. W. B.

**EGLI, Johann Heinrich** (b Seegraben, Zurich, 4 Mar. 1742, d. Zurich, 19 Dec. 1810).

Swiss composer. His songs had a great vogue in his time, and he published a large number of song-books, several of which remained in public use (churches and schools) beyond the middle of the 19th century.

E v. d. s

**EGMONT.** Incidental music for Goethe's drama 'Egmont' was commissioned from Beethoven in 1809 by Court Councillor Joseph Hartl, then director of the three court theatres in Vienna. The resulting work, of which only the overture is now familiar (Op. 84), was first performed with a revival of the play at the Burg Theatre on 24 May 1810. Records of the occasion, and of the later history of the music, are scanty. The 9 incidental pieces are named in the catalogue of Beethoven's works (see Vol. I, p. 576).

W. M

**EGRESSY, Benjamin.** See NATIONAL ANTHEMS (HUNGARY).

**EGYPTIAN MUSIC.** THE EARLY DYNASTIES.—Egypt is the one land which tells the complete story of its music from primitive times to the present day. It may be that we are on shifting sands in the archaic period (5th millennium B.C.) and that only the merest foothold can be secured in the predynastic years (4th millennium B.C.); yet here and there we get glimpses of the very cradle of music. In those days, sound itself was an arcanum. Faith in animism prompted man to the belief that the sound of an object—wood or stone, or that of the elements, the wind or sea—was a "voice". Primitive man, making no distinction between the animate and inanimate, reasoned that he could influence nature itself by the use of these "voices". As early as the 4th millennium we discern clappers in pairs figured on pottery, and when they recur in the 5th dynasty (24th cent. B.C.) as rhythmic wands they are used with animistic fidelity as conjuration for the success of vintners and harvesters. Some gods were of totemistic origin, the result being that we find instruments of music in the hands of animals, and animal forms are even carved on instruments. Another instrument which goes back to the predynastic period is the upright reed flute, the very embodiment of fertility.

Under the 4th dynasty (26th cent. B.C. *et seq.*) we are able to discern the practice of music in many aspects. The male musician predominates, handling the harp, flute and reed-pipe. The first-named was the *ben* or

*beni*, a lower-chested instrument with but few strings. From the time of the 6th dynasty (c. 2300 B.C. *et seq.*) the sound-chest grows to greater bulk. The flute was the end-blown instrument, but without a fipple. We do not know its name, but it may have been *seba'* (Coptic *sébe*). We are also denied the term for the reed-pipe, but Loret suggests *ma't*. We see music in almost every phase of social and religious life. It was called *hy*, the pristine significance of which was "gladness", and more than once do we read the injunction that man should indulge his ears with its charms ere the grave claims him. One sees the interior of a music academy in those days, with pupils being instructed, and harps, citharas and pandores on the walls. Among the folk, song enlivened toil for the workers in the fields, while the dance was just as popular there as in the palaces. In the temples, where the precentor chanted the hours regularly, there was not only the sistra (*shekhem*, *seshshet*), but flutes and reed-pipes.

Fresh impulses came to Egypt's music under the 18th dynasty (c. 1570 B.C. *et seq.*). This was after the Syrian campaign, the momentum being of Semitic origin. Many technical musical terms bring evidence of this, e.g. *henw* ("to praise [in song]": cf. Hebr. *ánah*), *shedi* ("to recite": cf. Arab. *shadd*, "to sing"). Certainly *shem'ayt* ("singing-girl") is Semitic (Hebr. *shamá'* and Arab. *samá'* = "music"). These female musicians now found the widest acceptance in both secular and religious circles. New types of instruments also came into use. A Semitic cithara, probably the *kena'na'ur*, had been known since about 1890 B.C., when we see it in the Beni Hasan picture under the 12th dynasty; but more important Semitic instruments came into more general use, *viz.* the pandore and the upper-chested harp. The former was the instrument which the older musicographers called the *nefer*. Actually we do not know what it was called. The name of the Semitic harp also escapes us for certainty, but it may have been the *da'da't*. It was the Persian *chang* that we see in Babylonia-Assyria. Drums and tambourines were in abundance. One of these was the *teben* (cf. Assyr. *jabalu*), while others were the *a'seh* and *ser*. Drums, with trumpets and clappers, made martial music. Many of these instruments are to be found in museums all over the world, notably harps, citharas, pandores, flutes, reed pipes and drums, not forgetting the famous trumpets of Tut-ankh-amen. Most of these instruments still appear on monuments much later, from the 21st dynasty (c. 1090 B.C.) down to the Graeco-Roman era (c. 332–30 B.C.).

GRAECO-ROMAN PERIOD.—Alexander's conquest heralded the famous Ptolemaic dynasty (c. 323–30 B.C.), when the land became the

home of Greek colonists, although their compatriots had been there before. Herodotus (d. c. 425) had already visited Egypt and left a record of it in which he tells us that the profession of music there was a hereditary one. To him it was "a land of wonders", as is proved by his account of the *aulos* skirling and *sestron* jingling in the religious processions. Plato, who was there later, informs us that "only the highest art and the best music" obtained in that country. Of the time of Ptolemy Philadelphus (d. 246 B.C.) Athenaeus records, at second hand, a scene of a choir of six hundred, which included three hundred harpers. Menecles (3rd cent. B.C.) avers that the Alexandrians were the teachers of the Greeks in music, while Diodorus Siculus insists that the Greeks actually appropriated the Egyptian cults, and we certainly see the *seshshet*, as the *sestron*, in the hands of those who served in Grecian Isis temples. Just before the end of this period there lived Ptolemy Auletes (d. 52 B.C.), who owed his surname to his fluting propensities. Both types of harp — with both the lower and upper sound-chests — the cithara and the pandore flourished in those days. Many Greek instruments, notably in the woodwind, are said to have been borrowed by the Greeks from Egypt, particularly the *giglaros* and *phoinix*.

The advent of the Romans (30 B.C.) was the end of the Ptolemies. Yet Egypt's artistic life changed but little. In the cults there could be no question of alteration or progress, although we get some strange enlightenment in Demetrius Phalerus (1st cent. A.D.), who visualized the priests hymning the gods through the seven vowels. Clement of Alexandria (2nd cent. A.D.) tells us about the precentor of the temple and of such instruments as the *psalterium*, *cymbala* and *tympana*, while we know from other sources of the *tibia* and *sistrum*. Even more interesting is the statement of Dio Cassius (d. c. 235) that a sidereal scale, from A to G, linked with the planets, was practised. It may be recalled that in those days (2nd cent. A.D.) lived Claudius Ptolemy the music theorist, Hero of Alexandria the organ constructor and Athenaeus the chatty writer on music, who were all Egyptian born, as was Claudian the poet, who tells us of the *tibiae* in the temples. Yet whatever cultural benefits came with Graeco-Roman civilization, Egypt well repaid the loan, as we have seen; and at the close of the Roman days, in the 6th–7th centuries, the real racial descendants of the Egyptians themselves, the Copts, were still speaking of their music as *hos* (= Old Egyptian *hesi'*), of their harp as *boine* (= *ben*), of their cithara as *kinéra* (= *kena' na'ur*) and of their flute as *sébe* (= ? *seba'*). It was these people who, because of persecution as Christians, were soon to welcome new-

comers as their deliverers. These were the Arabs.

MUSLIM ERA.—When the Arab armies of Islam entered Egypt in the year 641 the land of the Pharaohs became a province of the Arab caliphs of Medina and Kufa, who appointed their governors to rule Egypt in their name. This continued under the governance of the art-loving Umayyad caliphs of Damascus (661). It may be assumed that music was as much patronized by their lieutenants as by their free-handed masters, and that Hijazian and Syrian minstrels, practising the art of the old Arabian School, were patronized.<sup>1</sup> Soon after the 'Abbásid caliphs rose to power (750) Turkish governors and their soldiery took the places of the Arabs. These Turanians, who were keenly partial to music, naturally appreciated their own indigenous art, and newer ideas from the distant Oxus came to music in Egypt. Such rulers as Ibn Tūlūn (*d.* 884), Khumárawayh (*d.* 896), Al-Ikshíd (*d.* 946) and Káfūr (*d.* 968) were prodigal in gold spent on art and music. Ibn Khallikán (*d.* 1282) wrote rapturously of the charming voice of the first-named in chanting the Qur'án. His son, the second named, was so impassioned a musician that he had his palace adorned with portraits of his favoured singing-girls in direct defiance of the Islamic ban on the graphic arts. Al-Mas'ūdī, the Arabic historian, dilates on the marvellous scene at a festivity which he saw at Al-Ikshíd's palace on the Nile in 940, where "the sound of music was heard all about, with singing and dancing". During the nominal governorship of his sons the famous vizier Káfūr held the reins. He was another Maecenas in his patronage of art and literature, and like most Negroes, he delighted in music.

Under the Fātimid caliphs Egypt became the centre of Arabian culture for a time, in opposition to the caliphs of Baghdad. The *amīr* Tamīm, the son of Al-Mu'izz (*d.* 975), was devoted to music. Al-Hákīm (*d.* 1021) was brought up under the tutelage of the *ustādh* Barjawān, who was so absorbed in music as to neglect his duties. When his pupil came to the throne the scene changed. He forbade "listening to music". At the same time he patronized the music theorist Ibn al-Haitham (*d.* 1038), the author of a 'Commentary on Euclid's Canon' ('Sharḥ qánún Uqlidis') and a 'Discourse on the Commentary on the "Introductio Harmonica"' ('Maqála sharḥ al-armúníqí') of Cleonides. A contemporary was the song collector Al-Musabbíḥi (*d.* 1029), who compiled a 'Book of Selected Songs' ('Kitáb mukhtár al-aghání'). Thus we see that the sultan did not object to the science or literature of music, though he abominated listening to it, a point which was to become a

question of debate shortly. Unlike his father, Al-Záhir (*d.* 1036), he cultivated an immoderate taste for the *maláḥí* or "forbidden pleasures", and spent enormous sums on music, as Al-Maqrízí, the Egyptian historian, tells us. His successor, Al-Mustansir (*d.* 1095), was even more addicted to the art and argued that listening to the music of his singers was better than paying attention to the droning of the muezzin of the mosque. His vizier had pictures painted of his dancing-girls. Al-Musta'li (1101) and Al-Ámir (*d.* 1131) were no different from their predecessors, and the former had once encouraged Abul-Ḥalt Umayya (*d.* 1134), a skilled lutenist and a musical theorist, whose 'Treatise on Music' ('Risála fil-músíqí') had great recognition in both the East and West. It survives, possibly, in the section on music contained in an encyclopedia of the sciences in a Hebrew translation in Paris. The Fātimid period, which revealed the impingement of Persian ideas, was a most brilliant one for music, and if the delineation of instruments on pottery and woodwork of the period is any criterion, then the harp (*jank*), psaltery (*qánín*), lute ('*úd*), reed-pipe (*zannr*) and tambourine (*ṭar*) were in their heyday, together with the Persian guttar (*rubāb*), which was probably introduced during the days of Ibn Tūlūn, as a fine piece of lustre ware at Cairo testifies. Incidentally, the Persian harp (*chang*; Arab. *jank*) was introduced by the Fātimids. The "S" shaped soundholes on the lutes and guitars first appeared in those days. Turanian taste in music was more encouraged under the Ayyúbid sultans, whose founder was the great Saladin (*d.* 1193). Ibn Saná al-Mulk (*d.* 1211), who popularized the Andalusian song-form called *muwashshah* in Egypt, was employed by him. Al-Bayásí, a pupil of Ibn al-Naqqásh in musical theory, was favoured by this sultan as his court physician. Ibn Abí Ūsaibi'a speaks highly of the former as "an excellent performer on the lute, and the constructor of a mechanical organ [*urghan*]". 'Alam al-Dīn Qaisar (*d.* 1251) was another of Egypt's musical theorists who is praised by Ibn Khallikán. Much information on those who were "learned" in the science of music is to be found in 'History of the Learned' ('Ta'rīkh al-hukamá') by Ibn al-Qifí (*d.* 1248) and the 'Sources of Information' ('Ūyún al-anba') by Ibn Abí Ūsaibi'a (*d.* 1270).

The Mamlūk sultans (1250-1517) stepped into the shoes of the Ayyúbids. Those powerful rulers were generous supporters of the arts, and in their military music they so impressed the Crusaders that the latter soon adopted their technique. The sultan's band in the time of Baibars (*d.* 1260) consisted of 40 kettledrums (*kisár*), 20 trumpets (*anfár*), 4

<sup>1</sup> See ARABIAN MUSIC.

drums (*duhulāt*) and 4 shawms (*zumūr*). Every *amir* also had a band, but of lesser dimensions. Like the Ayyūbids, these Mamlūks were of Turkoman stock, and their musical preferences were for the art of the central Asian plain. Therefore it was Turki pandores, such as the *qūpūz* and *ūzan*, that gave them delight. When the sultan appeared in state he was preceded by a flautist and followed by a singer, who accompanied himself on a tambourine. In the procession too were poet-minstrels who chanted antiphonally to the music of the spiked viol (*kamānya*) and the double pipe (*mausūf*). Al-Maqrīzī (d. 1442), Egypt's historian for the period, describes the court music most eloquently. Musicians and singing-girls were in universal demand. In one showy passage he draws a picture of night music where torches are waved in time with the music.

For an intimate grasp of musical life at this period one may safely turn to the 'Arabian Nights', since most of those charming interludes are of Egyptian facture.<sup>1</sup> It was sultan Qalā'ūn (d. 1293) who built the famous hospital (*Māristān*) at Cairo, where "music soothed the wakeful hours of the sufferers". Music had been a part of therapeutic practice in Arab medicine since the 9th century. Many of the Circassian sultans were musicians of taste. Barqūq (d. 1398) was one of them, and when Tīmūr the Tartar sent him a threatening letter he replied contemptuously by likening its bombastic style to the scragging of a bad fiddler (*rabābī*). Al-Mu'ayyad Shaikh (d. 1421) was another sultan accomplished in music. There were some exceptions. Al-Zahir Saif al-Dīn (d. 1453) was severely orthodox and suppressed music, much to the delight of the puritans. This question was widely debated in Egypt, and some men of genius took sides. Among the condemnors was Ibn Taimīya (d. 1328). Others, such as Ibn Zaghdūn (d. 1477), defended the art, while a mystic like Al-Yafī'ī (d. 1368) pleaded its spiritual usefulness. It was the Egyptian *ṣūfī* Dhū'l-Nūn (d. c. 886) who said "Music is a divine influence which urges the heart to seek Allah". Egypt became the home of *ṣūfī* and *darwish* fraternities during the Ayyūbid and Mamlūk régimes.<sup>2</sup>

The great men of letters who wrote about music included Al-Nuwayrī (d. 1332), and what he had to say may be found in the 'Nihāyat al-arab'. The most accepted song librettist in Egypt was Al-Sartūjī (d. 1294). Two centuries later it was Al-Nawājī (d. 1455) who gained the public ear with his bacchanalian songs as illustrated in the 'Halbat al-kumait'.

Writers on the theory of music from Egypt during this period are not numerous. Al-

Maqrīzī (d. 1442) wrote a work on the 'Mode of Singing' ('*Hāl al-ghina*'), but only one page of it has been preserved. A really important work of Egyptian provenance is the '*Kashf al-humūm*' (15th cent.), with its valuable sections on instruments which include the organ (*mūsīqā*), lute (*'ūd*), Persian harp (*jank 'ajamī*), Egyptian harp (*jank musrī*), psaltery (*ṣnītrī*), spiked viol (*rabāb, kamānya*), flute (*shabbāba*), panpipes (*sha'ibya*) and tambourine (*duff, ghurbāl*).<sup>3</sup> The *jank musrī* was an Egyptian invention of the 15th century. Like the *jank 'ajamī* it was a harp, but with two sets of strings with a resonant wooden board between them.

In spite of internecine troubles the Mamlūk rule, of over three hundred and fifty years, was a brilliant one musically, and when these rulers were defeated by the Ottoman Turks in 1517 a cultural decline set in. For a time the music continued to find willing ears. Pierre de Belon du Mans, who was in Egypt in 1546-47, has a good word to say for its music and praises the singing. He mentions its *voiles*, with one or two strings stretched over a long neck which had frets (*touches*), and says that its belly was of fish-skin. Clearly it is the spiked viol (*kamānya*) that he describes. Changes soon came under the Ottomans. The famous military bands of the Mamlūk amirs were suppressed and Turkish ideas in music in general were adopted. Arabian music, as it had flourished in 'Abbāsīd times, had long deviated from that norm under Persian and Turkoman influences. Now, under the Ottoman masters, whose ears only favoured Anatolian and Rumelian music, a definitely Turkish texture and colouring showed itself under the tutelage of Ottoman musicians employed by the janissaries and *effendī* class. Hereafter we find a technical musical nomenclature such as one discerns in the '*Fāthīya*' of Al-Lādhīqī (fl. 1494). It seems fairly clear that Egypt, like Al-Lādhīqī and the rest of the Near East, was using the reformed systematist scale of *limma, lumma, comma*, although the contemporary Egyptian treatise, the '*Kashf al-humūm*' (15th cent.), hints at the existence of a quarter-tone ('*araba*') system. Yet after Al-Lādhīqī Turkey did not produce any outstanding works on music beyond the brief sections on the art in the encyclopedias of Tāshkoprizāde (d. 1560), Al-Shirwānī (d. 1626) and Ḥājī Khalīfa (d. 1657), who not only wrote in Arabic but derived their material from Arabic theorists. A flourishing musical Egypt under the Ottoman rule scarcely existed, and as Dr. Maḥmūd al-Hefny has said: "This period of decadence is a black page in the history of [Egyptian] music".

<sup>1</sup> See Farmer, 'Minstrelsy of the Arabian Nights'.

<sup>2</sup> See *Ṣūfī* and *Darwish* Music.

<sup>3</sup> Some of these are delineated in Farmer, 'Sources of Arabian Music'.

Fortunately for musicographers, Napoleon's short conquest of Egypt in 1798, which put an end to Ottoman rule, was followed by a body of scholars who, during 1798-1800, made a close survey of Egyptian arts and sciences, the results of which were published in 'La Description de l'Égypte' (1809-26). Villo-teau's contributions on Egyptian music appeared in the volumes issued in 1812-13. He shows that the Egyptian scale consisted of twenty-four microtones to the octave, based on a Turko-Arabian system of quarter-tones ('*arabdt*'), which gave seven diatonic intervals (*barddt*) to the octave. Unfortunately Villo-teau's description of the scale is erroneous, which rather spoils his notation of seventeen of the modes he records. However, the names of these, together with those of the seven *barddt*, reveal the *rast*, *dúkh*, *shúkh* sequence, which demonstrates that the Perso-Arabian system was in use. He also preserves many examples of contemporary songs and music, although of far greater value are the chapters devoted to instruments — the lute ('*úd*'), pandores (*tandbír*), spiked viols (*kamánydt*), rebecs (*rabábdt*), the psaltery (*qánún*) and dulcimer (*snitr*), flutes (*ndydt*), double-reed pipes (*araghíl*), and shawms (*zumúr*), the recorder (*suffrá*) and racket ('*iraghya*'), tambourines (*duff*, *múzhár*, *idr*, *riqq*), drums (*jubíl*), and kettledrums (*naqqárdt*), cymbals (*sumij*) and cymbalettes (*sajjdt*), all minutely described by him, and delineated with extreme care by Auguste Herbin.

MODERN EGYPT.—With the rise of Muhammad 'Alí Páshá (*d.* 1849), the founder of the present dynasty and the deliverer of Egypt from janissaries and the Mamelukes (Mamlúks), the cultural horizon changed. During 1824-34 music schools were opened in Cairo and other towns, where French and German teachers were engaged, while army and navy bands were formed on European models. The native art was carefully resuscitated, the greatest Egyptian musician of the day, Muhammad al-Qabbání, was attached to the court and Sákina, the famed female singer (*mughaniya*), became the rage. Among later artists were 'Abdu'l-Hamúli, Khaṭṭáb al-Qánúni (*i.e.* the psaltery player) and Mustafá al-'Aqqád, the founder of the present family of musicians. In those days lived Muḥammad Shiháb al-Dín (*d.* 1857), the author of the music text-book and song collection entitled 'Safinat al-mulk'. Under the grandson of Muhammad 'Alí, the Khedive Isma'il (*d.* 1895), both Oriental and Occidental music continued to find favour, but in the military bands the native music was now featured. Cairo's opera-house was built in this reign. It opened with Verdi's 'Aida' (1871), specially composed for it. Strange as it may seem, the Khedive did not altogether

appreciate the native Egyptian music and took greater delight in the purely Turkish art which then predominated in Syria and Iraq. In view of this he sent his court minstrel 'Abdu'l-Hamúli to Constantinople to acquaint himself more fully with the Turkish art. He returned later with a Turkish orchestra (*fırqa*) which was the means of grafting on the Arabo-Egyptian art a definite Turkish complexion and physiognomy. These were revealed in such forms as the instrumental prelude (Turk. *bashraw*, Pers. *pishraw*) in vocal utterance (*talhn*) and in purely Turkish melodic (*maqámdt*) and rhythmic (*dúrúbt*) modes. Many of the most famous musicians of the day made their reputation in this new art, including the singer Muḥammad 'Uthmán, the psalterist Muḥammad al-'Aqqád, the lutenist Aḥmad al-Laithi, the violinist Ibráhím Sahálún and the flautist Amín Buzarí.

Yet it was King Fu'ád I who, by his unremitting care and generous patronage, brought the music of this land to its unparalleled position in the world of Islam. There had been a music club founded by Mustafá Ridá Bey in 1914 which, in 1925, flowered into a School of Oriental Music. Both, however, were private ventures. In 1929, through royal efforts, the present handsome Institute of Oriental Music (Ma'had al-músiqí al-sharqí) was opened by King Fu'ád in the Shári' Malakí Nazlí as the national conservatory of the purely indigenous art. It was there, in 1932, that the first Congress of Arabian Music was convened. This was attended by scholars, not only from the various Arabic-speaking countries — Morocco, Algeria, Tunisia, Egypt, Iraq, Syria and Turkey — but also from western Europe. Since that date progress has been rapid. In 1935 the Music Institute for Women was established for the creation of *diplomées* among music teachers for the schools, and in 1944 the High School for Dramatic Music was founded, which gives a three years' course in vocal, instrumental and theoretical subjects. The music department of the Ministry of Education was under the direction of Dr. Maḥmúd Aḥmad al-Hefny, a graduate in music of Berlin University. In 1948 there were 980 schools (not counting provincial schools) in which instrumental music and singing were taught by 355 music teachers. Under the auspices of the Ministry was founded (1935) Egypt's musical periodical, 'Music', which became the 'Musical Magazine' (1936) and later (1947) 'Music and the Theatre'. It was edited by Dr. al-Hefny.

For examples of native Egyptian music during the first half of the 20th century it is best to consult the hundreds of recordings made by H.M.V., Odéon and others. The

gramophone discs of such imitable singers as Umm Khulthúm and 'Abd al-Wahháb, and those of such great instrumentalists as the psalterist Muṣṭafá Ridá and the violinist Sámī Shawá, testify to Egyptian artistry in music; while the chant of the muezzin and the cantillation of the Qur'án by the shaikh Muṣṭafá al-Bárdí will bring spiritual joy to most auditors. For the best account of modern Egyptian music should be read Alfred Berner's 'Studien zur arabischen Musik' (1937), in which both theory and practice are discussed. Examples are given in some of the most popular modes—*rast*, *stkhá*, *baydít*, *jahárkdh*, *ṣabá*, *ḥyáz*, *nahawand* and *ḥyáz-kar*—mostly in the two best-liked instrumental forms, the *taqsim* and *sam'dí*. The *taqsim* (literally "dividing") is a showy piece of instrumental flourishes for the virtuoso. A somewhat similar type is the *tahmíla*. The *bashraw* was originally the overture to the Turkish *fasl* (= Arab *nauba*, now defunct). It comprises four sections called *khándt* ("houses"), a fifth, the *taslím* ("saluting"), explains itself. Not unlike it is the *sam'dí*, another movement from the *fasl* or suite, but its "houses" are shorter thematically, and it features the *sam'dí* rhythms. All these are purely instrumental, the most favoured instruments being the lute (*'úd*), European violin (*kamánja*), psalter (*qánún*), flute (*ndy*) and tambourine (*riqq*, *duff*). In the vocal and instrumental art the *qasída* (ode) and *muwashshah* (ballad) are classical forms. The first part of the latter is termed the *badaníya*, which is followed by the *khána* and the *silsila*, the former being set to the higher notes of the mode (*maqám*) and the latter to the lower notes. Then there is the ancient *maudí*, reaching back to the 10th century, the *nashíd* (hymn), very popular in the schools, the *dawr*, with its jingling *rayaz* verses, and the *taḥqíqa*, whose simple rhythm—the *waḥda*—may have prompted its name (= English "tick-tack"). There is a good collection of all these in a book entitled 'Al-músíqí wa'l-aghání' ('Music and Songs') by 'Alí Imám 'Atíya (Cairo, 1929), while the hymns of the famous poet Aḥmad Shauqí, set to music by Muṣṭafá Ridá in 'Nashíd al-kashsháfa' are highly valued.

During the 20th century Egypt has produced quite a galaxy of musical theorists, the most important of which are Muhammad Dhákur, Aḥmad Amin al-Dík, Kámil al-Khulá'í, Darwish Muḥammad al-Harírí and Maṣṣúr 'Awad. They do not all hold the same views of basic theory or the precise constitution of the melodic (*naghamát*) or rhythmic (*usúl*) modes, but such things are endemic in the Near and Middle East, in spite of opinions to the contrary. Egypt still holds to the quasi-quarter-tone system (*'arabdt*) introduced in

the 16th century, which preserves the time-honoured neutral intervals of *'ráq* and *stkhá*, notes which may be refractory to westerners, but are absolutely essential to ears in the Near and Middle East. As elsewhere in these lands, all indigenous music is homophonic, save for the occasional adornment by a simultaneously struck fourth, fifth or octave, and a pedal point, which are considered as part of the usual embellishments (*zawa'id*).

Pioneered mainly by Egyptians, including the well-known singer and composer 'Abd al-Wahháb, a modernist movement has sprung up which has urged the harmonization of the purely indigenous art, and this, with the introduction of a tempered quarter-tone pianoforte devised by Najíb Naḥás, ought to receive consideration, since it does offer some protection against the over-intrusion of the purely Occidental art. The latter, in Egypt, has a wide and cultivated following, although mostly European. The Royal Opera House, now directed by Sulaimán Najíb Bey, has for many decades been the home of European opera. Societies abound, notably the Cairo Philharmonic Society, the Alexandria Concert Society, Musica Viva—which even encourages the study of the virginal, viola da gamba, recorder and other old European instruments. The Egyptian State Broadcasting House submits Occidental programmes through its English and French departments, while the British Council and the British Institute at Alexandria have bestowed wide cultural benefits on both the Oriental and Occidental art. Egypt is the vanguard in all that appertains to music in the Near and Middle East.

- 'Schweizer Dirigenten und Solisten' ('Schweizerisches Musikbuch', 1939).
- 'Grosse Interpreten' ('Musica aeterna', Zurich, 1948).
- Ehinger contributed most of the Swiss articles to the supplementary volume of the fourth edition of this Dictionary and was a collaborator in the 'Schweizer Musiklexikon' (1939). He was also the editor of 'Der Schweizer Tonkünstlerverein im 2. Vierteljahrhundert seines Bestehens' (1950) and the author of various short biographies of great masters, 'Klassiker der Musik' (1946 and 1948) and 'Meister der Oper' (1947). K. v. F.
- EHLERS, Alice** (b. Vienna, 16 Apr. 1893).
- Austrian harpsichordist. She was a pupil of Leschetizky for the pianoforte in Vienna, but later studied the harpsichord for five years with Wanda Landowska at the Berlin High School for Music. She soon took an important place in the modern revival of the harpsichord by reason of her fine taste as a solo performer, accompanist of recitative and teacher. Her

tours in Europe and America were directed to propagate the performance of 17th- and 18th-century music on the instrument for which it was written, the harpsichord, in a wide repertory based on Bach, Handel and Scarlatti. At the Worcester Festival of 1935 she brought forward a Concerto by John Christian Bach and took part in the performance of the St Matthew Passion as continuo player.

See also Amstad (collab.)

**EHLERT, Ludwig** (b. Königsberg, 13 Jan. 1825; d. Wiesbaden, 4 Jan. 1884).

German pianist, composer, critic and man of letters. He studied under Mendelssohn at the Leipzig Conservatory in 1845 and, after further studies in Vienna, settled in Berlin in 1850. For some years he stayed in Italy, directing the Società Cherubini at Florence up to 1869, when he taught for two years at Tausig's school in Berlin, subsequently going to Meiningen as teacher to the ducal court, and finally to Wiesbaden, where he died from an apopleptic seizure.

His 'Briefe über Musik' (Berlin, 1859) contain notices of Beethoven, Mendelssohn, Schumann, Wagner, Weber, Schubert, Chopin, Berlioz and Meyerbeer, which, without being technical, are often happily characteristic. These have been translated into English by F. R. Ritter (Boston, U.S.A., 1870). Still more valuable are his 'Römisches Tage' (1867) and 'Aus der Tonwelt' (1877), containing his latest contributions to the 'Deutsche Rundschau', etc. His compositions are ambitious and embrace overtures 'Hafiz' and to Shakespeare's 'Winter's Tale', a 'Spring Symphony', performed with success in Berlin and Leipzig; a 'Requiem für ein Kind', repeatedly performed; a 'Sonate romantique' for pianoforte, songs, etc. M. C. C.

**EHMANN, Wilhelm** (b. Freistatt, Hanover, 5 Dec. 1904).

German musicologist. He studied at the Universities of Freiburg i/B. and Leipzig, producing his doctor's dissertation in 1934. Having been assistant in the music department of Freiburg University and cantor at the Christuskirche there from 1934, he was appointed Professor of Musicology and director of the Musicological Institute at the University of Innsbruck in 1940. In 1945 he returned to Germany to become director of the Landeskirchenmusikschule of Westphalia. He has edited old German music of various kinds and published, among others, the following literary works:

#### BOOKS

'Das Schicksal der deutschen Reformationsmusik in der Geschichte der musikalischen Praxis und Forschung' (Göttingen, 1935).

E. B.

**EHRlich, Alfred Heinrich** (b. Vienna, 5 Oct. 1822; d. Berlin, 29 Dec. 1899).

Austrian pianist, critic and author. He studied the pianoforte under Henselt, Bocklet and Thalberg, and Sechter was his master in composition. After a longish stay in Bucharest, where he devoted himself to music, he was called to Hanover as court pianist to King George V. He took a keen interest in current events and acted as political correspondent to the 'Allgemeine Zeitung'. He spent the years 1855-57 at Wiesbaden, London and Frankfurt o/M., and finally settled in Berlin in 1862. He taught the pianoforte at the Stern Conservatory from 1864 to 1872 and again from 1886 to 1898, and also had many private pupils, of whom Felix Dreyschock is perhaps the best known. Ehrlich wrote several works for the pianoforte, e.g. 'Concertstück in ungarischer Weise', 'Lebensbilder', 'Variations on an original Theme, etc. He contributed largely to the 'Berliner Tageblatt', 'Die Gegenwart' and 'Die neue Berliner Musikzeitung' as music critic; he wrote novels and many monographs on musical and aesthetic questions, among which 'Lebenskunst und Kunstleben', 'Kunst und Handwerk', and 'Die Musik-Asthetik in ihrer Entwicklung von Kant bis auf die Gegenwart' are the chief. H. C. C.

**EHRSTRÖM, (Jarl) Otto (Sigurd)** (b. Helsingfors, 20 Nov. 1891).

Finnish musicologist, critic and composer. He studied music at the Conservatories of St. Petersburg (1912) and Charlottenburg (1919). In 1929 he was appointed music critic to the Helsingfors paper 'Hufvudstadsbladet'. Among his compositions are a Symphony (1933), choruses and songs, and his chief literary works are 'Faltun och hans samtid' (1934) and 'Jean Sibelius och hans Part i den Cultural Life of Finland' (1941).

A. R.

**EIBENSCHÜTZ, Ilona** (b. Budapest, 8 May 1873).

Hungarian pianist. She made her first appearance as a child of six in Vienna, and travelled in Russia, Germany, Denmark, Sweden, Norway, etc., until she was ten years old, studying during part of that time, and until 1885, at the Vienna Conservatory with Hans Schmitt. She also studied at Frankfurt o/M. with Clara Schumann for four years, and after playing to Brahms, Rubinstein, Liszt and many other musical notabilities, began her career as a mature artist in 1890, when she played at one of the Gürzenich

concerts at Cologne. The Leipzig Gewandhaus and the Richter concerts in Vienna followed next, and on 12 Jan. 1891 she made her first appearance in London at a Monday Popular Concert, playing Schumann's 'Études symphoniques' and in Beethoven's A major cello and pianoforte Sonata with Pratti. Her success was emphatic, and until her marriage with Carl Derenburg in 1902 she was one of the most highly esteemed of all the pianists that came regularly before the London public. After that her public appearances became rare. She continued to live in England.

**EIBLER, Joseph von.** See EYBLER.

**EICHBERG, Julius** (b. Düsseldorf, 13 June 1824; d. Boston, Mass., 19 Jan. 1893).

German violinist, teacher and composer. He entered the Brussels Conservatoire in 1843 and graduated in 1845 with first prizes for violin playing and composition. He was then appointed a professor in the Conservatory at Geneva, where he remained eleven years. In 1857 he went to New York and two years later to Boston. He was director of the orchestra at the Boston Museum for seven years, beginning in 1859, and in 1867 took a share in the establishment of the Boston Conservatory of Music, being mainly responsible for the high reputation it enjoyed as a violin school.

Eichberg's compositions are many and in various forms, for solo voices, chorus, violin, string quartet, pianoforte, etc. He prepared several text-books and collections of studies for the violin, and collections of vocal exercises and studies for the use of youths in the higher classes of schools. Eichberg's operettas were very successful. He produced four: 'The Doctor of Alcantara', 'The Rose of Tyrol', 'The Two Cadis' and 'A Night in Rome'.

F. H. J.

**Eichendorff, Joseph von.** See Alfonso el Sabio. Brahms (2 choral works, 6 songs, 1 duet, 2 canons). Burkhart (W., chorus). Cornelius (song & duet). Franz (13 songs). Gerstberger (songs). Grosse (4 songs). Kaminski (3 choruses). Knab (songs). Kunz (Ernst, cantata). Lothar ('Freier', incid. m.). Medtner (5 songs). Mendelssohn (10 partsongs, 5 songs, 1 duet). Paumgartner ('Aus dem Leben eines Taugenichts', opera). Pepping (chorus). Pfitzner (cantata; 18 songs; 1 song with orch.). Philipp (F., choral cycle). Radó (song). Reger (1 choral song, 2 songs, 1 duet). Rudorff (6 songs). Schoeck ('Schloss Durande', opera; 2 choral works; 2 song cycles with orch.; 8 songs with chamber music, 30 songs with pf.). Schulthess (songs). Schumann (6 partsongs, 16 songs). Siegl (partsongs). Smyth (E., 4 songs). Strauss (R., 'Tageszeiten', chorus & orch.; song with orch.). Wetz (chorus). Wirth (H., songs). Wolf (H., 6 choral works, 18 songs).

**EICHHEIM, Henry** (b. Chicago, 3 Jan. 1870; d. Montecito, Cal., 22 Aug. 1942).

American violinist, conductor and composer. He obtained his early musical training at the Chicago Musical College, where he was awarded a first prize for violin playing. His father was a cellist in the Theodore Thomas Orchestra, and the son secured the post of violinist in the same organization. His teachers

included Carl Becker, S. Jacobson and Leopold Lichtenberg. In 1890 he became a violinist in the Boston Symphony Orchestra, a post which he held for twenty-two years. He was for four years conductor of the Symphony Orchestra at Winchester, Mass., but from 1912 onward he devoted his time chiefly to composition and occasional recitals.

Eichheim's tours in the Far East resulted in the collection of much musical material and a number of unusual instruments. Several of his works call for these instruments, his orchestral composition 'Java' being one of the earliest serious efforts to reconstruct the actual music of the Orient for concert audiences of the West. Eichheim was elected a Fellow of the Asiatic Society of Japan. He conducted his own works in Paris, London, Boston, Philadelphia, San Francisco, Los Angeles, Chicago, Cleveland, Cincinnati and Hollywood. As a violinist he participated in the first American performance of the violin and piano sonatas of Debussy and d'Indy and of Ravel's Trio. He lectured in Peking, Tokio and, on oriental music, in many American cities.

His works include 'Chinese Legend', ballet (1924), 'Burmese Pwe', ballet (1926), 'The Moon, My Shadow and I', Chinese ballet with soprano and women's chorus (1926); orchestral works (all requiring oriental instruments): 'Oriental Impressions' for chamber orch. (1921) and for full orch. (1922), 'Chinese Legend' (1924), 'Burma' (1927), 'Java: First Movement of a Triptych' (1929) and 'Malay Mosaic' (1924).

G. R.

**EICHNER, Ernst** (b. Mannheim, 9 Feb. 1740; d. Potsdam, 1777).

German bassoonist and composer. He was a member of the court orchestra at Zweibrücken until 1770, subsequently travelled for a few years in Germany and also to Paris and London, and in 1773 entered the orchestra of Prince Frederick William (nephew of Frederick the Great and later Frederick William II of Prussia) at Potsdam. He was an excellent virtuoso on his instrument and a prolific composer of instrumental music in the Mannheim style and tradition. A thematic catalogue of 31 symphonies will be found in D.T.B., VII, ii (1906) and of 34 chamber works (sonatas, trios, quartets, quintets, one sextet on airs by Grétry) *ibid.*, XVI (1915). A Symphony in D is reprinted there in Vol. VIII, a flute Quartet in Vol. XV and two pf. Trios, Op. 1 No. 3 and Op. 2 No. 1 in Vol. XVI. He also wrote a number of pianoforte sonatas and concertos; Mozart played one of the latter at sight at Munich on 10 Oct. 1777 (see his letter of that date). Eichner was then no longer alive, having died early in that year.

Eichner's daughter, Adelheid Marie (b. Mannheim, 1762; d. Potsdam, 5 Apr. 1787),

published a collection of songs at Potsdam in 1780 and was also a good pianist and singer, from 1781 until her early death she took leading soprano parts in several Italian operas in Berlin. Zelter was a friend of hers and describes her voice in his autobiography.

A. L.

BIBL.—VOLK, A., 'Ernst Eichner: sein Leben' (Cologne, 1943).

**EINEM, Gottfried von** (b. Berne, 24 Jan. 1918).

Austrian composer. He was born in Switzerland while his father was Austrian military attaché at Berne. He developed artistic leanings early in his cultivated home and at the grammar-school of Plön (Holstein), where much was made of modern music, particularly of Hindemith, who wrote his 'Plöner Musiktag' for the school in 1932. Einem became assistant conductor and coach at the Berlin State Opera and at the Wagner festival theatre at Bayreuth. He finished his studies with Boris Blacher and occupied himself closely with modern tendencies, not only those of such composers as Stravinsky, Milhaud and Prokofiev, but also with those of light music, especially Gershwin's and Duke Ellington's. His most important work so far is the opera 'Dantons Tod', to a libretto based on a drama by Georg Buchner by Boris Blacher and the composer, produced at the Salzburg Festival on 6 Aug. 1947. The work synthesizes various trends that manifested themselves in music between the two world wars, but may be said to have its root in Mussorgsky, since it lays stress on a kind of inspired primitive eloquence which does not in the first place rely on orchestral colour. Einem achieves a personal style by uniting a variety of influences, not excluding that of jazz, and his music exudes a strongly individual atmosphere while it is handled with a virtuosity of technique exploiting all the resources of polyphony. It stands for a hard realism that makes no concessions to romantic illustration and replaces "chordal symbolism" by clear-cut instrumental line-drawing. Emotion is felt to be present, but is not allowed to reveal itself gushingly, and where it does emerge, it does so in a new way not easily apprehended by hearers unfamiliar with Einem's new manner. A second opera, 'Der Prozess', with a chamber orchestra, to a libretto by Caspar Neher in Kafka's 'The Trial', was written for production at Salzburg in 1953. The earlier works are:

- Op.
1. Ballet 'Turandot', scenario by L. Malpiero after Gozzi (prod. Dresden, 1944).
2. Capriccio for orch.
3. Pf. Pieces.
4. Concerto for orch.
5. Songs to poems by Hafiz.
6. Opera, 'Dantons Tod'.
- 6a. Suite from 'Dantons Tod' for orch.
7. Sonatinas for pf.
8. Songs on Chinese poems.

9. 'Music No. 1' for orch.
- Ballet 'Rondo of the Golden Calf' (1952).

**EINERT, Teodor** (b. Warsaw, 1838; d. Warsaw, 3 Feb. 1866).

Polish composer. He was the son of Karol Fryderyk Einert, organist of the Protestant Church in Warsaw, who died in 1837. He studied first under his stepfather, August Freyer, at the Warsaw Conservatory. He wrote numerous compositions for pianoforte, which include 'Douleur et passion', 'Pensée' (Op. 2), 'Chant sans paroles' (Op. 3), 'Au bord de la Vistule' (Op. 4) and two Mazurkas (Op. 5). He also composed a Funeral March which was first played by the Warsaw instrumentalists, conducted by Minchejmer, at the composer's funeral.

**EINSTEIN, Alfred** (b. Munich, 30 Dec. 1880; d. El Cerrito, California, 13 Feb. 1952).

American (naturalized) musicologist. He studied with Adolf Sandberger at Munich University and in 1903 took the Ph.D. degree with the thesis 'Zur deutschen Literatur für Viola da Gamba' (published in 1905). He then devoted himself chiefly to research on the subject of the madrigal and its composers, publishing articles on it in the journal of the I.M.G. His chapter on the madrigal in Adler's 'Handbuch der Musikgeschichte' (1924) is a comprehensive summary of the subject, and his exhaustive book in 3 volumes, published in English as 'The Italian Madrigal' (Princeton & Oxford, 1949), is likely to remain the classic on the Italian madrigal, not to be superseded by any future research, for which it appears to have left no further scope.

As a musical and musico-literary editor Einstein did equally distinguished work long before he left Germany. With Sandberger he produced the edition of selected works by Steffani in the D.D.T. (2nd series) and in 1918 he became editor of the 'Zeitschrift für Musikwissenschaft'. He was also responsible for three issues of Riemann's 'Musiklexikon' (1919, 1922 and 1929), the last two (10th and 11th eds.) being important revisions of the old Dictionary. He was also music critic to the 'Berliner Tageblatt' from 1927 till 1935. In the latter year, however, his ripe scholarship was lost to Germany, his independence as a journalist being threatened by the Nazi régime and his profound learning being cheerfully sacrificed to political ideology. He lived in London for a time, engaged in assiduous

research at the B.M. and other libraries, and then settled near Florence.

In the meantime two editions he had prepared for the D.T.Ö. after he went into exile were published. Works written for the Austrian Imperial Court (1934) and Gluck's 'L' *innocenza giustificata*' (1937); and a third and completely revised edition of Kochel's Catalogue of Mozart's works was also published (Leipzig, 1937). Always a monumental work of reference, it was immensely improved by Einstein's new investigations, from the bottom up, of questions of chronology and authenticity, and its bibliographical references were considerably enriched. A later edition, with further corrections and additions, was issued after his settling in the U.S.A. (Ann Arbor, 1947). During his London sojourn a group of his English colleagues in musicology, brought together by Richard Capell, combined to translate his 'Geschichte der Musik' (1917) as a personal tribute to the author. It was published as 'A Short History of Music' (London, 1936, 2nd ed. revised by the author, London, 1947). Another English work was 'Gluck', a contribution to the 'Master Musicians' series (London, 1936).

In 1939 Einstein left Europe to settle in the U.S.A. as professor of musical history at Smith College, Northampton, Mass., where he twice occupied the Neilson Chair. He also taught at Columbia University in New York, at Ann Arbor and Princeton Universities, and, from 1940, at the Julius Hartt School of Music, Hartford, Conn. In 1949-50 he was visiting professor both at Princeton and Yale Universities. He retired in 1950 owing to ill-health.

To his American period belong further works of outstanding value, apart from his monumental book on the Italian madrigal mentioned above: 'Greatness in Music' (New York & Oxford, 1941), 'Mozart: his Character, his Work' (New York & Oxford, 1945), 'Schubert: a Musical Portrait' (New York, 1950) and, as part of the Norton History of Music, 'Music in the Romantic Era' (New York & London, 1947). H. C. C. & E. B.

BBL.—HARMAN, R. ALGO, 'Einstein's "The Italian Madrigal"' ('Music Survey', Vol. III, No. 2, pp. 108-15).

**EISENBERG, Maurice** (b. Königsberg, 24 Feb 1902).

German violoncellist. He studied music at the Leipzig Conservatory and at the École Normale de Musique in Paris. For several years he took lessons with Casals, and he is a graduate of the Peabody Conservatory of Baltimore. He was head of the Casals class at the École Normale in Paris from 1930 to 1939 and is now head of the cello department at the New York College of Music and at the Philadelphia Musical Academy. He is also

visiting professor of the University of Southern California and the Birmingham and Midland Institute, and concert lecturer for the Association of American Colleges. As a soloist he has toured frequently throughout the U.S.A., Europe and Africa, playing with all the leading orchestras in every country, and also giving recitals. His repertory includes solos of all kinds from Frescobaldi and Bach to Brahms, Dvořák and modern composers. He has given many first performances of new works. He wrote a book, 'Cello Playing of Today'.

M. K. W.

**EISENBERGER, Seweryn** (b. Cracow, 25 July 1879; d. New York, 11 Dec. 1945).

Polish pianist. He studied first under his father. As a wonder child he appeared in Beethoven's B♭ major Concerto, but he then continued his studies under Ehrlich in Berlin and Leschetzky in Vienna. He taught the pianoforte at the Cracow Conservatory (1914-21) and in 1922 moved to Vienna, becoming a member of the Wiener Trio. In 1933 he moved to the U.S.A., where he gave a series of concerts both as soloist and recitalist.

G. R. H.

**EISENHUT, Thomas** (b. ?, d. ?).

German 17th-century theorist and composer. He was director of music to the Prince of Kempten and in 1674 *canonicus regularis* at St. George's, Augsburg. He composed 'Hymni arosi' (1674); 'Sacer concentus' (1683); also a theoretical work, 'Fundamentum musicale' (1702). E. v. d. s.

**EISLER, Hanns** (b. Leipzig, 6 July 1898).

German composer. He became a pupil of Schoenberg in Vienna, but did not adhere to his master's twelve-note system after trying it out in his early studies. He became the exponent of a tendency which disclaimed the conception of *l'art pour l'art* and sought to press music into the service of new social developments. Problems of the day, such as are approached from a politico-didactic viewpoint in the work of Bert Brecht or from a popular philosophic one in that of Silone, Eisler attempts to deal with through music, an art which he requires to serve our own time and to act as the messenger of extra-musical ideas. He was thus well qualified after the second world war to do much in helping to promote the organization of German workers' choirs. In his own choruses he tries to be understood by the masses who form a section of the population for whom culture is as yet a sealed book, without however sacrificing progressive means of artistic creation. Having lived and worked in U.S.A. after 1933, lastly at Hollywood, he returned in 1948 to Vienna, which he regards as his true spiritual home.

Eisler's early period, which may be regarded as still "purely artistic", includes music for pianoforte (sonatas Opp. 1 and 6, pieces Opp.

3 and 8), songs (Opp. 2 and 5) and a 'Duo' for violin and cello (Op. 7), but the 'Tagebuch' for 3 women's voices, tenor, violin and piano (Op. 9) already turns in the direction of an art influenced by everyday problems, an attitude to which he has remained faithful except in the case of the numerous commissioned works he has produced. From his later compositions, which up to 1948 have grown into the neighbourhood of a hundred opus numbers, the following may be mentioned as characteristic in their titles and their artistic tendencies: the didactic pieces 'Die Massnahme' (Op. 20) and 'Die Mutter' (Op. 25), music for the play 'Die Rundkopfe und die Spitzkopfe' the "Gott sei bei uns" Kantate' (Op. 52) and the 'Kantate auf den Tod eines grossen Mannes' (Op. 59), all to words by Bert Brecht, or the cantata 'In unserem Lande' to a text by Silone. To the same type of work belong the numerous scores of incidental music for plays by Odets, Shaw and Brecht ('Galilei') and of film music for German, Russian, French and American films. He also wrote a book on 'Composing for the Films' (New York, 1947). Further compositions deserving attention are the following:

#### VOCAL WORKS

Male Choruses, Opp. 10, 14, 17, 19.  
Mixed Choruses, Opp. 13, 21, 33.  
Various choral Ballads (incl. the 'Californian', Op. 47).  
Various choral Cantatas (incl. 'Die den Mund auf hatten', Op. 56, 'Man lebt von einem Tag zum andern', Op. 57, 'Zuchthauskantate', Op. 58, 'Kriegskantate', Op. 61).  
Eligies and Sonnets.  
'Woodbury-Chorbüchlein', Op. 77.  
'Hollywood Liederbuch', Op. 78 (c. 200 songs to words by Holderlin, Seneca and others).  
Songs to old German words, Op. 79.

#### ORCHESTRAL WORKS

'Kleine Sinfonie', Op. 29.  
Suites for various orchestras, large and small, Opp. 23-24, 30, 34, 40, 49, 67, 71-74, 80, 86-89.

#### CHAMBER MUSIC

Sonata for vn & pf, Op. 64.  
'Kindersuite' for flute, bassoon, strg. 4tet & pf. (on American children's songs), Op. 68.  
'Kammersymphonie' for 15 insts., Op. 69.  
'Vierzehn Arten den Regen zu beschreiben' for flute, clar., vn., cello & pf., Op. 70.  
Octet for wind & strgs., Op. 70a.  
Stg. Quartet, Op. 75.

#### PIANOFORTE MUSIC

Sonatina, Op. 44.  
Theme and Variations, Op. 76.

See also Film Music (theories of).

**EISTEDDFOD** (Welsh, plur. *Eisteddfodau*, "a sitting of learned men"). Musical and poetic festivals which originated in the triennial assembly of Welsh bards usually held at Aberffraw, the royal seat of the princes of North Wales and Anglesey, at Dynevor in South Wales and at Mathraael, Merionethshire. The main purposes of these gatherings were the regulation of poetry and music, the

conferring of degrees and the election to the chair of the Eisteddfod.

The antiquity of this ceremony is very high, mention being made of an Eisteddfod in the 7th century at which King Cadwaladr presided. Those bards only who acquired the degree of "Pencerdd" (chief minstrel) were authorized to teach, and the presiding bard was called Bardd Cadeiriawg — the bard of the chair — because after election he was installed in a magnificent chair and decorated with a silver and gold chain, which he wore on his breast as a badge of office. His emoluments from fees were considerable. Persons desiring to take degrees in music were presented to the Eisteddfod by a Pencerdd, who vouched for their fitness, the candidates being required to pass through a novitiate of three years and to study for further several periods of three years before advancement to each of the three higher degrees. It is now difficult to define the status of the titles conferred, but they cannot be considered more than historical names or complimentary distinctions, often bestowed by the Eisteddfodau upon persons who had but little knowledge of music.

After being discontinued for some time the Eisteddfodau appear to have been revived in the reigns of Edward IV, Henry VII, Henry VIII and Elizabeth I. In 1450 what has been called "The great Eisteddfod of Carmarthen" was held in that town, with the king's sanction; and another meeting was held in South Wales in Henry VII's reign, of which no records are preserved. In 1523, at Caerwys, Flintshire, an Eisteddfod was held at which many eminent men were present, and on 26 May 1569 there was another at the same place, under a commission granted by Queen Elizabeth. Still more memorable was the congress at Bewpyr Castle in 1681, under the auspices of Sir Richard Basset.

In 1771 the Gwyneddigion, a society established in London for the cultivation of the Welsh language, promoted several of these meetings in North Wales; in 1819 the Cambrian Society held a great Eisteddfod at Carmarthen, at which the Bishop of St. David's presided. John Parry, who was a chief promoter of this society, and its registrar, edited the Welsh melodies for it, and in recognition of his efforts a concert was given to him at Freemasons' Hall on 24 May 1826 (at which Catherine Stephens, Braham, Mori, Lindley and others assisted), followed by a dinner at which Lord Clive presided. In later years the revival of these meetings was promoted by Sir Benjamin Hall (afterwards Lord Llanover); at one of them, held in 1828 at Denbigh, the Duke of Sussex was present, and Sir Edward Mostyn was president. C. M.

<sup>1</sup> An Eisteddfod held at Caerwys in 1110 is held to have been the model for the Irish "Feis".

The National Eisteddfod is now held annually in Aug. at one or other of the Welsh towns. It differs from other competition festivals, to which it originally afforded a model, in its bardic ceremonial and customs, which have been revived as far as possible in accordance with what is known or supposed to have been the procedure of ancient Britain. The ceremony begins with the proclamation of the Eisteddfod a twelvemonth and a day before and culminates in the chairing of the bard.

H. C. G.

**LLANGOLLEN INTERNATIONAL MUSICAL EISTEDDFOD.**—A new development of the Eisteddfod, with a wider sphere of influence, began at Llangollen in 1947, when the first International Musical Eisteddfod was held there. The meetings have continued annually in July, and they are attended by ever-increasing teams of foreign visitors. The festival lasts five or six days and concentrates mainly on choral singing and folk music, with a great deal of stress laid on folk dancing. Performances by professionals are given for the entertainment of the visitors, including ballet and orchestral concerts, but the chief purpose of the organization is to give choirs and folk-dance parties from any part of the world an opportunity to judge each other and to compete in a spirit of friendly rivalry. The choirs are encouraged to sing folksongs, but may also compete with polyphonic music, such as motets and madrigals, or introduce suitable works by living composers of their own countries. International trophies and money prizes are offered for the three best entries in each of the classes held during the day. In the evening non-competitive concerts are given at which British and foreign artists of eminence take pleasure in appearing with the competitors before enthusiastic audiences of a kind hardly to be found elsewhere in the world. Distinguished musicians act as adjudicators. The Music Director is W. S. Gwynn Williams, O.B.E. In 1953 over 150 choirs and dance parties from 23 different countries competed and more than 15,000 people attended the performances.

**EITNER, Robert** (b. Breslau, 22 Oct. 1832; d. Tamplin nr. Berlin, 2 Feb. 1905).

German musical editor and bibliographer. He founded the Gesellschaft für Musikforschung in 1868 and contributed to the valuable historical periodical 'Monatshefte für Musikgeschichte'. His editorial work began with 'Verzeichnis neuer Ausgaben alter Musikwerke . . . bis zum Jahre 1800' (Berlin, 1871), which, though singularly defective as regards the English school, is a useful catalogue. It omits all mention of the collections of Barnard (1641), Boyce (1778) and Arnold (1790), as well as Morley's 'Triumphes of Orana' (1601).

logues. Later he produced, in conjunction with Haberl, Langerberg and C. F. Pohl, a valuable 'Bibliographie der Musik-Sammelwerke des 16. und 17. Jahrhunderts' (Berlin, 1877). The most important of his publications is the 'Biographisch-bibliographisches Quellen-Lexikon der Musiker und Musikgelehrten der christlichen Zeitrechnung bis zur Mitte des 19. Jahrhunderts' (begun 1900, completed in 10 vols. 1904), a work which, though not faultless, marks a great advance in trustworthiness of information over anything else of the kind. The 'Quellen-Lexikon' was continued and corrected by 'Miscellanea musicae bibliographica' (1912-15), edited by H. Springer, M. Schneider and W. Wolffheim and a photographic reprint appeared in the U.S.A. in the late 1940s, unfortunately with all its faults mechanically reproduced.

Eitner edited Sweelinck's organ works and other things for the Dutch Maatschappij tot bevordering der Toonkunst. His papers on Sweelinck (Berlin, 1870) and Arnold Schlick are of importance.

F. G., adds.

**EK, (Fritz) Gunnar (Rudolf)** (b. Asarum, Blekinge, 21 June 1900).

Swedish organist, cellist and composer. He was at the Stockholm Conservatory in 1920-1926, studying composition with Ernst Ellberg, organ with G. Hagg and O. Olsson, and cello with C. Lindhe. From 1928 to 1937 he was an orchestral cellist, organist of Östra Eneby church, Norrköping, in 1938-41, and of All Saints, Lund, from 1942.

His compositions include:

Works for chorus & orch.  
Symphony No. 1 (1926).  
Symphony No. 2 (1931).  
Symphony No. 3 (1935).  
Suite for orch.  
Concert Overture No. 2.  
Swedish Fantasy.  
Fantasia and fugue for stgs.  
Pieces for small orch.  
Pf. Concerto.  
Fantasy for vn. & orch.  
Chorale Fantasy for viola & organ.  
Pieces for organ, &c.

K. D.

BISL.—Article in 'Röster i Radio' (1945, No. 38).

**EKIER, Jan** (b. Cracow, 29 Aug. 1913).

Polish pianist, composer and teacher. He began his musical studies at Cracow and shortly afterwards went to Warsaw, where at the Conservatory he joined the pianoforte class of Drzewiecki and studied composition under Sikorski. As composer he was awarded the third prize for his 'Suita Góralska' ('Highlanders' Suite'), written for small orchestra, by the Polskie Wydawnictwo Muzyczne (Polish Music-Publishing Society). As pianist he won one of the prizes at the Chopin International Competition in Warsaw in 1937. Apart from his appearances on the concert platform he teaches the pianoforte

and is now (1951) rector of the Music School at Sopoty.

Ekier's output is very small and consists (up to 1948) of the 'Sutta Góralška' for small orchestra (1936), reorchestrated for symphony orchestra (1937), Variations and Fugue for string quartet (1938) and numerous pianoforte pieces. C. R. H.

**EKKEHARD.** There were three of that name; the first, who was a monk of St. Gall (*d.* 978), composed sequences, and wrote an epic, 'Walther'. The second (Palatinus) (*d.* c. 996) was provost at Mainz, head of the school of St. Gall and reader to the Duchess of Allemannia. The third, a pupil of Notker Labeo, was a singer and poet, and was called by Archbishop Aribio to Mainz as head of the school of singing. He sang before the imperial family at Ingelheim in 1030. E. v. d. s.

**EKMAN.** Finnish family of musicians.

(1) **Karl Ekman, sen.** (*b.* Åbo [Turku], 18 Dec. 1869; *d.* Helsingfors, 4 Feb. 1947), pianist, conductor and critic. He was a pupil of Busoni and Martin Wegelius at the Helsingfors Conservatory and of several prominent teachers abroad, e.g. Grunfeld in Vienna. From 1907 to 1912 he was director of the Helsingfors Conservatory and from 1920 to 1930 critic to the 'Hufvudstadsbladet'. In 1929 he received the Professor's title. He arranged works by Bach, Handel, Sibelius and others for the pianoforte.

(2) **Ida Ekman** (born **Morduch**) (*b.* Helsingfors, 22 Apr. 1875; *d.* Helsingfors, 14 Apr. 1942), soprano singer, wife of the preceding. She studied in Helsingfors, Vienna (under Pauline Lucca), Germany and Italy, and gave highly appreciated performances in western Europe, appearing with Grieg, and was the first to introduce many of Sibelius's songs, in the interpretation of which she was unsurpassed. She married in 1895.

(3) **Karl Ekman, jun.** (*b.* Bratislava [Pressburg], 29 Sept. 1895), writer and journalist, son of the preceding. He took the Ph.D. degree in 1920 and wrote a book on Sibelius (1935, Eng. ed. 1936). A. R.

*El Greco. See Greco.*

**ELCHE, MYSTERY OF.** A mystery-play on the Assumption of the Virgin Mary performed every year at Elche near Alicante in Spain on 14 and 15 Aug. The words are entirely set to music. The existing text dates from 1639; but it is undoubtedly taken from some manuscript far older than that, and is written in the Limousine dialect, a species of Catalan or Provençal. The earliest known copy of the music is dated 1709, but was made from a 16th-century manuscript. Much of it is polyphonic, by Juan Ginés Pérez, Antonio de Ribera and Lluís Vich; but the most striking pieces are the long monodic passages given to the boy who takes the part of the

Virgin Mary. These are sung not as they stand in the manuscript of 1709, but to a profusely ornamented version, a variant of the original, handed down by tradition. It has been concluded that these are fragments of the music of a 15th-century liturgic drama, they have a certain affinity with the 'Canto de la Sibila' sung every Christmas in the cathedral of Palma, Mallorca, with certain Balearic and Valencian folksongs, and perhaps with Mozarabic chant.

The Mystery of Elche as it is seen to-day is the 17th-century version of an earlier play. Another Spanish Assumption play is known, also in the Limousine dialect, the manuscript of which is dated 1420. The records of Elche relate that in 1266 (or 1370) an ark drifted to the coast of Spain, containing a miraculous image of the Virgin Mary as well as the words, music and ceremonial of the liturgic drama. This was performed, according to the directions given, until the mysterious death of Don Carlos (1568), after which it was forbidden by Philip II. In 1603, however, it was revived, and it has been performed annually ever since.

The Mystery is divided into 2 parts, each lasting about two hours and a half, and representing in a dramatic and musical form the death and burial of the Virgin Mary and her Assumption into Heaven. The sacred image is drawn up into the dome of the cathedral in a "machine" resembling a golden swing, in which is an angel playing the guitar and two cherubim with mandolins; the performance ends with the descent of another machine containing the Three Persons of the Trinity, while a crown is let down on to the head of the sacred image to the accompaniment of full choir, organ, bells and military band. The morning between the two performances is occupied by a very curious procession, showing definite traces of Astarte-worship. J. B. T.

**ELDERING, Bram** (*b.* Groningen, 8 July 1865; *d.* Cologne, June 1943).

Dutch violinist. He was a pupil of Jenő Hubay and Joseph Joachim. From 1891 to 1894 he was the leader of the Berlin Philharmonic Orchestra, then he was appointed to the same position in the Meiningen court orchestra. Afterwards he became a professor at the Amsterdam Conservatory, and from 1903 he was for many years leader of the Gurzenich

Orchestra and professor at the Hochschule für Musik at Cologne.

Eldering had a great reputation as a teacher and as a chamber-music player. He was for many years leader of the Gurzenich String Quartet. One of his pupils was Adolf Busch.

**ELECTRIC GUITAR.** See ELECTROPHONIC INSTRUMENTS.

**ELECTRO-MAGNETIC WAVE TRANSMISSION.** See RADIO.

**ELECTROCHORD.** An electrophonic pianoforte invented by Vierling of Berlin in 1929-33, producing its notes by the conversion of electrical oscillations into audible sounds.

**ELECTRONDE.** An electrophonic instrument invented by Martin Taubmann of Berlin in 1929, producing notes from the air capable of being graded according to the chromatic scales by means of a switch, not with arbitrarily adjustable pitch like those of the Aetherophone or Theremin.

**ELECTRONE.** An electrophonic organ brought out by the Compton Organ Company of London in 1939, producing its notes by electrostatic means and capable of synthetically imitating the sounds of various organ stops and mixtures.

**ELECTRONIC INSTRUMENTS.** See ELECTROPHONIC INSTRUMENTS.

**ELECTROPHONIC INSTRUMENTS.** Musical instruments on which the player may make at will notes whose origin is to be traced to electromagnetic vibrations ultimately converted into sound-waves by some form of loud-speaker. The intervention at some stage of these electromagnetic vibrations distinguishes these from the older instruments wherein the component vibrations and the final sound-waves have an entirely mechanical origin; at the same time the term excludes gramophones and sound-film apparatus, for these are mere reproducers of recorded music and cannot manufacture individual notes at the player's whim.

It is well known that what the scientist calls the "note" of a musical instrument can be split up into a number of simple "tones" and that it is the number and relative magnitude of these partial tones that determine timbre. In many cases these partials are members of the harmonic series based on the partial of lowest pitch in the note, but besides the true partial tones others may intrude whose origin is to be traced to the mechanical vibrations of the invariant parts of the instrument, e.g. to the belly of the violin, to the brass tube of a wind instrument or — in the instruments we are now considering — to the natural tones of the loud-speaker. In the simpler types of electrophonic instrument the timbre is not capable of adjustment — it lies in the nature

of the design — but in most it can be varied in some way, just as one can draw stops of different timbre on the organ. This is indeed one of the best features of these instruments, inasmuch as one is not limited to a few selected combinations of timbre such as the organ builder provides for the player, but can experiment with tone-quality just as an artist does with colours.

This brings us to another important problem before we describe the actual types: shall the designer aim at an instrument which shall copy in its functions existing instruments or shall he throw tradition to the winds and offer the player complete freedom of choice in his palette-box?

If it is desired to imitate the quality of existing instruments it will be necessary to analyse some typical notes, having regard to the fact that this quality is far from constant throughout the range of most instruments, even on the organ, though there is less variation through the ranks of, let us say, a clarinet stop than on the true clarinet. This analysis, the methods of which are to be found in scientific works on acoustics, results in a table giving the first six to ten component tones in the note in order of ascending pitch with their relative magnitudes on an arbitrary scale of intensity. The electrophonic imitator then requires to recombine these components in their correct relative intensities to synthesize the original note in its correct timbre. He ought to include in his study the "starting and stopping noises" of the prototype, as these are equally important in determining our appreciation of the tonal effect of the instrument and should be reproduced in the synthesis if aural verisimilitude is to be attained. These, together with the fixed tones already referred to in the make-up of the instrument which do not change with the notes of the scale it can produce, constitute the "formant" of the instrument. This formant must be faithfully reproduced.

Having thus enunciated the problem, we proceed to demolish it in greater part by suggesting that, although as a sop to tradition many of the makers of these new instruments have set themselves the task of copying existing formants, especially where the new type was intended to replace or be used alongside the church organ, the future of electrophonic instruments lies rather in providing the player or composer with all the possibilities of new tone-colour, not necessarily related to existing timbres. In other words, he should not copy imperfections which have grown up with conventional orchestral instruments and organ pipes.

The earliest electrophonic instrument antedated the era of applied electronics. Cahill's Telharmonium (1906) consisted of a series of

alternating current generators producing pure tones at considerable power, since it was intended to relay them over telephone lines. Switches permitted the synthesis of the pure tones into notes of any required timbre and there was also a volume control. Though Cahill built such an apparatus in New York at considerable expense, the scheme had to be abandoned because Cahill's music, though relayed over a separate wire system, interfered seriously by induction with the established telephone system. Nevertheless, Cahill's well-worked-out scheme contained all the essentials of electrophonic music, lacking only the electrophonic valves and amplifiers which would have made possible the relaying of the music by wireless.

Before we describe the modern types of electrophonic generator, it is appropriate to discuss certain adaptations of the "classical" instruments of music by the use of amplifiers and loud-speakers, though by so doing we are neglecting chronological order. In these modifications the sound is produced initially by the usual mechanical vibrator, usually a wire, but the amplifier and loud-speaker replace the "sounding-board" of the conventional instrument and permit of modification of both the quality and the intensity of the note. The quality is usually, however, fixed by the designer and cannot be varied by the player. Such instruments, for example, are the Neo-Bechstein, a pianoforte amplified on this principle, and the Electric Guitar. The amplifier on these is fed by a current which is picked up by a small electromagnet located near the wire. As the steel wire vibrates under the action of the hammer or the player's finger, it induces currents in the coil of the electromagnet. In another type of pick-up used by some makers, the wire moves to and from a plate together with which it forms a small electric condenser, the potential on which varies in synchronism with the wire's movements. This potential is then applied to the amplifier.

The station of the pick-up along the wire influences the quality of the vibration passed on to the amplifier. Not only this, but the quality of the note of the wire itself exerts a powerful influence and this in turn — according to well-known acoustical laws — is determined by the position and extent of the agent which sets the wire in vibration. Thus, if the string is struck as in the pianoforte, there will be a greater number of harmonics in the resulting tone if the hammer is sharply pointed and hard than if it is rounded and resilient. Furthermore the choice of striking-point operates in this way, that to each harmonic in the complex sound of the vibrating string there is a series of nodes and antinodes. If the location of the striking-point is such that

one or more of the harmonics require a node at that point, then these particular harmonics are absent in the resulting note. Similar principles apply to the situation of the pick-up. The electromagnetic oscillations reaching the amplifier will be deficient in those harmonics which have a node on the string opposite the pick-up, while those with antinodes there will receive preferential treatment. For this reason some inventors use a number of pick-ups to each wire and mix the resulting tones, though this is an expensive method and it is just as easy to modulate the tone from a single pick-up in any desired way.

Other instruments of the same type use reeds as the acoustic vibrators. Sometimes these are excited by hammers in the manner of a celesta (tuning-fork pianoforte); at other times wind-maintained reeds are employed as on the harmonium.

In the electrophonic instrument, as usually understood, the tones are built up directly from oscillating electric circuits and not borrowed in this fashion from vibrating strings or reeds. The basis of this circuit is considerably older than wireless telegraphy and the electron valve. All that is required is to connect an induction coil in a circuit with a condenser. If such a circuit is disturbed, for example, by picking up an electric charge upon it, it sets up oscillations at a set frequency determined by the product of the inductance of the coil and the capacity of the condenser. All that is needed, then, to make a note audible of pitch corresponding to the electric frequency is some form of transformer of electric into acoustic energy, *e.g.* a telephone headpiece connected in the circuit. Duddell (1900) was the first to produce loud sounds in this way. He replaced the headpiece with an electric arc and found that the fluctuations in the arc-current due to the circuit in which it was connected gave an intense sound. (Such "singing arcs" can still sometimes be heard where arc lamps line a street, though naturally the electricians take pains to suppress this — to the public — undesirable music.)

The next step forward is to make use of the well-known propensity of the electronic valve to amplify such oscillations, by connecting the basic circuit into the grid of the valve and feeding the amplified electric vibrations which arise on the plate or anode of the valve into a loud-speaker (which is after all the same piece of apparatus as the telephone earpiece, except that it is able to transform electromagnetic vibrations of adequate intensity into corresponding sound-waves, audible at a distance without the necessity of holding the output close to one's ear.) This, then, is the basis of all instruments for synthetic music, except those employing the photo-electric cell, which shall be described subsequently. Thus, in

order to construct an instrument which will play a scale of notes in this way all that is necessary is to have a conventional keyboard and connect each key of the manual to its own oscillating circuit — to which the key acts as an "on-off" switch — and let them all feed into the same loud-speaker.<sup>1</sup> This arrangement, though simple in principle, requires at least one valve and circuit to each note — more if "stops" of differing quality are to be provided — so that most designers adopt the principle of generating as many tones as possible from a rotating axle and mixing these as required for pitch and quality variation. This reduces the number of valves and so the initial expense and maintenance cost. We shall describe two systems: (1) the electromagnetic, as on the Hammond instrument and (2) the electrostatic, as on the Compton and Midgley-Walker instruments.

In the Hammond instrument a synchronous motor drives a series of 91 tone-generators mounted on a common axle. Each tone-wheel is a polygonal disc rotating in front of an electromagnet. As each high point of the disc passes in front of the magnet it induces an electric current in the coil which is wound round the magnet, and such alternating currents produce the component tones on which the synthesis of timbre is built. (For example, if the wheel is octagonal in shape and the axle to which it is fixed rotates at fifty revolutions per second, a current of frequency  $8 \times 50 = 400$  cycles per second is induced and this, converted into sound, produces a note in the neighbourhood of the orchestral tuning-A. At the side of the manual there is a harmonic controller by which the player can set the timbre to whatever colour he desires. Actually eight harmonics are available in nine gradations of intensity. When a key is depressed it selects the proper frequency for the fundamental of the note in question, together with the proper frequencies of all seven overtones in their due relative intensities. These are superposed in the instrument, and the combined note flows to the pre-amplifier located in the console and — after passing through an overall amplification corresponding to a "swell" — reaches the loud-speakers.

In the electrostatic type it is the alteration of the capacity of a condenser in a valve circuit which originates the currents to generate the partial tones. The plates of each condenser are discs, placed a small distance apart

in air. One of them is fixed while the other, on which undulating grooves are inscribed, rotates in front of it. In an alternative type (Midgley) both plates of the condenser are fixed while a sheet of bakelite having the necessary gradation of thickness rotates as a variable dielectric between them and so has the same effect of producing rhythmic variations in the capacity. The condensers are connected to the grids of valves so as to produce the necessary fundamentals and overtones when amplified.

Finally, working on a different principle, we find instruments such as the Organova, in which the sound-waves are transformed from undulations of light in the form of fluctuations in the intensity of a beam falling on a photo-electric cell. In this device the quantity of electrons leaving a specially coated plate, which constitute a current of corresponding intensity, is controlled by the amount of light falling on the plate. It is only necessary to cause the light falling on the cell to fluctuate in rhythmic fashion to get a current of electrons which varies in the same fashion and to transform this current into sound-waves from a loud-speaker in the usual way. The light variation is secured either by passing a film on which a dark track of varying blackness is inscribed between a lamp and the photo-electric cell, or by rotating between them a suitable arrangement of discs cut to a template, which produces the same effect.

Although the three organs described normally give tones of fixed intensity as long as they last, it is not difficult, though of course it adds to the elaboration, to introduce circuits which will make the sound of each note decay after its inception and so mimic pianoforte, harp or bell. Although the artificial wave-form does not vary during attenuation in the same way that it does in some of these prototype instruments, it is not impossible to devise circuits which will change the quality at the same time as they make the note die away and so give a better imitation of pianoforte or bell timbre. Some inventors indeed derive both constant and evanescent tones as required from the same decaying source of sound, *e.g.* a struck reed. As soon as the sound has reached maximum intensity the pick-up is switched over to a circuit with a time-constant which can be made to give a slow or rapid fall in loudness or to maintain the tone without dissipation as long as the key is held down, in spite of the damping in the acoustic vibrator. On the Midgley organ low-pass filters for preventing the high-frequency oscillations produced by the key contacts from reaching the amplifiers produce a lag in both the rise and fall of intensity when the key is depressed and released respectively. The former gives an imitation of the slowness of speech of

<sup>1</sup> The first public demonstration which the author remembers of such an "electronic organ" in England was at a conversation at King's College, London, in 1923; but many people in university laboratories had been constructing them privately in the years since the end of the 1914-18 war. These contained no provision for altering the timbre of the notes. Meissner states that the first public demonstration of a pipeless organ in which timbre control was possible was given by Capt. R. H. Ranger at Newark, New Jersey, in 1931.

certain organ pipes while the latter provides an artificial reverberation.

Besides the instruments we have already described — which are usually referred to by their inventors as "organs" — on account of the provision of a keyboard and the (generally) sustained notes — there are others which bear a closer analogy to orchestral instruments, since they are capable of producing one note only at a time. Of such solo instruments that of Theremin and the Trautonium have reached commercial production. The former is an oscillating circuit in which the condenser that controls the frequency of the oscillatory current is composed of a copper loop aerial and a metal baton held in the hand, or sometimes the hand alone suffices. When the hand is remote the note of the apparatus is ultra-sonic (above the audible pitch limit for the human ear), so that no sound output is heard, but as the hand is brought near, the note descends the scale and may be halted at any pitch determined by the relative position of the hand and the aerial, in virtue of the increased capacity. If the current supply to the loud-speaker is kept on while the player is "feeling" for his notes, the music of the instrument is confined to an unbroken series of *portamenti*; but the provision of an on-off switch under control of his other hand or of a foot enables him to a certain extent to cut these distressing glides.

The Trautonium, made before the second world war in Germany, has a grid-glow electron tube for a variable frequency generator. The grid potential which controls this frequency and therefore the pitch of the note given out is determined by the length of a resistance wire pressed by the player at some point on to a metal plate placed behind it. Another resistance under the plate is varied by the pressure of a finger at a fixed point and controls the loudness of the note. The technique of playing is therefore rather like that of a stringed instrument except that no action like bowing or plucking is demanded of the performer. The makers in fact claim that it is possible to get as fine a gradation in pitch and intensity as on a violin with greater ease, including effects such as *vibrato*, *portamento* and *staccato*.

It seems doubtful, however, whether these solo oscillators will survive as serious musical instruments. In electro-acoustics the future lies rather with the "organs", which on account of their compactness and portability are becoming serious rivals of the pipe organ.

Other electrophonic instruments not already named above are the Aetherophon, Couplex Organ, Electrochord, Electrone, Electrone, Emicon, Hellertion, Klaviatur Sphaerophon, Magnetron, Ondes Musicales, Orgatron, Phototone, Pianotron, Radio-Synthetic Organ,

Rangertone, Sphaerophon, Superpiano and Wave Organ.

**ELEGY** (ἐλεγος). In its original Greek sense the word denotes a poem always of a sad and touching character, and generally commemorative of some lamented decease (e.g. Gray's 'Elegy'); subsequently such a poem with music; and still more recently a piece of music inspired by the same feeling and suggested by a like occasion, but without poem or any words whatever.

J. H.

**ELEKTRA**. Opera in 1 act by Richard Strauss. Libretto by Hugo von Hofmannsthal, based on Sophocles. Produced Dresden, Court Opera, 25 Jan. 1909. 1st perf. abroad, Vienna, Court Opera, 24 Mar. 1909. 1st in U.S.A., New York, Metropolitan Opera (in French, trans. by H. Gauthiers-Villars), 1 Feb. 1910. 1st in England, London, Covent Garden Theatre (in German), 19 Feb. 1910.

**ELER, Franz** (b. Uelzen, Lüneburg, c. 1500; d. Hamburg, 22 Feb. 1590).

German hymnodist. He was cantor and teacher at the Johanneum at Hamburg in 1529 and afterwards *Kapellmeister* at the cathedral. He wrote an important hymn-book in 2 volumes. Part I, 'Cantica sacra . . .'; Part II, 'Psalmi Dr. Martini Lutheri . . .', with notation of the melodies after the system of Glareanus.

E. v. d. s.

**ELERT, Piotr** (b. ?, prob. 1599; d. ?, 1653).

Polish violinist and composer. In 1633 his opera under the Italian title of 'La fama reale, ovvero Il principe trionfante Ladislao IV, monarcha della Polonia, re di Svezia (Varsovia per Pietro Elert, Dramma per musica)' was performed at the royal court of Warsaw. He was a member of the royal chapel and frequently sent on some unofficial diplomatic missions. He was the first Polish musician to be granted the privilege of printing music by the king. Of all his works one only remains, a canon published by M. Scacchi in 'Cribrum musicum (Xenia Apollinea)' in 1643.

C. R. H.

**ELEVATION**. See ORNAMENTS, A (iii); D (iv).

**ELFORD, Richard** (b. ? Lincoln, ?; d. London, 29 Oct. 1714).

English countertenor singer and composer. He was educated as a chorister in Lincoln Cathedral. His voice changing to a fine countertenor, he became a member of the choir of Durham Cathedral. About the beginning of the 18th century he went to London and was engaged as a stage singer. On 2 Aug.

1702 he was sworn in as a Gentleman of the Chapel Royal, a place being created expressly for him, and the same year he wrote music for Rowe's 'Tamerlane', produced at the Lincoln's Inn Fields theatre. He also obtained the appointments of vicar-choral of St. Paul's Cathedral and lay vicar of Westminster Abbey. Weldon, in the preface to the first book of his 'Divine Harmony' (six solo anthems composed expressly for Elford), and Croft, in the preface to his 'Musica sacra', speak in high terms of Elford's voice and singing.

W. H. H.

**ELGAR, (Sir) Edward (William)** (b. Broadheath nr. Worcester, 2 June 1857; d. Worcester, 23 Feb. 1934).

English composer. His father, W. H. Elgar, was a musician of the type in which, fortunately, England is rich, who, without seeking or attaining any personal eminence, do sterling work in provincial centres. He founded a successful music-selling business at Worcester, was organist of St. George's Roman Catholic church there, and was also a capable violinist. He played in a local orchestra as well as in the professional one engaged for the annual Three Choirs Festival and took some part in determining the programmes of the festivals, exerting his influence to widen their repertory on certain occasions. Edward Elgar therefore grew up in musical surroundings, and the liberal experience he gained of string music through his father's violin, of wind instruments through his own playing of the bassoon in a wind quintet for which he also composed, of the organ and church music both Roman and Anglican (for he was constantly in and out of Worcester Cathedral and knew the repertory of the cathedral choir intimately), took the place for him of more systematized musical education. He was at school till he reached the age of fifteen at Littleton House, near Worcester, but during his school days he often deputized for his father at the organ of St. George's and also became a good violinist. The Worcester Glee Club proved another means of developing his talents. Elgar attended its meetings and so became conversant with that peculiarly English form of vocal chamber music, the glee. He also acted as piano accompanist and became leader of the orchestra which sometimes assisted at the Club's meetings, performing such works as the concertos of Corelli and the symphonies of Haydn. A proposal to send him to Leipzig for music study when he left school was not carried out: Elgar entered a solicitor's office but continued to develop his music along individual lines, playing and composing. It is worth recording that he played the violin in the orchestra of the Three Choirs Festival during these years.

In 1879 Elgar visited London to receive

some violin lessons from Pollitzer, but his life continued uneventfully at Worcester for the next few years, unless indeed his appointment as bandmaster at the County Lunatic Asylum (1879), a post which he held for five years, can be called an event. Other local engagements began to occupy him: he became a member of Stockley's orchestra at Birmingham, where an Intermezzo of his composition was played (13 Dec. 1883). He travelled abroad and spent three weeks at Leipzig in 1882, and in the same year was appointed conductor of the Worcester Amateur Instrumental Society. He succeeded his father as organist of St. George's (1885-89).

In 1889 he married Caroline Alice, daughter of Major-General Sir Henry Gee Roberts, K.C.B., and his wife's devotion and unswerving confidence in his genius was one of the prime factors in that ultimate success which, though slow in coming, arrived with extraordinary decisiveness a few years later. Up to the time of his marriage Elgar had composed small works only, from that time forward he began to think in larger musical terms, as the list of his works shows. Elgar and his wife settled in London, but London had no particular use for a composer of slight things and was not the most congenial atmosphere in which to attain greater ones. Two years later (1891) he retired, therefore, to Malvern, whence issued during the next thirteen years all those works for orchestra and voices which were to convince the world of the force of Elgar's individuality. There he enjoyed years of quiet and concentrated work in ideal surroundings, varied by the forming of many friendships, by holiday travels abroad, and later, as his fame grew, by journeys to conduct or otherwise superintend the production of his works. In 1904 the Elgars moved to Hereford and thence a few years later to London (Severn House, Hampstead), which was their headquarters until the death of Lady Elgar in 1920.

**EARLY WORKS.**—Meantime Elgar's public career may be said to have begun with the production of his 'Froissart' overture (Op. 19) in the Public Hall, Worcester, at the festival of 1890. Its significance scarcely seems to have been fully recognized at the time. The distinctive qualities which make Elgar are now easily perceived in the light of his subsequent output; the hearers of 1890 had nothing to guide them. The 'Froissart' overture, with the quotation from Keats on its title-page:

When chivalry

Lifted up her lance on high,

stamps Elgar at once as belonging to the late romantics. It is said<sup>1</sup> to have grown directly out of the scene in Scott's 'Old Mortality', in which Claverhouse dilates on the spirit of

<sup>1</sup> Ernest Newman, 'Elgar', p. 128.

chivalry enshrined in the *Chronicles of Froissart*. But it does more than assign Elgar to a class; tune after tune emphasizes personal characteristics. Alternate vigour and sensuousness, exuberant leaps of melody and nervous chromatic twists of harmony reveal his own voice and manner, and the glowing orchestration is part and parcel of the thematic ideas 'Froissart' at once showed Elgar as a man who does not score for orchestra but thinks in its terms.

In 1893 the first of his important choral works, 'The Black Knight' (Longfellow's translation of Uhland's 'Der schwarze Ritter'), described as "a symphony for chorus and orchestra", came out at Worcester, not at the festival but at a concert of the Festival Choral Society. The same body first gave three years later his suite for chorus and orchestra, 'From the Bavarian Highlands', which he wrote after a summer holiday at Garmisch. The year 1896 was indeed an eventful one, since it included, besides this, the performance of Elgar's first oratorio, 'The Light of Life' ('Lux Christi'), at the Worcester Festival, and the production of 'Scenes from the saga of King Olaf' (poem by Longfellow, with additions by H. A. Acworth) at the North Staffordshire Musical Festival (Hanley). The latter is important as the first considerable work to be given outside the composer's immediate neighbourhood, for Elgar is a conspicuous instance of a prophet honoured first in his own country, as the above list of the Worcester productions shows.

'The Light of Life' is an oratorio on the miracle of Christ healing the man blind from his birth, and its words, put together by the Rev. E. Capel-Cure on the traditional plan of oratorio, are partly original and partly taken from Scripture. The Three Choirs Festival had produced a long series of such oratorios year after year, only a small percentage of which had any permanent value. The life in Elgar's music was at once evident. He brought a fresh point of view and originality of musical style to a form which, in spite of a few masterpieces, had become jejune. Particularly striking was the note of sincere devotion with which he surrounded the character of the Saviour and His mission as the bringer of light into the world, and the use of representative themes to illustrate the idea anticipated the method of later and greater works. The other choral works of this period, 'The Black Knight', 'King Olaf', 'The Banner of St. George' (1897) and 'Caractacus', which was Elgar's first introduction to the Leeds Festival (1898), all share with this oratorio a certain unsatisfactoriness of form, though their defects are due to different causes. In the one case Elgar was still subject to an established tradition; in these cantatas on secular themes he

was trying to make up for the lack of one. The romantic spirit which had first shown itself in the 'Froissart' overture burns in them all, but these legends of ancient kings, deeds of heroes and loves of fair ladies all belong properly to the region of opera. An English composer, untrained to think in terms of the stage and lacking opportunity for performance thereon even if he turned his thoughts in its direction, had to use the choral society as a substitute and present to his public dramatic ideas undramatized. 'The Banner of St. George', written for the Diamond Jubilee year of Queen Victoria, is the least important of the group. Its subject (verses by Shapcott Wensley) combines the story of St. George killing the dragon with the patriotic motive, and it served to give rein to Elgar's love of the symbolism of pagantry and power which gleams through a number of his compositions, including the Imperial March (written for the same occasion) and the later and more famous 'Pomp and Circumstance' marches.

'Caractacus' is a work of much greater significance. Its libretto, by H. A. Acworth, tells the story of the British leader's fruitless struggle against the Roman invasion. The general lay-out in six scenes is frankly operatic. The curtain rises (the phrase is inescapable) on a scene of the British Camp on the Malvern Hills; the second scene depicts the mysteries of the Druids; the third gives us a love scene between Eigen (the daughter of Caractacus) and Orbin, a minstrel; the fourth and fifth scenes deal with the overthrow of the Britons, and the sixth shows Caractacus a captive at Rome, with a choral peroration prophesying British freedom and aggrandisement. This choral finale, with some other places where the choir is used for scene-painting purposes, is one of the things which mark the hybrid form of the work. Opera could have done without it; the choral cantata was felt to need summing up, and the process of summing up hardly came naturally to Elgar. In all these early works the attempt to do it brings bombast. At this stage indeed he offers a certain analogy to his great predecessor, Henry Purcell. His inspiration came in flashes and was apt to exhaust itself in a phrase. With the virtue was the attendant defect of scrappiness. In one respect, however, Elgar was, and has remained, very far from Purcell. He has never had that innate genius for setting the English language, and very few, if any, of his melodies seem to come straight from the ring of words as Purcell's do. Generally the melody is born as something independent, to which the words are subsequently fixed. The result is a certain *gaucherie* in the vocal writing. The brilliant qualities of 'Caractacus' as they appeared at Leeds consolidated Elgar's position among his contemporaries. It was performed there on 5 Oct. 1898.

In the following year two works made very essential additions both to the actual value of his output and to the growth of his reputation. These were the 'Variations on an original theme for Orchestra', called "Enigma", first played in London under Hans Richter at St. James's Hall on 19 June 1899, and a cycle of five songs for contralto with orchestral accompaniment, called 'Sea Pictures', sung at the Norwich Festival. Each one of the "Enigma" variations was dedicated to a personal friend, generally indicated by initials or some other device, and Elgar claimed that in writing them he had, as it were, "looked at the theme through the personality" of that friend. He also explained the use of the title "Enigma" by stating that the theme itself has for counterpart another theme which, however, is not heard.<sup>2</sup> But the success of the work as a series of deliciously contrasted mood pictures and a masterpiece of orchestral device was not at all dependent on the intriguing questions which such suggestions raise. Indeed the audiences who still listen with delight to these variations have now almost forgotten to ask to whom they refer, and they have quite given up the hope of discovering the enigma theme, just as they no longer puzzle over the Sphinxes of Schumann's 'Carnaval'.

As regards the 'Sea Pictures', though Elgar's settings of the poems will not always bear the closest scrutiny, for the reason hinted at above in the comparison with Purcell, the beauty of the musical ideas and of their orchestral handling leaves little desire to subject them to that sort of criticism.<sup>3</sup> The fact is that though Elgar may not always be guided by the poetic rhythm or even by the plain sense of the words he chooses, he so far comes under their spell as to produce music completely sympathetic to their mood.

THE ORATORIOS.—The year 1900 saw the birth of the work most widely acclaimed as Elgar's masterpiece, his setting of the greater part of Cardinal Newman's poem, 'The Dream of Gerontius', for solo voices, chorus and orchestra. It was produced at the Birmingham Festival on 3 Oct. 1900, and conducted by Richter. At its first appearance 'Gerontius' seemed to miss fire. Probably Richter, in spite of his great Wagnerian experience, understood this subtle combination of voices and orchestra less thoroughly than he had grasped the orchestral style of the "Enigma" Variations; certainly the Birmingham choir was puzzled by its startlingly new choral idiom. A portion of the audience was too much repelled by the theology of the poem

to appreciate the truthfulness with which the musician had entered into its psychology. One musician discovered that it "stinks of incense" and seemed to suppose the aphorism to be a complete condemnation, instead of being, as in fact it was, a tribute, though a superficial one, to the sympathy existing between poet and composer. That sympathy is the first quality of the musical setting of 'The Dream of Gerontius'. It was not conditioned by the circumstances of production, as earlier choral works had been. Elgar had pondered the poem for ten years or so, and it had appealed to all that was both visionary and human in his nature. The result was one of those works of absolutely spontaneous feeling which are rare in the history of even the greatest artists. Criticism can put its finger on the weak spots as easily here as in the case of 'Caractacus', but they matter less; they vanish out of sight or hearing as the listener becomes absorbed in the poignant struggle between life and death and the vision of judgment and eternity which the music unfolds.

The comparative failure of the Birmingham production was bound to be reversed by the verdict of time. It was partly through the exertions of Elgar's friend, A. J. Jaeger, a German in the employment of the firm of Novello & Co., that 'Der Traum von Gerontius' (translation by Julius Butts) was performed at Dusseldorf on 19 Dec. 1901 and accepted for the Lower Rhine Festival held there on 19 May 1902, under the direction of Julius Butts, with Muriel Foster, Ludwig Wullner and Johannes Messchaert as the soloists. The acclamations with which it was greeted were underlined by a public speech in which Richard Strauss conveyed to the composer the compliments of the continental connoisseurs. The second English performance then followed at the Worcester Festival on 11 Sept. 1902, when the composer conducted and John Coates sang the name-part for the first time. A further performance was given the same autumn (2 Oct.) at Sheffield, and thenceforward it went the round of the provincial festivals. The London Choral Society was formed for the purpose of performing it in London (1903), though it was first actually given there in the newly-built Roman Catholic cathedral of Westminster on 7 June 1903. In America it was first given by the Oratorio Society of New York on 26 Mar. 1903, and at the Cincinnati Festival of 1904, and its success there paved the way for Elgar's personal visits to the United States a little later.

Before 'Gerontius' was launched on its career Elgar was pondering a still more ambitious scheme, a sequence of oratorios dealing with the calling and training of the Apostles and their mission to the world in founding the Christian church. The first part

<sup>2</sup> Mus. T., 1900. All the persons referred to in the work have been identified. See "ENIGMA" VARIATIONS.

<sup>3</sup> Various attempts have been made to discover what this "familiar" theme is, but so far none has led to a convincing solution of the mystery.

<sup>4</sup> Ernest Newman did it trenchantly in his book, 'Elgar' ('Music of the Masters' series), chap. iv.

of this project was fulfilled in time for the next Birmingham Festival, and was given there under Richter's direction on 14 Oct. 1903, as 'The Apostles, Parts I and II'. It was first given abroad at the Lower Rhine Festival held at Cologne, 1904, but its appeal to the German audience was less powerful than that of 'Gerontius', had been. The words "Parts I and II" were omitted from later editions of 'The Apostles', since the next section to appear (Birmingham Festival, 3 Oct. 1906) was called 'The Kingdom'.

Another section yet remained for the completion of the trilogy, but this never appeared, though it is believed that the composer, whose thoughts turned in widely different directions from oratorio, proceeded some way towards its composition, and in particular took it up again in the last years of his life. Nevertheless the original plan is important in any discussion of 'The Apostles' and 'The Kingdom', since it is evident from the choice of words and the structure of the music that both were planned to lead to a larger fulfilment.

The words of both are taken from the Holy Scriptures, and texts, narrative, prophetic and descriptive, are woven together to illustrate the point of view from which Elgar approaches his subject. What is didactic<sup>1</sup> in that point of view is so suffused by the composer's mystical insight and reverent imagination, as well as human sympathy in such episodes as the penitence of Mary Magdalene and the remorse of Judas, that it is not on the whole oppressive. The hearer may even forget it just as he can forget the theological premises from which the psychology of 'Gerontius' is developed. The narrative of 'The Apostles' covers broadly the story of the Gospels from the beginning of the ministry of Christ to the Death, Resurrection and Ascension. 'The Kingdom' takes its story from the early chapters of 'The Acts of the Apostles', including the miracles of healing, the gift of the Spirit at Pentecost, the first persecution and the consolidation of the infant church by sacramental worship in the upper chamber. But throughout incident, whether described or referred to allusively, is treated rather as matter for reflection than as an affair of intrinsic interest. Thus the attitude towards the subject-matter is nearer to Bach's in the Passions than to Handel's in the majority of the oratorios. Musically these works may be described as oratorio reviewed in the light of the Wagnerian music-drama. The interweaving of innumerable representative themes is the chief principle of cohesion. Some of them are of very great beauty, and the majority stamp themselves on the mind as belonging by right to the ideas associated with

them. The attendant weakness of treating these themes in catalogue fashion appears acutely at times, for example in the orchestral opening of Part II of 'The Apostles', and also in setting certain words such as 'Judas who was guide to them that took Jesus' ('The Kingdom', p. 33). Elgar's old difficulty of summing up in a developed movement is seen in the chorus "Turn you to the stronghold", which ends Part I of 'The Apostles'. Again the setting of "Our Father", which leads to the finale of 'The Kingdom', opens with a version of a theme from 'Gerontius', which has lost all its mystery in the process of its attachment to words sung by the full choir. On the other hand the finale of 'The Apostles' may be pointed to as the greatest of Elgar's ensemble movements, both for its purely musical qualities and for its visionary aspect in the picture it presents of the Ascended Lord received by the hierarchy of Heaven. It is impossible to miss a certain growth of style between the two works in the musical handling. 'The Kingdom' is on the whole broader in melodic outline, more diatonic in harmony, less introspective but more daring. This change is partly conditioned by the subject-matter, but it is also indicative of the composer's personal growth towards the symphonic period of his career which followed the oratorios.

Before discussing that period it is necessary to refer to certain minor works contemporary with the oratorios (1900-6), which were landmarks in Elgar's career. Such are the 'Pomp and Circumstance' marches (Op. 39), the concert overture 'Cockaigne—In London Town' (Op. 40), the 'Coronation Ode' (Op. 44), the 'Introduction and Allegro' for strings (Op. 45) and the concert overture 'In the South (Alassio)' (Op. 50). Of the six military marches for orchestra called 'Pomp and Circumstance' only five appeared, the fifth much later, and one is famous. That is No. 1, in D major, first played with its companion No. 2, in A minor, by the Liverpool Orchestral Society on 19 Oct. 1901. It has as its trio the broadly swinging melody subsequently known as "Land of Hope and Glory". This pair of marches was first heard in London at a Queen's Hall Promenade Concert of the same year (22 Oct.). No. 3, in C minor, did not appear until 1905, and No. 4, in G major, having something of the characteristic qualities of No. 1, was produced at a Promenade Concert on 24 Aug. 1907. No. 5, in C major, appeared in the same series on 20 Sept. 1930. All illustrate that strain of romantic militarism found in the earlier cantatas, the love of that proud pageantry of war which belongs essentially to times of peace. The same thing permeates the brilliant 'Cockaigne' overture, first heard at a concert of the Philharmonic Society (Queen's Hall, 20 June 1901), in

<sup>1</sup> The didactic side of the librettos is fully expounded in Canon Gorton's 'Interpretation'. (See Bibl.)

which London, as represented by its parks and open spaces, the bands marching from Knightsbridge to Buckingham Palace, Westminster, with its dignified associations of Church and State, is mirrored in glowing orchestral colours.

The invitation to compose the official Ode to be sung at the gala performance at the Royal Opera, Covent Garden, in honour of the coronation of King Edward VII, was tantamount to the acknowledgment of Elgar as the musical laureate of the Edwardian era. In 1904 he received the honour of knighthood. The performance, planned for 30 June 1902, was postponed owing to the King's illness, and the Ode was never given its official production. The composer conducted its first performance at the Sheffield Festival in the autumn, and its first hearing in London at Queen's Hall on 26 Oct. The words, written by A. C. Benson, were skilfully planned to give Elgar opportunities in directions in which he was known to excel, and the quality of the verse was superior to that of the earlier patriotic librettos which Elgar had chosen for himself. He made the most of his opportunity, producing a work generally imposing and occasionally distinguished, and gaining a world-wide celebrity for the tune from the first 'Pomp and Circumstance' march by allying it with the words "Land of Hope and Glory".

Of greater musical importance than any of these are the 'Introduction and Allegro' for strings (1905), in which quartet and orchestra are combined and contrasted rather in the manner of the old concerto grosso, and the concert overture 'In the South (Alassio)', which was, as its name implies, the outcome of a visit to the Italian Riviera. The dedication of the former "to Professor S. S. Sanford of Yale University" recalls the fact that this was the year of Elgar's first visit to the United States, when, on 28 June, he was made a Doctor of Music of Yale University. He had received similar degrees at home from Cambridge, on 22 Nov. 1900, the year of 'Gerontius', and from Oxford on 6 Feb. 1905. 'In the South', in spite of its later opus number, marks an earlier event. It was the new work of the three days' Elgar Festival given in Covent Garden opera-house (14, 15, 16 Mar. 1904), when 'Gerontius', 'The Apostles' and a miscellaneous selection were heard. But the historical value of both these works, apart from their intrinsic beauties, is that both are essays in pure instrumental design leading up to the symphony so long projected and so long postponed.

**SYMPHONIC WORKS.**—More than two years passed between the composition of 'The Kingdom' (1905-6) and the production of Elgar's next work of first-rate importance, the Symphony No. 1, in A♭ major (Op. 55), pro-

duced by Richter at a Hallé concert in the Free Trade Hall, Manchester, on 3 Dec. 1908. It is dedicated "to Hans Richter, true artist and true friend". The time coincides with the only period in which Elgar undertook academic work by accepting the Richard Peyton chair of music created for him at Birmingham University (1905-8). Unsuitable as he was by temperament to such work, it was not probably responsible for the apparent lull in his productivity. These were years in which his visits to America and elsewhere made heavy calls on his time, but they were also years in which his mind was maturing in purely musical thought. The Symphony given at Manchester and repeated in London by Richter and the London Symphony Orchestra four days later (7 Dec.) was the first result of this process. It was realized at once to be a work of sustained power. A theme of noble simplicity, propounded in the barest outline, appears first to be introductory, and the bulk of the first *allegro* in a different key is based on a number of ideas, exuberant, agitated and impulsive, which contrast strongly with its classic calm. But this initial theme gradually imposes its mood. It appears in the several movements in fragmentary allusions as well as in more complete statements, and at the end of the finale its apotheosis arrives in a grandiose version. The two middle movements, *Allegro molto* and *Adagio cantabile*, are linked together by the fact that the theme of the latter is actually a rhythmic metamorphosis of that on which the mercurial scherzo is propelled forward. The Symphony made an immediate and vivid impression, and was performed over 100 times in the first year of its existence. That sort of popularity could not last, and it was in fact succeeded by a period of quite unjustifiable neglect. Its length may be said to account for that, but only if it is admitted that length in music is not a question of actual time taken in performance. The Symphony says the same thing too often, and not always with greater power in the course of its repetitions, moreover a tendency, which Elgar shares with César Franck, to write long movements in multiples of two-bar phrases brings rhythmic monotony. This is a more or less recurring structural defect, but one which is mitigated in the later symphonic works by the lighter handling of the thematic material.

The Symphony in A♭, however, is the majestic opening of the richest period in Elgar's career, the period which contains the violin Concerto (Op. 61), the second Symphony, in E♭ major (Op. 63), and the symphonic study for orchestra, 'Falstaff' (Op. 68). The violin Concerto, first played by Fritz Kreisler under the composer's direction at a concert of the Philharmonic Society (Queen's Hall, 10 Nov. 1910), is remarkable as the first

work of the kind by an English composer which can be said to have taken root in the repertory of violin virtuosi. No doubt Elgar's early training as a violinist stood him in good stead in tackling the technical problems of writing for the solo instrument, and the bravura passages are as successful as they are daring. But more personal qualities make the work live in the affections of listeners. There is the charm of a wayward sentiment in its *cantilena*, something subtle and elusive which justifies the Spanish motto of its title-page—

Aquí está encerrada el alma de . . .<sup>1</sup>

In a cadenza near the end, accompanied by thrummed chords on the strings, Elgar dwells on his themes as though he could not bear to say good-bye to them lest he should lose the soul enshrined therein.

The second Symphony, produced at the London Musical Festival (24 May 1911), the composer conducting the Queen's Hall Orchestra, is the strongest possible contrast to the first. It begins in a blaze of light and ends in the utmost quietude. In one of his Birmingham lectures Elgar dwelt on this characteristic of Brahms's third Symphony (F major), and it is not impossible that this example may have influenced him in planning his own second. A comparison of the opening theme of his finale with that of Brahms's indeed seem to suggest an unconscious influence. The score bears the following inscription:

Dedicated to the Memory of His Late Majesty  
King Edward VII.

This Symphony, designed early in 1910 to be a loyal tribute, bears its present dedication with the gracious approval of His Majesty the King [George V]. March 18th, 1911.

Though the work aroused less excitement than its predecessor, its greater clarity and directness of expression are beyond question, and it may be taken to be the high-water mark of Elgar's creative genius in instrumental music. In 'Falstaff', produced under the composer's direction at the Leeds Festival (2 Oct. 1913), Elgar returned again to programme music in order to recreate in musical imagery his impressions of characters and incidents in Shakespeare ('Henry IV' and 'Henry V'). It is a big and virile work, but while immensely more accomplished than his early essays in the pictorial use of the orchestra, it seems in its mental attitude to be rather a throw-back towards the romanticism of younger years. It is worth noting here that Elgar broke through his usual rule of silence as to the intentions of his work and wrote programme notes<sup>2</sup> to explain the scenario of his 'Falstaff' which from their numerous allusions show that the symphonic study had been the outcome of

an extensive literary study of Shakespearian criticism.

This pre-eminently instrumental period contains a few vocal works which must be mentioned. Op. 45 is a set of five partsongs (words translated from the Greek Anthology by various writers) for male voices which have been widely used as test-pieces at competitive festivals. Among numerous other partsongs one for mixed choir (6 voices), 'Go, Song of Mine' (Op. 57), produced at the Hereford Festival, 1909, is a thoughtful piece of a *cappella* writing. An ode for contralto solo, chorus and orchestra, 'The Music Makers' (Op. 69), was first given at the Birmingham Festival (1 Oct. 1912), Muriel Foster singing the solo part and the composer conducting. Though it has had a certain popularity with choral societies since, it is on the whole unworthy of Elgar's genius. The vague sentiment of Arthur O'Shaughnessy's poem appealed to his weaker side, and he allowed himself to underline its wording with quotations from his greater works such as the 'Engima' Variations, the 'Sea Pictures', 'Gerontius', the violin Concerto and the Symphonies. For the coronation service of King George V (1911) Elgar had composed an Offertorium and a Coronation March (Opp. 64, 65) and on this occasion the signal honour of the Order of Merit was bestowed on him. In the following year an Imperial Masque in two tableaux, 'The Crown of India' (Op. 66), was composed to celebrate the visit of the king-emperor to India, and was produced on the stage of the London Coliseum (11 Mar. 1912), the composer conducting. Such *pièces d'occasion* are rather distressingly prominent in Elgar's career at this period.

MUSIC OF THE WAR.—The war of 1914, which stopped all musical festivals in England immediately and checked all musical undertakings on a large scale, turned Elgar's energies in fresh directions. It produced from him several short but highly significant compositions. First and foremost among them came 'Carillon' (Op. 75), a setting of orchestral music to the recitation of a poem in French by Émile Cammaerts, which Tita Brand Cammaerts produced in London, at Queen's Hall, on 7 Dec. 1914. Poem and music together reflected the shock of horror with which the invasion of Belgium was received in England, and the almost delirious determination to quell the invader which came as the inevitable reaction from that shock. At the time Elgar's music was a trumpet-call ringing through Britain. It has none of the unreal bombast of his peace-time patriotism. The persistent clangour of a four-note *ostinato* in the orchestra pictures the peal of bells from innumerable English steeples rather than the authentic Belgian carillon, and intensifies the white-hot fervour of the composer's inspiration. Neither

<sup>1</sup> "Herein is enshrined the soul of . . .": a partial quotation from Le Sage's 'Gil Blas' (Everyman Library ed., I, xx).

<sup>2</sup> Mus. T., Sept. 1913.

the symphonic prelude 'Polonia' (Op. 76), produced at Queen's Hall at a concert in aid of the Polish Relief Fund (6 July 1915), nor a second essay in recitation with music, 'Le Drapeau belge' (Op. 79), but their mark with the sureness of 'Carillon', but a setting of three short poems by Laurence Binyon, grouped together under the title of 'The Spirit of England', has outlived the war. Composed in 1915, the second and third parts, 'To Women' and 'For the Fallen', were first heard in London at a series of concerts organized in aid of the Red Cross (Queen's Hall, 8-13 May 1916), when 'The Dream of Gerontius' was performed daily throughout the week. 'The Fourth of August', now the first part, was added for the first complete performance given by the Royal Choral Society at the Albert Hall, 24 Nov. 1917. A set of songs, 'Fringes of the Fleet', had considerable popularity during the war, when they were brought out in a semi-dramatic setting at the Coliseum Theatre, June 1917. Two essays in the direction of stage music must be named here. 'Une Voix dans le désert', produced at the Shaftesbury Theatre by Sir Thomas Beecham (29 Jan. 1916), is a war piece consisting mainly of recitation to music; the fantasy 'The Starlight Express' (Kingsway Theatre, 1916), consists of delicate incidental music to Algernon Blackwood's Christmas play of that name.

**CHAMBER MUSIC.**—The removal of the war-cloud brought a second though short-lived period of pure instrumental music from Elgar. It contained four works; a Sonata in E minor for violin and piano (Op. 82), a string Quartet in the same key (Op. 83), a Quintet for piano and strings in A minor (Op. 84) and the violoncello Concerto (Op. 85). All were produced within the year 1919, but there seems to be internal evidence that some of the music, at any rate of the violin Sonata, dates from an earlier time. Elgar had composed chamber music in his boyhood, but he had produced no important work of this class in his maturity. His decisive turning to it seems to indicate that the discipline of these years had caused him to shed some of that love of opulence in means of effect which had been a salient characteristic of his music. All three chamber works bear the date "Brinkwells, 1918". Although in neither Sonata nor Quintet does Elgar write for the piano with the mastery of technique which he possesses where other instruments are concerned, the Quintet at any rate is among his finest works. The Sonata and Quartet are full of the peculiar charm of his slighter thoughts, but the Quintet possesses that largeness of purpose and strength of design which belongs to the symphonies.

The new-found economy of means is carried into the Concerto for violoncello and orchestra,

first played by Felix Salmond with the London Symphony Orchestra at Queen's Hall under the composer's direction on 27 Oct. 1919. An unsatisfactory orchestral performance prevented the Concerto from making the fullest impression at its first hearing. Moreover, an audience who came with memories of the luscious profusion of the violin Concerto was disappointed to find a work of four short movements in which a few leading themes were treated with almost severe conciseness. But this quality of conciseness is its strength. In the Concerto the composer has said all that he wanted to say, and a wealth of varied expression is contained within its simple outline.

Though Elgar produced few compositions after the death of Lady Elgar in 1920, he contributed to the literature of the orchestra transcriptions of Bach's organ Fantasia and Fugue in C minor and of an overture of Handel.

When the fugue<sup>1</sup> was first produced by Eugene Goossens and his orchestra (27 Oct. 1921) very diverse opinions were expressed as to the appropriateness of Elgar's instrumentation to the style of Bach's fugue, but of its brilliance as a piece of orchestral virtuosity there could be no question. The fantasia, treated in a more restrained style, appeared later (Gloucester, 1922). The transcript of Handel's Overture in D minor was first given at the Worcester Festival, 1923. In 1924, on the death of Sir Walter Parratt, Elgar accepted the appointment of Master of the King's Music.

No further work of outstanding importance came from the composer's pen. To the outside world it may have appeared that, having no more to say, he was a wise man in refraining from major compositions; but that was not really the case. Undoubtedly his wife's death was a shock from which he took long to recover, and without the stimulus of her constant faith in him a certain apathy settled on his spirits. He felt that, to quote an expression often used by him, he had "gone off the boil". Moreover, when he began once more to pick up the threads of life and, living partly in London, to re-enter society and form new friendships, the tendency to fritter time over trifles, and sometimes with trifling people, could not always be resisted. He was attracted by the idea of himself as a man of many interests of which music was only one, and a minor one at that. This was an innocent pose adopted partly in self-defence against the wiles of the lion-hunters. The club bore who approached him with musical talk as a gambit could be snubbed with an expression of complete indifference towards the subject. Some-

<sup>1</sup> It was the result of an undertaking entered into with Richard Strauss that each composer should score a Bach fugue as a demonstration in modern orchestration of a classic. Strauss never carried out his share in this pact.

times the pose might be a little unfortunate in its results, as when a young composer shyly opened conversation, only to be met with some remark about horse-racing, which happened to absorb Elgar's attention at the moment.

There was everything to divert him from that single-minded concentration on his work which Lady Elgar had kept alight in him through the twenty years or more which saw the birth of his oratorios, symphonies and concertos. There was also much to withdraw his mind from that deep religious conviction which was the natural core of his being and which had given so powerful an impulse to earlier phases of his art. But those who were nearest to him knew that he was unchanged in any essential of character, and his best friends, like his daughter Carice<sup>1</sup>, cherished every sign of the revival of his zest for creative work.

In 1921 Elgar gave up Severn House, Hampstead, where the eight last years of his married life had been spent, and also Brinkwells at Fittleworth in Sussex, which had been his holiday home since 1917, and where the chamber works (Opp. 82-84) had all been written. He took a flat (No. 18) at 37 St. James's Place, S.W. 1, which remained his headquarters in London until 1929. In the autumn of 1923 he took a two-months trip to South America, sailing from Liverpool on 15 Nov. and returning in Jan. 1924, having travelled some 1000 miles up the Amazon. Meantime he had rented Napleton Grange, Kempsey, and he lived there at intervals until 1928. Other country-houses which he occupied were Battenhall Manor, Worcester (Oct. 1927 to Mar. 1928) and Tiddington House, Stratford-on-Avon (Mar. 1928 to Nov. 1929). Finally, at the last-named date, he settled at Marl Bank, Rainbow Hill, Worcester, which was his home until his death there in 1934.

Among the many public honours bestowed on Elgar in these last years were the following, granted by King George V: K.C.V.O. (Jan. 1928), a Baronetcy (June 1931) and G.C.V.O. (June 1933).

The chief musical works which occupied his mind in these years were the third oratorio to complete the trilogy of which 'The Apostles' and 'The Kingdom' were the two earlier parts, an opera, 'The Spanish Lady' to a libretto by Sir Barry Jackson based on Ben Jonson's 'The Devil is an Ass', a pianoforte Concerto based on an early piece written for Fanny Davies (long thought lost, but preserved among Elgar's manuscripts) and the third Symphony. None of these materialized. Two relatively unimportant works, the 'Severn Suite', originally designed for a brass band

contest at the Crystal Palace and 'The Nursery Suite', written for the Princesses Elizabeth and Margaret, were the outcome of the Marl Bank period.

THE THIRD ORATORIO—It is quite clear from the evidence of many of Elgar's friends that, in spite of many protestations to the contrary—"No one wants oratorio now", he would say—the project of finishing 'The Apostles' trilogy never wholly left him. The diaries which his daughter, Mrs. Elgar Blake, kept during the nineteen-twenties recall that when she visited him in his several homes he talked of, or played to her, parts of the third oratorio. Others could give the same testimony. Sir Herbert Brewer believed the work to be so far advanced that he tried to induce Elgar to complete it for the Gloucester Festival of 1928. Some were quite certain that a thorough examination of manuscripts after his death would lead to the discovery of a score or at least a considerable part of it. It may be difficult to persuade them even now that a search which has produced next to nothing has been thorough. Yet that is the case. Only a few detached musical fragments exist, some of them written out several times, together with some workings-out of themes, either on single sheets or in the large sketch-books which Elgar used in the initial stages of his works. These sketch-books remind one of Beethoven's. Fragments of now familiar works crowd their pages in no sort of systematic arrangement. It is only when something unfamiliar catches the eye that one can suppose that it represents some unfulfilled intention which may possibly be the third oratorio.

On the other hand there is a considerable quantity of material for the libretto of the oratorio, which not only goes to show the general intention of the scheme, but affords a valuable illustration of Elgar's method of compiling the texts of all the biblical oratorios of this trilogy. He searched the Scriptures diligently for possible texts which would illustrate his ideas. He examined the librettos of oratorios by other composers, notably Henry Hugo Pierson's 'Jerusalem' and Philip Armes's 'St. Barnabas'. Marked copies of these form part of the collection. He read sermons, and a report of one on 'The Primitive Doctrine of the Eucharist'<sup>2</sup> gave him what he needed for the finale of 'The Kingdom'. That sermon quoted from the Didache the words:

As the Broken Bread was grain scattered upon the mountains and gathered together became one, so may thy Church . . .

He also consulted friends whose theological knowledge might help him, and a note on church history from the Very Reverend Armitage Robinson, then Dean of Westminster

<sup>1</sup> A name compounded from her mother's Christian names, Caroline Alice.

<sup>2</sup> 'Church Times', 19 June 1903.

ster, evidently influenced the plan of the third oratorio. Placed among these records is a rough chart in Elgar's own hand of the plan of the three oratorios, headed 'The Development'. It names the principal personages in each and whither their characters tend, suggesting that the later are the consequences of the earlier. Thus Jesus, the Master of the first oratorio, is "the influence always present — the Eucharist" of the second, and the words "worthy is the Lamb" suggest the apotheosis of the third. The Apostles, the Blessed Virgin and Mary Magdalene are there to portray different types of sainthood, as may be inferred from the two existing oratorios, but the other side of the picture is more indicative of what was to belong to the third. Judas in 'The Apostles' was to have been followed by "Simon Magus" and "Sapphira" in 'The Kingdom', and these again in the third oratorio by "Antichrist" and "Barren Women" (*i.e.* barren of soul, trivial, light-minded).

All these materials belong to the original plan of the trilogy. Neither Simon Magus nor Sapphira eventually found a place in 'The Kingdom', but since the development of evil as well as of good was an essential factor in the scheme Elgar clung to the idea of at least a Simon Magus scene (the spirit of Antichrist leading to destruction) in the third oratorio.

Dawn". Beside these words is noted the Shofar call.

The materials for this last section include scenarios of the Simon Magus and Antioch scenes, as well as one concerned with the centurion Cornelius and St. Peter (Acts x). Probably all these are materials left over from 'The Kingdom', but he intended at one time at any rate to incorporate something from at least the first two into the third oratorio. Notes for the Antioch scene make it clear that the conflict between the church and Antichrist was to be illustrated therein. He proposed a scene of vivid oriental pageantry, the reproof of evil and the establishment of the church there, noting that "the disciples were called Christians first in Antioch" (Acts xi, 26).

The surviving fragments of music suggest that it was with the Last Judgment scene that he was primarily occupied when he took up the work some twenty years later. There are two principal fragments: (1) A chorus, "Alleluia. Salvation and glory and power belong to our God" and (2) an orchestral passage referred to as "The Judgment". The first is written out in four-part harmony and an extension sketched in which the theme is combined with the angelic "Alleluia" from 'The Apostles'. The second occurs frequently in several forms. A facsimile of one presentation of it scored for strings is given here:

Later he commonly called the third oratorio 'Antichrist', though it is clear that this would not have been its main theme or its final title. He intended the conflict of evil with good to come to its crisis here and righteousness to triumph in a scene of "The Last Judgment", culminating in the glory of the "Eternal

The peculiar interest of this is that here we have something which has already been published, no doubt rightly, as a portion of the third Symphony. In 'Elgar as I Knew Him', which contains all the identifiable fragments for the third Symphony, W. H. Reed gives this motive as his example 23. He also tells how

during his last illness Elgar wrote it out again in pencil and spoke of it as "the end". The end of what? He may have meant the end of the Symphony or of the *Adagio* movement, as Mr. Reed suggests. Or he may have seen in it a figure of his creative life closing in the inexorable recapitulation of "The Judgment".

We have dwelt, perhaps over-long, on the somewhat meagre records of the third oratorio, partly to set at rest all doubts as to how far its written composition really proceeded and partly to show that it provided a connecting thread of thought between the early works and the third Symphony which occupied his last years.

OPERA AND CONCERTO.—There is no saying when Elgar's thoughts began to turn towards a third Symphony, but it is clear that at the time knowledge of it was made public he was not actively concerned with it. When he moved to Marl Bank he was toying with the idea of writing a piano Concerto and beginning to get hot on the scent of an opera. Only some barely decipherable sketches for the piano Concerto exist, and it may be surmised that he desired to achieve it less from any inner creative urge than from the wish to break new ground and refute those critics who, on the evidence of the piano Quintet and the Sonata for violin and piano, had declared that writing for the piano was not his strong point. If so he has left that criticism unanswered.

The opera, however, was taken much more seriously, and the pile of manuscript which he left for it, like all Elgar's posthumous works, is much too fragmentary to be completed by any other hand. Elgar's late friendship with George Bernard Shaw and his attendance at the Malvern dramatic festivals turned his mind towards dramatic music. It has been suggested earlier in this article that, had conditions of performance in England been different, 'Caractacus' might have been Elgar's first opera, and a highly successful one. The masque, 'The Crown of India', 'Une Voix dans le désert' and the incidental music to 'The Starlight Express' had shown his leanings towards the stage, and he hugged to himself a certain sense of frustration. He would write an opera. He tried to cajole his friend Bernard Shaw into writing or finding an opera-book for him. The demand was skilfully turned aside with the suggestion that he should write another 'Falstaff'. By some curious chance he fixed his affection on Ben Jonson's play 'The Devil is an Ass' and he badgered Sir Barry Jackson to make it into an opera-book. Failing to get immediate satisfaction, though much sympathy, he began to do it himself. There exists among his papers a copy of the play in which the earlier acts are pencilled all over with his comments. Long passages of dialogue are cut out; a rough

sketch of the opening scene is drawn at the beginning and the *dramatis personae* is allotted to the several voices. Fitzdottrel is described as "Beckmesser Baritone", which may be a small indication of the source of his inspiration. It is noteworthy, however, that these annotations get scantier as the play progresses, and from the amount of musical manuscript marked "B. J." it seems evident that the composer began to write before the librettist had fully determined the form of the book. It is impossible to imagine how Elgar could ever have thought that the pungent verbiage of Ben Jonson's text could be matched by his own smooth and mellifluous musical speech. One can imagine him being caught by the lyric, "Do but look on her eyes"<sup>1</sup>, but by little else in the play. Probably we may conjecture that Sir Barry Jackson's fear that in refusing to co-operate he "might be standing between the world and a great musical work"<sup>2</sup> was groundless, and conclude that Elgar had neither the temperament nor the practical experience of the stage to wring a masterpiece from the unpromising material of 'The Devil is an Ass'. The circumstances which caused both the opera and the piano Concerto to be put aside need not be too deeply regretted.

THE THIRD SYMPHONY.—This arose from an indiscreet word spoken by the composer in the course of the Worcester Festival of 1932. At a tea-party he spoke of a third Symphony as "written", but said that it would not be worth while to finish up the full score since no one wanted his music now. This, at a festival where 'The Dream of Gerontius', the first Symphony, 'The Music-Makers' and 'For the Fallen' were all being given under his own direction, and the 'Severn Suite' was receiving its first full orchestral performance, was too obviously perverse to be passed without protest. His remarks were quoted lightly by one who heard them to another who had not. Next morning 'The Daily Mail' came out with a demand, emphasized with large headlines, for the production of Elgar's new Symphony. Sir Landon Ronald then carried the matter to Sir John Reith and secured from the B.B.C. a contract for the completion and production of the new Symphony, with payment in advance. This unusual munificence was to prove embarrassing. Elgar had spoken rashly. The Symphony was no more really "written" than were the third oratorio and the opera, and at the moment it was the opera and not the Symphony which was filling his head. But such an offer backed by something like a public demand could not be refused, and so there followed the tragic year in which

<sup>1</sup> At the foot of the page there is a note in another hand referring to the more salacious action of Wittipol's courtship. Against this Elgar has placed the words "Not my note. E. E."

<sup>2</sup> See Reed, 'Elgar as I Knew Him', p. 90.

he wrestled with the somewhat intractable material of the Symphony with results which W. H. Reed set forth in his book and fully described.

What exists of the third Symphony may be tabulated as follows:

1st Movement: *Allegro*, C minor.

- (a) Opening 8 bars complete in full score. Subsequent fragments partially scored.
- (b) Opening in short score. 26 bars in 12-8 time.
- (c) Second-subject section in short score, beginning in E♭ major. 4-4 time. 38 bars followed by 7 bars. *1<sup>ma</sup> volta* leading to double bar.
- (d) *2<sup>da</sup> volta* and fragments of development very roughly sketched.
- (e) A sketch of passage marked "leading to reprise" with portions of reprise itself including the 2nd subject in C major.
- (f) A passage, 9 bars, in full score, like the approach to the reappearance of the 2nd subject in the sketch, but, Reed thinks, meant to belong to the development section.

This is enough to show that the first movement was planned on the regular classical pattern. The plan of the subsequent movements cannot be traced with equal certainty:

2nd Movement. Described as "in place of Scherzo".

- (a) Two versions of opening theme in A minor, 3-4 time, 13 and 14 bars.
- (b) Two episodes, D major, A major, thematically connected, apparently alternating with first theme.
- (c) Passage in E♭ major making return to (a).
- (d) A cadence in C minor, 6 bars.
- (e) Coda, 23 bars, making complete ending.

3rd Movement: *Adagio*.

- (a) Two versions of opening theme. E♭ and D major. 16 and 18 bars.
- (b) Two fragments of development.

4th Movement: *Finale*.

- (a) Introductory 4 bars in full orchestral score of *maestoso* character (brass).
- (b) The same in short score, with 2 more bars *allegro*.
- (c) Violin part, 21 bars, written for Reed to play from, and sketch of 18 bars of the same passage, a principal theme, C minor.
- (d) Two passages not clearly connected, in short score. The second leads into the second subject proper, B♭ major, *nobilmente*.
- (e) Two passages, 21 bars and 10 bars. The first, Reed thinks, concludes the ex-

position; the second is a working-out of a figure in (c).

- (f) A vigorous development of the *nobilmente* theme (d).
- (g) The "Judgment theme" from the third oratorio, ending on a long held D (vn. solo) with double bar and "Fine" written after it.

The evidence of the manuscript suggests that this last is meant to be the end of the *Adagio* and not of the whole Symphony. Above it is a list of the movements, thus:

Sym. I. *All<sup>o</sup>*.

II. *Allegretto* (Scherzo).

III. *Adagio*.

IV. *Finale*.

Then "III. *Adagio*" is written again above the music which seems to leave no doubt as to its place in the Symphony. This leads us to interpret Elgar's remark "This is the end" rather in the subjective sense suggested above.

The effort of 1933 at least showed that the composer was not exhausted. There is the old vitality in these fragments together with something that is new, particularly in the *risoluto* opening of the first *Allegro*. It was the mechanical effort of realizing his ideas on paper which was more than he could compass in the allotted time. With a year more of health these difficulties would probably have been overcome, and though they might have left some mark on the structure, with the third Symphony Elgar would have entered that very small group of composers who have produced any notable work after the age of seventy-five.

LAST DAYS AND MEMORIALS.—He appeared to be in his usual health and spirits at the Hereford Festival of 1933, at which he conducted 'The Dream of Gerontius', the violoncello Concerto arranged for viola by Lionel Tertis, who played the solo part, and 'The Kingdom'.

Soon after the festival he became ill and had to enter a nursing-home for an operation which could alleviate but could not cure a malignant growth. In Nov. he was reported to be sinking rapidly, but he rallied and was able to move back to Marl Bank at the New Year. The last musical incident of his life was an occasion early in 1934 when he was enabled to direct from his bed at Marl Bank a rehearsal of some part of 'Caractacus' which was being recorded by the Gramophone Company in a studio in London. For many years Elgar had been deeply interested in the gramophone, and his own recordings of his works are noted in the catalogue below. The arrangements for this rehearsal were made by Fred Gaisberg; Lawrence Collingwood conducted the orchestra which was led by W. H. Reed. Conversation

could be exchanged. Elgar criticized the playing in some detail and then listened to the actual performance.

Elgar had desired to be buried beside his wife, and the funeral took place therefore privately at St. Wulstan's, Little Malvern, on the morning of 26 Feb. 1934. A public tribute was paid to his memory in Worcester Cathedral on Friday, 2 Mar., when an impressive service was held there, the London Symphony Orchestra and the Festival Choir taking part in selections from Elgar's works under the direction of Sir Ivor Atkins. A permanent record of his devotion to the Three Choirs is a fine window placed by subscription in Worcester Cathedral. The design by A. K. Nicholson depicts the subject of 'The Dream of Gerontius'. Another permanent memorial, and a very attractive one, is the birthplace at Broadheath, three miles or so out of Worcester. The little house and garden was purchased and placed under the care of the Corporation of Worcester, who have restored the garden to the condition in which it was when Elgar's parents lived there. A most interesting collection of mementoes has been arranged in the house with loving care by the composer's daughter, Mrs. Elgar Blake. To her the writer of this article is indebted for access to the archives, for much information given personally and for the exhaustive catalogue of works on which that following the present article is based. The birthplace was opened to the public in time for the Worcester Festival of 1938.

Various memorial concerts were given in London shortly after Elgar's death, notably one on 24 Mar. 1934, at the Albert Hall, the proceeds of which were given to the Musicians' Benevolent Fund, of which Elgar had been president. But the best memorial of a composer is the continued performance of his works, and it is possible to say that in England at any rate all his major works are regularly given, not in memory of the man, but because they serve the public need.

It is by the direct and constant appeal of Elgar's music to his own countrymen that the English character of his art is abundantly proved. He belonged to what is generally spoken of as the post-Wagnerian era of European music, and, like many other composers not of German origin or upbringing, he owed much of his technical style to Wagner. He was never impressed by the doctrine that national music can be synthetically developed from national sources of folksong and other traditions of the past. In his early years Elgar found suggestions for music all about him, in London, in the Malvern Hills, on his foreign travels in the Bavarian Highlands and at Alassio. He knew no nationalistic inhibitions. The musical composers who had the most direct influence on him, especially in the

matter of orchestration, were Mendelssohn, Berlioz and Wagner. His acquaintance with English music was confined to those secondary composers of hymn-tunes and cantatas who pervaded the concert-rooms and churches of the 19th century, together with such examples of the older and greater church music as might be found in the daily service lists of Worcester Cathedral, which he had haunted as a boy. When the fuller revival of the Tudor church music began he was not more interested in it than in its companion, the folksong revival. By that time his concepts of music were formed. He believed it to be the composer's business to invent tunes, not to quote them, and to make history rather than to study it. Consequently his may be called a cosmopolitan language, spoken perhaps with a provincial accent, but certainly with a personal tone of voice. That, it may be suggested, is what the normal English man and woman has demanded that music should be, at any rate ever since the days of Handel. They found in Elgar a new Handel, but a Handel who happened to be an Englishman born and bred.

In this connection it may not be entirely beside the mark to note that the name Elgar is one of pure Anglo-Saxon origin<sup>1</sup>, particularly in view of the many Welsh, Scottish, Irish, Jewish and German strains obviously represented in names of composers who have contributed greatly to what has been called the British musical renaissance of the last half-century. Possibly Elgar was too innately English to wish to think about being British, certainly among all the justly honoured names of that renaissance none stands out with the unique significance which attaches to the name of Edward Elgar. H. C. C.

## CATALOGUE OF WORKS:

## WORKS FOR THE STAGE

Op.	Title	Composed	Published	First Performance
1	'The Wand of Youth', play for children (see Orchestral Works)	c. 1869.	—	—
42	'Grania and Diarmuid', incidental music for the play by George Moore and W. B. Yeats (ded. to Henry J. Wood)	c. 1901-2.	1902.	Irish Literary Society, 1902.
66	'The Crown of India', imperial masque by Henry Hamilton, for solo voices, chorus & orch. 1. (a) Introduction. (b) Sacred Measure. 2. Dance of Nautch Girls. 3. Hail, immortal Ind (contralto song). 4. March of Mogul Emperors. 5. Entrance of John Company. 6. Rule of England (bass song). 7. Interlude. 8. Warriors' Dance. 9. Cities of Ind. 10. Crown of India March. 11. Crowning of Delhi. 12. Ave Imperator.	1911-12	1912.	London Coliseum, 11 Mar. 1912.
78	'The Starlight Express', incidental music to a play adapted from Algernon Blackwood's 'A Prisoner in Fairyland' by Violet Pearl. 3 songs for baritone: 'To the Children', 'The Blue-eyes Fairy', 'My Old Tunes'.	1915	MS.	Kingsway Theatre, London, 29 Dec. 1915.
81	'The Sanguine Fan', ballet based on a fan by Condor	1917	MS	1916 Chelsea Palace, London, 20 Mar. 1917.
—	'Fringes of the Fleet', songs for 4 baritones, words by Rudyard Kipling 1. The Lowestoft Boat. 2. Fate's Discourtesy. 3. Submarines 4. The Sweepers.	1917.	1917.	London Coliseum, 11 June 1917
—	'Inside the Bar', song for 4 baritones, words by Gilbert Parker	1917	1917.	London Coliseum, 25 June 1917.
—	'King Arthur', incidental music for Laurence Binyon's play	1922-23	MS.	Old Vic. Theatre, London, 12 Mar. 1923.
—	'Pageant of Empire Music', 7 songs for solo voices or chorus, words by Alfred Noyes.	1924.	1924.	British Empire Exhibition, Wembley, London, 1924.
—	'Beau Brummel', incidental music for a play by Bertram P. Matthews.	1928.	MS.	Theatre Royal, Birmingham, 5 Nov 1928
—	'The Spanish Lady', opera (sketches only), lib. by Barry Jackson, on Ben Jonson's 'The Devil is an Ass'.	?	MS.	—

## CHURCH MUSIC

Op.	Title	Composed	Published	Dedication
—	Anthems &c. for the Roman Catholic church of St. George's, Worcester.	c. 1875-85.	MS.	
—	4 Litanies B.V.M. for unaccompanied chorus.	?	1888.	Father T. Knight, S.J., Worcester.
—	'Ecce sacerdos magnus' for chorus & organ.		1888.	Hubert Leicester, Worcester.

<sup>1</sup> Based on the Catalogue compiled by Mrs. Elgar Blake for the fourth edition, where names of publishers and performers may be found, if required. The present list has been rearranged by categories; Mrs. Blake's gave Elgar's whole output chronologically, divided into two sections including works with and without opus numbers. The present arrangement has been thought more convenient for quick reference.

<i>Op.</i>	<i>Title</i>	<i>Composed</i>	<i>Published</i>	<i>Dedication</i>
—	'O salutaris Hostia' for 4-part chorus.	?	1888	
—	Hymn-tune to R Campbell's trans. of 'Verbum supernum' ('Hear thy children' in Westminster Hymnal, sub-title 'Drake Broughton').	?	1898 & 1912.	
—	'O salutaris Hostia' (in Tozer's 'Benediction Manual').	?	1898	
—	Hymn, 'O mightiest of the mighty', for the coronation of Edward VII	1901.	1902.	H R H. Prince of Wales.
2	(i) 'Ave, verum corpus', arr for C. of E. service as 'Jesu, word of God incarnate'.	?	1902	
2	(ii) 'Ave Maria', arr for C. of E. as 'Jesu, Lord of life and glory'.	?	1907.	Mrs H. A. Leicester

**ELIAZAROV, Grigory** (b. Ikidur, Russian Armenia, 23 Oct. 1908).

Armenian Soviet composer. He was from 1921 to 1929 a bandsman in a cavalry regiment and in the latter year entered the Moscow Conservatory, where he studied composition with Miaskovsky, Glière, Alexandrov and Shekhter successively. Most of his music is based on native tunes. His output includes

a ballet, 'A Drop of Mead', a string Quartet, a Scherzo for bassoon and pianoforte, and Tartar, Armenian and Kurd dances for pianoforte.

**ELIJAH** (Ger. *Ehas*). Mendelssohn's 'oratorio on words from the Old Testament'. Produced Birmingham Festival, 26 Aug. 1846; in the revised version, Sacred Harmonic Society, Exeter Hall, London, 16 Apr. 1847; in Germany, Hamburg, 7 Oct. 1847. A stage version was produced by the Moody-Manners Opera Co., Kelly's Theatre, Liverpool, Feb. 1912.

**ELINSON, Iso** (b. Moghilev, 13 Apr. 1907).

British pianist of Russian birth. He was first taught the pianoforte by his mother, a pupil of Rubinstein, before he entered the Leningrad State Conservatory. There he studied the pianoforte under Blumenfeld and composition with Glazunov and Steinberg. During the centenary of Beethoven's death in 1927 he played the thirty-two sonatas in Leningrad, Moscow and Kazan. Three years later he gave a series of concerts in Berlin which included Bach's forty-eight Preludes and Fugues, and works by Beethoven, Chopin and Schubert, as well as some by modern composers. His first performance in England was in 1936, when he played in London, at Queen's Hall. Since then he has appeared with many of the leading orchestras and conductors there, besides giving recitals at Sheffield, Oxford, Manchester, Derby and other provincial cities. He played Bach's "48" in Copenhagen in 1951 and the following year he was soloist with the Berlin Philharmonic Orchestra. He has appeared at several Promenade Concerts in London and has broadcast frequently both in England and abroad. In 1944 he was appointed pianoforte professor at the Royal Manchester College of Music. He is married to the pianist Hedwig Stein.

**ELIZAGA, José Mariana** (b. Morelia, 1786; d. Morelia, 1842).

Mexican theorist and composer. A child prodigy, he was by command of the viceroy exhibited in Mexico City at the age of six. After studying with Carrasco, chapel master of Morelia cathedral, he received a grant from the Morelia *cabildo* to defray the expenses of his study in Mexico City with Soto Carrillo, a Haydn enthusiast and the leading pianoforte teacher in the capital. Upon his return to Morelia Elizaga was appointed assistant organist at Morelia Cathedral, and the *cabildo* simultaneously purchased for his use "the best available pianoforte in Mexico City", so that he might instruct the local aristocracy in the new art of pianoforte playing. Among his pupils was Doña Ana María Huarte, later the wife of Agustín Iturbide, first emperor of Mexico.

In 1822 Elizaga was appointed imperial chapel master, but his duties were merely nominal; his newly found leisure was used in the preparation of a notable didactic work, 'Elementos de música', published at Mexico City in 1823 (copy in the Biblioteca Nacional). In 1824 he presided at the foundation of the Sociedad Filarmónica and the next year established the first conservatory in the infant nation. In 1826 he founded a music press and issued as its first product an original 'Valse with Variations'. Between 1827 and 1830 he acted as chapel master in Guadalajara Cathedral, but he returned to the capital in 1830 and taught privately during the next eight years. In 1835 he published a second didactic work, 'Principios de la armonía y melodía'. He retired to Morelia in 1842 and died there at the age of fifty-six.

Two Masses (one for Guadalajara and the other for Morelia), a Miserere, a set of lamentations, a set of responses and music for the matins of Transfiguration survive; his extant works are all written for chorus with orchestral accompaniment. He was acquainted with the works of Mozart and Beethoven and was one of the first to advertise their music in Mexico.

R. S.

**ELIZALDE, Federico** (b. Manila, 12 Dec. 1907).

Spanish conductor and composer. His family were of Navarro-Andalusian stock. Owing to his precocity as a child he was sent at seven years of age to the Royal Conservatory in Madrid, where he studied under Trago and

Perez Casas, winning the first prize in piano-forte at fourteen. In 1921 he went to England for two years' study and later entered Stanford University, California, where his parents wished him to study law. His musical vocation, however, was so imperious that against his parents' wishes he left the University and, as a result of the influence of Ernest Bloch, from whom he received lessons in composition, devoted himself to music. After giving recitals in the western states he visited England and entered Cambridge University as a law student. There he founded the "Quinquaginta" Band, which was recruited from the students who belonged to the "Footlights Club". He was appointed conductor of the Savoy Hotel orchestra and composed a symphonic poem 'Bataclan' and a ballet 'The Heart of a Nigger', which was produced by Diaghilev in 1928. In the same year he visited Germany, where he became closely associated with Siegfried Wagner. He also conducted concerts in Germany, Belgium and Holland. In 1930, after obtaining permission from his parents to devote himself entirely to music, he was appointed conductor of the Manila Symphony Orchestra and, before setting out for the East, conducted the Philharmonic Orchestra in Madrid. To these years belong his three symphonic poems, 'Jota', 'Spiritual' and 'Moods'. In the years 1931-33 he was in Paris and was guest conductor of various French orchestras, especially the Orchestre Symphonique de Paris. He was closely associated with Ravel and Milhaud, and he conducted the first performances of several of the latter's works. In 1932 he composed the incidental music for 'La pájara puita' by the modern Spanish poet Rafael Allreti, and songs for Conchita Supervia.

In spite of the international influences which moulded the art of Elizalde, stress must be laid on his particular devotion to Spain, his native country, and to Great Britain, where he had spent the impressionable years of adolescence. Noteworthy, too, was his profound affection for Manuel de Falla, who always looked upon him as one of his best interpreters. In the years before 1936 Elizalde spent many months at Granada and Seville with Falla, and on many occasions he conducted the Orquesta Bética founded by the latter. During the fourth-centenary celebrations of the foundation of the University of Granada Elizalde conducted Falla's harpsichord Concerto, and the composer himself played the solo part. In 1935 Elizalde was nominated Spanish delegate to the Maggio Musicale Fiorentino and collaborated with the other Spanish delegate, the critic and musicologist Adolfo Salazar. During 1935-36 his close relations with the Spanish poets, particularly García Lorca, inspired him to compose. Lorca, through his

poetry and his passionate enthusiasm for folk-song, folk plays and the puppet theatre, exercised a deep influence upon all those with whom he came into contact, and Elizalde set to music his 'Titeres de Cachiporra' and 'Don Perlumplin'. At the I.S.C.M. of Barcelona in 1936 he conducted his 'Sinfonia concertante' for piano-forte and orchestra, Leopoldo Querol playing the solo part.

At the outbreak of the Spanish Civil War in July 1936 Elizalde, who was in France, returned to Spain and was enrolled in the *Requeti* troops of Navarre, with which he served until 1939. At the end of the war, after visiting Manila, he returned to France, where he remained until the second world war. After the invasion he was obliged by the Germans to remain on his estate near Bayonne until the end of hostilities. These war years were the most fruitful of all his career as a composer, for he was able to finish his opera 'Paul Gauguin' in 1943 for which Théophile Briant wrote the libretto, and he composed his violin Concerto, which was given its first performance in Paris by Ginette Neveu. He also composed a string Quartet and a piano-forte Concerto, which was played for the first time in Paris by Leopoldo Querol in 1947 at the Palais Chaillot. The composer himself played this Concerto at the Besançon Music Festival in 1948 with the Colonne orchestra under Gaston Poulet and later in the Albert Hall with the London Symphony Orchestra. In the spring of 1948 'Paul Gauguin' was broadcast in its entirety by Radiodiffusion Française to commemorate the centenary of the great painter's birth.

Since 1948 Elizalde has been president of the Manila Broadcasting Company, and in that capital he founded the Manila Little Symphony Orchestra, a string orchestra which has aroused considerable interest in Europe and the U.S.A. In 1951 he visited Europe and conducted in Paris and London. During the Festival of Britain year he conducted the London Symphony Orchestra in the Royal Festival Hall.

It is possible to trace three clearly defined periods in the works of Elizalde. In the youthful compositions of the first period we find snappy rhythms, fresh melodies and a stylistic charm which he derived from Spain and Hispano-America. Then came the German and especially the French influences of the moderns such as Milhaud, which combine with his traditional Spanish qualities. The haunting verses of García Lorca and his puppet play stylization supplied the external influences which moulded his art, but in a work such as the 'Sinfonia concertante' the idiom gravitates within the orbit of Manuel de Falla. In the later works, which belong to the third period and were composed since 1939,

we notice greater originality and much stronger texture in the opera 'Paul Gauguin' and in the violin Concerto. The latter work, which is lyrical and violinistic, was admirably adapted to the strong personality and rhythmic qualities of that most brilliant of women violinists, GINETTE NEVEU. W. S.

**ELIZON.** See MASŁOWSKI.

**ELKIN & CO., LTD.**—This publishing-house was founded in London in 1903 by William Wolfe Alexander Elkin, who had previously been manager of Enoch & Sons. On his death in Jan. 1937 control of the company passed to his son Robert, and there is now a third generation of Elkins in the firm, in the person of the founder's grandson, William Alfred.

Ever since its foundation the firm has been active in publishing music by British composers, and its catalogue contains many works by Elgar, Bantock, Cyril Scott, Roger Quilter, Norman O'Neill, Eric Fogg, Victor Hely-Hutchinson, Peter Warlock, Maurice Jacobson, John Tobin, Geoffrey Bush and others. Elkin & Co. also own the British Commonwealth rights in the works of MacDowell, and in Jan. 1949 they acquired the catalogue of Universal Music Agencies (previously owned by Dr. Jean Michaud), which includes a valuable edition of pianoforte classics, edited by Michele Esposito, in addition to modern works by Hamilton Harty and others.

W. C. S.

**ELKIN, Robert (Stiebel)** (b. London, 25 June 1896).

English writer on music. He was educated at Rugby and became a director of Elkin & Co., the London firm of music publishers, in 1920, being made managing director in 1937. From 1935 to 1936 and again in 1947-48 he was chairman of the Mechanical-Copyright Protection Society, and since 1947 he has been chairman of the London Choral Society. In 1952 he became director of the Mechanical-Copyright Protection Society. He has been chairman of the Ealing Music Festival since 1939.

Elkin has written a number of books on music: 'Queen's Hall, 1893-1940' (1944), 'Royal Philharmonic' (1947), the history of the Royal Philharmonic Orchestra, and 'The Stones Behind Music' (1949). He has compiled and edited 'A Career in Music' (1950) and 'The New Opera Glass' (1951).

M. K. W.

**ELKUS, Albert (Israel)** (b. Sacramento, California, 30 Apr. 1884).

American composer and teacher. He received his degrees of B.A. and M.A. from the University of California in 1907. From about 1929 Elkus was connected in one way or another with the music department of Mills College as lecturer and pianoforte instructor.

From 1922 he taught pianoforte, theory and composition at the San Francisco Conservatory of Music and at the Dominican College at San Rafael, California. He has also lectured at the University of California and has for many years been Professor of Music there. He has been associated with many educational organizations, such as the Music Teachers' National Association, the Music Educators' National Conference, etc., and is a member of the American Musicological Society. He received the Juilliard Publication Award in 1936.

The principal works by Elkus are:

- 'I am the Reaper' for chorus & orch. (Henley) (1921).
- 'Impressions from a Greek Tragedy' for orch. (1921).
- 'On a Merry Folk Tune' for orch. (1924).
- 'Concerto on Leone III of Ariosto' for orch. (1927).
- Serenade for strg. 4tet (1921).

F. G.-H.

**ELLA, John** (b. Leicester<sup>1</sup>, 19 Dec. 1802; d. London, 2 Oct. 1888).

English violinist, conductor and critic. In 1819 he received lessons in violin playing from M. Fémy in London, in 1825 he entered the R.A.M., in 1826 he was a pupil of Attwood for harmony and in 1827 he completed his education in counterpoint, instrumentation and composition under Fétis in Paris. In 1832 he became a member of the orchestra of the King's Theatre in London, and subsequently of the orchestras of the Concerts of Antient Music, Philharmonic, etc., retiring finally in 1848. In 1845 he established, under the name of The Musical Union, a series of morning concerts of instrumental chamber music at which the best classical works were given by the best artists, native and foreign. He directed the Musical Union uninterruptedly for thirty-five years; the concerts came to an end in 1880. In 1850 he established a similar series of concerts under the name of Musical Winter Evenings, which were given annually under his direction until 1859, after which they were discontinued. At both these series he introduced "analytical programmes" written by himself. He contributed many notices of music and musicians to 'The Morning Post' (of which paper he was music critic for twenty years), 'The Musical World' and 'The Athenaeum'. In 1855 he was appointed lecturer on music at the London Institution. He also published a 'Personal Memoir of Meyerbeer', with an analysis of 'Les Huguenots', and 'Musical Sketches Abroad and at Home' (1869), mostly reprinted from his Musical Union programmes.

**BIBL.**—RAVELL, JOHN, 'John Ella. 1802-1888' (M. & L., XXXIV, 1933, p. 93).

<sup>1</sup> Earlier books of reference give Thursk as his birth-place, but his father, Richard Ella, was a baker at Leicester, and John was baptized in the "Civic Church" of St. Martin's there on 23 Dec. 1802.

**ELLAG** (Instrument). See **BABYLONIAN MUSIC**.

**ELLBERG, Ernst Henrik** (b. Soderhamn, 11 Dec. 1868; d. Stockholm, 14 June 1948).

Swedish violist and composer. He studied at the Stockholm Conservatory in 1886-92: composition with Joseph Dente, violin with J. Lindberg and bassoon with J. A. Johnsson, played in the royal orchestra (viola 1887 and 1890-95, violin 1888) and was a coach and conductor of ballet. He taught composition, counterpoint and instrumentation at the Conservatory 1904-33 (professor's title 1916), and instrumentation and military music at the Academy of Music, 1933-43. Among his Swedish pupils several won distinction as composers: G. de Frumerie, A. Haquinus, C. A. T. Hennerberg, L.-E. Larsson, G. L. Nordquist, Hilding Rosenberg and Dag Wirén. He was elected a member of the Academy of Music in 1912. In 1948 his opera 'Rassa' was awarded the second prize in a competition in connection with the Jubilee of the Royal Theatre, Stockholm.

Ellberg's compositions include:

Ballet, 'Sommaridyll', 1898 (perf. 1899)  
Ballet-pantomime, 'Askungen', 1906 (perf. 1907).  
Symphony, D ma., 1897.  
Overture, F ma., 1892.  
Concert overture 'Vår brytning', 1906.  
Introduction and Fugue for stg. orch., 1891 (perf. 1894).  
String Quartet, Eb ma., 1890.  
String Quintet, F ma., 1895.  
Quartets for men's voices.

Ellberg completed the orchestration of F. Berwald's D major Symphony (1842) in 1914 and named it 'Symphonie capricieuse' after the lost symphony of the same name. K. D.

**ELLERTON, John Lodge** (b. Cheshire, 11 Jan. 1801; d. London, 3 Jan. 1873).

English amateur composer. He was a descendant from an ancient Irish family and the son of Adam Lodge of Liverpool, assuming the name of Ellerton about 1845.

Being sent to Brasenose College, Oxford (where he graduated as M.A. in 1828), he composed an English operetta and an Italian opera. On leaving the University he went to Rome, studied counterpoint for two years under Terriani, and composed seven operas. His English opera 'Domenica' was produced in London, at Drury Lane, in 1838. In 1836 and 1838 the Catch Club awarded him prizes for glees. His works comprise: 6 anthems; 6 masses; 17 motets; 'Paradise Lost' (Milton), oratorio, published 1857; 'Issipile', 'Berenice in Armenia', 'Annibale in Capua', 'Il sacrificio di Epito', 'Andromacca', 'Il carnevale di Venezia' and 'Il marito a vista', Italian operas; 'Salvator Rosa', 'Lucinda', German operas; 'The Bridal of Triermain', another English opera; 61 glees; 65 songs; 19 vocal duets; 6 symphonies; 4 concert overtures; 3 quintets; 54 quartets

and 3 trios for stringed instruments; and 8 trios and 13 sonatas for various combinations of instruments.

W. H. H.

**ELLICOTT, Rosalind Frances** (b. Cambridge, 14 Nov. 1857, d. London, 5 Apr. 1924).

English composer. She was the daughter of the Right Rev. C. J. Ellicott, Bishop of Gloucester and Bristol. In 1874-81 she studied at the R.A.M. in London under Thomas Wingham. Her song 'To the Immortals' was sung at the Gloucester Festival of 1883, her 'Dramatic Overture' played at the same festival, 1886, and a concert overture at St. James's Hall in the same year. A cantata, 'Elysium', was brought out at the Gloucester Festival of 1889, 'The Birth of Song' in 1892 and a Fantasia for pianoforte and orchestra in 1895. Another vocal work, 'Radiant Sister of the Dawn', was produced at the Cheltenham Festival in 1887, and a male-voice cantata, 'Henry of Navarre', at Oxford in 1894. A Festival overture was played at the Cheltenham Festival in 1893, and a Quartet for piano and strings was given for the first time in London in May 1900.

H. C. C.

**ELLING, Catherinus** (b. Christiania, 13 Sept. 1858, d. Oslo, 8 Jan. 1942).

Norwegian composer and authority on folk music. He studied at Leipzig and Berlin and later taught in the Christiania Conservatory. From 1909-26 he was organist at Gamlebyen, Christiania. He was a prolific composer, but the work by which he is chiefly known, and for which he received a state pension, is the collection of Norwegian folk music, published in about 30 volumes. He also wrote a number of monographs on this subject. J. H. (ii).

**ELLINGER, Désirée** (b. Manchester, ?; d. London, 30 Apr. 1951).

English soprano singer. She was educated at the London School of Opera and studied under Spencer Clay. She sang with the Beecham Opera Company and at Covent Garden, besides singing with the Hallé Orchestra in Manchester and Liverpool. Her repertory included 'Madame Butterfly', 'Figaro', 'La Bohème', 'Faust' and 'Il Seraglio', and she sang the principal part in Beecham's English Drury Lane production of Lecocq's 'La Fille de Madame Angot'. She frequently broadcast, and when in New York starred in 'Rose Marie'. In Paris she played the lead in 'Show Boat'. Her Susanna in 'Figaro' in the great Beecham production during the first world war was in every way exemplary.

M. K. W.

**ELLINGFORD, Herbert Frederick** (b. London, 8 Feb. 1876).

English organist. He was educated at the R.C.M. in London (1893-98), where he won an open scholarship in 1895 and was recognized as one of the most able of the pupils of

Sir Walter Parratt. After holding several organ appointments, including for six years (1906-12) that of organist to the Earl of Shaftesbury at Belfast, he succeeded to the position at Liverpool which had been made famous by W. T. Best and A. L. Peace, that of organist of St. George's Hall, the main purpose of which was, before the hall was destroyed in the 1939-45 war, to give frequent recitals which were free to the public. Ellingford's wide repertory and his brilliant performance enabled him fully to maintain the reputation of St. George's Hall first created by Best. Several valuable educational works on organ-playing by him were published. H. C. C.

**ELLINGTON, Duke.** See JAZZ.

**ELLINWOOD, Leonard (Webster)** (b. Thomaston, Conn., 13 Feb. 1905).

American musicologist. He received the degree of B.A. from Aurora College, Aurora, Ill., and the degrees of Mus.M. and Ph.D. from the University of Rochester (Eastman School of Music), Rochester, N.Y. He was supervisor of instrumental music at the Mount Hermon School, Mount Hermon, Mass., 1927-33, held a teaching fellowship at the University of Rochester, 1934-36, and then joined the faculty of Michigan State College, teaching musicology and theory.

Ellinwood has made valuable contributions on phases of medieval music. His publications include 'Musica Hermanni Contracti' (1936), containing Hermannus's Latin text edited after both the Vienna manuscript and the manuscript owned by the Eastman School, together with an English translation and notes; articles on Francesco Landini (M.Q., 1936), on the origins of the Italian 'Ars Nova' (Papers read at the Annual Meeting of the American Musicological Society, 1937), etc. He edited a transcription into modern notation of all Landini's surviving works, with commentary (1939).

In 1940 Ellinwood joined the staff of the Library of Congress in Washington as a subject cataloguer. On 17 June 1948 he was ordained deacon by the Bishop of Washington (Episcopal). Among his published articles have been 'On Conductus' (M.Q., 1941), 'Ars musica' ('Speculum', 1945), 'Tallis's Tunes and Tudor Psalmody' ('Musica Disciplina', 1948) and 'Tune Indexing' ('The Hymn', 1950). He has edited two reference books: 'Bio-bibliographical Index of Musicians in the U.S.A.' (1941) and 'The Hymnal 1940 Companion' (1949). A 'History of American Church Music' is (1954) in preparation.

G. R.

**ELLIOTT & HILL.** See HILL & SON, W.

**ELLIS** (formerly Sharp), **Alexander John** (b. London, 14 June 1814; d. London, 28 Oct. 1890).

English philologist and mathematician.<sup>1</sup> He was educated at Shrewsbury, Eton and Cambridge. Scholar of Trinity College, Cambridge, 1835, he graduated as 6th wrangler in 1837. He only just missed his double first, being at the top of the second class in the Classical Tripos in the same year. He was elected a Fellow of the Royal Society in 1864, was President of the Philological Society 1872-74 and 1880-82, and became known as "one of the earliest advocates of spelling reform".<sup>2</sup>

He were best remembered, to-day, for his contributions to phonetics; but his name is more familiar to musicians as that of the English translator of Helmholtz's 'Tonempfindungen', which he greatly admired. His version bore the title 'On the Sensations of Tone as a Physiological Basis for the Theory of Music', and the first edition appeared in 1875. Ellis's *a priori* theories about music, which found their way into his translation, were logical applications of the conception of musical acoustics that was current in certain musical circles in his day. That is why his great industry in developing those theories, and in studying the melodic scales of other parts of the world, won the respectful recognition of his contemporaries. To this day musicians owe a debt to Ellis for all he did to form English opinion in favour of a standard (concert) pitch, and to explain some of the difficulties inherent in its attainment. He was admitted to the degree of Litt.D. *honoris causa* by his old University in the last months of his life.

**ELLIS, T. E. (Lord Howard de Walden).** See Holbrooke ('Cauldron of Amnwy', opera trilogy, lib.).

**ELMAN, Misha (Mischa)** (b. Tainoy, Kiev, 20 Jan. 1891).

Russian violinist. He first studied the violin in Odessa at the Royal Music School under Fiedelman, making his first appearance at a school concert in 1899, when he played Bérnot's seventh Concerto. He was heard later by Leopold Auer, who urged him to go to St. Petersburg to study under him at the Conservatory, which he did in 1901, and (with Cui as harmony professor) made astonishing progress. He made his début in Berlin on 14 Oct. 1904; his success was immediate and brought him engagements all over Germany. His introduction to the London public was in Mar. of the following year at Queen's Hall, where he played with the London Symphony Orchestra under Charles Williams and laid the foundation of the reputation he enjoys of being in the first flight of the world's violinists. In 1908 he was engaged for an American tour,

<sup>1</sup> So described in 'The Historical Register of the University of Cambridge'.

<sup>2</sup> *Ibid.*

making his début in New York on 10 Dec, since when he has played with success in every part of the world. He eventually settled in the U.S.A. His repertory includes all the great violin concertos and solos. The instrument he first played upon was a small Nicolo Amati, later he acquired a fine Stradivari dated 1727.

**ELMBLAD, Johannes (Wilhelm Samuel)** (b. Karda, Jonkopings lan, 29 Aug. 1853; d. Vaxjo, 4 Dec. 1910).

Swedish bass singer. After studying at the Stockholm Conservatory with J. Gunther and F. Arlberg in 1871-73, with J. Stockhausen in Berlin and Frankfort o/M. in 1874-78 and with Pauline Viardot-Garcia, he sang at concerts and in oratorio during a tour through Europe, India and Australia. Between 1879 and 1897 he was engaged successively at the Operas at Dresden, Hanover, Prague, New York, Berlin and Breslau, at the two last-named of which he was producer as well as singer. He also toured in Russia with the Prague Opera in 1889. On his return to Sweden in 1897 he sang at the Royal Theatre, Stockholm, and was producer there until 1902, whereafter he was engaged in the same capacity in New York, Amsterdam, Wiesbaden and Leipzig until 1906. He then taught singing at the Malmo Conservatory until his death.

Elmblad's fine voice and striking appearance were ideally suited to Wagnerian bass parts, all of which he sang at the Bayreuth festivals over a period of twenty years. While he was producer in Stockholm his productions of Wagner's operas were a notable feature of the repertory.

DROSTE, C., 'Johannes Elmblad' ('Bühne und Welt', 1905), pp. 901-4.

**ELMENDORFF, Karl** (b. Dusseldorf, 25 Jan. 1891).

German conductor. He studied philology at first, but soon turned his interest to music, and from 1913 he attended the Hochschule für Musik at Cologne. He chose the career of an opera conductor and worked in the theatres of Dusseldorf, Munich, Wiesbaden and Mannheim. From 1927 he was a regular conductor of the Bayreuth Festival, and from 1938 the first conductor of the Berlin State Opera. Elmendorff also conducted outside his country, at the Maggio Musicale of Florence, in Spain, France, Belgium, etc. While at Wiesbaden and Mannheim he paid special attention to Verdi and arranged the first performances of some of the composer's less well-known operas. He was responsible for the first performances of many German operas, and for the first performances in Germany of

Malipiero's 'Torneo notturno' (Munich) and Wolf-Ferrari's 'Dama boba' (Berlin).

K. G.

**ELSENHORST, H.** See Bohm ('Geistliche Lieder').  
**ELSBETH, Thomas** (b. Neustadt, Franconia, c. 1600, d. ?).

German composer. He lived at Frankfort a/O., was at Coburg in 1602, at Liegnitz in 1606-10 and at Jauer, Silesia, in 1616-24. In the dedication of Psalm CL (1616) he complains about his poverty. He was a composer of motets and sacred and secular songs. Twelve books to Latin and German texts, as well as some single numbers, were published between 1599 and 1624, while others, including a Mass, remained in manuscript.

**Elslander, J. F.** See Delcroix ('Petit Poucet', incid. m.).

**ELSNER, Ksawery Józef** (b. Grotków, Silesia, 29 June 1769; d. Warsaw, 18 Apr 1854).

Polish composer, conductor, teacher and writer. He completed his musical studies at Wrocław under Janisch, Dreinitzer and Maar, continuing them in Vienna for a year or two. In 1791 he became a member of the Opera orchestra at Brno. The next year he went to Lwów to take up the post of second conductor of the German Theatre (Opera), where he remained for seven years. Invited by Bogusławski (nicknamed "the father of Polish opera"), he went to Warsaw in 1799, remaining there till his death, writing and conducting operas and teaching at the Conservatory. Chopin was his greatest pupil there.

Elsner organized an engraving workshop in 1803 and published works (songs) by Polish composers (written before 1805). He was the founder of the Society for Cultivation of Church Music. In 1821 he became principal of the Warsaw Conservatory. To celebrate his eightieth birthday a medal was designed and struck in 1849.

Elsner wrote 32 operatic works (operas, *opérettes-bouffes*, vaudevilles, opera-ballets), the first two of which (in German) were produced at Lwów, all the latter (in Polish) in Warsaw. They are as follows:

'Die seltenen Brüder' (1794).  
'Der verkleidete Sultan', libretto by Bretschneider (1796).

'Iskahar, King of Guaxara', lib. by Bogusławski (1800).

'Amazonki' ('The Amazons'), lib. by Bogusławski (1800).

'Sultan Wampun', lib., after Kotzebue, by Głuński and Bogusławski (1800).

'Sydney and Zuma' (1801).

'Mieszkańcy Kamkatal' ('The Inhabitants of Kamkatal'), lib. by L. A. Dmuszewski (1804).

'Siedem razy jeden' ('Seven Times One'), lib. by Dmuszewski (1805).

'Stary trypiot' ('An Old Simpleton'), lib. by Hoffman, trans. by Matuszewski (1805).

'Nurzahad', lib. by Caignez, trans. by Adamczewski (1805).

'Wieszczka Urzella' ('The Prophetess Urzella'), lib. by Favart, trans. by Baudouin (1806).

'Sad Salomona' ('Solomon's Judgment'), lib. by Caignez, trans. by Zabłocki (1806).

- 'Andromeda', lib. by Ludwik Osński, prod. Warsaw, 14 Jan 1807, composed in honour of Napoleon Bonaparte who was present at its second performance in Warsaw given four days later.
- 'Trybunał niewidzialny' ('The Invisible Tribunal'), lib. by Wziesiński (1807)
- 'Mieczysław Słepý' ('Mieczysław the Blind'), lib. by Szymański (1807)
- 'Karol Wielki i Witykind' ('Charles the Great and Witykind'), lib. by Szymański (1807)
- 'Kalif Bagdadu' ('The Caliph of Bagdad') (?).
- 'Szwyc i krawcowna' ('The Cobbler and the Tailor's Daughter'), lib. by Drozdowski (1808).
- 'Urojenie i rzeczywistość' ('Imagination and Reality'), lib. by Adamczewski (1808).
- 'Echo', lib. by Pękalski (1808)
- 'Śniadanie trzpiotów' ('Breakfast of the Simpletons'), lib. by Ustion (1808).
- 'Żona po drodze' ('A Wife on the Way'), lib. by Drozdowski (1808).
- 'Rzym oswobodzony' ('Rome Liberated'), lib. by Wężyk (1809).
- 'Benefis', lib. by Pękalski (1809).
- 'Leszek Biały', lib. by Dmuszewski (1809).
- 'Wawozy Sierra-Morena' ('The Ravines of Sierra Morena'), lib. by Dmuszewski (1812).
- 'Kabalista', lib. by Wężyk (1813)
- 'Król Łokietek albo Wiśliczanki' ('King Łokietek, or The Vistula Maids', better known as 'Wiśliczanki'), lib. by Dmuszewski (1818)
- 'Jagiello w Tenczyne' ('King Jagellon at Tenczyn'), lib. by Chodkiewicz (1820)
- 'Ofiara Abrahama' ('Abraham's Sacrifice'), (?) (1821)
- 'Pospolite ruszenie' ('Levy in Mass') (?).
- 'Dwa posągi' ('Two Statues') (?).

Elsner's sacred works include an oratorio, 'Passio Domini nostri Jesu Christi' for solo voices, chorus and orchestra (1838)<sup>1</sup>; 17 masses *a cappella*; 2 masses for men's chorus; 7 masses, comprising the more famous Mass in C major (composed in 1829) and a Requiem, for solo voices, chorus and orchestra; several graduals; many hymns and motets; offertories; 'Te Deum', 'Veni Sancte Spiritus' (1815), 'Veni Creator Spiritus' (in 4 and 8 parts), 'Vesperae' (in 4 parts) with orchestra; cantatas to Polish and German words; many religious songs designed to be sung during mass (to words by K. Brodziński) and composed in 1820.

He wrote numerous secular songs contained in 24 books and comprising song-polonaises, arias, a duet, several partsongs and many secular cantatas written for special occasions.

Elsner's instrumental works comprise 3 symphonies, 2 polonaises for orchestra, many concertos for different instruments headed by his flute Concerto, 6 string quartets, 2 pianoforte quartets, 3 Sonatas for violin and pianoforte, a pianoforte Sonata for 4 hands and many pieces for pianoforte solo. The major part of his compositions was published in Poland as well as in Germany and France.

As an author he produced several essays and treatises on music ('On the Suitability of the Polish Language for Music', the treatises 'On Metre and Rhythm of the Polish Language' and especially 'Polish

Verse in Relation to Music', 'Military Music and its Use') and — a fact worth noting — a summary of his own musical activities with comments and notes. The original of these memoirs, written in French during 1839-48, was lost; a part of its Polish translation, made by K. Lubomirski, was later published by Hoesick (see Bibl.). According to Sowiński (see Bibl.) Elsner is said to have written in German a history of Polish opera (?).

Although so prolific a composer, he is remembered solely as an excellent organizer of the musical life in Warsaw and as the teacher of Chopin. His music now belongs to the past, although some of his works have been revived in Poland in the present century.

**ELSON, Louis Charles** (b. Boston, Mass., 17 Apr. 1848; d. Boston, 14 Feb. 1920).

American critic and writer on music. He studied singing at Boston and theory at Leipzig. He served on the staffs of several Boston journals, joining that of 'The Boston Advertiser' in 1888, on which he remained till his death. From 1882 he was head of the theory department of the New England Conservatory of Music. Elson was editor-in-chief of the 'University Encyclopaedia of Music' (1912) and of 'Modern Music and Musicians', and was on the editorial staff of 'Famous Composers and their Works'. He was the author of about sixteen books, of which the most important is 'A History of American Music' (1904; 2nd ed. 1915).

**ELVEY, (Sir) George (Job)** (b. Canterbury, 27 Mar. 1816; d. Windlesham, Surrey, 9 Dec. 1893).

English organist and composer. He began his musical education as a chorister of Canter-

<sup>1</sup> When this oratorio was performed under N. T. Nidecki in the Evangelical Church in Warsaw in 1844, the choir consisted of more than 320 singers and the orchestra was equally large, for the number of the string section alone was well above 100.

\* Articles on his daughters, Franziska (1810-84) and Therese (1808-78), appeared in earlier editions of this work, but as dancers they are not entitled to biographies in a musical dictionary.

bury Cathedral under Highmore Skeats, the organist. After quitting the choir he pursued his studies under his elder brother, Stephen, and was afterwards at the R.A.M. under Cipriani Potter and Crotch. In 1834 he gained the Gresham prize medal for his anthem 'Bow down Thine ear'; in 1835 he was appointed to succeed H. Skeats, jun., as organist of St. George's Chapel, Windsor, a post which he held until his retirement in 1882. In 1838 he graduated B.Mus. at Oxford, his exercise being a short oratorio, 'The Resurrection and Ascension', which was afterwards produced in London by the Sacred Harmonic Society on 2 Dec. 1840, and also given at Boston, U.S.A., and at Glasgow. Another oratorio, 'Mount Carmel', is among his works, and several odes, among them one for the opening of the Royal Holloway College on 30 June 1886. In 1840 he proceeded D.Mus., his exercise being the anthem 'The ways of Zion do mourn'. He conducted the Windsor and Eton Choral Society, and the Glee and Madrigal Society. He composed an anthem for voices and orchestra, 'The Lord is King', for the Gloucester Festival of 1853, and a similar one, 'Sing, O heavens', for the Worcester Festival of 1857.

Elvey's compositions are chiefly for the church; many of his anthems were published. He composed for the wedding of the Princess Louise in 1871 a Festival March, which was afterwards performed in public. In the same year he received the honour of knighthood. He is buried near the west front of St. George's Chapel, Windsor. A memoir was published in 1894 by his widow. W. H. H.

**ELVEY, Stephen** (b. Canterbury, 27 June 1805; d. Oxford, 6 Oct. 1860).

English organist and composer, brother of the preceding. He was entered as a chorister of Canterbury Cathedral under Skeats, sen., whose pupil he continued to be after the breaking of his voice. On the death of Alfred Bennett in 1830 Elvey was appointed his successor as organist of New College, Oxford. In the following year he took the degree of B.Mus. at Oxford, his exercise being the hymn from Thomson's 'Seasons', "These as they change". In 1838 he proceeded D.Mus., his exercise being an anthem, 'Great is the Lord!'. He was Choragus of the University from 1840 till his death.

Stephen Elvey's compositions are not numerous; they consist chiefly of chants and services. His Evening Service, composed in continuation of Croft's Morning Service in A, and his 'Psalter and Canticles pointed', in collaboration with Ouseley, are well known. Some years before his death he had to submit to the amputation of a leg, through a gun accident; he was, however, able to pedal with a wooden appendage. W. H. H.

**ELWART, Antoine (Aimable Élie)** (b. Paris, 18 Nov. 1808, d. Paris, 14 Oct. 1877).

French musical scholar, author and composer of Polish descent. He became a pupil at the Paris Conservatoire, learning composition under Fétis. In 1828, when in Lesueur's class, he founded "concerts d'émulation" among the pupils, which continued for six years. In 1831 he obtained the second prize for composition and in 1834 the Grand Prix de Rome. While in Rome he composed, among other things, an 'Omaggio alla memoria di Bellini', performed at the Teatro Valle in 1835. In 1836, back in Paris, he resumed his post of assistant professor to Reicha at the Conservatoire. He conducted the concerts in the Rue Vivienne and those of the Société de Sainte-Cécile. Elwart was for long professor of harmony at the Conservatoire; in 1871 he retired into private life. Among his compositions may be specified:

Opera, 'Les Catalans', prod. at Rouen.

Other operas, not produced.

Incidental music for Euripides' 'Alceste', perf. Paris, Théâtre de l'Odéon.

Oratorios 'Noë' (1845) and 'La Naissance d'Eve' (1846).

Masses and other church music.

Symphonies.

Overtures.

String Quintets.

String Quartets.

Trios.

He wrote 'Duprez, sa vie artistique . . .' (Paris, 1838); a 'Petit Manuel d'harmonie' (Paris, 1839), translated into Spanish, and in use at the Madrid Conservatory; 'Théorie musicale' (1840); 'Le Chanteur accompagnateur' (Paris, 1844); 'Traité du contrepoint et de la fugue' (Paris) and other theoretical works. He completed the 'Études élémentaires de musique' of Burnett and Damour (Paris, 1845) and contributed articles on musical subjects to the 'Encyclopédie du dix-neuvième siècle' and to the 'Revue et Gazette musicale de Paris'. His 'Histoire de la Société des Concerts' (1860) and 'Histoire des concerts populaires' (1864) are two compendia of useful and interesting matter.

M. C. C.

**ELWELL, Herbert** (b. Minneapolis, 10 May 1898).

American teacher, critic and composer. He studied at the University of Minnesota, piano-forte with Carlyle Scott and theory with Donald Ferguson. He later worked for two years in New York with Ernest Bloch, and for three years in Paris and Fontainebleau with Nadia Boulanger.

In 1928 Elwell became head of composition and theory at the Cleveland Institute of Music, where he remained for seventeen years, and during part of the same period he taught summer-school classes at the Eastman School of Music at Rochester, N.Y. He subsequently became assistant director of the Cleveland

Institute, but in 1945 he retired from these activities in order to devote more time to composition. He has been music critic of the 'Cleveland Plain Dealer' since 1932.

Elwell's 'Introduction and Allegro' won the Juilliard Publication Award, and his 'Lincoln' the 1945 \$1000 Paderewski Prize. In 1946 the honorary degree of D.Mus. was conferred on him by the Western Reserve University.

The principal works by Elwell are:

- Ballet, 'The Happy Hypocrite' (after Max Beerbohm) (1925)  
 Five Songs for chorus (Li Po) (1943)  
 'Lincoln' for baritone, chorus & orch. (Fletcher) (1945)  
 'Introduction and Allegro' for orch. (1942).  
 'Pastorale' for vn & orch (1947).  
 Quintet for stgs & pf. (1924).  
 String Quartet (1940).  
 'Blue Symphony', song cycle for voice & stg. 4tet (1944).  
 Sonata for vn. & pf (1938)

P G.-H.

**ELWES, Gervase (Cary)** (b. Billing Hall, Northampton, 15 Nov. 1866; d. nr. Boston, U.S.A., 12 Jan 1921).

English tenor singer. He was educated at the Oratory School, Birmingham, and Christ Church, Oxford, and studied music in Vienna, Munich, Paris and London. He married (1889) Lady Winifred Fielding (daughter of the Earl of Denbigh) and served in the Diplomatic Service from 1891 to 1895. He sang as an amateur tenor, taking part in the entertainment organized at Her Majesty's Theatre in London on behalf of the widows and orphans of the Household Troops during the South African War, on 13 Feb. 1900. He made his first professional appearance at the Westmorland Festival, Kendal, in 1903, and in London with the Handel Society in the same year. Several appearances at the Popular Concerts, etc., were made later, and his first regular festival engagement was at Leeds in 1904. Later he sang with great success at the Broadwood Concerts, Promenade Concerts, at the Albert Hall and at all the provincial festivals, besides giving interesting recitals of his own. He gave recitals in Germany, where he was associated with Fanny Davies, and also sang in Belgium and America. He was on a concert tour in America and on his way to fulfil an engagement at Harvard University when the accident occurred which caused his death. He was struck by the moving train which he had just left and fell beneath it.

The high place which Elwes held among English singers was due more to his personal qualities than to natural vocal gifts. A temperament sensitive to every implication of the music, but controlled by a refined intelligence, made him a rare interpreter of classical song, particularly of Brahms. In oratorio his singing of two parts stood out: that of the Evangelist in Bach's St. Matthew Passion and the name-

part in Elgar's 'Dream of Gerontius'. His enunciation in singing the English language was perfect, but above technical considerations there was the spirit of a sincere piety in his attitude towards such works as these

### EMANUEL MOÓR PIANOFORTE.<sup>1</sup>

An invention devised by the Hungarian composer Emanuel Moór and applied to the grand pianoforte, which it leaves unaffected except in the matter of the keyboard. The instrument has in fact two keyboards, one above the other, as on a double harpsichord, the upper producing notes an octave higher than the lower. These keyboards may be coupled in such a way that a passage in octaves can be played in single notes on the lower keyboard alone. They can also be played separately for any given time, or alternately in quick succession (to facilitate wide skips, for instance), or again both together so far as the fingers can reach them. Judicious use of the device on the player's part enables him to overcome a variety of difficulties presented by pianoforte writing for a normal instrument, and for this the Emanuel Moór Pianoforte has been warmly commended by some eminent musicians, including Sir Donald Tovey. It has, moreover, been brilliantly used by some performers, such as Winifred Christie, who became the inventor's second wife.

Apart from facilitating music as written by composers, the Emanuel Moór Pianoforte is, of course, capable of a great deal of amplification. This is of great advantage in the playing of pianoforte scores of works for other media and may be legitimately used in the performance of all kinds of transcriptions, including for example those of Bach's organ works, where the pedal parts can be played with the octaves automatically doubled, and other tricks of organ registration can be resorted to up to a point. But it must be admitted that the instrument may offer temptations to unscrupulous pianists anxious not only to play with greater ease difficult passages as they stand, but to make their performances more "effective" by amplifications not intended by the composer. On the other hand there have been composers—Ravel, for instance—who on hearing certain works of theirs thus amplified, declared that the sounds thus produced were what they had really intended, if only it had been possible to write thus for two hands playing on a normal pianoforte. It seems clear that for the interpretation of music on this instrument, as after all on any other, taste, imagination and discretion are required in the performer, and that the lack

<sup>1</sup> Not Duplex Coupler Pianoforte, a name never given to the instrument by its inventor.

of these qualities rather than the instrument's characteristics will produce undesirable results.

A specimen of the Emanuel Moór Piano-forte, presented by Mrs. Christie Moór, is in the Central Music Library in London.

**EMBOUCHURE** (Fr. in origin, lit. "opening into"; Ger *Ansatz*, "setting on"; musically "mode of applying lips to wind instrument").<sup>1</sup> The term may be defined as "mode of application of the lips and mouth to the mouthpiece of a musical wind instrument as expertly advised, and the mode actually adopted or developed by a particular player for the particular mouthpiece of a wind instrument."

Lips and mouth would involve

- (a) Muscles: *Orbicularis oris*, and the muscles radiating from it (*vide infra*).
- (b) Tongue: Intrinsic and extrinsic muscles.
- (c) Teeth: Mainly maxillary and mandibular anterior teeth.
- (d) Maxillae.

The maxillary sinuses and the palate and pharynx play a part.

Mouthpiece. This implies the

- (a) Mouthpiece alone in the case of all brass instruments and the flute and the piccolo.
- (b) Mouthpiece plus reed in the case of the single-reed instruments, *i.e.* clarinet, saxophone, etc.
- (c) Reed alone in the case of double-reed instruments, *i.e.* oboe, cor anglais, bassoon, etc.

**RELATIONSHIP OF EMBOUCHURE TO "TONE".**  
 —On the musician's embouchure depends largely the quality of tone he is able to produce from his instrument. "Technique", *i.e.* the ability to render, in playing a musical piece, the exact notes on the instrument at the correct time by means of "fingering" the keys, pistons, holes, etc., is a matter of considerable

diligent study and practice, but however greatly this may be developed, it may result in an overall mediocrity of performance if the quality of tone is poor.<sup>2</sup>

An anatomical description of the musculature involved in the embouchure, without which the mechanism of wind-instrument blowing would be incomplete, calls for some understanding of the functions of the various organs.

In blowing any wind instrument the lungs act as bellows and furnish the supply of air to the mouth, which in turn acts as a bag or reservoir.

The part played by the tongue is similar to that of a valve: it controls the flow of air through the instrument.

The lips in turn have a function similar to that of a washer, which during playing prevents the escape of air.

The teeth and jaws form a scaffolding which supports the mouth, tongue and lips.

**MUSCULATURE INVOLVED IN EMBOUCHURE.**—In describing the musculature of the embouchure in the different classes of instruments one instrument is taken as an example of each class, with the exception of the brass, where both trumpet and German horn are shown, as these illustrate the interesting difference in detail of the position of the cup-like mouthpiece, *i.e.* the cup embraces the upper and lower lip approximately equally in the trumpet and approximately two thirds upper lip and one third lower lip in the horn.

There are further differences in detail of embouchure in the woodwind and brass, but details of these differences are beyond the scope of this generalized explanation.

For the purpose of description, and viewed from the front, the embouchure may be looked upon as the convex side of an open umbrella, with the ferrule end of the cane removed so as to leave a small opening, analogous to the aperture of the mouth. This aperture is closed by the mouthpiece of the instrument and/or the tip of the tongue according as to whether "movement" or "rest" occurs during the playing of the instrument. From the muscle forming this aperture, *i.e.* *orbicularis oris*, radiate those muscles most responsible for the embouchure; these correspond to the ribs of the umbrella. The only exception to the aperture of the lips being closed by the mouthpiece occurs in the flute or piccolo, where air is blown across the hole, which is slightly distant from the mouth aperture. In this case and in the case of all brass instruments the mouthpiece is extra-oral, while in all other types of wind instrument (*i.e.* with single or double reeds) the mouthpiece is intra-oral.

The scheme of muscles involved in the

<sup>1</sup> In the flute the head of the instrument contains the hole across which air is blown, and this is often referred to as embouchure, but it is quite distinct from the much wider subject under discussion.

<sup>2</sup> Bach, 1925; Blodgett, 1919; etc., see Bibl.

embouchure is shown diagrammatically in Fig. 1.

FIG. 1.—Scheme of musculature of embouchure, front view<sup>1</sup>

1, orbicularis oris (upper lip portion). 2, levator labii sup. alaeque nas. 3, levator labii superioris 4, levator anguli oris 5, zygomaticus minor. 6, zygomaticus major. 7, buccinator. 8, depressor anguli oris. 9, depressor labii inferioris. 10, mentalis 11, orbicularis oris (lower lip portion)

The muscles are numbered clockwise around the central aperture.

Viewed laterally (Fig. 2) these muscles radiate either directly from the *modiolus*<sup>2</sup> (central point of *m. cruciati modiolii*, which plays an important part in maintaining the correct embouchure in all wind instruments), or indirectly via the *orbicularis oris*.

FIG. 2.—Scheme of musculature of embouchure, lateral view

*M. modiolus*. 1, orbicularis oris (upper lip portion). 2, levator labii sup alaeque nas. 3, levator labii superioris. 4, levator anguli oris. 5, zygomaticus minor 6, zygomaticus major. 7, buccinator. 8A, risorius (masseteric strand). 8B, risorius (platysma strand). 9, depressor anguli oris. 10, depressor labii inferioris. 11, mentalis. 12, orbicularis oris (lower lip portion)

<sup>1</sup> This figure and all other figures in this description of the embouchure reproduced from 'The British Dental Journal', 5 Aug. 1952, by courtesy of the Editor.

<sup>2</sup> Fish, 1948.

The part played by the tongue, teeth, jaws and lips is illustrated in Figs. 3, 4, 5, 6 and 7, to show the difference in their relationship to each type of mouthpiece.

The tongue permitting, as it does, the flow of air through the instrument, or shutting it off as required, is the means of playing *staccato* (equivalent of *spiccato* bowing on the violin) in all classes of wind instruments.

In the case of all brass instruments the cup-like mouthpiece is pressed against both upper and lower lips, to a varying extent, in some cases embracing more upper lip and in some more lower lip, according to the different instrument, *i.e.* trumpet, horn, trombone, etc., or the comfort of the player.

FIG. 3.—To show the adaptation of the lips to the cup-like mouthpiece of the trumpet

Note that the cup is covered half by the upper lip and half by the lower lip

FIG. 4.—To show the adaptation of the lips to the cup-like mouthpiece of the horn

Note that the cup is covered two thirds by upper lip and one third by lower lip

In the case of the flute and piccolo the head of the instrument is pressed lightly just beneath the lower lip, which together with the upper lip is drawn into a tense smiling position.

FIG. 5.—To show adaptation of lips to flute

In the case of the single-reed instruments, *e.g.* the clarinet, the anterior mandibular teeth are covered incisally by the lower lip, which is drawn inwards, and on which rests the reed, while the upper teeth in the majority of players rest on the sloping upper side of the mouthpiece, with the upper lip firmly drawn around the latter to prevent escape of air.

FIG. 6.—To show adaptation of lips, teeth and tongue to the mouthpiece of the clarinet

*Note.*—1, Compression of lower lip on to the lower incisors by mouthpiece. 2, Pressure of upper incisors on upper side of mouthpiece

With the double-reed instruments, *e.g.* the oboe, both upper and lower lips are drawn inwards to cover the incisal edges of the teeth so that the double reed, inserted into the mouth for about half an inch, can be firmly gripped between the lips.

In each case the sound is produced by conveniently inflating the lungs and sharply withdrawing the tip of the tongue from the reed, in the case of a reed instrument, and from the lips in the case of the flute, piccolo and brass instruments, while at the same time pronouncing the letter "T" or "D" or "TH" lightly, or as though a hair is being sharply dislodged from the tip of the tongue.

FIG. 7.—To show adaptation of lips, tongue and teeth to mouthpiece of oboe

*Note.*—Compression of lower lip and upper lip against lower and upper incisors respectively

Carried out at various speeds this constitutes "tonguing" or *staccato*. Owing to the tenseness of the *orbicularis oris*, air is prevented from escaping otherwise than through the instrument. Contraction of this muscle and all the muscles radiating from it, particularly the buccinator, does not allow the cheeks to puff out, which is regarded as a common error in blowing orchestral wind instruments.

**IMPORTANCE OF TEETH TO THE WIND INSTRUMENTALIST.**—It will be seen from the above that an important part is played by the teeth in the development and maintenance of the embouchure. These organs, together with the jaws into which they are pivoted, support the whole of the musculature of the embouchure.

A musician who has greatly developed his embouchure may often produce a beautiful tone from a very cheap and poor instrument. A musician not so equipped, however, may produce a very poor tone from the finest instrument, no matter how well he has mastered technique. It has been shown how much a "good" embouchure depends upon the individual's oral and dental anatomy. Much of his potential embouchure will depend to a very great extent on his teeth, their form, malform, position or malposition, which in turn will largely influence the position, strength and power of contraction of the musculature of the lower part of his face and the final position in which he will place his mouthpiece. It is for this reason that many a diligent student does not reach a high standard of musicianship on a particular wind instrument. The intelligent would-be professional wind musician would do well to realize that he will be earning his livelihood by using his mouth in what may be regarded as an abnormal way for many hours daily. It follows that, as his teeth will be of such importance to his embouchure, their care, by himself and

their constant attention by his dental adviser, may in the long run be vital to him.

The progressive dental troubles of some experienced wind musicians have often been responsible, either directly or indirectly, for a deterioration in the high quality of tone so laboriously developed over many years of study and practice. In other players with certain dental defects of one kind or another already present at the time of commencing study of the particular instrument, a high quality of tone will be achieved only with greater difficulty, since the defect present is a hindrance to progress, but in some cases a high quality of tone will be impossible or achievement altogether. This is to be inferred from the reports of a number of observers.<sup>1</sup>

The dentist, by virtue of his knowledge and experience, is in a position to help both the practised wind instrumentalist and the beginner, and indeed may even advise an intended musician on the choice of a type of wind instrument most suited to his oral and dental anatomy.<sup>2</sup> Furthermore, the orthodontist is able to advise parents on the choice of a wind instrument which might have the effect of an orthodontic appliance, should such an instrument be practised under the guidance of a qualified teacher for a certain period daily, while a careful watch is being kept on the orthodontic condition. Such work has been and is being done.<sup>3</sup>

Dental research will probably in the near future devise means of artificially correcting the malformed teeth of a musician during playing, where these are seriously preventing him from developing a suitable embouchure for his instrument; indeed this is already being done.

It is believed possible that the teeth play a part in the rapid tiring of the muscles in some individuals.

Lastly, Frucht (1937) has shown physiologically the relationship of the lips (*e.g.* their texture and sensitivity) to the potential ability of the player.

M. M. F.

#### GLOSSARY OF ANATOMICAL TERMS USED

- Alae. Wings, *i.e.* of nose.  
 Buccinator. Lit. a trumpeter — anat. muscle of cheek.  
 Cruciatu: Shaped like a cross.  
 Extrinsic muscle: Muscle outside the organ, but attached to it.  
 Intrinsic muscle: Muscle within the organ.  
 Labia: Lips.  
 Levator: Elevator or lifter.  
 Masseteric. Pertaining to masseter muscle — muscle of mastication.  
 Mandible: Lower jaw.  
 Maxilla: Upper jaw.  
 Maxillae: Upper and lower jaws.  
 Maxillary sinuses: Natural air cavities within the upper jaw.  
 Mental: Pertaining to chin, *i.e.* *mentalis*, muscle of chin, muscle of expression.  
 Modiolus: The nave of a wheel.

- Orbicularis oris. Muscle surrounding aperture of mouth, *i.e.* lips.  
 Orthodontic. Pertaining to the dental science of regulation of the teeth.  
 Pharynx. Cavity behind the mouth and nose.  
 Risorius: Laughing, muscle of expression.  
 Zygoma: Yoke, *i.e.* bone in upper jaw.

EMMANUEL, (Marie François)

Maurice (b. Bar-sur-Aube, 2 May 1862; d. Paris, 14 Dec. 1938).

French musicologist and composer. He studied at the Paris Conservatoire with Savart, Delibes, Dubois and Bourgault-Ducoudray, and in Brussels with Gevaert. In 1895, while professor in the history of art at the Lycées Racine and Lamartine, he presented for his doctorate at the Sorbonne a thesis on Greek orchestrics. He was afterwards sent to Germany and Austria, and as a result of his mission published in the 'Revue de Paris' (1898 and 1910) some interesting articles on the study of music in the conservatories and universities of those countries. From 1904 to 1907 he was choirmaster at Sainte-Clotilde, and in 1909 he succeeded Bourgault-Ducoudray as professor in the history of music at the Paris Conservatoire, a post which he held until his retirement in 1936.

Emmanuel as a composer is not unlike Busoni: in both a widespread reputation won in other fields delayed their recognition as remarkable, even revolutionary composers — ahead of their contemporaries not merely in understanding the problems of modern music, but in solving these problems in their compositions. For Emmanuel's creative imagination was never blunted or desiccated by his

<sup>1</sup> Reichenbach, 1924, etc.

<sup>2</sup> Lamp, 1935, *et al.*

<sup>3</sup> Strayer, 1939.

scholarly habits; and although his theories about rhythmic asymmetry and free modal cadences (as opposed to metrical and tonal squareness) were first laid down in his essays on the history of music, they sprang from the practical musician's most original approach to rhythm, harmony and form, by which his 'Sonatines' and 'Salamine' puzzled his first listeners and enchanted his first admirers. His principal compositions include:

- 'Pierrot peintre', operetta in 1 act (lib. by F. Régamey) (1886).
- 'Prométhée enchaîné', drama in 3 acts after Shelley (1916-18).
- 'Salamine', opera (lib. by Théodore Reinach, based on Aeschylus), prod. Paris, Opéra, 1929.
- Incidental music for Plautus's 'Amphitryon' (1936).
- 'Ouverture pour un conte gai' for orch. (1890).
- 'Zingaresca' for stig. orch. 2 pfs., 2 piccolos & kettle-drums (1902).
- Symphony No. 1 (1919).
- 'Suite française' for orch. (1925).
- Symphony No. 2, 'La Légende du roi Grallon' (1931).
- 'Trois Odelettes anacréontiques' for voice, flute & pf. (1911, orch. 1912).
- Vn. & pf. Sonata (1902).
- Cello & pf. Sonata (1887).
- 'Suite bourguignonne' for pf. (1893).
- 'Sonatine pastorale' for pf. (1897).
- Sonatas Nos. 3 & 4 for pf. (1920).
- Sonatas Nos. 5 & 6 for pf. (1925).
- 'In Memoriam Matris' & 'Musiques' for voice & pf. (1908).

This output, immense for a scholar much occupied with other matters, would in itself have been sufficient for one man's lifetime, but must not cause his work as a musicologist to be forgotten, since it includes the following important works:

- 'Histoire de la langue musicale', 2 vols. (1911).
- 'La Musique grecque antique' in Lavignac's 'Encyclopédie' (1911).
- 'Traité de l'accompagnement modal des psaumes' (1913).
- 'Trente Chansons bourguignonnes' (1913).
- 'La Polyphonie sacrée' (with Canon Moissenet) (1921).
- 'Pelléas et Mélisande' (1925).
- 'César Franck' (1930).
- 'Antonin Reicha' (1937).

Emmanuel also collaborated in the production of Vols. XVII and XVIII of the complete works of Rameau and edited a number of Bach's works for the clavier, including the Partitas, the Italian Concerto, the French and English Suites, etc. E. B. (ii), adds.

**EMMETT, Daniel (Decatur)** (b. Mount Vernon, Ohio, 29 Oct. 1815; d. Mount Vernon, 28 June 1904).

American musical entertainer. He was a "negro minstrel" (not a Negro), to whose lot it fell to write the music of 'Dixie', one of the most widely and lastingly beloved and most excellent of American popular tunes. In 1859 he was a member of "Dan" Bryant's Negro minstrel company then playing in New York, and he produced the tune there in the regular course of his profession as composer-in-

ordinary to the company. The song was first sung in Niblo's Garden and immediately became enormously popular. It was adopted in the southern States as a national air in the Civil War. Nothing else of Emmett's escaped immediate oblivion.

**"EMPEROR" CONCERTO.** This title for Beethoven's fifth pianoforte Concerto, Op. 73, in E♭ major, is current only in English-speaking countries. It is not known for certain who invented it, though J. B. Cramer is usually the suspect. The work was composed in 1809 and dedicated to the Archduke Rudolph. Friedrich Schneider played it at Leipzig in Dec. 1810 and Czerny gave the first public performance in Vienna in Feb. 1812.

W. M.  
**EMPEROR JONES (Opera).** See GRUENBERG.

**"EMPEROR" QUARTET.** The name by which Haydn's string Quartet in C major, Op. 76 No. 3, is known because the slow movement is a set of variations on the composer's hymn dealt with elsewhere.<sup>1</sup>

**EMPEROR'S HYMN, THE.** A hymn the words of which were written in Vienna in 1796 by Lorenz Leopold Hauschka during the patriotic excitement caused by the movements of the French revolutionary army. It was set to music for four voices by Haydn and first sung in the Austrian capital on 12 Feb. 1797, on the emperor's birthday. The process by which the melody is supposed to have been adopted and developed from a Croatian national song is set forth in detail in W. H. Hadow's 'A Croatian Composer' (1897)<sup>2</sup> Haydn afterwards employed it as the theme for

<sup>1</sup> See EMPEROR'S HYMN & NATIONAL ANTHEMS: AUSTRIA.

<sup>2</sup> Briefly, its remarkable resemblance to a folksong from the Becectrece (Bistritz) district of Croatia may be pointed out here:

It has given rise to much discussion, see for instance H. Riemann and F. Kuhač in the 'Allgemeine deutsche Musikzeitung', 1893, Nos. 40-42; also Hugo Conrat's article in 'Die Musik', 1 Jan. 1905, and 'Josip Haydn' by Dr. Kuhač O. Fleischer, while admitting the resemblance of Haydn's melody to the folksong, prefers to trace its origin back to the Church and quotes many examples of hymns which open with the same phrase as "Gott erhalte", e.g. from the Franciscan Requiem.

and a 'Stabat Mater' from Cantarium St. Gall, 1845 (see 'Zur vergleichenden Liedforschung', S.I.M.G., III, 2):

four variations in his string Quartet, Op. 76 No. 3, named "Kaiser" Quartet, the original opening words of the hymn being "Gott erhalte Franz den Kaiser". The hymn became the Austrian national anthem.

C. F. P., adds.

See also National Anthems (Austria).

**EMPFINDSAMER STIL** (Ger., from *Empfindung*, *Empfindsamkeit*=sensitivity). A musical style cultivated by early 18th-century German composers, particularly Carl Philipp Emanuel Bach and the Mannheim School. The German term has been retained by English musicians, not because it is untranslatable, but rather because it can be translated in two ways and is thus best retained in the original for the sake of its ambiguity; for it may mean "sensitive style" if taken seriously or "affected style" if regarded as representing a shallow and trifling phase of music.

**Empis**, A. J. *Simonis d'*. See Auber ('Vendôme', lib.).

**ENCHANTRESS, THE** (Opera). See BALFE.

**ENCINA**<sup>1</sup>, Juan del (real name Juan de Femoselle) (b. prob. Encinas nr. Salamanca, 12 July 1468<sup>2</sup>; d. prob. León, 1529<sup>3</sup>).

Spanish poet, dramatist and composer. He was the son of a shoemaker named Juan de Femoselle, and under that name he was a chorister at Salamanca Cathedral in 1484. He attended the University of Salamanca some time between that year and 1490, when he was *capellan de coro* at the cathedral, by that time using the name of Juan del Encina. Soon afterwards he became a member of the household of the Duke of Alba, at Alba de Tormes, where as master of ceremonies he produced a number of mystery plays in the duchess's private oratory. The first, a Christmas eclogue, was given there in 1492. The first edition of his poetic works, containing eight plays, was published at Salamanca in 1496<sup>4</sup>, and he himself says that most of his works, both in music and in verse, were written between his fourteenth and his twenty-fifth years. In 1498 he competed unsuccessfully for the post of choir-master of Salamanca Cathedral. This was obtained by his rival Lucas Fernández, and his failure was probably the cause of his leaving Spain. At any rate he was in Rome in 1500 in the retinue of Pope Alexander IV, from whom in 1502 he received a papal bull granting him the desired post at Salamanca, of which he endeavoured to take possession by proxy, only

<sup>1</sup> The name is also found in the form of Enzina, but if Encinas was his birthplace, this is untenable, unless that village also had the alternative spelling with a z.

<sup>2</sup> The matter of the birthplace and date is argued at some length by Gilbert Chase (see Bibl.).

<sup>3</sup> Certainly before 10 Jan. 1530, according to Chase.

<sup>4</sup> A second, containing two more plays, appeared in 1507.

to become involved in a long law-suit with Fernández. At length, in 1509, he was consoled with an appointment as archdeacon and canon of Málaga, where he arrived by the end of that year. But he was not at that time in full orders and seldom took his place in the Chapter. Between May 1512 and Aug. 1513 he paid another visit to Rome, with a third following in 1514-16. Early during that sojourn, in 1514, his Italian 'Farsa de Plácida e Vittoriano', in which he acted himself and parodied the Office for the Dead, attracted the attention of Pope Leo X and was published.<sup>5</sup> He was then promised the priorate of León, which however he did not obtain until Mar. 1519. Back at Málaga before May 1516, he was appointed in 1517 Sub-Colector de Espolios de la Cámara Apostólica by Leo X. After a shorter fourth visit to Rome in 1518 he obtained a (possibly non-resident) benefice at Morón in Feb. 1519, and by the following month he was established at León. It was then that he took full orders, and during a pilgrimage to the Holy Land he said his first mass at Jerusalem on 6 Aug. 1519. He returned via Venice and Rome, and in the latter city his 'Tribagia, o Via Sagra de Hierusalem' was published in 1521. He then retired to the enjoyment of his priorate, which he retained until his death.

There is no evidence that Encina was ever a singer in the papal choir or that he was professor of music in the University of Salamanca, as has sometimes been supposed. His work as poet and dramatist, author of *representaciones* and *eglogas* both sacred and secular, is well known to Spanish scholars. They have a peculiar interest for the musician in that the speeches alternated with song and that a considerable quantity of the music has been preserved and published. His musical technique shows the influence of the Flemish school, but has a curious directness of expression which distinguishes his work both from the Flemish composers' and that of the authors of Italian *frottole*. It is curious that all his known compositions should be secular, since the greater part of his life was spent in ecclesiastical surroundings. His music is to be found in Barbieri's 'Cancionero musical de los siglos XV y XVI' (Madrid, 1890). A facsimile of his Cancionero of 1496 was published by the Real Academia Española (Madrid, 1928). J. B. T., adds.

**ENCORE** (Fr. = again). The cry in English theatres and concert-rooms when the audience desires to have a piece repeated. It has taken the place of the "altra volta" of the 18th century, and was certainly in use as early as 1711, when Addison referred to it in 'The Spectator'. A song, 'The Bath Teasers', published in 1717, gives "ancore" as a common form of the word, thus showing it to have been in general use at that date. The French and Germans use the Latin term "bis", and the French have even a verb, "bissier". Similarly the English use "encore" both as a verb and a noun. For example *see* Mus. T., 1919, p. 61. "Le public anglais est grand redemandeur, et exprime son vœu par un mot français, comme nous par un mot latin" (A. Adam, 'Souvenirs', XXVII).

**ENESCO** (orig. *Enescu*), **Georges** (b. Dorohoiu, 19 Aug. 1881).

Rumanian violinist and composer. He was early discovered to possess great musical gifts. At the age of seven he entered the Vienna Conservatory, which he left in 1893, carrying with him the highest awards. He then went to Paris to finish his training (harmony and composition with Massenet, Gédalge and Fauré; violin with Marsick). After brilliantly taking a first prize for violin in 1899, he began a virtuoso career, pursued ever since with lasting success. He settled permanently in Paris, but in his compositions retained certain national characteristics, which make him a representative, in a somewhat conventional way, of the Rumanian school.

As a composer Enesco had his first 'Poème roumain' played at the Colonne concerts in 1898. His earlier works include music for the pianoforte ('Suite dans le style ancien', 'Deuxième Suite'), violin and pianoforte (two sonatas), for four or eight strings, for ten wind instruments, for orchestra ('Rhapsodies roumaines'), two symphonies ('Symphonie concertante'), songs, etc. In 1921 he began a

large dramatic work, 'Œdipe', to a libretto by Edmond Fleg based on Sophocles, of which fragments were performed at concerts. This music, full of strength, free from the influences of Brahms and Wagner which had hitherto marked him, takes its place as a work thoroughly Rumanian in character: it is national music in the true sense of the word. On 10 Mar. 1936 it was at last produced at the Paris Opéra.

Enesco's more recent compositions include a Sonata, a third Symphony, two orchestral Suites and two Intermezzi. In his later years he added an interest in teaching to his other activities, and Yehudi Menuhin, among others, owes to him a great part of his musical education.

**ENGEL, Carl (i)** (b. Thiedewiese nr. Hanover, 6 July 1818; d. London, 17 Nov. 1882).

German writer on musical instruments. He studied first with Enckhausen, an organist at Hanover, and afterwards received pianoforte lessons from Hummel; after adopting music as a profession, he for some time remained in the family of a nobleman in Pomerania. About 1844-45 Engel went to England and lived at first at Manchester, but removed soon after to London. He began by reading in the B.M. to prepare himself for those studies in musical history on which his reputation is founded, and became a collector of rare instruments and books, forming a private museum and library that could hardly be rivalled except by a few public institutions. The first-fruits of his archaeological studies were shown in the publication of 'The Music of the Most Ancient Nations, particularly of the Assyrians, Egyptians, and Hebrews' (1864), which was followed by 'An Introduction to the Study of National Music' (1866).

About that time began Engel's connection with the South Kensington (Victoria and

Albert) Museum, to which he gave valuable advice respecting the formation of the rich collection of rare musical instruments which is an important branch of that institution. His first public essay in connection with it was the compilation in 1869 of a folio volume entitled 'Musical Instruments of all Countries', illustrated by twenty photographs, a work now rarely to be met with. He compiled the catalogue of the loan collection of ancient musical instruments shown there in 1872 and followed it by a 'Descriptive Catalogue of the Musical Instruments in the South Kensington Museum' (1874), a masterpiece of erudition and arrangement, and the model for the subsequently written catalogues of the Paris and Brussels Conservatoires, and of the Kraus Collection at Florence. He resolved to complete this important work by an account of the musical instruments of the whole world, and wrote a book which, in manuscript, fills four thick quarto volumes, and is illustrated by upwards of 800 drawings. It remained in the hands of his executors.

Among Engel's miscellaneous writings are a contribution to 'Notes and Queries' on anthropology, pp. 110-14 (1874), 'Musical Myths and Facts' (1876), and articles in *Mus T.*, from which 'The Literature of National Music' (1879) is a reprint. Among these articles the descriptions of his four clavichords possess an unusually lasting interest and value. They were published in July-Sept. 1879, and were followed by 'Music of the Gipsies', May-Aug. 1880, and 'Æolian Music' Aug. and Sept. 1882. A posthumous publication of considerable importance is 'Researches into the Early History of the Violin Family' (1883).

After the death of his wife in 1881 Engel thought of living again in Germany and sold his library by public auction, while the more valuable part of the musical instruments (excepting his favourite harpsichord, clavichord and lute, now in private possession and in the R.C.M.<sup>1</sup>) was acquired by South Kensington Museum. But after a short visit to Hanover he returned to England and died at his house in Addison Road, Kensington.

A. J. H., abr.

**ENGEL, Carl (ii)** (b. Paris, 21 July 1883; d. New York, 6 May 1944).

German-American musicographer and editor. He was a great-grandson of Josef Kroll, founder of Kroll's Etablissement in Berlin, and grandson of J. G. Engel, who made the Kroll Opera internationally famous. He was educated at the Universities of Strasbourg and Munich and studied composition at Munich with Thullie. He went to the U.S.A. in 1905 and became a citizen of that country.

<sup>1</sup> Those which are in the possession of the R.C.M. were presented after the death of A. J. Hipkins.

From 1909 to 1921 he was editor and music adviser of the Boston Music Company, and in 1922 he was appointed chief of the music division in the Library of Congress at Washington, retaining the post until 1934, when the Library made him Honorary Consultant in Musicology.

In 1929 Engel succeeded Sonneck as editor of 'The Musical Quarterly' and was invited to become president of G. Schirmer, Inc., the music publishers. He was the first chairman of the Committee on Musicology of the American Council of Learned Societies and in 1935 became vice president of the Friends of Music in the Library of Congress, also one of the organizers of the American Musicological Society and its president in 1937-38. In 1934 he received the honorary degree of Doctor of Music from Oberlin College.

Engel published many articles (chiefly in 'The Musical Quarterly') and two books, 'Alla Breve' (1921) and 'Discords Mingled' (1931). His annual reports, during his incumbency in Washington, set a standard in "statistics made readable". He contributed to Guido Adler's 'Handbuch der Musikgeschichte' in 1924. His 'Triptych' for violin and pianoforte (1920) was performed in New York, Chicago, Boston, London, Berlin, etc. His other compositions include works for violin, instrumental and choral transcriptions, and many songs, including 'Sea Shell' and 'A Sprig of Rosemary'.

G. R., abr.

**ENGEL, Hans** (b. Cairo, 20 Dec. 1894).

German musicologist. He studied under Klose and others at the High School for Music at Munich and under Sandberger at the University, where he took the Ph.D. degree in 1924. He was conductor at Munich in 1924-1926, lecturer in musicology at Greifswald University from 1926 to 1932, when he became professor there. In 1935 he was appointed professor at Königsberg, as well as director of the University Institute of Musical Education and Church Music; and in 1946 he took on a professorship at Marburg University. Among his publications are the following:

#### BOOKS

- 'Die Entwicklung des deutschen Klavierkonzertes von Mozart bis Liszt' (Leipzig, 1927).
- 'Das Instrumentalkonzert' (Kretzschmar's 'Führer der Orchestermusik', III) (Leipzig, 1932).
- 'Franz Liszt' (Potsdam, 1938).
- 'Deutschland und Italien in der Musikgeschichte' (Rastatt, 1944).
- 'Joh. Seb. Bach' (Berlin, 1947).
- 'Geschichte der Musik' (Wolfenbüttel, 1948).

#### ARTICLES

- 'Klaviermusik in nordischen Ländern' ('Nordische Rundschau', Berlin, 1933).
- 'Marenzios Madrigale und ihre dichterischen Grundlagen' ('Acta musicologica', Copenhagen, 1937).
- 'Über indische Musik' (A.M.F., Leipzig, 1938).
- 'Richard Wagners Ring des Nibelungen und Versuche seiner Sinndeutung' ('Geistige Arbeit', Berlin, 1941).

'Mozarts Jugendsinfonien' ('Deutsche Musikkultur', 1941).

## EDITIONS

- Marenzio, Motets (Vienna, 1926).  
 Marenzio, Villanelle (Cassel, 1928).  
 'Denkmaler der Musik in Pommern': works by Johann Vierdanck and Andreas Fromm (Cassel, 1930-35).  
 'Muscomastix eine Komodie von dem Music Feinde von Elias Herlitz, 1606' (Cassel, 1936).  
 Kugelmann, Paul, '7 Deutsche Liedlein' (Königsberg, 1937).  
 Kugelmann, Hans, 'Concentus novi trium vocum, 1540' (Cassel, 1938).  
 'Hochzeitsarien und Kantaten Stettiner Meister' ('Erbe deutscher Musik', 1939).

E. B.

**ENGEL, Lehman** (b. Jackson, Mississippi, 14 Sept. 1910).

American conductor and composer. He studied at the Conservatory of Cincinnati and at the Cincinnati College of Music, and in 1929 went to New York, where he did further work at the Juilliard Graduate School with Rubin Goldmark. Later still he worked with Roger Sessions.

Engel has been active most of his life in "functional" music, in the theatre and in films. He began his career by conducting the American première of Kurt Weill's 'Der Jasager'. He also directed the Broadway run of Weill's 'Johnny Johnson' in 1937, the production of Aaron Copland's children's opera 'The Second Hurricane' in 1937, while from 1936 to 1939 he was in charge of a W.P.A. project, The Madrigal Singers.

Engel is one of the best-known American writers of incidental music for the theatre and has written music for innumerable productions, such as Maurice Evans's 'A Hero is Born', T. S. Eliot's 'Murder in the Cathedral', Dekker's 'The Shoemaker's Holiday', Robert Ardrey's 'Thunder Rock', Barrie's 'A Kiss for Cinderella', Shakespeare's 'Henry VIII', etc. He has also composed music for dancers such as Martha Graham, Chas. Weidman, etc.

Other works of importance are:

- 'Medea', opera, after Euripides (1935).  
 'Scientific Creations', ballet (1932).  
 'Traditions', ballet (1938).  
 Symphony No. 1 (1939).  
 Symphony No. 2 (1945).  
 Overture (1945).  
 'The Creation', for narrator & orch. (1945).  
 Vn. Concerto (1945).  
 Sonata for cello & pf. (1945).  
 Pf. Sonata (1937).

**ENGELBERTA, OSSIA LA FORZA DELL' INNOCENZA.** See ZENO.

**ENGELMANN, Georg** (b. Mansfeld, ?; d. ?).

German 16th-17th-century organist and composer. He studied at Leipzig in and about 1616 and was organist of St. Thomas's Church there in 1631. He published 5 books of pavans, galliards, courantes (1616-22), remarkably

developed; also vocal music (1596-1631).

E. v. d. s.

**ENGLAND.** English 18th-19th-century organ builders, father and son. The elder, George England, flourished between 1740 and 1788 and married the daughter of Richard Bridge; the younger, George Pike England, worked between 1788 and 1814. The former is believed to have been trained by the younger Harris and to have lived in Hand Court, Holborn, London, in 1748. He built many noble organs, including those in Dulwich College Chapel and St. Stephen's, Walbrook; and his son provided organs for the parish churches of Newark, Sheffield, Gainsborough and Margate. None of these is now in existence in the original form. v. de p., adds.

**ENGLEBERT OF ADMONT (Engelbertus Admontensis)** (b. ?; d. Admont, Austria, 1331).

Austrian (?) musical theorist. He studied at Padua and became a Benedictine monk. When he died he was Abbot of the Benedictine monastery of Admont. His treatise 'De musica', printed in Vol. II of Gerbert's 'Scriptores . . .', contains material for the history of medieval music.

**ENGLISH CONSORT OF VIOLS, THE.**

This body of players was formed in 1935 for the purpose of giving public performances of the chamber music of the period 1550 to 1750, with special attention to the concerted music for viols by the English composers. It consisted of five permanent members, Elizabeth Goble, Margaret Donington, Robert Donington, Richard Nicholson and Marco Pallis, each of whom had had from twelve to fifteen years' previous experience in association with Arnold Dolmetsch, to whose pioneer work the English Consort acknowledges its debt. The members believed that such music can be appreciated at its true value only when it is interpreted in keeping with its period and played upon the instruments for which it was written, with their correct technique: they aimed at perfecting their team-work by constant association, at exhaustive preparation of each work produced and at selecting for performance only compositions of the highest merit.

The English Consort based its repertory, therefore, on this residue, with the object of restoring these works to a permanent place in the general corpus of chamber music. After nearly three years of preparatory work the English Consort of Viols gave its first London recital at the Wigmore Hall in Feb. 1938, when its musicianship and technical proficiency established its position as an authoritative exponent of early instrumental music.

**ENGLISH FOLK DANCE AND SONG SOCIETY, THE.** In 1932 the Folk Song Society, founded in 1898, and the English Folk Dance Society, founded in 1911 by Cecil Sharp, joined forces, largely at the instigation of Dr. Vaughan Williams, who held office in both societies. On amalgamation the joint society adopted the name of the English Folk Dance and Song Society and in 1934 was incorporated under the Companies Act 1929.

By the time (1926) that Lucy Broadwood relinquished the editorship of the 'Folk Song Journal' the Folk Song Society found that its principal work, that of collecting and preserving in print the surviving traditional airs of England, had been virtually accomplished. The English Folk Dance Society, under the vigorous leadership of Douglas Kennedy, who on Sharp's death in 1924 had become its director, was an active propagandist and educational body that had established branches all over England, had made contacts with similar societies and with traditional dancers in many European countries, and was developing the artistic policy that had been laid down by its founder. The new society therefore was able to pursue with increased confidence the three aims of art, science and amenity.

The building of Cecil Sharp House in London, near Regent's Park, in 1930 as a memorial to one who had worked equally in the fields of dance and song provided the E.F.D.S.S. with headquarters which not only house a valuable library and an organization for linking up English folk dances at home and abroad, but contains a hall and classrooms where many kinds of traditional art are practised. Conferences, lectures and recitals on folk customs, balladry and folk music are arranged; festivals of folksong and displays of the three forms of English traditional dancing, Morris, Sword and Country dancing, are held; and such kindred arts of drama, ballet and costume as impinge on the main objects of the Society find a legitimate place in the activities of Cecil Sharp House. The editorial policy of the 'Journal' has been enlarged to include a liberal study of these subjects in its new form as the 'Journal of the English Folk Dance and Song Society', first edited by Frank Howes.

The international side of the Society's work is an important development since Sharp's death. From 1927 to 1939 an annual festival was held in London, at the Albert Hall at the New Year. To these festivals one or more teams of foreign dancers were always invited.

By 1935 it was plain that the time was ripe for something on a more ambitious scale, and a great festival was held in London to which seventeen European countries sent 515 dancers, exclusive of England. A whole week in July was given up to indoor and outdoor performances of a bewildering variety of national and traditional dances and to daily conferences on subjects connected therewith.

The second world war inevitably saw curtailment of these many activities at headquarters, though new openings were found in the country at large. The director departed for service in the R.A.F. and Cecil Sharp House suffered great damage from a bomb; but the organization was kept in operation and the 'Journal' continued to be issued annually. With the return of the director after the war the scope of the work was again increased to cover American square dancing, the constitution was raised to link the branches more closely with the parent body and a Patron was found in H.R.H. Princess Margaret.

Frank Howes relinquished the editorship of the 'Journal' after nineteen years and was succeeded in 1945 by Miss M. Dean-Smith, who was also appointed librarian. The work of the library was developed and the scholarly side of the work was extended in co-operation with the extra-mural departments of London and provincial universities. The annual festivals at the Albert Hall were resumed and the Society participated in a festival and congress of the folk music and dances of the British Isles organized by the Scottish Anthropological and Folklore Society in 1948.

Two bodies which have an independent existence, but owe their parentage to the E.F.D.S.S. are the Morris Ring, an all-male organization designed to foster the traditional practice of morris dancing, and the International Folk Music Council, founded by Miss Maud Karpeles in 1947, which derives from the international festival held in London in 1935.

**ENGLISH GUITAR.** An 18th-century descendant of the cittern, similar in shape but with a deeper body and fewer frets; the back is parallel with the belly. It had six courses of strings, tuned c e g c' e' g'. Each of the four highest courses consists of a pair of strings. It appeared at least as early as the 1740s and it became an increasingly fashionable dilettante instrument as the century wore on. Burney's story in Rees's 'Cyclopaedia' is well known, telling how Kirkman restored the popularity of the harpsichord by buying up large numbers of English guitars and selling them at a bargain price to ladies' maids. Various improvements,

chiefly in the tuning mechanism, were made between 1780 and 1810; some makers incorporated a miniature keyboard controlling six hammers for striking the strings (keyed guitar). The instrument went out of fashion in the early years of the 19th century.

A vast number of 18th-century song-sheets include an arrangement at the foot of the page for (English) guitar; some more serious music exists, by Gemmiani and F. Giardini (1716-1796).

**ENGLISH HYMNAL, THE.** Desire for reform in the hymnody of the Church of England prompted the publication by the Oxford University Press of 'The English Hymnal' at the beginning of the century. Its general editor was the Rev. Percy Dearmer; its musical editor R. Vaughan Williams. The book was put forward as a "humble companion to the Book of Common Prayer", which meant that its arrangement, according to the seasons of the Christian year, saints' days and other holy days, sacraments and other rites, was designed to follow the English calendar and to accord with the Anglican liturgy. Special attention was paid to the revival of the office hymns of the ancient Sarum use with their plainsong melodies. These facts, together with the known proclivities of its general editor at the time, gave it an immediate acceptance among the High Church party in the Church, but its preface disclaimed any desire to offer it as "a party book". A wide eclecticism was shown in the inclusion of hymns written for all sorts of religious exercises by men of widely different schools of thought. Its music was no less eclectic, and its musical editor's personal taste was reflected chiefly in a liberal use of folk melody. Half a century's experience of its qualities have made 'The English Hymnal' the principal companion to 'Hymns Ancient and Modern'. Many English churches still use one or other exclusively, but, while congregations are generally supplied with only one, it is not infrequently found that the choir library contains both, in order that favourite tunes from the one may be sung with the hymns of the other. The taste of English congregations in hymns, and still more in hymn tunes, is notoriously conservative.

In 1933 a second edition of 'The English Hymnal' was issued which made considerable musical revision in two directions. The accompaniments to all the plainsong melodies were rewritten in accordance with principles laid down by J. H. Arnold, who took charge of this part of the work. Those of the first edition had been written on the plan of one chord to a

note of the plainsong, which modern taste rejects as unsuitable to the free character of the melody. A quotation from the setting of the first hymn in the book, 'Creator of the stars of night' ('Conditor alme siderum'), will best show the difference of style in accompaniment:

Space was also found in the second edition for over a hundred tunes, many of them new, not formerly included. Those tunes which they replaced were relegated to an appendix. Many of the new tunes were those which had already appeared in 'Songs of Praise'. H. C. C.

See also Songs of Praise.

**ENGLISH MADRIGAL SCHOOL, THE.** The first complete edition of the English madrigals (1588-1624). The whole was transcribed, scored and edited from the original partbooks by Edmund H. Fellowes, and published by subscription (Stainer & Bell, London) between the years 1913 and 1924. The reliability of its text makes it invaluable to students. The publication marks and, indeed, has been largely responsible for a widespread revival of these works in practical performance. Fellowes, both in his general preface and in his editorial method, has insisted on the necessity for interpreting madrigals according to phrase-rhythms. For this reason he has used irregular barring. Each of the madrigals in these 36 volumes is obtainable separately.

Vol.

- I. Part I. THOMAS MORLEY, 'Canzonets to two voices' (1595).
- Part II. THOMAS MORLEY, 'Canzonets to three voices' (1593).

 XXXV. Part I. ROBERT JONES, 'Madrigals of three four, five, six, seven and eight parts' (1607)  
 Part II. JOHN MUNDY, 'The madrigals in his Songs and Psalms composed into 3, 4 and 5 parts' (1594)  
 XXXVI. Madrigal writings of MICHAEL CAVENDISH (1598); THOMAS GREAVES (1604); WILLIAM HOLBORNE (1597), etc.

H. C. C.

**ENGLISH MUSICIANS ABROAD** (c. 1575-c. 1625). During these fifty years English music reached one of its greatest heights. While the influence of Italian music on its development was very considerable, it is nevertheless true to say that the English music of this period was no mere shadow of Italian taste and technique, but had a character of its own; in many fields, notably those of keyboard music, the viol fantasy, dance music for instrumental consort and music for broken consort, English composers attained an eminence without parallel in all Europe. The musical connoisseurs of north-western Europe were well aware of this, either by hearsay or by actual experience of the music in performance, and the resulting fashion for English music, though short-lived, left many traces on continental music and musicians of the time. Many English composers lived and worked on the Continent, particularly in Germany, Den-

mark and the Low Countries. Some were Catholics in enforced or voluntary exile; others were Protestants, employed by Protestant courts and corporations. Some spent most of their lives abroad; others stayed away from England only for short periods.

This article is concerned with the lesser figures alone, men of whose achievements and lives mere fragments are recorded. Accounts of the principal musicians will be found under their names.<sup>1</sup>

The fashion for English music and musicians originated from the influence of the companies of English actors and jugglers that began to travel over northern Europe towards the middle of the 16th century. Such companies are often mentioned in the account-books of the Prussian court between 1556 and 1584. Companies visited places as far apart as Vienna, Königsberg, Rostock, Utrecht, Münster, Bergen, Lübeck, Augsburg, Cassel and Copenhagen, setting up their makeshift stage in the market place and acting jugs—the half-mime, half-burlesque improvised folk plays of the 16th century—enlivened with interludes by dancers, jugglers and musicians.<sup>2</sup> Many of the plays were in doggerel verse made to fit various contemporary English folk tunes: 'Roland', 'Fortune', 'Pickled Herrings', and so on.

Some of these companies of "English Comedians", as they were called, settled in Germany *en bloc*: Maurice, Landgrave of Hesse, had a resident company at Cassel from 1594 onwards, for instance, and it was almost certainly their music that Praetorius had in mind when he wrote so enthusiastically of the "quiet, soft and lovely" sound of a broken consort, "as the English call it". Other companies merely visited the Continent, and these are often misleadingly referred to in contemporary records as "musicians", though in fact they were primarily actors. Such a company was the Earl of Leicester's, visiting Copenhagen in 1586 and moving on to Elsinore and Saxony before returning home. The company, headed by the famous Will Kemp, took away with them from Copenhagen four comedians who had held appointments there since 1579, named John Croft, John Pearson, John Kirk and Thomas Bull. Richard Machin, at Cassel in 1600-5; Robert "Fassen", Olivier, John and Thomas Roberts, and "Rutschert" (? Rogers, ? Richard) at Oldenburg at various dates between 1618 and 1645; John Webster and Richard Browne, visiting Cassel in 1596 in the train of the Earl of Lincoln; Henry Jordan, in Berlin in 1572 and becoming

<sup>1</sup> See BRADÉ (William), BULL (John), CUTTING (Francis), DOWLAND (John), DOWLAND (Robert), MAYNARD (John), NORCOMB (Daniel, i & ii), PHILIPS (Peter), PRICE (John, i & ii), ROBINSON (Thomas), ROWE (Walter, i & ii), SIMPSON (Thomas).

<sup>2</sup> For further details see JRG.

a naturalized German in 1585, Francis Hedgman, leaving Cassel for Gottorp in 1624, but staying there only two years; Christopher Gregory, at Gottorp in 1624-25: these are the names of some of the Englishmen who performed English plays, sang English songs, danced English dances and played English music on the Continent. Some of these lesser men seem to have been composers in their own right; there is a pavan by Machin, for instance, in the *Thysius* lute-book. Most of them were only players, in both senses of the word; but there is no doubt that they were responsible for the inclusion of English dances in such collections as Hesse's '*Viel feiner lieblicher stucklein*' (1555) and Schmid's organ-book of 1577.

Many of the English musicians living abroad seem to have been proscribed Catholics, forced to leave England to escape arrest. Among these were John Bolt of Exeter, one of the beneficiaries of Sebastian Westcote's will, warrants for whose arrest were issued in 1593-94; Nicholas Morgan, countertenor and Gentleman of the Chapel Royal in 1567, who left for Paris in 1582, travelling via Rouen and Rheims, stayed there as a member of the *Sainte-Chapelle* choir until 1586, returned to England in 1591, entered the Jesuit College at Saint-Omer in 1595, was ordained in 1605, became organist of the convent of Benedictine nuns in Brussels (1608-11) and then moved to Louvain, where he became organist to the convent of Augustinian nuns (1612 to his death on 3 Aug. 1640); Thomas (? Richard) Morris, another Gentleman of the Chapel Royal, who left for Rouen in 1582 and had reached Rome by 1595; and perhaps also John Cowden, an expatriate Englishman living at Venice, six of whose madrigals were published there in collective volumes between 1598 and 1604.

By the early years of the 17th century the fashion for English musicians was at its height. Brade, Bull, Cutting, both Dowlands, the Norcomes, Peter Philips, the Prices, the Rows and Thomas Simpson were nearly all of them making their livings abroad. William Burt, cornettist, was in the service of the Duke of Lorraine in 1604-8; the court dancing-master at Copenhagen in 1601 was the Englishman Henry Sandam; John Jordan, a "music-player from London", lived at Leyden in 1608; lute-books like those of *Thysius*, *van den Hove* (1601 & 1612), *Besardus* (1603), *Fuhrmann* (1615), *Vallet* (1618 & 1619), and the manuscript lute tablatures in libraries at Berlin and Leipzig, contain quantities of English dances and fantasies. Copies of Morley's madrigals found their way to places as remote as Riga and Königsberg; the owner of a castle in Saxony bought six books of lute songs by Dowland and Jones in 1630, as well

as two copies of Dowland's '*Lacrimae*'. Some of Morley's canzonets and ballets were reprinted in editions by Staricius (1609), Haussmann, Praetorius and Friderici, and his '*Plaine and Easie Introduction*' was translated into German by Caspar Trost. Dance collections published in north-west Germany, like those of *Fullsack-Hildebrand* (1607 & 1609) and *Simpson* (1611 & 1621), include music by Bateman, Chezam, Dowland, Farmer, Ferrabosco, Harding, Holborne, Edward and Robert Johnson, Phillips, Shirley, Tomkins, Webster and others. Otto's collection of 1611 consists of music "in the English style", even though Otto himself was a German, and minor German composers like Grep, Schop and Lechner follow English models very closely. The English traits in the instrumental music of men like Scheidt, Schein and Sweelinck need no stressing.

With the outbreak of the Thirty Years' War much of Germany's flourishing musical life withered away, and the names of English musicians appear with increasing rarity in contemporary records. Some were working outside the main area of conflict; Darby Scott, the court harpist at Copenhagen from 1621 until his death in 1634, is one of them. Others flit from place to place as the war swirls on: John Stanley, violist at Copenhagen in 1620-21, in Berlin from 1628 to 1631, safely at Cassel from 1631 until his death (he was almost certainly the father of J. G. Stanley, a member of the court band of the Duke of Slesvig in 1665); Valentine Flood, in the service of the Elector of Brandenburg in 1627 and at Danzig in 1634-37 (one of two English violists there in 1637); John and David Morell, and Clement Dixon, who formed a team with John Price the elder in 1625 and were appointed to the Saxon court at Dresden in 1629 (John and Clement Dixon were still there in 1632-36). And some are mere names. Who was the sergeant-major Kennedy who composed a coranto found in Berlin State Library MS 40316 (c. 1620)? Who was William Brown, some of whose music is found in the same Berlin manuscript and also in Liège University MS 888? And who was the solitary English musician at Weissenfels in 1645? Questions like these may never be answered.

R. T. D.

**ENGLISH OPERA GROUP, THE.** An association of a somewhat exclusive nature, but registered as a non-profit-making company limited by guarantee, formed in 1947 by the composer Benjamin Britten, the author Eric Crozier and the painter John Piper for the purpose of producing chamber opera of an experimental nature. A distinguished board of directors was assembled under the chairmanship of the Rt. Hon. Oliver Lyttelton, D.S.O., M.C., M.P., and the three founders

became artistic directors. Several conductors, producers, writers and designers were engaged, together with an excellent small company of singers and a highly accomplished chamber orchestra. The repertory began by being confined to works by Britten, his 'Rape of Lucretia' (1946) being drawn into it and his 'Albert Herring' (1947) specially written for it. Even when a new version of 'The Beggar's Opera' was added in 1948, it turned out to amount almost to a new Britten work, and Purcell's 'Dido and Aeneas' was edited by him. But more comprehensive plans were made later, and the English Opera Group has appeared with success in many places in Great Britain, including some where opera cannot be said to have been at home, and it has also visited the Lucerne Festival, the Holland Music Festival, and has taken part in other musical functions abroad.

E. B.

**ENGLISH SCHOOL OF LUTENIST SONG-WRITERS, THE.** This comprehensive edition of the solo songs with lute accompaniment of John Dowland and his contemporaries was undertaken by Edmund H. Fellowes, and began to be published by Winthrop Rogers of London in 1920. After the first eleven volumes had appeared the publication was transferred to Stainer & Bell, Dr. Fellowes remaining sole editor.

The edition has now been arranged in two series, the first of which was completed in 1924. In the first series each song is printed in two versions:

(1) In its original form and key, together with the lute tablature and an exactly literal translation of the tablature retaining the original barring.

(2) With the lute accompaniment adapted for use on a modern pianoforte with the addition of expression and tempo marks and occasional transposition. In this version the words of stanzas subsequent to the first are fitted to the music.

In the second series only one version is given. In this the original key is retained and an exactly literal translation of the tablature is printed as the only accompaniment. As in the original editions, the first verse alone is set out with the music, the complete poem being printed at the foot of the page. The original barring is not always followed, but the method of free barring is retained by the editor. Some suggestions as to tempo and expression are inserted. Neither series includes the arrangements for four voices published as alternative versions in some of the original books.

The contents are as follows:

#### FIRST SERIES

JOHN DOWLAND, 'First Booke of Songes or Ayres' (1597, 2 vols.).

'Second Booke of Songes or Ayres' (1600, 2 vols.).

'Third Booke of Songes or Ayres' (1603, 2 vols.).

'A Pilgrime's Solace' (1612, 2 vols.), including (Vol. II) 'Three Songs', published in Robert Dowland's 'A Musically Banquet' (1610).

THOMAS FORD, 'Songs in Musike of Sundrie Kindes' (1607, 1 vol.).

FRANCIS PILKINGTON, 'First Booke of Songes and Ayres' (1603, 2 vols.).

PHILIP ROSSETER and THOMAS CAMPIAN, 'A Booke of Ayres' (1601). The first half by Thomas Campian, 2 vols., the second half by Philip Rosseter, 2 vols.

THOMAS MORLEY, 'First Booke of Ayres' (1600, 1 vol.).

#### SECOND SERIES

THOMAS CAMPIAN, 'First Booke of Ayres' (undated).

'Second Booke of Ayres' (undated).

'Third Booke of Ayres' (undated).

'Fourth Booke of Ayres' (undated).

ROBERT JONES, 'First Booke of Songes and Ayres' (1600).

'Second Booke of Songes and Ayres' (1601).

'Ultimatum Vale, or Third Booke' (1608).

'A Musically Dreame, or Fourth Booke' (1609).

'The Muses Gardin for Delights, or the Fifth Booke' (1610).

**ENGLISH SINGERS, THE.** A group of six singers formed in London, whose special province has been the principles of vocal teamwork in the performance of the English madrigals. Their first concert in London (28 Feb. 1920) was given by the group without a name. The first foreign tour was to Prague in Jan. 1922, on the invitation of the Czechoslovak Ministry of Education, for a series of British concerts conducted by Adrian Boult. In Apr. 1922 concerts were given in Berlin, Prague and Vienna, and in Apr. 1923 a more extended tour in Czechoslovakia and Berlin, with a tour in Holland in the autumn of the same year. The original English Singers were Flora Mann, Winifred Whelen, Lillian Berger, Stuart Wilson, Clive Carey and Cuthbert Kelly. In addition to their special study of the English madrigals they were the instruments of propaganda abroad for the unaccompanied music of Vaughan Williams, particularly his folksong settings. The importance of their work lay in its exact coincidence with the republication of the text of so much English vocal music of the 16th-17th centuries, after the style and knowledge necessary for the performance of it had been rediscovered.

In Oct. 1924 the group was reconstituted to consist of Flora Mann, Nellie Carson, Lillian Berger, Norman Stone, Norman Ntley and Cuthbert Kelly. This group made the first tour in the U.S.A., on the invitation of Mrs. Coolidge, in 1925.

<sup>1</sup> The last seven of the twenty-one songs and the final pavan and galliard are missing from the only known original copy of this song-book. After its publication by Stainer & Bell, two of the missing songs (Nos. 17 and 18) were found by Dr. Fellowes in the Ch. Ch. Library, Oxford (MS 439), edited by him and published by the same firm.

In Oct. 1932 the group was again reformed, the members being Dorothy Silk, Nellie Carson, Mary Morris, Eric Greene, Peter Pears and Cuthbert Kelly. The name was changed to The New English Singers. Annual tours in America and more occasional ones in Europe (notably one in 1936 under the auspices of the British Council) have been undertaken with unabated success.

H. C. G.

See also English Madrigal School

**"ENGLISH" SUITES.** Bach's six suites for harpsichord composed about 1725 and so called probably because they have long preludes for their first movements, as his six "French" Suites have not. Such preludes seem to have been regarded as an English peculiarity of the suite form, possibly on the evidence of Purcell's suites or "lessons".

**ENGLUND, Einar** (b. Gothland, Sweden, 17 June 1916).

Finnish pianist and composer. He was a pupil of Carlson and Palmgren for composition, Paavola and Linko for the pianoforte and Funtek for orchestration at the Sibelius Academy of Helsingfors from 1933 to 1941. In 1949 he visited the U.S.A., where he worked with Aaron Copland, from whom he doubtless acquired the somewhat American tone of his compositions, which however also show Russian leanings. His orchestral poem 'Epinikia', composed for the Finnish Games in Helsingfors in 1947, was awarded the first prize there and also obtained honourable mention at the London Olympic Games the following year. He is one of the most promising Finnish composers of his generation.

The following are Englund's other principal works:

Incidental music for 'The Chinese Wall' (1949).  
Symphony No. 1, A mi. (1946).  
Symphony No. 2 (1946).  
P.E. Concerto (1951).  
Quintet, F mi., for 2 vns, viola, cello & pf (1941).  
Sonata for vn. & pf., A mi.  
P.E. pieces.

A. R.

**ENGRAVING.** The modern process by which the greatest bulk of printed music is issued to-day is this:

The stave lines are first cut on a pewter plate, then a series of small steel punches are used for striking the notes and lettering, the graver being employed in such parts (such as tied stems and slurs) as cannot be reduced to standardized shapes, as well as for the title-page. Proofs are pulled by an ordinary copper-plate press, and corrections can be easily made on the plates. For the final printing a copy in transfer ink is placed on a lithographic stone, from which the entire edition is worked, leaving the plates for future use, and with the exception of the lithographic part (which nowadays embodies the use of photography and machine plates of metal in place of the

"stone") this process has remained exactly the same for a couple of centuries.

**EARLY ENGLISH ENGRAVING.**—While the arts of engraving and etching for pictorial purposes had attained a high degree of perfection during the 17th century, it is singular that so obvious a method and so superior a one to that where the clumsy music typography of the day was employed should have been so seldom used. The first music (of which we have record) printed in England from plates is either 'Parthenia' (c. 1613) or Orlando Gibbons's 'Fantazies of III. Parts' for viols. The date of this latter work has been fixed at 1606, 1609 and 1610, but there is no definite evidence for any of these dates, although the probability is that the work was published before 1611. Both 'Parthenia' and the 'Fantazies' were reprinted several times from the same plates.

It has been stated that the first English printed plate music occurs in 'The Noble Arte of Venerie or Hunting' by George Turberville, imprinted by Henry Bynemann for Christopher Barker, c. 1575, 4to (second ed. 1611), where a short passage—notes for the hunting-horn—occurs. But it is probable that in both editions it has been printed from a raised surface, possibly a woodcut, for the work is freely adorned with these.

In 1683 Thomas Cross began to engrave, and he soon made a revolution in English music publishing. After 1695 it was the rule rather than the exception to issue music from plates. About that time the Dutch appear to have found out a method of softening copper, so that the notes could be readily stamped on the plate. Early in the 18th century pewter began to take the place of the more expensive metal, and engraving was superseded by stamping.

John Walsh and John Hare are stated to have introduced the process of stamped pewter plates into England about 1710, but the date is uncertain, although there is evidence that they were using this metal in 1724.

It has been said that Cross (except in his very early work) did much of his engraving on either zinc or pewter, and probably used in some cases the etching-needle and acid; but this use of zinc and pewter is questionable, as throughout the period of his working his productions were frequently advertised as being on copper plates. It may be pointed out that in engraved music the quavers and semi-quavers were joined in groups as in the manuscripts of the day, while in music typography of the same period before the introduction of the "tied note" they were separate.

In many cases of firms who advertised as engravers, or published engraved music, it is not known who actually did the work, but the following are the names of some who,

besides Thomas Cross, appear to have been practical engravers, with the approximate dates when they are known to have been working on music:

William Hole, 1613; Robert Hole, 1614; T. Greenhill, 1679-88; Robert Thornton (Dublin), 1685-86, R. Brett, 1692; Luke Pippard, 1709-12 (formerly an apprentice of John Walsh, the elder); Thomas Atkins, 1720-32; William Smith, 1720-63 (formerly an apprentice of John Walsh, the elder); Thomas Cobb, 1723-36 (worked for John and Elizabeth Cluer, 1723-30); Richard Cooper (Edinburgh), 1725-64; B. Fortier, 1736-40; George Bickham, the elder and the younger, 1737-54; Henry Roberts, 1737-65; Benjamin Cole, 1738-60; John and Sarah Phillips, 1740-75; Michael Broome (Birmingham), 1744-59; James Read (Edinburgh), 1756-72; Thomas Phinn (Edinburgh), 1757-1787; Richard Alderman, 1760-65; Thomas Baker, 1762-70; John Caulfield, the elder and the younger, Joseph Caulfield, and Henry Caulfield, 1765-1808 (John Caulfield, the elder, was formerly an apprentice of John Walsh, the younger); James Johnson (Edinburgh), 1772-1811; James Kempson (Birmingham), 1774-80; Thomas Skillem, the elder, 1777-1802 (formerly partner with Thomas Straight, 1766-77, and at one time employed by John Walsh, the younger); Thomas Straight, 1777-96 (formerly partner with Thomas Skillem, 1766-1777, and at one time employed by John Walsh, the younger); J. B. Scherer, 1780-1801; S. Straight, 1790-1820; George Walker (Edinburgh), c. 1790 ff.; Robert T. Skarratt, 1791-1839

The following fairly comprehensive short title-list of English music books, issued before 1700, in which the music was from engraved plates, does not include works by Walsh and Hare (1695 ff.) and John Young (1699 ff.), practically all of whose publications were engraved, this practice being generally followed by their contemporaries, and throughout the 18th century. Quite a number of other 17th-century works, copies of which have not survived, may also have been engraved, and in addition to the books listed innumerable engraved sheet-songs were issued by Cross, Heptinstall, Henry Playford, Robert Thornton and others:

Gibbons, Orlando, 'Fantazies of III Parts' (c. 1606-1610, no imprint. Reprinted twice, 1620-30, London, At the Bell in St. Paul's Churchyard.)

Byrd, William, Bull, John, Gibbons, Orlando, 'Parthenia or the Maydenhead of the first Musick that euer was printed for the Virginals . . . Ingrauen by William Hole.' G. Lowe, London. (c. 1613. Two slightly later issues by G. Lowe from the same plates, with modified titlepages. Later editions with titles in letterpress by John Clark, junior [or John Clarke]. London, 1646, 1651, 1655, 1659?)

Notari, Angelo, 'Prime musicke nuove à una, due, e tre voci . . . Intagliate da Guglielmo Hole.' London. (c. 1613.)

Hole, Robert, 'Parthenia In-violata. Or Mayden-Musicke for the Virginals and Bass-Viol Selected . . . By Robert Hole.' John Pyper: London. (c. 1614.)

Child, William, 'The First Set of Psalmes of III. Voyces.' James Reave: London, 1639. (Reprinted? 1650. Reissued as 'Choyse Musick to the Psalmes of David.' John Playford: London, 1656.)

Simpson, Christopher, 'The Division-Violist.' William Godbid: London, 1659. (Later editions with new title, 'Chelys, Minuritionum artificio exornata.' W. Godbid for Henry Broome: London, 1665; William Pearson for Richard Mears: London, 1712.)

'Musicke's Hand-maide Presenting New and Pleasant Lessons for the Virginals or Harpsycoon.' John Playford: London, 1663. (Many other editions.)

Greeting, Thomas, 'The Pleasant Companion' or New Lessons and Instructions For the Flagelet'. John Playford: London, (? 1667. Other editions 1673, 1675, 1680, 1682, 1683. Said to have been first published 1661. Title above is from the 1675 edition.)

Bowman, Henry, 'Songs for 1 2 & 3 Voyces'. (Oxford, 1677, no imprint. Reissued, with second title, 'Songs for one, two, & three Voyces'. Thomas Bowman: Oxford, 1678; Second edition, corrected and amended, R. Davis: Oxford, 1679; Reissued, R. Davis: Oxford, 1683.)

Mattei, Nicola, 'Ays for the Violin', &c (London, ? 1679), 1685, 1687, 1688. (In separate parts and several editions, with different titlepages, no imprints. All engraved apparently by T. Greenhill.)

Reggio, Pietro, 'Songs set by Signior Pietro Reggio'. (London, 1680, no imprint. Advertised 1692 as 'A Choyce Collection of Songs', &c. T. Sawbridge, sold by John Carr. London.)

'The Delightful Companion, or Choyse New Lessons for the Recorder or Flute.' John Playford: London, 1682. Title is taken from the second edition, edited by Robert Carr, J. Playford and John Carr: London, 1685.)

Salter, Humphry, 'The Genteel Companion; Being exact Directions for the Recorder'. Richard Hunt and Humphry Salter: London, 1683. (With an outer illustrated titlepage, 'Lessons for the Recorder'.)

Purcell, Henry, 'Sonata's of III Parts'. J. Playford and J. Carr. London, 1683. (Engraved by Thomas Cross, junior.)

Grabu, Lewis, 'Pastoralle A Pastoral in French beginning with an Overture & some Aires for Violins. . . ' (London, 1684, no imprint.)

'The Division-Violin'. Printed by J. P. (Playford, junior) and sold by John Playford: London: 1685 (And later editions.)

'A Collection of Twenty Four Songs, Written by several Hands. And set by several Masters of Musick.' Printed by F. Leach, for C. Corbet. Published by W. Davis. London, 1685.

'A Collection of the Choycest and newest Songs. Set by severall Masters . . . The Second Book.' John Crouch: London, 1687.

'Youth's Delight on the Flagelet the second part . . . 9th Edition.' John Clarke: London, (c. 1690. Details of earlier editions and parts not available. John Hare published later editions.)

Lenton, John and Tollet, Thomas, 'A Consort of Musick of Three Parts'. R. Brett. (London,) 1692.

Purcell, Henry and others, 'Philomela, or The vocal Musitian: being a Collection of . . . Songs; especially those in the "Prophetess" and "King Arthur"'. T. Cross and J. Man: London. (1692.)

'Synopsis Musick: Or The Musical Inventory, Being a Collection of . . . Ayres . . . Songs and Catches.' Tho. Cross. London, &c. 1693.

'Joyful Cuckoldom . . . a Collection of New Songs . . . By Henry Purcell, Dr. John Blow, . . . J. Heptinstall for Henry Playford and J. Church: London. (c. 1696. The only available copy has a manuscript titlepage dated 1671, which is clearly an error.)

King, Robert, 'A Second Booke of Songs'. (London, c. 1696. No imprint.)

Purcell, Henry, 'A Choyce Collection of Lessons for the Harpsichord or Spinnet.' Mrs Frances Purcell, sold by Henry Playford, London, 1696. (Second edition not traced. Third edition, c. 1699.)

Purcell, Henry and Eccles, John, 'A Collection of Songs'. Tho. Cross: London. (c. 1696. Sheet songs originally issued separately.)

Purcell, Henry and others, 'New Songs in the Third Part of the Comical History of Don Quixote'. Samuel Briscoe: London, 1696.

'Military Musick'. Thomas Cross: London. (1697.)

'The A'lamode Musician Being a new Collection of Songs, Compos'd by . . . Eminent Masters.' Henry Playford: London, 1698.

Blow, John, 'A Choyce Collection of Lessons for the Harpsicord, Spinnet, &c.' Henry Playford: London. (1698.)

'Musica Oxoniensis. A Collection of Songs.' Published by Francis Smith and Peter de Walpergen, printed by Leon. Lichfield. Oxford, 1698. (Cut on steel. Two issues, one sold by Walsh and Hare.)

Leveridge, Richard and others, 'The Songs and Dialogues in the last New Opera, call'd the Island Princess'. Tho. Cross and John Young: London. (1699.)

W. C. S.

**ENHARMONIC.** One of the genera of ancient Greek music.

**ENHARMONIC CHANGE.** A term descriptive of a change such as we perceive for example in an enharmonic modulation, in which a chord containing, say, F# dissolves mysteriously into a chord containing Gb, thus leading to a change of key. Since the middle of the 19th century keyboard instruments have been so tuned as to use the same key for a chromatic sharp and its neighbouring chromatic flat, and this is perhaps the reason why enharmonic change is sometimes assumed to imply equal temperament. In fact equal temperament and enharmonic change are incompatible. That is why Sir Donald Tovey, writing of enharmonic modulation, shrewdly observed: "Even with a limited keyboard the ear imagines a change of intonation when the unexpected resolution appears"<sup>1</sup>, though in the light of modern knowledge of sensory perceptions it would be more accurate to write "perceives" than "imagines". For it is precisely in the influence of the musical context on our aural perceptions in listening to music that the significance of enharmonic change lies. It is certainly faulty science to assume, as too many theorists have done, that in listening to pianoforte music our hearing-faculty reproduces, in the tones we perceive, something corresponding exactly to the frequency of the sound vibrations listened to.<sup>2</sup> That is to attribute to aural perception a precise acuity of which it is not equally capable in all circumstances, especially with ears whose acuity has been corrupted by familiarity with equal temperament.<sup>3</sup>

In 16th-century polyphony chromatic notes were each related to a note of the mode or scale by a diatonic semitone. The chromatic semitone<sup>4</sup> was not a melodic interval and, unlike the interval *mi fa*<sup>5</sup> derived from the hexachordal scale of modal music, could not properly find a place in modal polyphony. The chromatic semitone was a difference of pitch between unrelated notes. F# was not a sharpened F#; it was a substantive note of the scale, substituted for F#; it gave a major third in an authentic cadence on D and a diatonic semitone below G. When mean-tone tuning was adopted for keyboard instruments, if G# was played when Ab was wanted the difference between them (a diesis) was made evident by a wolf.<sup>6</sup>

To-day, when functional ambiguity has been introduced into the chromatic scale by some modern composers, it is important to distinguish between diatonic and chromatic semitones of earlier music. A significant

observation was recorded by Pier Francesco Tosi in his 'Observations on the Florid Song' (first published in its original Italian at Bologna in 1723) when discussing the appoggiatura. He wrote that, as the octave consisted of twelve unequal semitones, it was necessary to distinguish the Semitone Major from the Semitone Minor (i.e. the diatonic semitone from the chromatic one). He found it agreeable in singing to go from *mi* to *fa*, i.e. from B *quattro* (our B#) to C or from E to F, so he concluded that interval to be a Semitone Major. "But whence does it proceed that from this very Fa [i.e. from F or G] I cannot rise to the next sharp, which is also a semitone? It is Minor, says the Ear." Which perhaps helps to explain why our hearing-faculty (the partnership of ear and brain) undoubtedly associates F# with G but not with F# on an instrument with free intonation, and why a player in a string quartet, listening intently, is impelled by aural perception of the musical context in an enharmonic modulation to make, it may well be unconsciously, that small variation in the point of pressure of his fingertip required to change, say F# into Gb. LL. S. L.

See also Modulation.

**ENIGMA (or Riddle) Canon.** See CANON.

**"ENIGMA" VARIATIONS.** Elgar's set of orchestral Variations in G minor and major, Op. 36, written in Feb. 1899. The first performance took place at St. James's Hall in London, under Hans Richter, on 19 June 1899. The work presents two mysteries, one of them still unsolved. It is based on a theme which the composer said combined in counterpoint with another, unheard tune with which everybody was familiar; but he refused to the last to divulge the secret. Various attempts to show what the mysterious theme may be turned out to be no more than conjecture. 'Auld Lang Syne' and Chopin's G minor Nocturne, Op. 37 No. 1, have been suggested, but the former does not fit Elgar's theme without drastic adjustment, nor does the latter go with it throughout.

The second mystery was never more than a mystification. It is connected with the inscription on the score: "Dedicated to my Friends pictured within". Each variation is a musical portrait of one of these persons, outlining not only character, but gestures and tones of voice, and making occasional allusions to matters of environment, such as those to the organ pedals and the barking dog in Var. XI. The dedicatees, now all known, are the following:

Var. I. C. A. E. = Lady Elgar (the composer's wife).

Var. II. H. D. S.-P. = Hew David Stuart-Powell (amateur pianist).

<sup>1</sup> Article 'Harmony' in Ency. Brit., 14th ed.: the complete passage is quoted in JUST INTONATION.

<sup>2</sup> See ACOUSTICS.

<sup>3</sup> The tuning of the pianoforte varies from instrument to instrument (see TUNING) and is at best an approximation to equal temperament.

<sup>4</sup> See INTERVALS.

<sup>5</sup> See HEXACHORD.

<sup>6</sup> See TEMPERAMENTS.

- Var. III. R. B. T.=Richard Baxter Townshend (author of the "Tenderfoot" books).  
 Var. IV. W. M. B.=W. M. Baker (a country squire).  
 Var. V. R. P. A.=Richard P. Arnold (Matthew Arnold's son).  
 Var. VI. Ysobel=Isabel Fitton (amateur violinist).  
 Var. VII. Troyte=Troyte Griffith (a Malvern architect).  
 Var. VIII. W. N.=Winifred Norbury (music-lover).  
 Var. IX. Numrod=A. J. Jaeger (author of notes on Elgar's oratorios).  
 Var. X. Intermezzo: Dorabella=Dora Penny (Mrs. Richard Powell).  
 Var. XI. G. R. S.=George Robertson Sinclair (Hereford cathedral organist) (including the bulldog Dan).  
 Var. XII. B. G. N.=Basil G. Nevinson (amateur cellist).  
 Var. XIII. \* \* \* = long supposed to have been Lady Mary Lygon (later Lady Mary Trefusis), but actually the portrait of a lady whose identity has remained unknown.  
 Var. XIV. Finale: E. D. U.=the composer (whose wife's nickname for him was "Edu").

The opening of Var. IX alludes to the slow movement of Beethoven's "Pathetic" Sonata; Var. XIII quotes from Mendelssohn's 'Calm Sea and Prosperous Voyage' Overture; Var. XIV refers back to Vars. I and IX.

**ENIGMATIC SCALE.** See VERDI, p. 744 (mus. ex.).

**ENNA, August** (b. Naskov, 13 May 1860, d. Copenhagen, 3 Aug. 1939).

Danish composer. He was born of humble parents, his father being a shoemaker. His grandfather had been an Italian soldier in Napoleon's army, who had married a German woman and settled in Denmark. In 1870 the Ennas moved from Naskov to Copenhagen, where August attended the free-schools. In early years he taught himself the pianoforte, and at seventeen had a few lessons of little value on the violin and in theory. With this exception he was entirely self-taught. When he was about twenty he attached himself to a small travelling orchestra on a tour to Finland. After a fairly successful tour of six months he returned to Copenhagen and composed an operetta called 'En landsby historie' ('A Village Tale'), which was produced, towards

the end of 1880, in several provincial theatres. A second operetta, 'Areta', followed in 1882. In 1883 he obtained the post of conductor to a provincial company, for which he wrote incidental music and several overtures. He was now enabled to publish some music: songs, an orchestral suite and a number of piano pieces, which happened to attract Gade's attention. By Gade's help Enna gained the Ancker scholarship, which enabled him to go to Germany for a year (1888-89), where he studied.

Enna produced his first opera, 'Agleia', in 1884; but his first great stage success was 'Heksen' ('The Witch'), produced at the Royal Opera, Copenhagen, on 24 Jan. 1892. On 7 Feb. 1894 followed 'Cleopatra', based on Rider Haggard's novel, which for some reason failed to catch the public taste until the following year, when a new cast made it extremely popular. He met with a further success with 'Auccassin og Nicolette' on 2 Feb. 1896, which was given at Hamburg the following year. Next came 'Pigen med svolvstikkerne' ('The Match Girl', based on Hans Andersen), produced on 13 Nov. 1897 and later translated into Dutch, German, Czech and Polish. Enna's successes abroad procured him a production at Antwerp, 'Lamia', on 3 Oct. 1899, some of the music of which he afterwards used for 'Ung Elskov', first produced in German at Weimar in 1904. Two more operas on Hans Andersen subjects were 'Prinsessen paa aerten' ('The Princess on the Pea'), Aarhus, 15 Sept. 1900, and 'Nattergallen' ('The Nightingale'), Copenhagen, 10 Nov. 1912. 'Gloria Arsena' followed in Copenhagen on 15 Apr. 1917, 'Børnene fra Santa Fé' in 1918 and 'Komedianter' (on Victor Hugo's 'L'Homme qui rit') on 8 Apr. 1920. The last operas were 'Don Juan Mañara' (Copenhagen, 1925), 'Afrodites praestinde' ('The Priestess of Aphrodite', 1925) and 'Ghettoens Dronning' ('The Queen of the Ghetto', 1932).

Other works for the stage by Enna were incidental music for Helge Rode's 'Kongesønner' ('King's Sons', 1896), Holger Drachmann's 'Halfred Vandraadskjald' (1906), Stellan Rye's 'Bellman' (1907) and Strindberg's 'Kronbruden' (1913); a melodrama based on Andersen's 'Ib og lille Kirstine' (1902); ballets 'Hyrdinden og Skorstensfejeren' ('The Shepherdess and the Chimney-Sweep', 1900), 'Sancta Caecilia's Guldsko' ('St. Cecilia's Golden Shoes', 1904), 'Elskovs Guld' (1914) and 'Kysset' ('The Kiss', 1927). Non-dramatic works include 'Historien om en moder' ('The Tale of a Mother') for chorus and orchestra, 2 symphonies, an Andersen Overture (1905), a violin Concerto (1897), some other orchestral works, pianoforte pieces and songs. His

music is notable for its unconventional freshness.

*See also* Ashdown.

**ENRICHELLI.** *See* ERICHELLI.

**ENRIQUEZ (Anriquez) DE VALDERRABANO, Enrique** (*b.* Peñaranda de Duero, ?; *d.* ?).

Spanish 16th-century lutenist. He was the author of a 'Libro de música de vihuela, intitulado Silva de Sirenas' (Valladolid, 1547). The book contains a number of transcriptions of sacred and secular music of the time, some of them arranged for two vihuelas, the parts being printed on opposite pages, and facing in opposite directions, so that the book could be used by two performers sitting opposite to one another. The transcriptions include a number of *villancicos* and madrigals, by Juan Vasquez, Mateo Flecha and others, some of which are known in their original form. Morphy published a selection of the works of Enriquez in 'Les Luthistes espagnols'.

J. B. T.

*See also* Daza.

**ENSALADA** (Spa., salad). A kind of burlesque madrigal cultivated in Spain in the 16th century, in dramatic form but not intended for the stage. Also a quodlibet.

**ENDSALL, John** (*b.* ?; *d.* ?).

English 16th-century composer. His 4-part motet 'Hic dies, quam fecit dominum' is in the B.M. (Add. MSS 17,802-5). There is also a score of this, but arranged in 3 parts (Add. MSS 29,382-85).

J. M. (ii).

**ENSEMBLE** (Fr. = together; noun = teamwork). A term adopted into the English language and used in a special sense. Its use as a substantive may come from the French phrase "musique d'ensemble", for what we call concerted music, whether in regard to the concerted pieces in an opera, where the principal characters take part together, or in chamber music, written for a small number of instruments in combination. It is in regard to this latter sense that the special use of the word is most common. A party of players, brought

up in different schools, each pre-eminent in his own line, if required to join forces in a string quartet, for example, would find a special difficulty in so modifying their own individuality as to present a perfectly harmonious interpretation of the work, their "ensemble" would probably be pronounced unsatisfactory, and players of far inferior attainment, who happened to have enjoyed frequent opportunities of playing together, and learning each other's manner of phrasing, would probably give a far better idea of the work as a whole, and their "ensemble" would be rightly said to be good. The same applies to vocal performances of concerted music.

The term is also frequently used with regard to orchestral performances, but with less significance, since there the "ensemble" is controlled by one mind, that of the conductor.

**BIBL.**—DUNHILL, THOMAS, 'Chamber Music' (London, 1913).

FULLER-MATLAND, J. A., 'The Consort of Music' (London, 1915).

**ENTFÜHRUNG AUS DEM SERAIL, DIE** ('The Elopement from the Harem', known as 'The Seraglio'). Opera in 3 acts by Mozart. Libretto by Gottlieb Stephanie, jun., adapted from Christoph Friedrich Bretzner's libretto 'Belmont und Constanze'.<sup>2</sup> Produced Vienna, Burg Theatre, 16 July 1782. 1st perf. abroad, Prague, autumn 1782. 1st in England, London, Covent Garden Theatre (trans. as 'The Seraglio' by W. Dimond), 24 Nov. 1827. 1st in U.S.A., New York (? in German), 16 Feb. 1860.

**ENTHOVEN, Henri Emile** (*b.* Amsterdam, 18 Oct. 1903; *d.* New York, 26 Dec. 1950).

Dutch composer and historian. As a boy he was a pupil of Johan Wagenaar, and his first Symphony (Op. 2) was produced under Willem Mengelberg in 1918. Later he studied under Franz Schreker in Berlin. In 1924 he became a student in jurisprudence at Utrecht University and later studied history at Amsterdam, where he took the degree of Doctor of History in 1929. While still a student he acted as coach under Felix Weingartner at Basle. After taking his degree he was tutor in diplomatic history at Leyden and later at Amsterdam, and gave useful lectures both in these subjects and in musical history by wireless. He also wrote much for periodicals on legal and musicological subjects.

His compositions comprise 3 Symphonies, 3 Suites for pf. and orch., incidental music for 'Ichonaton' and 'De groote Geus', outdoor plays produced by the students at Utrecht, 'Sol Justitiae Hymnus Universitati Rheno Trajectinae' for the 300th anniversary of the

<sup>2</sup> In a substantive sense this English term may be recommended for use in place of the more familiar but usually mispronounced French word. Adjectivally the word "concerted" serves well, e.g. concerted singing for "vocal ensemble", etc.

<sup>3</sup> Composed by Johann André and produced in Berlin on 25 May 1781. The libretto is said to have its ultimate source in Isaac Bickerstaff's play 'The Captive', which is however quite unlike it in plot, though the Turkish setting is similar.

foundation of that University, 'Romantic Variations' for orch., composed in America during the Nazi occupation of Holland, a 'Symphonic Fantasy' for orch. with vn. obbligato, various groups of songs with orchestral accompaniment, 'Gaudemus igitur' for woodwind, perc. and organ written for the 300th anniversary of the foundation of Amsterdam University, and many smaller works. His music, though modern in its construction, is of a romantic character.

Among his musicological activities should be mentioned his organization of an exhibition in connection with the jubilee of the Concertgebouw under the name Gedenck-clanck (Memorial Sounds) in 1938 and his useful work as musical contributor to the Amsterdam 'Algemeen Handelsblad'. H. A.

See also Amsterdam.

**ENTR'ACTE** (Fr., lit. between acts).

A piece of orchestral music played between the acts of an opera or a play. It corresponds to the old English act-tune and is often used rather as the prelude to the coming act than as an interlude. Bizet's 'Carmen' gives admirable specimens of the entr'acte standing apart altogether from the action of the play, except that before the second act, which anticipates the song sung by Don José at his entrance in that act. H. C. C., rev.

See also Act-Tune

**ENTRADA** }  
**ENTRATA** } See INTRADA.

**ENTRÉE** (Fr. = entry, entrance).

(1) A name formerly given to a small piece of music in slow 4-4 time, with the rhythm of a march, and usually containing two parts, each repeated. It received its name from the fact of its being largely used in theatrical and ballet music to accompany the entry of processions, etc. An example of this kind of Entrée may be found in J. S. Bach's Suite in A major for violin and clavier (B.-G., IX, 51).

(2) The word Entrée (Ital. *intrada*; Spa. *entrada*) is also used as synonymous with "introduction", and is applied to the opening piece (after the overture) of an opera or ballet. J.-J. Rousseau ('Dictionnaire de musique') defines it as "instrumental air forming the beginning of a ballet".

(3) It is also applied in an opera to one whole act, and in an opera-ballet where every act forms a separate argument (Rousseau). The Allemande, with its heavy rhythm and rather solemn expression, was easily transformed into a prelude which, under the name of Entrée or Overture, was played before a ballet. E. P., adds. M. L. P.

See also Allemande. Intrada.

**ENTREMES** (Spa.). See INTERMEZZO.

**ENTREMET** (Fr., lit. between-dish). A brief entertainment, usually a dance, performed with vocal or instrumental music

between the courses of a banquet in the 14th and 15th centuries.

**ÉPINE, Margherita de l'.** See L'ÉPINE.

**EPISODE.** Secondary portions of musical works, which stand in contrast to the more conspicuous and structurally important features, are called episodes. Their function as an element of form is most easily distinguishable in the fugal type of movement. In the development of that form of art composers soon found that constant reiteration of the principal subject had a tendency to become wearisome, however ingenious the treatment; thus they often interspersed exposition and counter-exposition with independent passages, in which sometimes new ideas, and more often portions of a counter-subject, or of the principal subject, were used in a free and fanciful way. By this means they obtained change of character and relief from the stricter aspect of those portions in which the complete subject and answer followed one another, in conformity with certain definite principles. In connection with fugue, therefore, episode may be defined as any portion in which the principal subject does not appear in a complete form.

There are a certain number of fugues in which there are scarcely any traces of episode, but in the most musical and maturest kind episodes are an important feature. It is most common to find one beginning as soon as the last part to enter has concluded the principal subject, and therewith the exposition. Occasionally a codetta in the course of the exposition is developed to such dimensions as to have all the appearance of an episode, but the more familiar place for the first one is after the end of the exposition. As an example of the manner in which it is contrived and introduced, the Fugue in F minor, No. 12 of the first book of Bach's 'Well-tempered Clavier', may be taken. Here the subject is clearly distinguishable at all times from the rest of the musical material by its slow and steadily moving crotchets. The counter-subject which at once follows the first statement of the subject, as an accompaniment to the first answer, introduces two new rhythmic figures, (a) and (b), which afford a marked contrast to the principal subject:

and out of these the various episodes of the movement are contrived. The manner in which it is done may be seen in the beginning of the first episode, which occurs at bar 16, and into which figure (a) is closely woven. The adoption of this little figure is especially happy, as the mind is led on from the successive expositions to the episodes by the same process as in the first statement of subject and counter-subject, and thereby the continuity becomes so much the closer.

As further examples in which the episodes are noticeable and distinct enough to be studied with ease may be quoted the 2nd, 3rd, 5th, 10th and 24th of the first book of the 'Well-tempered Clavier', and the 1st, 3rd, 12th and 20th of the second book. Episodes are generally most noticeable and important in instrumental fugues which have a definite and characteristic or rhythmically marked subject.

It follows from the laws by which expositions are regulated that episodes should be frequently used for modulation. While the exposition is going on, modulation is restricted, and normally answers of the subject are not in the dominant, but only on the dominant; but directly the exposition is over the mind inclines to look for a change from the regular alternation of prescribed centres. Moreover, it is often desirable to introduce the principal subject in a new key, and the episode is happily situated and contrived for the process of getting there; in the same way that after transitions to foreign keys another episode is serviceable to get home again. In this light, moreover, episodes are very frequently characterized by sequences, which serve as a means of systematizing the steps of the progressions. Bach occasionally makes a very happy use of them by repeating near the end a characteristic episode which made its appearance near the beginning, thereby adding a very effective element of form to the movement.

In a looser sense the term "episode" may be applied to portions of fugues which stand out noticeably from the rest of the movement by reason of any striking peculiarity; as, for instance, the instrumental portion near the beginning of the "Amen" chorus in Handel's 'Messiah', or the central portions of certain very extensive fugues by Bach, in which totally new subjects are developed and worked, to be afterwards interwoven with the principal subjects.

In the predominantly homophonic forms of music the word is more loosely used than in the polyphonic order. It is sometimes used of portions of a binary movement in which

subordinate or accessory subjects appear, and sometimes of the subordinate portions between one principal subject and another, in which modulation frequently takes place. It serves more usefully in relation to a movement in aria or rondo form, since the middle portion in the former in its *da capo* form and the alternative subjects or passages between each entry of the subject in the latter cannot conveniently be called "second subjects". In the old form of rondo, such as Couperin's, the intermediate divisions were so very definite and so clearly marked off from the principal subject that they were conveniently described as *couplets*. But in the mature form of rondo to be met with in sonatas and symphonies the continuity is so much closer that it is more convenient to define the form as an alternation of principal subject (in rondo) or subjects (in sonata) with episodes. It sometimes happens in the most highly artistic rondos that the first episode presents a regular second subject in a new key; that the second episode (following the first return of the principal subject) is a regular development or "working-out" portion, and the third episode is a recapitulation of the first transposed to the principal key. By this means a closer approximation to binary form is arrived at.

In operas and oratorios, and kindred forms of vocal art, the word is used in the same sense as it would be used in connection with literature. Mozart somewhat loosely calls some of his operatic arias rondos (e.g. Donna Anna's "Non mi dir" or Fiordiligi's "Per pietà") because they have single principal subjects interspersed with episodes.

See GRÉTRY.

Epstein, Jacob. See Dieren (book on E.).

**EPSTEIN, Julius** (b. Agram [Zagreb], 7 Aug. 1832; d. Vienna, 1 Mar. 1918).

Austrian (Croatian) pianist and teacher. He was a pupil of Rudinatscha and Halm. He settled in Vienna, where he was professor of pianoforte at the Conservatory from 1867 to 1901. He belonged to the circle of Brahms's friends.

E. B.

**EQUAL TEMPERAMENT.** See TEMPERAMENTS.

**EQUAL VOICES.** A term of rather ambiguous use, strictly denoting voices of equal compass. Sometimes works for female voices alone, or for male voices alone, are spoken of as "works for equal voices"; but this is incorrect, and the term should be kept for those of equal compass, such as compositions for two or more sopranos or for several contraltos, as the case may be. In cases where one of two soprano parts is taken by a tenor, or one of two contralto parts by a bass, the composition

does not cease to be "for equal voices", and the term is more correctly used of this combination than of that for soprano and contralto, or for tenor and bass. J. A. F.-M.

**EQUALI** (*pl.*). A term applied to short pieces for a group of trombones, of an elegiac character and performed at funerals and commemorative ceremonies in the Austria of Beethoven's day. The term may have originated in a sense equivalent to the expression "equal voices", that is to say, the *Equali* were for instruments of one kind.

Beethoven's *Equali*, written in 1812 and performed at his own funeral, are the most famous specimens of the type. They are still occasionally performed on appropriate occasions. H. C. G.

**EQUIVOCI NEL SEMBIANTE, GLI** (Opera). See *SCARLATTI* (A.).

**ERACLEA, L'** (Opera). See *SCARLATTI* (A.).

**ÉRARD**. Alsatian family of instrument makers. The name borne by that firm of harp and pianoforte makers has been known almost as long in England as in France, its workshops having been established in London near the close of the 18th century, not long after those in Paris. The reputation of Érad's house is as much due to successful improvements in the harp as in the pianoforte, those of the harp being of similar importance to the perfecting of the violin accomplished by the famous Cremona makers.

(1) **Sébastien Érad** (*b.* Strasbourg, 5 Apr. 1752; *d.* nr. Passy, 5 Aug. 1831). He was early put to his father's handicraft of cabinet-making. His father dying when he was sixteen, he went to Paris and placed himself with a harpsichord maker. He had soon the opportunity to display his practical ingenuity by the construction of a mechanical harpsichord, which was described by the Abbé Roussier in 1776. The Duchess of Villeroi took notice of him and allotted to him a workshop in her own château, where, in 1777, he made the first pianoforte constructed in France. According to Fétis this was a square with two unison stops and a compass of five octaves, similar to the English and German instruments that had been imported. He now established himself, with his brother Jean Baptiste, in the Rue de Bourbon. Their success exciting the jealousy of the Parisian instrument makers known as *luthiers*, and belonging to the fan-makers' guild, they used the power they possessed to seize the Érards' workshops; Louis XVI, however, came to the aid of the brothers and conferred upon Sébastien (in 1785) a *brevet* permitting him to make "forte-pianos" independent of the guild, but obliging him to

employ workmen who had satisfied its regulations.<sup>1</sup>

Sébastien founded a branch in London in 1786, and in 1792 he took out a patent for improvements in harps and pianofortes. He returned to Paris, after the Terror, in 1796, in which year he made his first grand pianoforte, using the English action, which he continued with until 1808. In 1809 he patented a repetition grand piano action (the first) and improvements in the construction of the harp, nearly completing that ingenious double action which was begun about 1786 and was perfected in 1810. A feature in the 1809 patent was the inverted bridge or upward bearing at the wrestplank bridge of the piano. Among Sébastien's other inventions may be mentioned a "piano organisé" or combination of piano and organ, a "harpe à fourchette" and the "orgue expressif".

(2) **Pierre Érad** (*b.* Paris, 1796; *d.* Passy nr. Paris, 18 Aug. 1855), nephew of the preceding, son of Jean Baptiste Érad. Advanced age made Sébastien leave to Pierre the introduction of his perfected repetition action, the patent for which was taken out in London in 1821. The same year he published there 'The Harp in its Present Improved State Compared with the Original Pedal Harp'. In 1835 the patent of the "orgue expressif" was extended to Pierre Érad for seven years on the plea of its great value and of the losses sustained in working it. The invention in 1838 of the Harmonic Bar is claimed for him.<sup>2</sup> His widow succeeded him in the business. From her it descended to the Count de Franqueville, who had married her niece and became the chief proprietor of the Paris house, his partner Blondel being in charge of its affairs. On Blondel's death the manufactory was taken over by Guichard et Cie. The London manufactory was discontinued in 1890. A. J. E.

**ERBA, Dionigi** (*b. ?; d. ?*).

Italian 17th-18th-century composer. Like Marcello and Astorga he was of noble birth, and Cardinal Benedetto Erba seems to have been his brother. In 1692 he was *maestro di cappella* of the church of San Francesco at Milan (see F. Vigoni's 'Sacre armonie', 1692, which contains music by him). The title of Don, given him by Quadrio, and that of "R<sup>d</sup>", mentioned below, show that he was in holy orders. In 1694 he took part with Carlo Valtellina in the recitatives for the opera 'Arione', the airs being taken from no less than 26 other composers; and in 1695 he collaborated with Alessandro Besozzi and Giacomo Battistini in 'Antemio in Roma'.

Erba's chief interest lies in the fact that he is

<sup>1</sup> Rimbault, 'The Pianoforte' (1860), p. 124.

<sup>2</sup> Oscar Paul, 'Geschichte des Claviers' (Leipzig, 1868).

not improbably the composer of a Magnificat for two choirs from which Handel borrowed more or less closely for several pieces in the second part of 'Israel in Egypt'. A complete copy of this work, entitled 'Magnificat. Del R<sup>d</sup> Sgr. Erba', is in the R.C.M. and a partial one (ending in the middle sheet) in Handel's writing, without title or date, in the Roy. Lib., B.M. Opinions are divided as to whether it is an original composition of Handel's Italian time (1707-10) or by Erba. In favour of the former were Schoelcher and Macfarren (preface to 'Israel in Egypt' for the Sacred Harmonic Society). It is obvious that but for the existence of the manuscript by Handel the question would never have been raised. The whole evidence was carefully examined at great length by Chrysander ('Handel', I, 168-78), whose conclusion is strongly in favour of its being by Erba. He shows that the date of Handel's manuscript is probably 1735-40 ('Israel' was 1738); that it has marks of being a copy and not an original composition, that the paper is not Italian, but the same as that used for his English works; and that the style of the music differs materially from Handel's style, whether early or late. In addition it might be urged that it is extremely improbable that in a copy of a work of Handel's his powerful name would be displaced on the title in favour of the insignificant one of Erba. Chrysander published the Magnificat as the first of the supplements to his Handel edition. Since then the researches of Percy Robinson, embodied in his book 'Handel and his Orbit', have added fresh matter to this discussion. Robinson found that Erba and Urio are names of places in the neighbourhood of Milan (Erba is between Como and Lecco), and on this discovery he founds the theory that the manuscripts which bear these names are the composition of Handel himself, dating from the Italian period. In this respect Robinson's book is of importance to the student. For the list of numbers borrowed for 'Israel' see Sedley Taylor, 'The Indebtedness of Handel' (Cambridge, 1906).

**ERBACH, Christian** (b. district of Algesheim, Hesse, 1573; d. Augsburg, 1635).

German organist and composer. About 1600 he became organist to the Fuggers at Augsburg, succeeded Hassler as town organist of Augsburg in 1602, in 1625 became cathedral organist and in 1628 (according to Gerber) was appointed "Ratsherr" of the same city. The first book of his 'Modi sacri seu cantus musici vocibus 4, 5, 6, 7, 8 et pluribus, ad omne genus instrumenti musici accommodatis' was published in 1600 at Augsburg, the second in 1604 and the third in 1606. Bodenschatz's 'Florilegium Portense' and Schade's 'Promtuarium musices' (Strasbourg) contain motets

of his in 4, 6 and 8 parts. Manuscript compositions of his are in the cathedral library at Augsburg and in the State Library in Berlin.

F. G., adds.

**ERCOLE AMANTE (Opera).** See CAVALLI.

**Erdélyi, József.** See Jemnitz (6 songs)

**ERDMANN, Eduard** (b. Tseziz [Wenden], Latvia, 5 Mar. 1896).

Latvian-German pianist and composer. He comes of a Baltic family of scholars. While attending the "Gymnasium" at Riga he took pianoforte lessons from Bror Mollersten and Jean de Chastain and learned theory from Harald Creutzburg. In June 1914, having matriculated, he went to Berlin to study the pianoforte with Conrad Ansoerge, and composition, until 1918, with Heinz Tiessen. From 1919 onwards he toured as a concert pianist, in which capacity he came to be known also as a disinterested champion of modern composers. For instance, at the Venice Festival of the I.S.C.M. in 1925 he introduced the exacting pianoforte Sonata by Artur Schnabel. In Oct. 1925 he was appointed professor at the Hochschule of Cologne.

As a composer Erdmann first attracted attention with a Symphony performed at the 50th Tonkünstlerfest at Weimar in 1920, and afterwards in many German cities. His second Symphony was performed for the first time in 1925 at the Prague Festival of the I.S.C.M. In his works Erdmann shows himself a daring and original thinker. He makes few concessions to his audiences, and it is sometimes a difficult task to follow his rather complex mode of expression, but while availing himself of modern harmonic freedom, he adheres to sound methods of construction and notably to the principles of tonality. Of the following compositions, all of which are published, Opp. 8, 10, 11, 12 and 13 are those which represent his development most strikingly:

*Op.*

1. 'An den Frühling', vn. & pf
2. Four songs.
3. Six songs.
4. 'Bagatellen' for pf.
5. Five pf. pieces.
6. Five songs.
7. 'Himmel und Erde', song.
8. Rondo for orch.

10. Symphony No. 1.
11. Two songs.
12. Sonata for vn. unaccomp.
13. Symphony No. 2
15. Pf Concerto.

Without opus number a Fox Trot in C major.

E. E.

**EREDE, Alberto** (b. Genoa, 8 Nov. 1909). Italian conductor. He studied pianoforte, cello and composition at the Conservatories of Genoa (1926), Milan (1927) and Basel (1929). At the last he became a pupil of Weingartner for conducting. He first became known in England as associate conductor at the Glyndebourne Opera, which he visited annually from 1934 to 1939. At the same time he was musical director of the Salzburg Opera Guild from Aug. 1935 to Mar. 1938. In May 1945 he was appointed artistic director and permanent conductor of the symphony orchestra of the Italian Radio Company at Turin, a post he held until Aug. 1946, when he returned to England as musical director and permanent conductor of the New London Opera Company at the Cambridge Theatre, London. He has been a guest conductor for many years at the Teatro alla Scala, Milan, and has conducted both opera and concerts in Vienna, Berlin, Stockholm, Amsterdam, Belgrade, New York, Boston, San Francisco, Los Angeles, Chicago, Buenos Aires, Rome, Florence, Hamburg, Naples, Goteborg, Toronto, etc.

E. B.

**EREDI (Heredi), Francesco** (b. ?; d. ?). Italian 16th-17th-century composer. He was *maestro di cappella* of the cathedral at Ravenna in 1623 and of the town in 1629. He published a book of madrigals (1600), vesper psalms (1623), 'L' Armida del Tasso . . . a 5 voci', Op. 3 (1629); also songs in collective volumes.

E. v. d. s.

**EREMITA** (real name *Giusberti*), **Giulio** (b. Ferrara, ?; d. ?).

Italian 16th-century organist and composer. He was a monk, organist at Ferrara (? Calmaldoli monastery), and published 3 books of madrigals, 1584-89.

E. v. d. s.

**ERHART (Ehrhardt), Dorothy** (*Agnes Alice*) (b. London, 5 Jan. 1894).

English harpsichordist, conductor, composer and writer on music. She was educated at the Dame Alice Harpur School, Bedford, between 1908 and 1910, and took music lessons from Dr. H. A. Harding. Later she studied at Birmingham University, becoming a B.Mus. in 1916. She had composition lessons with Granville Bantock and studied conducting under Adrian Boult and at the Salzburg Mozarteum, and the harpsichord with Alice Ehlers. Since 1930 she has been on the staff of the Webber-Douglas School of Singing. She was Music Adviser to the Joint Committee for Music and Drama in Villages from 1934 to 1940 and Music Adviser to the

Carnegie "C" Committee in 1940-41, besides being on the panel of Music Advisers to the National Federation of Women's Institutes since 1951. In 1927-29 she was Honorary Secretary of the Society of Women Musicians. She founded the Erhart Chamber Orchestra in 1926 and conducted it until 1938, specializing in lesser-known works by Bach, Arne, Pergolesi, the music to 'The Tempest' by Locke, and compositions by modern musicians. During these years she conducted several other orchestras, including that of the Chanticleer Opera Company, and she often played the harpsichord for them. She worked for C.E.M.A. and for the Army Educational Department during the second world war, and since then she has been a frequent lecturer and adjudicator at provincial music schools and festivals.

Dorothy Erhart's compositions include Variations for pianoforte and orchestra, written for Mary Abbott and the British Women's Symphony Orchestra, and played by them in 1929, some choral duets, a pianoforte Quintet in D major (1917) and arrangements of 'Little Gaddesden May Song' and 'The Spotted Cow' (1935). She has also edited J. C. Bach's Quintet in F major and written several articles for various music journals.

M. K. W.

**ERICH, Daniel** (b. ?; d. ?).

German 17th-18th-century organist and composer. He was a pupil of Buxtehude at Lubeck and became organist at Gustrow, where he worked early in the 18th century. He is one of Bach's precursors as a composer and no doubt improviser of organ chorale preludes. He is also said to have written clavier works, of which, however, no trace remains.

E. B.

**ERISMENA** (Opera). See CAVALLI.

**ERK, Ludwig Christian** (b. Wetzlar, 6 Jan. 1807; d. Berlin, 25 Nov. 1883).

German conductor, teacher and song collector. His father (Adam Wilhelm Erk, 1779-1820) was cathedral organist at Wetzlar. Ludwig studied music under his father and André of Offenbach, receiving his general education from Spiess, a well-known teacher at Frankfurt o/M. In 1826 he was appointed professor at the teachers' seminary at Moers on the Lower Rhine, and there his connection with popular music began. He started musical festivals at Remscheidt, Ruhrort, Duisburg and other small towns, which largely contributed to the taste for sacred and secular part-music. In 1836 he was appointed musical professor of the royal seminary at Berlin, and in the following year conductor of the newly formed cathedral choir, which post, for want of proper support, he relinquished in 1838. In 1843 he founded a Männergesangverein in Berlin, for the express purpose of singing

"Volkslieder", and in 1852 started the Erkscher Gesangverein, a mixed choir. In 1857 Erk was appointed director of music. In the beginning of 1877 he resigned his post in the seminary in Berlin, and was succeeded by Dienel. Among the most important of the many collections of German songs he edited is his 'Deutscher Liederhort', of which Vol. I contains modern "Volkslieder"<sup>1</sup> and Vol. II those of the 13th-18th centuries.

F. G.

**ERKEL.** Hungarian family of musicians, believed to be of German or Netherlandish origin.

(1) **Ferenc Erkel** (b. Gyula, Comitat Békés, 7 Nov. 1810; d. Budapest, 15 June 1893), pianist, conductor and composer. His known ancestors were all musicians and schoolmasters at Pozsony (Pressburg, now Bratislava in Czechoslovakia). His grandfather, on entering the services of Count Wenckheim's family, settled at Gyula, the manorial residence of his employers. His son, the composer's father, schoolmaster and *regens chori* at the parish church of the local German community, had himself attended to the musical instruction of his ten children, of whom Ferenc, the second, was undoubtedly the most talented. At the age of ten he deputized for his father at the church organ and at eleven his pianoforte playing introduced him to the musical gatherings of the local gentry. At twelve he was sent to the secondary schools at Nagyvárad, but shortly afterwards he was transferred to Pozsony where he found greater facilities for musical training. He took lessons from Heinrich Klein, a well-known teacher, composer and cathedral organist, and from Károly Turányi, an esteemed pianist and composer. As the seat of the Hungarian Diet and fairly near to Vienna, Pozsony provided many opportunities to enlarge musical experience; Erkel attended opera performances and concerts — he is said to have heard the young Liszt, his junior by one year. His first attempts at composition ('Litany', etc.) also date from this period, and he made frequent public appearances as pianist.

On concluding his studies Erkel became music master in the household of Count Kálmán Csáky at Kolozsvár. The years spent in the Transylvanian capital (1827-34) were of some importance to his future career, for he became acquainted with some of the leading Hungarian musical personalities and with the administrative and social notabilities of the country, and he soon assumed the musical leadership of the town. In 1834, on his way to Szemeréd, where he took up new duties as music master to Countess Stáinlen-Saalfeld, he visited Pest and appeared as pianist at a concert, attracting considerable attention. He

did not remain long at his new post, for the following year saw him as musical director of the recently formed Hungarian theatrical company of Buda. His name had begun to appear with increasing frequency on the musical programmes of the twin-capital, and he accompanied many of the visiting musical celebrities. It may have been Vieuxtemps's début at Pest in 1837 which led to the composition of the 'Duo brillant' for violin and pianoforte, his first published work. Although the title-page of its second edition claims joint authorship, Vieuxtemps's share is believed to have been confined to the editing of the violin part.

Erkel's Buda engagement too was of a short duration, for in 1836 he became second conductor of the Municipal (German) Theatre at Pest. The two years spent with this company enlarged his knowledge of the operatic repertory and gave him considerable experience in orchestral conducting. On 17 Jan. 1838 he signed his contract with the newly established National Theatre at Pest, which appointed him musical director with full powers of administration. His début in that post took place on 25 Jan. 1838, when Bellini's 'La straniera' was performed. His consummate musicianship and organizing talent soon made the operatic performances a popular success.

The question of Hungarian opera occupied Erkel's mind from the very beginning of his directorship, and he decided to attempt a national work of his own. The success of his first opera, 'Bátori Mária', first performed on 8 Aug. 1840, confirmed his claims. The achievement was the more remarkable because it had been preceded by a mere handful of compositions — about eight in number, mostly variations and fantasies. The famous 'Hunyadi László', his next opera, was produced in 1844, with an extraordinary success, due in part to the patriotic feeling on the eve of the nation's struggle for independence. The chorus "Meghalt a cselszövő" ("Dead is the intriguer") was regarded as a political demonstration and was greeted with sustained applause, much like Verdi's famous chorus in 'Attila'. It is interesting to note that the tune of this chorus was rediscovered by Bartók during one of his folk-music collecting expeditions more than half a century later. The florid aria traditionally known as the "La Grange aria" was a later addition to the score (June 1850), written especially for Anne de La Grange, a French soprano who studied the principal part in Hungarian. Plans were made to produce 'Hunyadi László' in Paris and London, but they did not materialize.

In the year of its first performance Erkel's 'Hymnusz' was awarded first prize at an open competition: it has remained the nation's prayer ever since. Having thus become the

<sup>1</sup> Thus not folksongs at all: see VOLKSLIED.

first musician of the country, he was elected musical director of the Pest-budai Hangász-egyesület<sup>1</sup>, whose early concerts were often given under his direction. It was Erkel who acquainted Berlioz with the tune of the Rákóczy March on the occasion of the latter's visit to Pest in 1846. In recognition of Erkel's share in the frenetic success of his Hungarian debut Berlioz presented him with the autograph score of his celebrated orchestral piece, now preserved in the Music Department of the Hungarian National Museum. Erkel's next opera, 'Bánk bán', though written shortly afterwards, was not performed until 1861, probably on account of the unsettled political situation following the defeat of 1849. This opera has remained in the repertoire: the Ides of March, a national holiday, is traditionally celebrated with its performance.

Erkel played an important part in the foundation of the Philharmonic Society in 1853, of which he was subsequently appointed President Conductor, and he directed its concerts until 1870. With the Doppler brothers he collaborated in the opera 'Erzsébet' (of which he composed the second act), written for the Empress Elizabeth's visit to the capital as Queen of Hungary in 1857. In 1868 he was elected "National Music Director" of the "National Hungarian Association of Choral Singers", and in 1875 he was appointed principal and *professor ordinarius* of the recently established Academy of Music. He participated in the fiftieth anniversary celebrations of the National Theatre (1887) by writing a 'Festival Overture' especially for the occasion: this is his best orchestral composition, a truly majestic piece of music. His last opera, 'István király', intended for the inauguration of the opera-house was not finished in time and was performed in 1885.

Although not the first to have set original Hungarian texts to music of a predominantly national character, Erkel will always be remembered as the creator of a Hungarian operatic style. His achievement must be judged in the light of his contribution to the "romantic" programme of the later 19th-century Hungarian composers for the creation of a national musical style of European significance. The national element was then represented by the characteristic *verbunkos* dance music, which enjoyed national — indeed international — popularity and whose characteristic rhythms, melismatic patterns and elastic formal organization made it particularly suitable for opera where symphonic treatment was not thought essential by a public that could not as yet appreciate a sophisticated utterance and the finer points of musical

treatment. This explains the fact that national opera was established and to a certain extent consolidated before the emergence of a corresponding instrumental or symphonic style. The models provided by grand opera were particularly suited to Erkel's gifts, and in his earlier operas the national idiom was wedded to the traditional schemes of French and Italian models. 'Bátori Mária', 'Hunyadi László' and 'Bánk bán' are all constructed in set numbers, i.e. arias, concerted pieces, cabalettas, scenes, *concertante* instrumental solos, etc., connected by accompanied recitative, and thus resemble the operas of Bellini, Donizetti, Meyerbeer, Verdi, etc. His later operas on the other hand show him approaching the Wagnerian ideal: in 'Dózsa György' and 'Brankovics György' arias, etc., are increasingly replaced by free recitative-like declamation and continuous music, though effective finales and dramatic ensembles still prevail to some extent. 'István király' shows a compromise between musico-dramatic and operatic conception. On the whole the qualities of these later operas, their structural plan and their dramatic force show a striking resemblance to Mussorgsky's methods and style. The prophetic gifts of Erkel's musical thinking are seen especially in 'Brankovics György', whose vocal writing, based on a text adapted from prose drama, foreshadows the methods of Richard Strauss and Debussy. This opera is also remarkable for the introduction of Serbian and Turkish melodies, happily blended with Hungarian. The comic operas 'Sarolta' and 'Névtelen hősök' represent an intermediate phase in which he strove to reconcile elements of Hungarian popular song with the conventions of theatre music. The style and method anticipate Kodály.

His scores show a remarkable sense of orchestral colour; his virtuoso flute and clarinet parts were undoubtedly inspired by the excellent performers under his command (e.g. the Doppler brothers), while the inclusion of the *tárogató* and *cimbalom* was a concession to national sentiment. There is a part for *viola d'amore* (treated as an instrumental *obbligato*) in 'Bánk bán'. In all his operas he resorted to episodes from national history, which contributed greatly to their success. A film, depicting his life, was produced in 1952.

## CATALOGUE OF WORKS<sup>2</sup>

### OPERAS

- 'Bátori Mária', 2 acts (libretto by Béni Egressy, after András Dugonics), prod. Pest, National Theatre, 8 Aug. 1840.
- 'Hunyadi László', 4 acts (lib. by Egressy, after Lőrinc Tóth) (1842-43), prod. Pest, National Theatre, 27 Jan. 1844.

<sup>1</sup> An association for the promotion of choral and orchestral concerts, the precursor of the Philharmonic Society.

<sup>2</sup> Based on Ervin Major's annotated bibliographical essay, to which the reader is referred for further details.

- 'Erzsébet' (in collaboration with Ferenc & Károly Doppler), 3 acts, prod. Pest, National Theatre, 6 May 1857  
 'Bánk bán', 3 acts (lib. by Egressy, after József Katona) (1844-52), prod. Pest, National Theatre, 9 Mar 1861.  
 'Sarlota', comic opera, 3 acts (lib. by József Czanyuga), prod. Pest, National Theatre, 26 June 1862.  
 'Dózsa György', 5 acts (lib. by Ede Szighegyi, after Mor Jókai) (1864-67), prod. Pest, National Theatre, 6 Apr 1867.  
 'Brankovics György', 4 acts (lib. by Lehel Odry & Ferenc Ormai, after Károly Obernyik's drama), prod. Budapest, National Theatre, 20 May 1874.  
 'Névtelen hősök', 4 acts (lib. by Ede Tóth) (1875-80), prod. Budapest, National Theatre, 30 Nov. 1880.  
 'István király', 4 acts (lib. by Antal Váradi, after Lajos Dobsa), prod. Budapest, Royal Hungarian Opera, 14 Mar 1885.  
 'Kemény Simon', 3 acts (lib. by Jókai), not prod., MS lost.

## INCIDENTAL MUSIC

Music for a number of plays.

## ORCHESTRAL WORK

- 'Ünnepi nyitány' ('Festival Overture') (1887)

## PIANOFORTE AND STRING ORCHESTRA

- 'Begleitungs-Skizzen zu den Csel Variationen' (1839).

## ONE INSTRUMENT AND PIANOFORTE

- 'Duo brillant en forme de fantaisie sur des airs hongrois...' for vn. (with Vieuxtemps) (1837).  
 'Magyar album-lap' ('Hungarian Album-Leaf') for viola (1890).

## PIANOFORTE MUSIC

- 'Magyar ábránd' ('Hungarian Fantasy') (? 1827-34) (? lost).  
 'Albumblatt' (1839).  
 'Phantasia klavirra, az erdélyi Rákóczy dal themájára...' ('Fantasy for Clavier on the Transylvanian Rákóczy Theme') (1839) (? lost).  
 'Emléklül Liszt Ferenc Rákóczy Indulója' ('Souvenir for Liszt, Rákóczy's March') (? 1840).  
 'Rákóczy Indulója... és Bátori Mária Indulója' ('Rákóczy's March... and Bátori Mária's March') (? 1855).  
 'Capriccio' (? 1844) lost.  
 'Original Ungarischer...' (1845).  
 'Transcriptions' (? 1850).  
 1. 'Élégie de H. W. Ernst.  
 2. 'Le Carnaval de Venise.  
 'Marche hongroise...' (? 1852).  
 'Adagio.'

Also a number of choruses and songs.

See also National Anthems (Hungary).

(2) **Gyula Erkel** (b. Pest, 7 Aug. 1842; d. Ujpest, 22 Mar. 1909), composer and conductor, son of the preceding. At six years of age he already played percussion in the orchestra of the National Theatre. He conducted operas and founded the Ujpest Conservatory of Music. He wrote many so-called "popular plays" (*népszavmu*) similar to the English ballad operas and incidental music. His works also include a Symphonic Movement (1858), a Hungarian March (1858), Overture on Themes from Ruzitska's 'Béla király futása' (1881), and Ballet Suite for full orchestra (1885).

(3) **Elek Erkel** (b. Pest, 2 Nov. 1843; d. Budapest, 10 June 1898), conductor, bass-drum player and composer, brother of the preceding. He wrote operettas.

(4) **László Erkel** (b. Pest, 9 Apr. 1844; d. Pozsony, 3 Dec. 1896), conductor, brother of the preceding. He was a choral conductor and an esteemed pianoforte teacher at Pozsony, where Bartók received lessons from him.

(5) **Sándor Erkel** (b. Pest, 2 Jan. 1846; d. Békéscsaba, 14 Oct. 1900), conductor and composer, brother of the preceding. He began his career, like the other Erkel sons, as a percussion (kettledrum) player in the orchestra of the National Theatre, where he served from 1861 to 1874. He succeeded his father as first conductor of the Opera in 1875; the next year he was appointed its director. He remained in service until 1886 and after his resignation retained the title of Musical Director. The overture to his opera 'Csobáncz' (produced on 13 Dec. 1865) is still a favourite piece with Hungarian orchestras. Other compositions include 'Hungarian Overture' (1868), choruses and pianoforte transcriptions.

**ERKIN, Ulvi Cemal** (b. Istanbul, 14 Mar. 1906).

Turkish pianist, conductor and composer. He comes of a musical family, his mother playing the pianoforte and his brother Feridun, who later chose a diplomatic career and became Turkish ambassador to the U.S.A., the violin. Ulvi began to have pianoforte lessons at the age of eight. From 1919 to 1925 his teacher was Filomeno Adinolfi. After studying at the Galatasary Lyceum in his native city, he won a scholarship sponsored by the Ministry of Education in 1925 and went to Paris to study at the Conservatoire in 1926-28 and the École Normale de Musique in 1929-30. His teachers there were Isidor Philipp (1925-

<sup>1</sup> The first Hungarian opera whose music is preserved first performed at Kolozsvár, 26 Dec. 1822.

1928) and Camille Decreuse (1925-28) for pianoforte, and Jean and Noel Gallon (1925-1928) for composition. Later he concluded his studies in composition privately with Nadia Boulanger. In 1930 he received the Licence d'Enseignement from the École Normale and the same year returned to Turkey, where he was appointed teacher of pianoforte at the Music Teachers' School in Ankara. On 29 Sept. 1932 he married the well-known Turkish concert pianist Ferhunde Remzi.

After the reorganization of the State Conservatory by Hindemith in 1936, Erkin continued to be a pianoforte professor at both institutions, but he soon afterwards reduced his public appearances as a pianist to occasional accompanying in broadcasts. In 1943 his pianoforte Concerto was awarded the Music Prize of the People's Party and performed in Ankara and Berlin by his wife. In 1947 he conducted his first Symphony in Prague, where his 'Koçekçe' and string Quartet were also performed. In 1948 he began to conduct the orchestra of the State Conservatory in Ankara and to make guest appearances with the Presidential Philharmonic Orchestra. In 1949-51 he was director of the State Conservatory. He continues to be a professor there.

As a composer Erkin first tried his hand at smaller forms, but gradually turned towards sonata form, in which almost all his mature works are cast. Since his ancestors came from the Black Sea coast, it is not surprising to find that, as a rule, his scherzo movements are in 5-8 or 7-8 time and in the style of the *horon* (a folk dance of that coast), with passages imitating the effect of the *kemençe*, a stringed instrument of the same region.

## CATALOGUE OF WORKS

### BALLET

'Keloglian', choreography by Ninette de Valois (1950).

### INCIDENTAL MUSIC

'Karagoz', Turkish shadow play (? 1941).

### CHORAL WORKS

Folksongs for 2-part chorus (1936).  
7 Folksongs for mixed chorus (1945).

### ORCHESTRAL WORKS

2 Dances (c. 1930).  
'Bayram' ('Feast') (1934).  
'Koçekçe', dance rhapsody (1943).  
Symphony No. 1 (1944-46).  
Symphony No. 2 (1948-51).  
'Simfonietta' for strgs. (1951).

### SOLO AND ORCHESTRA

'Concertino' for pf. (1932).  
2 Songs for soprano (1932).  
1. Bulbul (The Nightingale).  
2. Aynı Öndördü (Full Moon).

<sup>1</sup> The music is an orchestral version of 'Five Drops' for pianoforte (1931).

Pf. Concerto (1942).  
Vn. Concerto (1947).

### CHAMBER MUSIC

String Quartet (1935-36).  
Quintet for 2 vns, viola, cello & pf. (1943).

### VIOLIN AND PIANOFORTE

'Lullaby, Improvisation and Zeybek Song' (1929-32)

### PIANOFORTE MUSIC

'Five Drops' (1931).  
7 Easy Pieces for children (1937).  
Sonata (1946).  
'Duyuşlar' ('Sensations').

### SONGS

7 Folksongs for voice & pf. (1936).

G. O.

**ERLANGER, Camille** (b. Paris, 25 May 1863; d. Paris, 24 Apr. 1919).

French composer. He entered the Paris Conservatoire at the age of seventeen, studying pianoforte and composition under G. Mathias, E. Durand, Taudon, Bazille and L. Delibes. In 1888 he won the Grand Prix de Rome with the cantata 'Velléda'. His first great success was with a dramatic legend in three parts, 'Saint-Julien l'Hospitalier', a powerful work after Flaubert's story, performed at the Concerts de l'Opéra in 1895. An 'Idylle d'Armorique' in three acts and a prologue, 'Kermaria', was produced at the Opéra-Comique on 8 Feb. 1897. His most important work, 'Le Juif polonais', on the popular Alsatian story by Erckmann-Chatrian on which Irving's success, 'The Bells', was also based, was produced at the Opéra-Comique on 11 Apr. 1900. 'Aphrodite' was performed there on 23 Mar. 1906; 'Bacchus triomphant' in 1910; 'La Sorcière' in 1912. A 'Sérénade carnavalesque' for orchestra, six 'Poèmes russes' and other songs, and some pianoforte pieces, may also be mentioned. Another opera, 'Le Fils de l'étoile', was produced at the Opéra on 20 Apr. 1904; he also composed 'Hannele Mattern' and 'Faublas'.

G. F.

BIBL.—BACHELET, A., 'Camille Erlanger' in 'Le Monde musical', May 1919.

**ERLANGER, Frédéric d', Baron** (b. Paris, 29 May 1868; d. London, 23 Apr. 1943).

Anglo-French composer. His father was a German and his mother an American. He began his musical studies in Paris under Anselm Ehmann, his only teacher. His first work, a book of songs, was published during the composer's twentieth year, and shortly afterwards he took up his abode in London as a banker, becoming a naturalized Englishman. His compositions include works of all kinds, notably the operas, 'Jehan de Saintré' (Aix-les-Bains, 1 Aug. 1893; Hamburg, 1894), 'Inès Mendo' (produced, under the pseudonym of Ferd. Regnal, in London at Covent

Garden on 10 July 1897, and subsequently in Germany); 'Tess' (after Thomas Hardy's 'Tess of the d'Urbervilles'), produced at the San Carlo Theatre, Naples, on 10 Apr. 1906 and at Covent Garden on 14 July 1909, and 'Noël', produced at the Paris Opéra-Comique on 28 Dec 1910.

Among d'Erlanger's other works are a string Quartet, a Sonata for violin and pianoforte, an 'Andante symphonique' for cello and orchestra, a Quintet for pianoforte and strings, a 'Suite symphonique' for orchestra (1895), a violin Concerto, Op. 17, played by Kreisler at the Philharmonic Concert of 12 Mar. 1903, and a 'Concerto symphonique' for piano and orchestra (1921). More recent is a Requiem for solo voices, chorus and orchestra (1931). Clearness of form and elegance of idea and expression are the distinguishing marks of d'Erlanger's music, whether in his operatic work, in his chamber and orchestral music, or in his songs.

G. F.

**ERLEBACH, Philipp Heinrich** (b. Esens, East Frisia<sup>1</sup>, 25 July 1657, d. Rudolstadt, 17 Apr. 1714).

German composer. He was *Kapellmeister* at the court of Rudolstadt in 1697. His opera (*Singspiel*), 'Die Pleiaden', appears to be lost. He also wrote cantatas, sacred songs, overtures, sonatas, etc.

E. v. d. s.

**ERLKING, THE.** } Schubert's song, a setting of Goethe's ballad, composed at the age of eighteen in 1815, of which there are four versions. It was first sung in public, in Vienna, by Michael Vogl, on 7 Mar. 1821, and published that year as Op. 1. The familiar English title has come to stay, although it is utterly meaningless: there is no such thing as an "erl", and the proper English word for the German *Erle* is alder. However, the original German name of the song too is due to a mistake. It comes from Herder's collection 'Stimmen der Völker', an anthology of translations of folk poetry of various nations, in this case a Danish tale. Herder mistook the meaning of the Danish *Ellerkong* (now *Elverkong*), which has nothing to do with alder-trees and should have been translated "Elfenkönig" = king of the elves.<sup>2</sup>

E. B.

**ERMELINDA TALEA PASTORELLA.**  
See MARIA ANTONIA WALPURGIS.

**ERNANI.** Opera in 4 acts by Verdi. Libretto by Francesco Maria Piave, based on Victor Hugo's drama 'Hernani'. Produced Venice, Teatro La Fenice, 9 Mar. 1844. 1st perf. abroad, Vienna (in Italian), 30 May 1844. 1st in England, London, Her Majesty's Theatre (in Italian), 8 Mar. 1845. 1st in

U.S.A., New York (in Italian). 15 Apr. 1847. **ERNELEINDE** (Opera). See PHILIDOR.

**ERNST, Alfred** (b. Périgueux, 9 Apr. 1860; d. Paris, 16 May 1898).

French writer on music. He was one of the foremost champions of Wagner in French literature. The following are his most important works: 'L'Œuvre dramatique d'Hector Berlioz' (1884); 'Richard Wagner et le drame contemporain' (1887); 'L'Art de Wagner', i, 'L'Œuvre poétique' (1893), ii, 'L'Œuvre musicale' (unfinished); 'Étude sur Tannhäuser de Wagner' (1895, with E. Poirée); and lastly, the translations into rhythmic French prose of the words of 'Die Meistersinger' and 'Der Ring des Nibelungen'. Ernst also wrote many articles in various reviews, and undertook the musical reporting in the 'Revue Encyclopédique', etc.

G. F.

**ERNST, Heinrich Wilhelm** (b. Brno, 6 May 1814; d. Nice, 8 Oct. 1865).

Moravian violinist and composer. As a student at the Vienna Conservatory he had Bohm for his master on the violin, and studied counterpoint and composition under Seyfried. He afterwards received instruction from Mayseider and soon achieved great proficiency on his instrument. When sixteen he made his first tour and played with much success at Munich, Stuttgart and Frankfurt o/M. At that time Paganini was travelling in Germany, and Ernst, greatly fascinated by this extraordinary artist, followed him from town to town in order to become familiar with the peculiarities of his style and technique. Towards the end of 1832 he went to Paris, where he lived for six years, studying and repeatedly playing in public. Between 1838 and 1844 he travelled over a great part of Europe, meeting everywhere with enormous success. He first appeared in London, on 18 July 1843, in the Hanover Square Rooms; on 15 Apr. 1844 he played for the first time at the Philharmonic, after which he regularly visited London for the season and settled there in 1855. He played in Dublin in 1851 and 1855. After some years, however, his health began to fail, and he had to give up playing in public. He died after a painful and protracted illness.

Ernst's playing was distinguished by great boldness in the execution of technical difficulties of the most hazardous character. At the same time his cantabile was full of deep feeling, and his tone had a peculiar charm. He was a thorough musician, and although critics found fault with his reading of classical music, on the other hand competent judges pronounced him an excellent quartet player.

As a composer Ernst is now forgotten, but the following among his brilliant, effective and mostly very difficult works for the violin were once the best known:

<sup>1</sup> Not Esens, as has been stated

<sup>2</sup> The O.E.D. says "a goblin that haunts the Black Forest in Thuringia".

- Op.*  
 1. 'Deux Nocturnes'  
 10. 'Élégie.'  
 11. Fantasy on airs from Rossini's 'Otello'.  
 12. Concertino, D ma.  
 17. 'Polonaise de concert.'  
 18. Variations on Dutch airs  
 19. Introduction, caprice and finale on airs from Bellini's 'Il pirata'.  
 22. Fantasy on Hungarian airs.  
 23. 'Concerto pathétique', F# mi.  
 24. Fantasy on Meyerbeer's 'Le Prophète'.  
 30. 'Rondo Papageno'

He also wrote two string Quartets, in B♭ major and A major. With Stephen Heller he collaborated in a number of very pretty duets for pianoforte and violin, which were published under the title of 'Pensées fugitives'. He also published an imitation of Paganini's once famous 'Carnaval de Venise'.

P. D., abr.

See also Heller (collab in vn. & pf. works). Osborne (do.)

**ERO E LEANDRO** (Opera). See BOTTO. BOTTESINI. MANCINELLI.

**EROE CINESE, L'** (Opera). See METASTASIO.

**"EROICA" SYMPHONY.** The 'Sinfonia eroica', in E♭ major, is the third of Beethoven's symphonies. The title is his own:

Sinfonia eroica composta per festeggiare il sovvenire di un grand' uomo dedicata a Sua Altezza Serenissima il Principe di Lobkowitz da Luigi van Beethoven. Op 55. No III. Partizione. Bonna e Colonia presso N Simrock.

(Note the Italian: the titles of Symphonies 1 and 2 are in French.) But its original title was simply 'Bonaparte. Louis van Beethoven.' The subject was suggested to him — perhaps as early as 1798, two years before the known completion of the first Symphony — by Bernadotte, the French ambassador in Vienna; but there is no trace of his having set seriously to work at it till the summer of 1803. On his return to town in the autumn of that year he played the finale to Mahler and Breuning.<sup>1</sup>

The work was finished in 1804 and is in four movements: (1) *Allegro con brio*, E♭ major, (2) *Marcia funebre. Adagio assai*, C minor. (3) *Scherzo and Trio. Allegro vivace*, E♭ major. (4) *Finale. Allegro molto*; interrupted by a *Poco Andante*, and ending in a *Presto*, E♭ major.

The Symphony was purchased by Prince Lobkowitz. There is an interesting story of its having been played three times in one evening by the prince's band, to satisfy the enthusiasm of Prince Louis Ferdinand of Prussia, passing through Vienna in strict incognito; but the first known performance (semi-private) was in Dec. 1804, when it was preceded by the previous two symphonies and the pianoforte Concerto in C minor. The first public performance was at the Theater an der Wien on Sunday evening, 7 Apr. 1805, at a concert of Clement's, where it was announced as in D♯ and was conducted by Beethoven. Czerny

<sup>1</sup> Thayer, 'Beethoven', II, 236. For the story of the intended dedication to Napoleon I, see BEETHOVEN, p. 542.

remembered that at this performance someone in the gallery called out, "I'd give a kreutzer if it were over".

The first performance in England was (probably) at one of the Vocal Concerts in London, at Hanover Square Rooms, on 14 Feb. 1806. It was played by the Philharmonic Society at the second concert of the second year — 28 Feb. 1814 — and was announced as "containing the Funeral March". In France it was the opening work of the first concert of the Société des Concerts du Conservatoire, 9 Mar. 1828. It was published by Simrock of Bonn, the publisher of the first four symphonies, on 29 Oct. 1806.

**"EROICA" VARIATIONS.** Beethoven's set of pianoforte Variations, Op. 35, composed in 1802 and dedicated to Count Moritz Lichnowsky. The theme is No. 7 of a set of 12 Country Dances, published in 1802-3, but probably written before the ballet 'Die Geschöpfe des Prometheus', produced in Vienna on 28 Mar. 1801, where the theme is used again in the finale. The Variations came next, and the theme then reappeared as that of the finale of the "Eroica" Symphony in 1803. The name "Eroica" Variations is thus not a title, but it is useful for identification.

E. B.

**EROS I PSYCHE** ('Eros and Psyche') (Opera). See RÓZYCKI.

**ÉROSTRATE** (Opera). See REYER.

**ERRARS, Jean** (b. ?, d. ?).

French 14th-century troubadour. Twenty-four of his chansons are present in the Bibliothèque Nationale in Paris.

E. v. d. s.

**ERREUR D'UN MOMENT, L'** (Opera).

See AUBER. DEZÈDE.

**ERRICHELLI** (or **Enrichelli**), ? (b. Naples, ?; d. ?).

Italian 18th-century composer. He wrote chiefly operas for Naples, of which the following are known: 'La serva astuta' and 'Il finto Turco', both in collaboration with G. Cocchi, 1753; 'Issipile', 1754 (score at Naples); 'Solimano', 1757 (score at Monte Cassino); 'Siroe', 1759 (score in Stockholm); and 'Eumene', 1771 (1st act by G. F. di Maio, completed after his death by Insanguene and Errichelli). Apart from 'Solimano', which was given in Rome, all these were produced at Naples. The Naples Conservatory also preserves a cantata, several single airs and a volume of solfeggi; some other vocal works are in the Milan Conservatory and elsewhere.

A. L.

See also Insanguene (collab in 'Eumene'). Maio (Giov., do.).

**Errico, Corrado.** See PIZZETTI ('Santa Uliva', incd. m.).

**ERSHOV, Ivan Vassilevich** (b. nr. Novochoerkassk, 1867; d. ?).

Russian tenor singer. He was born in a

farmhouse, and his mother, a Don Cossack woman, was a domestic servant of the humblest rank. His early childhood was spent in the most cramping poverty. The first change in his fortunes occurred when his mother took him into the house of a lady whom she served as kitchen-maid. Her employer was an excellent musician, and discovering that the child invariably stood outside the door whenever she played the pianoforte, she began to give him music lessons. After attending for a time a near-by district school he entered the educational department of the Alexandrovsky railway and subsequently obtained employment as a supervisory engineer. During this period he had become a member of the church choir. His voice attracted so much attention that he was advised to go to Moscow for the purpose of persuading Kochetov, then a famous professor of singing, to hear him. The audition was successful, and with the help of friends he was enabled to enter the Moscow Conservatory. On the advice of N. Rubinstein he transferred in 1893 to the recently founded Conservatory of St. Petersburg and in the spring of that year made his debut at the Maryinsky Theatre in 'Faust'. With the aid of a benefactor he then spent four months under Rossi at Milan, and at the conclusion of this tuition he was engaged to sing in 'Pagliacci' and 'Carmen' at Turin. Offers were now made to tour in South America, but he preferred to return to Russia and accepted an engagement at Kharkov. There he appeared with success in 'Puritani', 'Ernani', 'The Huguenots', 'Romeo and Juliet' and 'Faust', taking part also in the first production of an opera by the Swedish composer Hartevelde, entitled 'The Song of Triumphant Love', the text of which was derived from Turgenev.

News of these successes soon reached the capital, and in 1895 Ershov became a permanent member of the Maryinsky company, serving for no less than twenty-eight years during which he undertook forty-seven parts. But his zenith was reached in his Wagnerian interpretations. In 1899, when Felia Litvin was bidden from Paris, she found awaiting her collaboration a native artist who proved that after profound study he had become a fully fledged Wagnerian singer. Every member of the company was well versed, wrote the historian Stark, in the Wagnerian tradition, but, he continued, "like a Montblanc surrounded by lesser eminences towered Ershov". His interpretation of such different characters as Loge, Tristan, Siegmund and Siegfried were said to be almost startling in their variety.

M. M.-N.

**Erskine, John.** See Antheil ('Helen Retires', opera).

**ERTHEL, Sebastian** (b. ?; d. ?).

German 17th-century composer. He was a

monk at Freising, Bavaria, and later choir-master at the monastery of Garsten, Upper Austria. He wrote masses and other church music, vocal and instrumental. E. v. d. s.

**ERWARTUNG, DIE** (Opera). See SCHOENBERG

**"ES MUSS SEIN."** At the head of the last movement of the string Quartet in F ma., Op. 135, Beethoven wrote the following musical motto under the words "Der schwergefasste Entschluss" (the hard-won resolution):

this being the principal theme of the movement. The origin seems to have been a current joke in Beethoven's circle that had to do with the payment to his housekeeper. Beethoven worked out the theme in a four-part vocal canon, quoted by Thayer. W. M.

**ESCHER, Rudolf (George)** (b. Amsterdam, 8 Jan. 1912).

Dutch writer on music and composer. Before going to the Amsterdam Conservatory to study composition with Willem Pijper he was a pupil of Anton Kaltwasser and Jaap Callenbach (pianoforte) at Rotterdam. He wrote a study, 'Toscanini en Debussy: magie der werkelijkheid' and a number of articles in periodicals. His compositions include incidental music for F. Schmidt-Degener's play 'De Poort van Ishtar'; Trio for oboe, clar. & bassoon; sonatas for 2 flutes, for cello & pf. and for cello solo; 'Musique pour l'esprit en deuil', 'Passacaglia' and 'Sinfonia in memoriam Maurice Ravel' for organ; Sonata and Suite ('Arcana Musae dona') for pf.; 'Trois Poèmes de Tristan Corbière' and 'Horgajo' for soprano & pf., 'Lettre du Mexique' for baritone & pf., etc. H. A.

**ESCHIG, Max (Maximilian)** (b. Opava [Troppau], 27 May 1872; d. Paris, 3 Sept. 1927).

French music publisher of Czech birth. He founded a music-publishing business in Paris in 1907. Among the works for whose publication he was responsible are Charpentier's 'Julien' (1913) and the works of Sylvio Lazzari. He also published the French scores of numerous operettas, including 'The Merry Widow' and 'Waltz Dream', which had a universal success. Later composers in the firm's catalogue were Satie, Ravel, Falla and Turina. He was the French agent for Schott, Simrock and Furstner (publisher of Richard Strauss). After his death the firm became a limited company. J. G. P.

**Eschmann, Ernst.** See Vogler (C., 'Fiedelhänschen', lib.).

**ESCLARMONDE.** Opera in 4 acts, with a prologue and epilogue, by Massenet. Libretto by Édouard Blau and Louis de Gra-

mont. Produced Paris, Opéra-Comique, 15 May 1889. 1st perf. abroad, Brussels, Théâtre de la Monnaie, 27 Nov. 1889.

**ESCOBAR, ?** (b. ?; d. ?)

Spanish 16th-century composer. He was *maestro de capilla* at Seville from 1507 until 1514, and possibly longer. Church music by him is to be found in a manuscript, 'Varios de música', bought at Seville by Ferdinand, nephew of Christopher Columbus, about 1533 (Bibl. Columbina, Seville), in the Chapter Library at Toledo, in the Cathedral at Tarazona and the Bibl. de la Diputació at Barcelona. More interesting, however, are his secular compositions, of which 18 (for 3 and 4 v.) are printed by Barbieri from the manuscript in the Royal Library at Madrid.

J. B. T.

**ESCOBAR (Escovar), Andre de** (b. Evora, ?; d. ?).

Portuguese 16th-century musician, possibly of Spanish origin. He was a noted performer on the *charamelinho* or *boe* (shawm) and seems to have spent some time at Evora and at Coimbra, where he was a member of the University and Cathedral orchestras. In 1550 he sailed for the Portuguese Indies. He wrote a method for his instrument, 'Arte musica para tanger o instrumento da charamelinha', of which neither the manuscript nor a copy has ever been found. S. K.

**ESCOBEDO (Scobedo), Bartolomeo** (b. Zamora, c. 1515; d. Segovia, 1563).

Spanish composer. He was admitted to the papal choir in Rome in 1536, the year after Morales. He is described in the records as "clericus zamorensis"; on a certain occasion he acted as judge in a dispute between Vicentino and Lusitano. In 1541 he applied for leave to visit his country; in 1554 he left Rome altogether and became *maestro de capilla* at Segovia in Old Castile. His works, which are admirably conceived in the severe style of Morales, include:

Mass, 6 voices. 'Philippus Rex Hispaniae' (for accession of Philip II; MS, Sistine Chapel, dated 1563).

Mass, 6 v. 'Ad te levavi.' (Sistine Chapel.)  
Motets: 'Domine, ne memineris'; 'Hodie completi sunt' (Vatican); 'Immutemur habitu', 4 v. (Vatican; Toledo); 'Exsurge, quare obdormis', 4 v. (printed in Gombert's 'Musica 4 vocum, vulgo Motecta . . .', Venice, 1541. MS, Toledo).  
Magnificats; Miserere (Madrid Capilla Real).

Eslava printed the last two of the above-mentioned motets, and 'Erravi sicut ovis', for 4 voices. J. B. T.

See also Lusitano (dispute with Vicentino).

**ESCRIBANO (Scribano), Juan** (b. ?; d. Rome, 7 Oct. 1558).

Spanish singer and composer. He was in the papal choir in Rome under a succession of popes from 1507 until 1539. In 1545 he returned to Spain. The Vatican archives contain a motet, 'Paradisi porta' (5 v.), and a Magnificat in the 6th tone. In secular music,

he was the author of two chansons included in the 'Canzoni nove' of Andrea Antiquo di Montona (Rome, 1510), now in the University Library at Basel. J. B. T.

**ESCUDIER, Léon** (b. Castelnaudary, Aude, 17 Sept. 1821; d. Paris, 22 June 1881).

**ESCUDIER, Marie** (b. Castelnaudary, Aude, 29 June 1819; d. Paris, 17 Apr. 1880).

French writers on music, brothers. They settled in Paris and were the founders of 'La France musicale' (1838), a weekly musical periodical, and joint authors of 'Études biographiques sur les chanteurs contemporains' (Paris, 1840), 'Rossini, sa vie et ses œuvres' (Paris, 1854), and 'Vic . . . des cantatrices célèbres . . .' (Paris, 1856), which contains a life of Paganini. They set up a music-publishing business and brought out many of Verdi's works. Their 'Dictionnaire de musique' (2 vols., 1844, 5th ed. 1872) is a compact but unequal work. In 1862 the brothers dissolved partnership, Léon continuing in the business and starting a new paper, 'L'Art musical', while Marie directed 'La France musicale' until 1870. In 1876 Léon was for a short time director of the Théâtre-Italien. M. G. C.

**ESHIRTU** (Instrument). See BABYLONIAN MUSIC.

**ESLAVA Y ELIZONDO, Miguel Hilarion** (b. Burlada, Navarre, 21 Oct. 1807; d. Madrid, 23 July 1878).

Spanish musical scholar and composer. In 1824 he was appointed violinist in the cathedral at Pamplona and in 1828 *maestro de capilla* of Burgo de Osma. Here he was ordained deacon and took priest's orders when *maestro de capilla* at the metropolitan church of Seville (1832). In 1841 he produced at Cadiz his first opera, 'El solitario', followed by 'La tregua di Ptolomaida' (1842) and 'Pedro el Cruel' (Seville, 1843), which were successfully performed in several Spanish towns. In 1854 he became a professor at the Real Conservatorio de Música in Madrid. He composed over 140 pieces of church music, including masses, motets, psalms, etc. His *Miserere* is sung annually in Seville cathedral. The work by which he will live is his 'Lira sacro-hispana', 10 vols. (Madrid, 1869), a collection of Spanish church music of the 16th-19th centuries, with biographical sketches of the composers. Some of his organ music appears in another collection, his 'Museo orgánico español' (Madrid). His 'Método de solfeo' (1846) has been adopted throughout Spain. His 'Escuela de armonía y composición', in three parts, harmony, composition and melody, the fruit of many years' labour, appeared at Madrid in 1861 (2nd ed.). In 1855-56 he edited the 'Gaceta musical de Madrid', a periodical of considerable interest.

The following are the contents of the 'Lira sacro-hispana' <sup>1</sup>:

- 16TH CENTURY, i, 1
- Ramos. Ave Regna. For 4 voices.  
Anon Magnificat 4.  
Anon Domine Jesu. 4.  
Fevin, A. Sanctus. 4.  
Benedictus. 3  
Agnus. 4.  
Agnus. 5.  
Ascendens Christus. 6
- Peñalosa, F. Sancta Mater. 4.  
Tribulari si nescirem 4.  
In passione positus. 4.  
Memorare, pissima. 4.  
Versa est in luctum. 4.  
Precor te, Domine. 4.
- Ribera, B. Magnificat 4.  
Virgo prudentissima. 5.  
Rex autem David. 5
- Torrenes, A. de. Magnificat. 4
- Ceballos, F. Hortus conclusus. 4  
Inter vestibulum. 4  
Exaudiat Dominus. 4.
- Morales, C. Emendemus. 5.  
O vos omnes. 4  
Verbum iniquum 5.  
O crux ave. 5  
Lamentabatur Jacob. 5.
- Morales, Cr Kyrie, Christe, Gloria. 4
- Escobedo, B. Immutemur. 4.  
Exurge. 4  
Erravi sicut ovis. 5.  
Heu mihi Domine. 4.
- Fernandez, P. Dispersit, dedit 4.  
Heu mihi Domine. 4.
- Bernal, A. Ave sanctissimum 4.  
Robledo, M. Domine Jesu. 4.  
Regem cui omnia. 4  
Magna opera 4 & 5.  
Sumens illud ave. 4.
- 16TH CENTURY, i, 2
- Victoria, J. L. de. Mass, 'Ave maris stella'. 4, solo  
Vere languores.  
O Domine.  
Jesu dulcis memoria.  
O quam gloriosum  
Laudate.  
Requiem mass, "el canto llano".
- Guerrero, F. Passio sec. Mattheum. 2, 4, 5, 6.  
Passio sec. Joannem. 4 & 5.  
Ave Virgo. 5.  
Trahe me post. 5.  
Mass, "Simile est regnum". 4
- Navarro, J. M. Lauda Jerusalem. 4.  
In exitu Israel. 4.  
Magnificat rmi toni. 4.  
Magnificat xdi toni. 4.  
Magnificat svi toni. 4.  
Quis enim cognovit. 5.  
Quis enim cognovit. 5.  
O alitudo. 5.
- Las Infantas, F. de. Victimae Paschali. 6.  
Camargo, M. G. Defensor almae Hispanae. 4.  
Ortiz, D. Pereat dies. 5.  
Perañez, F. Maria virgo. 5.
- 17TH CENTURY, i, 1
- Gomes, J. B. Hodie nobis. 12.  
Lobo, A. Versa est. 6  
Credo quod Redemptor. 4.  
Vivo ego. 4.  
Ave Maria. 8.
- Heredia, A. de. Magnificat (super tonos). 4.
- Tafalla, P. Qui Lazarum. 5 & 8.
- Romero, M. Libera me. 8
- Veana, M. Villancico Asturiano. 8.
- Vivanco, S. O Domine. 5.
- Vargas, U. de. Magnificat. 8.
- Baban, G. Voce mea. 8.

- Juarez, A. Vulnerasti cor meum. 8.  
Dum sacrum pignus 9  
Caseda, D. Mass 8.

- 17TH CENTURY, ii, 1
- Pontac, D. Mass, 'In exitu Israel'. 4.  
Patino, C. Mass, 'In devotione'. 8  
Salazar, G. Heu mihi. 4 (soli).  
O Rex gloriae 8, col organo.  
Quae est ista 6, col organo.  
Vidi speciosam. 6, col organo.  
Sancta Maria. 5, col organo.  
Nativitas tua. 6 col organo.  
Mater Dei. 5, col organo
- Ortells. Lamentatio 12.  
Montemayor, F. de. Requiem mass. 8  
Duron, S. O vos omnes 4.

- 18TH CENTURY, i, 1
- Bravo, J de T. M. Portions of a Misa de defuntos. 8.  
Parce mihi 8.  
Taedet animam meam 8.
- Dudoso Dan, dan, don, don 5.  
Rabassa, P. Audite, universi 12.  
Valls, F. Tota pulchra. 4  
Cabrera, F. V. Kyrie and Gloria. 8.  
Roldan, J. P. Sepulto Domine 4.  
Sanjuan, N. Spiritus meus. 8.  
Paez, J. Jesu Redemptor. 4  
Muelas, D. O vos omnes. 8  
Ductus est Jesus 4  
Dicebat Jesus 4  
Erunt signa. 4  
Cum audisset Joannes. 4  
Vox clamantis. 3.
- Caseda, J. de. Kyrie and Gloria. 4  
Literes, A. Vos saeculorum iudices. 4  
Hi sunt quos fatue 4.
- Julý, B. Dilex quoniam. 4.  
Fuentes, P. Beatus vir. 10  
Soler, F. A. Introito and offertoria de defuntos. 8.  
Anon. Ecce sacerdotes. 5

- 18TH CENTURY, ii, 1
- Nebra, J. de. Requiem mass. 8 (strings and flutes).  
Ripa, A. Mass 8 (strings, trumpets and organ).  
Stabat Mater (6 verses). 8 (organ).  
Lidon, J. Ave maris stella. 4 & 8

- 19TH CENTURY, i, 1
- García, F. J. Lamentation. 8 (orch).  
Lamentation. 7 (orch).  
Aranaz, P. Ad te levavi. 4 (soli).  
Laudate. 6 (viol and trumpets).  
Doyague, M. Miserere. 4 (wind).  
Secanilla, F. Defensor almae Hispanae 5 (strings, trumpets and organ).  
Pange lingua. 7.  
Prieto, J. Salve regina. 4 (strings, trumpets and organ).  
Cuellar, R. Lauda Sion. 5 (strings, oboes and trumpets).  
Montesinos, A. Sancta et immaculata Virginitas. 8.  
Pons, J. Letrida, 'O Madre'. 8.  
Cabo, F. J. Memento Domine. 7.

- 19TH CENTURY, i, 2
- Ledesma, N. Stabat mater (12 verses) accd. by string quartet. 3  
Andrevi, Fr. Nunc dimittis. 4 (orch).  
Salve Regina. 6 (orch).  
Ledesma, M. R. Principes persecuti. 4 (orch).  
Bros, J. Benedictus. 4 (orch).

- 19TH CENTURY, ii, 1
- Eslava, H. Te Deum. 4.  
O sacrum convivium. 4.  
Bone Pastor 4.  
O salutaris hostia. 8.  
Requiem mass. 8 (orch).  
Parce mihi. 8.  
Taedet animam. 8.  
Libera me. 8.

- 19TH CENTURY, ii, 2
- Perez y Alvarez, J. Salve Regina 8  
O Salutaris 4 (bar. solo and orch).

<sup>1</sup> The numbering of the volumes is very puzzling; but the plan seems to be that each century is represented by two "series" and each series is divided into two volumes or *tomos*. The number of the series is indicated above in Roman numerals, that of the *tomo* in Arabic figures.

- Hugalde, C. J. Bone pastor Bass solo and organ  
O salutaris 3 (organ).  
Meton, V. O quoniam suavis. 5.  
Ecce panis 5  
O salutaris 5 (all with orch)  
Olleta, D. Salve Regina. 5 (organ and basses)  
García, M. Ave maris stella. 4 (strings, trumpets  
and organ)  
Prádanos, H. O quam suavis 4 (strings)  
Caballero, M. F. Ave maris stella. 4 (orch).  
Calahorra, R. O. Lauda Sion 1  
Vere languens. 4 (orch)

## APPENDIX

(ref. to)

**ESPINÓS, Victor** (b. Alcoy [Alicante],  
1875; d. Madrid, 21 Dec. 1948).

Spanish critic and musicologist. In early  
life he was a lawyer and a well-known  
journalist, and for many years his weekly  
articles on music and the drama written under  
the pseudonym ‘Perfacto Caballero’ were  
celebrated. These articles were later included  
in his book ‘Diez años de crítica teatral’.  
He was also music critic successively for the  
following Madrid papers: ‘El Español’,  
‘La Época’, ‘El Universo’, ‘El Debate’  
and in later years in ‘A.B.C.’ and ‘Madrid’.  
Throughout his life he was indefatigable in  
his efforts to foster the love of books and music  
among the poorer inhabitants of Madrid, and  
he founded the Music Library of the City  
Hall of Madrid, which for many years he  
directed. Since his death the work has been  
carried on by his daughter, Juanita Espinós.

Espinós also founded special circulating  
libraries for the people in the parks of Madrid,  
the Zoological Gardens and the Fire Brigade  
stations. Nor should we forget his founding a  
special children’s library, for he, like Dr.  
Mariano Benavente, the celebrated children’s  
doctor, was a pioneer in child welfare and a  
supporter of the ‘Teatro para niños’ of the  
dramatist Jacinto Benavente in 1909. One  
of his earliest books was a volume of children’s  
stories entitled ‘Pues Señor...’. He also  
wrote a special kind of dramatic sketch on  
historical subjects which he called ‘Retablos’.  
For many years he was associated with  
Fernández Arbós in musical life in Spain, and

the most authoritative biography of the  
latter comes from his pen (‘El maestro  
Arbós’, 1944). In his later years he was  
associated with the composers Rodrigo and  
Guridi and wrote poems for a collection  
entitled ‘Danzas viejas’ which were evoca-  
tions of the ancient folksongs of Spain. At his  
reception into the Royal Academy of Fine Arts  
of San Fernando he delivered an address on  
‘Mitos de España en la música universal’.

Espinós’s most important work in musicolo-  
gy was ‘El Quijote en la música universal’  
(1947), which was published in commemora-  
tion of the fourth centenary of Cervantes.  
In this work he analyses the musical works  
inspired by ‘Don Quixote’ from ‘Las bodas  
de Camacho’ by Pablo Esteve (1784) down  
to Manuel de Falla and Oscar Esplá. The  
value of the book is increased by the fact that  
the author has also studied the theme of ‘Don  
Quixote’ in music in France, Germany,  
Italy, England and in other European as  
well as in American countries. Of particular  
interest for English readers are his pages on  
Henry Purcell’s opera ‘The Comical History  
of Don Quixote’ (London, 1694). He says that  
Purcell was the first foreign composer to express musically  
his own feelings concerning the novel of Cervantes. For  
this reason his work and those by Richard Strauss and  
Manuel de Falla form a triptych of the greatest works  
inspired by the immortal novel.

And Espinós continues saying that England  
had been the first country to produce a  
translation of ‘Don Quixote’; the first to  
produce a biography and a commentary; and  
to this may be added that England was the  
first to interpret in music the story of the  
Knight and his Squire w. s.

**ESPINOSA, Guillermo** (b. Cartagena,  
Colombia, 9 Jan. 1905).

Colombian conductor. Having studied  
first in his native town, he obtained a scholar-  
ship from the Colombian government to study  
in Europe. He went first to Milan, where he  
worked with Renzo Bossi, and then obtained a  
Humboldt scholarship to the Berlin Hoch-  
schule für Musik, where he continued his  
studies with Pruvver, at the same time attend-  
ing University lectures in musicology. After  
studying for a time with Weingartner at Basel  
he became coach at the Berlin Municipal  
Opera and founded the Fremdensymphonie-  
orchester, which he conducted till 1932. In  
1931 he had founded the German-Latin-  
American Society of Music, for which he  
conducted and broadcast many Latin-Ameri-  
can symphonic works. Having conducted  
concerts and operas in many parts of Europe  
he returned to Colombia in 1932, and in 1936  
founded the Orquesta Sinfónica Nacional de  
Bogotá, of which he is the permanent con-  
ductor. N. F.

**ESPLÁ, Oscar** (b. Alicante, 5 Aug. 1889).  
Spanish composer. In his youth his edu-

cation was both humanistic and practical, for he became a doctor of philosophy as well as a civil engineer. As a musician he was mainly self-taught, though later he studied in Germany under various masters. His training in philosophy and exact science had influence on his musical output, for at every stage of his development as a composer we are struck by his high intellectual qualities. Among his early works should be mentioned first of all the Sonata for violin and pianoforte, Op. 9 (1913), which deserves to be included more often in recital programmes. In the second movement we get the essential lyrical qualities of a composer who in music produces the same haunting pictorial effect as the poet Gabriel Miró does in his evocative prose works, but Esplá is less of a colourist than Miró, and his music is based upon the folk music of eastern Spain. This music, though it springs from a part of the country which was at one time overrun by the Moors, has very little in common with Andalusian music, with its Oriental characteristics. For this reason Esplá's idiom is unfamiliar to the general public outside Spain, who when they listen to a Spanish composer always listen expectantly for the arabesques and snappy rhythms of the southern or Tartessian portion of the country. The great virtue of this Sonata lies in the contrast between the dramatic first movement and the lyric second. The scherzo and the broad *cantabile* finale seem like the metaphysical comments on the inspired dialogue of the first two movements.

In his early compositions, such as his opera 'La bella durmiente' ('The Sleeping Beauty'), the Suite for orchestra, which obtained first prize in the International Competition for Symphonic Works in Vienna in 1909, and the symphonic poem 'El sueño de Eros', the composer marks a definite antagonism to the nationalistic trend of Spanish music as it was understood then, but at the same time he has done for the folksongs of the Mediterranean coast what Falla had done for the Andalusian region. The general public, who were not familiar with Esplá's eclectic qualities, did not understand the melodic or harmonic subtleties of his genius, which was so different from that of the Andalusian composers, whose idiom and style was so well known throughout the world. As Pedro Morales has shown<sup>1</sup>, Esplá after his period of study in Germany adopted a scale of his own formation, from which he evolved the harmonic system that gives to the texture of his music its regional character, without using any definite folk melody. The scale is C, D $\flat$ , E $\flat$ , E $\sharp$ , F, G $\flat$ , A $\flat$ , B $\flat$ . This technical device appears in his works gradually, starting from 'Crepuscul', Op. 15, and reaching its full development in the three orchestral works,

'Ambito de la danza', 'Cíclopes de Ifach' (a fine piece of musical impressionism) and 'Las cumbres'.

Adolfo Salazar in some illuminating pages of criticism<sup>2</sup> describes how intensely Esplá feels the influence of his native landscape, and he adds that he does not know any other case of a man so profoundly rooted in the soil of his native province. There came a moment, however, when Esplá wished to make a paraphrase and leave his native mountains for the steppes of La Mancha. For some time he had been rereading 'Don Quixote' with a view to composing music for one of the episodes in the immortal book. After taking counsel with his friends among the writers the subject he chose was 'Don Quixote watching over his arms', and as a result he produced one of the finest modern orchestral works. It is significant that as far back as 1929 Salazar wrote that Esplá among the Spanish composers was admirably endowed by nature to be a symphonic composer — not in the sense of a follower of German models, but in an authentic, traditional Spanish manner. Esplá's individual qualities as a symphonic composer differ greatly from those we find in the harpsichord Concerto of Falla or the 'Sinfonietta' of Halffter. Esplá's music, be it symphonic or for voice or pianoforte, is essentially Mediterranean music and is completely different in texture from the music of the Spanish composers of other regions. Taking the symphonic poem 'Don Quixote' as an example, it is remarkable how he builds up his massive texture upon a very simple theme, or rather cell, which becomes the main agent in constructing the broad phrases describing the heroic impulses of the idealistic knight. Another exceptional work of Esplá's is the cantata-suite 'Nuit de Noël du diable', which has aroused enthusiasm in foreign audiences and marks a still greater contrast to other works such as his 'Sonata del Sur' for pianoforte and orchestra with its essentially Spanish atmosphere. Esplá in such a work avoids all superficial and external use of local colour and delves deep down into his country's soul.

As Salazar has shown, Esplá, owing to his symphonic tendencies, has turned away from Spanish traditional music styles, and thus at first puzzled some of his critics and led them wrongly to speak of vague German influences in his work, whereas he has always been poles apart from central-European or northern music systems.

In addition to his own original compositions, which include a bewildering variety of styles, he merits close attention on account of his important work as musicologist, humanist and philosopher. He is not, however, the conventional scholar who remains for years buried

<sup>1</sup> 'Dictionary of Modern Music and Musicians' (ed. A. Eaglefield Hull, London, 1922).

<sup>2</sup> 'Sinfonia y ballet' (Madrid, 1929).

in his library. He is, on the contrary, possessed by the *Wanderlust* and has travelled for years from country to country in his eagerness to draw closer to the intellectual centres in Europe. He should therefore be called not only a composer but also a musical humanist whose vast culture leads him for ever in search of new voices and new rhythms to add to his storehouse. Philosophy and science he has worn so elegantly that he reminds one of the consecrated phrase used by the ancient Spanish chroniclers when they wished to give the highest praise to a gallant cavalier. They said of him that he could ride well in both the saddles — that is to say in Christian as well as in Moorish fashion — and this saying, which corresponded to the *Doctor in utroque jure* of the universities, was even cut upon men's tombstones as an appropriate epitaph. This double mastery which is possessed by Esplá enables us to understand his personality as composer and musicologist. Above all we should not forget when considering his music that he came from the same region as Gabriel Miró, whose philosophic *sigüenza*, with its profusion of syncopated metaphors and its echoing phrases personifies Alicante of the clear sky and transparent sea. Can we wonder then that Esplá, a musical *sigüenza*, should have felt himself irresistibly drawn towards Elche, surrounded by its palm trees, a phantom Jerusalem transplanted to western lands? At Elche has survived the 'Festa de Elche', a liturgical drama of the 13th century, which is performed each year on the eve and on the day of the Assumption, 14 and 15 Aug.<sup>1</sup> This wonderful music-drama, which combines the ancient chanted liturgy of the 13th with the polyphony of the 16th century and gives rise to a ritualistic performance unparalleled in the European theatre, needed revision by a master who would purge its text of the excrescences and impurities which had accumulated through the centuries. Esplá not only revised the music but also restored the most brilliant scene of the mystery play called the 'Judada' with its magnificent polyphony of the 16th century, which had not been played for over fifty years.

W. S.

**ESPOSITO, Michele** (b. Castellammare nr. Naples, 29 Sept. 1855; d. Florence, 26 Nov. 1929).

Italian pianist, composer and teacher. From the age of ten to eighteen he was at the Naples Conservatory studying (as classmate with G. Martucci) pianoforte playing under Cesi and composition under Serrao. In 1878 he went to Paris, where he remained until 1882, when he was appointed professor of pianoforte playing at the R.I.A.M., Dublin. For several years he was principally occupied with teaching and concert playing, giving

pianoforte recitals under the auspices of the Royal Dublin Society and also organizing and playing for many years in the chamber music recitals given by that Society. In 1899, aided by some friends, he succeeded in establishing in Dublin a resident orchestra (the Dublin Orchestral Society), the concerts of which he conducted with much success.

His published works include 'Deirdre', cantata for solo voices, chorus and orchestra (Feis Ceoil prize), produced Dublin, 1897, and subsequently given by Wood at a Queen's Hall concert in London; an operetta, 'The Post-bag' (lib. A. P. Graves), produced at St. George's Hall, London, 27 Jan. 1902, by the Irish Literary Society; a string Quartet; a Sonata for cello and pianoforte (Incorporated Society of Musicians prize, 1898); a Sonata for violin and pianoforte; and many songs and pianoforte pieces. He also wrote an 'Irish' Symphony (Feis Ceoil prize, 1902), music for Douglas Hyde's 'The Tinker and the Fairy' (1910), an overture for Shakespeare's 'Othello' and other orchestral works, unpublished.<sup>2</sup> He was made Doctor of Music (*honoris causa*) of Dublin University in 1917 and the Italian title of Commendatore was conferred on him in 1922.

See also Dublin.

**ESQUIVEL, Juan Barahona de** (or **Juan de Esquivel Barahona**) (b. Ciudad Rodrigo, ?; d. ?).

Spanish 16th-17th-century composer. He was *maestro de capilla* in his native town. His motets were printed at Salamanca in 1612 under the title of

*Motecta festorum et dominicarum cum communis Sanctorum 4, 5, 6 et 8 vocibus concinnanda Salmanticae, excudebat Artus Tabernellus Antverpianus, MDCXII.*

A second part, comprising hymns, magnificats, etc., and published in 1613, is mentioned by Vicente Espinel, but has not been preserved.

J. B. T.

**ESSENGA, Salvador (del)** (b. ?; d. ?).

Italian 16th-century composer. He was a monk at Modena and apparently the teacher of Orazio Vecchi. He composed 2 books of madrigals a 5 (1st lost; 2nd, 1561); 1 book of madrigals a 4 (1566); single numbers are in collective volumes.

E. v. d. s.

**ESSENTIAL DISCORD.** A chord which is acoustically dissonant, but whose notes belong to the key in which a composition or passage is written and is thus closely enough related to the prevailing key to be introduced without preparation. This rule applies to the academic theory of harmony only, needless to say: it has no meaning in modern practice, which does not demand preparation for any kind of chord.

E. B.

<sup>2</sup> Two operas performed in Moscow, 'Camorra' (1903) and 'Il gentiluomo' (1905), sometimes ascribed to him, are by Eugenio Esposito.

<sup>1</sup> See also ELCHE, MYSTERY OF.

**ESSER, Heinrich** (b. Mannheim, 15 July 1818; d. Salzburg, 3 June 1872).

German conductor and composer. He was appointed *Konzertmeister* in 1838 and then musical director of the court theatre at Mannheim. For some years he was conductor of the "Liedertafel" at Mainz and in 1847 succeeded Otto Nicolai as *Kapellmeister* of the Imperial Opera, Vienna. In Nov. 1869, shortly after becoming a member of the board of the Opera, he was compelled by ill-health to resign and retired on a pension to Salzburg.

As a conductor he was admirable. Wagner showed his appreciation by entrusting him with the arrangement of his 'Meistersinger' for the pianoforte. Esser was the first to discern the merit of Hans Richter, whom he recommended to Wagner as a copyist, and who ultimately justified the choice by succeeding Esser at the Opera in May 1875 (the former sub-conductor, Dessoff, having filled the chief post between Esser's death and Richter's appointment).

As a composer Esser was industrious and successful. The stage was not his forte, and though three of his operas were produced — 'Silas' (Mannheim, 1840), 'Riquiqui' (Frankfurt, 1843) and 'Die beiden Prinzen' (Munich, 1845) — they did not keep the boards. His compositions for the voice are numerous and beautiful: some forty books of songs, two of duets, four of choruses for men's voices and two for mixed chorus, etc. His symphonies (Opp. 44, 79) and suites (Opp. 70, 75), and orchestral arrangements of Bach's organ works (Passacaglia, Toccata in F), performed by the Philharmonic Society in Vienna, were published as well as a string Quartet (Op. 5).

c. f. p.

**ESSER, Karl Michael, Ritter von** (b. ? Aachen or Zweibrücken, 1736; d. ? , c. 1795).

German violinist and composer. He started on his professional career as a violinist in the orchestra at Cassel, but appears to have spent the greater part of his life as a travelling virtuoso. Mozart, as a boy of seven, rebuked him at Mainz (in Aug. 1763) for adding too many notes and said he ought to play music as it was written, as Leopold Mozart remembered seventeen years later, when Esser visited Salzburg and Munich. The letters exchanged between father and son in Dec. 1780 present a lively picture of the "excellent violinist who cloaks his real merits in the tricks of a charlatan". Esser anticipated Paganini in playing a "whole concerto of his own composition on an overstrung G string only". He also played the viola d' amore. As a composer Esser is known by some symphonies (Op. 1, dedicated to the King of Denmark), duets for two violins (Op. 2) and string quartets (Op. 3; thematic catalogue in D.T.B., Vol. XV, 1916); he is also said to have written a *Singspiel*, 'Die drei

Pächter'. Like Mozart, Esser was a knight of the papal Order of the Golden Spur, but, unlike Mozart, he displayed it.

**ESSIPOV, Annette Nikolayevna** (b. St. Petersburg, 1 Feb. 1851, d. St. Petersburg, 18 Aug. 1914).

Russian pianist. She was educated at the Conservatory of St. Petersburg, principally under the care of Theodor Leschetzky. After attaining considerable reputation in her own country she undertook a concert tour in 1874, appearing in London at the New Philharmonic concert of 16 May, in Chopin's E minor Concerto, at recitals of her own and elsewhere. She made her début in Paris in the same Concerto in 1875 at one of the Concerts Populaires, and afterwards played at a chamber concert given by Wieniawski and Davidov. In 1876 she went to America, where her success was very marked. From 1880 to 1892 she was the wife of Leschetzky.

**ESTAMPIE** (Prov. *estampida*, Ital. *stampita*). Perhaps the earliest known European form of instrumental music in the middle ages: it is a dance form, originally vocal. References to it are very frequent in trouvère and romance poetry from the 12th to the 14th century, where it is usually associated with viols. The form is closely linked with that of the vocal *lai*: it is a sequence of double "points", or melodic units, of which the first appearance usually had an "open" (*vert*) ending and the second a "closed" (*clos*) ending, and these same endings served all the sections, giving the effect of rhyme in music. The best known *estampie*, the 'Kalenda maya' of Reimbautz de Vaguiers (c. 1200) has a melody that is known to have been adapted from an older *estampie*. An allied form, the "note" (*nota* or *notula*), is often coupled with the *estampie* in the literary references, and a few examples have been preserved. The only theoretical writer who dealt with these secular forms was Johannes de Grocheo (14th cent.) and some confusion has been caused by his Latin word *stantipes*: recent writers have suggested that this is not the same thing as the *estampie*, while others regard it simply as a translation and contend that it merely means music played standing and not intended to accompany dancing. Both may be wrong; *estampie* and *stampita* descend from the Germanic *stampjan* and so have nothing to do (philologically) with *stare* or *pedes*, but when Grocheo wanted a Latin word for it, he mistook the formation and coined his nonce-word *stantipes*. According to Grocheo the *estampie* was a much more sophisticated and difficult form than the *nota* and the *ductia*. The last-named is stated by Grocheo to be "without words" (*sonus illiteratus*), per-

haps wordless singing, but some apparently instrumental texts exist; no mention of the *ducta* has yet been found in literature, while, as stated above, the *estampe* and the *nota* occur very often, usually with instrumental contexts.

Other forms, known mainly from literary references, were the *carole* and the *tresque* (*treske*): these seem to have been partly vocal, but mainly instrumental, and were associated with dances of the chain type. The name *carole* is thought to have been derived from "Kyrie eleison". G. H. (1).

**ESTE.** At the town of Este, in N.E. Italy, between Padua and Rovigo, two musical academies — *Degli Eccitati* and *Degli Atestini* — were established in 1575. The family of the Este, always liberal patrons of the fine arts, encouraged especially the revival of music. Francesco Patrizzi (1530–90), a professor in the latter of these two academies, in dedicating one of his works to Lucrezia d' Este, daughter of Ercole II, the reigning duke of Ferrara, ascribes the revival of music in Italy to the house of Este, because Guido d' Arezzo was a native of Pomposa in their dominions, and because such famous musicians as Fogliano, Giusquino (Josquin), Adriano (Willaert) and Cipriano (de Rore) first found favour and support from the dukes of Este. **ESTEVE Y GRIMAU, Pablo** (b. ?; d. ?). Spanish 18th-century composer. He was the author of a great number of *tonadillas* in the second half of the 18th century, the manuscripts of which are preserved in the Bibl. Municipal, Madrid. Pedrell ('Teatro lírico') prints extracts from various *tonadillas* dating from 1779–87. J. B. T.

When Piccinni's 'La buona figliuola' was translated into Spanish and performed in Madrid in 1765 Esteve adapted the music and wrote some additional numbers. He did the

same the following year with Giuseppe Scarlatti's Goldoni opera 'I portentosi effetti della Madre Natura', given, with an acknowledgment to "Sr. Escarlatti", as 'Los portentosos efectos de la naturaleza'. Esteve's own dramatic works on a larger scale were 'Los jardineros de Aranjuez' (1768), the score of which is extant, 'Los zagales del Genil' (Granada, 1769), 'La isla de los pescadores' and 'La espigadera', both given in Madrid in July 1778; also the Italian opera 'Caio Fabrizio' (1783). 'Los signos del año' (c. 1785) was reprinted in Subirá's 'Tonadillas teatrales inéditas' (1932). A. L.

**ESTHER.** Handel's first English oratorio; words by Samuel Humphreys, founded on Racine's 'Esther'. Originally written as a masque entitled 'Haman and Mordecai' for the Duke of Chandos, and first performed at Cannons, 29 Aug. 1720. Performed again, in action, under Bernard Gates — in private on 23 Feb. 1732, as 'Esther', and in public at the King's Theatre, Haymarket, 2 May 1732, with "additions" not specified.

See also Racine.

**ESTINTO** (Ital. = extinct, dead). A direction obviously to be interpreted rather as synonymous with the more common *morendo* (dying [away]), since dead sound is not sound but silence. H. C. C.

**ESTIVE.** The name of a musical instrument which is found very frequently in medieval French poetry and romances, and is believed to denote a form of bagpipe. Many forms of this popular instrument existed in the 13th and 14th centuries, but unlike the *muse*, which was the big outdoor bagpipe, the *estive* was used more in association with the refined instruments, such as the harp, fiddle, etc. This suggests that it was soft and delicate in tone, as these other instruments were. The name *estive* may be connected etymologically with the Italian *stivare*, to compress (Lat. *stipare*).

Also frequently mentioned is the *estive de Cornoaille*. A 13th-century text quoted by Gérold<sup>1</sup> describes a minstrel playing the "lai Goron" faultlessly and very sweetly with this instrument. Again, in the 'Romance of the Rose' a *controville* (invention) is sweetly performed on *estives de Cornoaille*, which Chaucer, a century later, translates as "hornpipes of Cornewaile". The hornpipe was in recent times the English equivalent of the Scottish stockhorn and like the North African bagpipe had a small out-curved bell of horn, though it was played direct, *i.e.* without a bag. Nosuch instrument has been found in medieval art, but it apparently existed in the bagpipe form<sup>2</sup>, and so probably the *estive de Cornoaille*,

<sup>1</sup> 'Histoire de la musique' (1936), p. 354.

<sup>2</sup> See especially in the illuminated MS of 'Le Roman d'Alexandre' at Oxford (Bodl. Lib., MS Bod. 264), e.g. fol. 26 recto.

like the *estive*, had a bag: indeed they may well have been the same instrument.

On the other hand, Alexander Neckam (13th century, see Thos. Wright's vocabularies) gives *estives* as gloss for *tubae* — a word which in general medieval usage denoted bag-less reed instruments like the shawms. Finally Kastner<sup>1</sup> quotes a passage from a 12th-century French Bible in which *estive* does duty for the *tuba* of the Vulgate in Psalm XCVII (XCVIII).

**ESTOMPÉ** (Fr., lit. stumped, shaded off). A direction frequently used by Debussy where he requires a damped or muffled effect.

**ESTRADA, Carlos** (b. Montevideo, 15 Sept. 1909)

Uruguayan conductor and composer. He studied in Paris with Roger-Ducasse, Henri Busser, Noël-Gallon and Philippe Gaubert. On his return to Montevideo he conducted a chamber orchestra and became *maestro substituto* of the OSSODRE. He was also appointed professor of the history of music in the state schools and chorus master in the secondary schools. Most of his compositions are songs for various combinations of voices, but there are also pieces for string quartet, organ and pianoforte.

N. F.

**ESTRÉES, Jean d'** (b. ?; d. ?).

French 16th-century oboist and collector. Duverdiér calls him a "joueur du hautbois du Roy". He wrote a 'Livre de danseries, contenant le chant des branles communs, gays, de Champagne, de Bourgogne . . .' (4 vols. Paris, 1559-64), a collection of great interest.

E. v. d. s.

**ESTRELLA, Arnaldo** (b. Rio de Janeiro, 1908).

Brazilian pianist. He graduated from the Escola Nacional de Musica and subsequently studied with Lorenzo Fernández before undertaking his first South American tours as a pianist in 1935. He won the Columbia Concerts Prize in New York some seven years later and toured extensively in the U.S.A. He has since lived in Paris and first appeared in London in 1948. He is also a professor at the Escola Nacional de Musica.

N. F.

**ESTRELLA DE SORIA** (Opera). See BERWALD (7).

**ESTWICK, Sampson** (b. ? London, 1657; d. London, 16 Feb. 1739).

English divine and composer. He was one of the children of the Chapel Royal under Henry Cooke. Upon quitting the chapel on the breaking of his voice he went to Oxford, took holy orders and became one of the chaplains of Christ Church. He took the degree of B.A. in 1677, M.A. in 1680 and B.D. in 1692.

<sup>1</sup> 'Dances des morts', p. 217.

In 1692 he was appointed sixth minor prebend of St. Paul's Cathedral in London. On 27 Nov. 1696 he preached at Christ Church, Oxford, "upon the occasion of the Anniversary Meeting of the Lovers of Musick on St. Cæcilia's day", a sermon upon "The Usefulness of Church Musick", which was printed in the following year. In 1701 he was appointed vicar of St. Helen's, Bishopsgate, which living he resigned in 1712 for the rectory of St. Michael, Queenhithe. Estwick composed several odes for performance at the Acts at Oxford and other pieces which have remained in manuscript.

**ETON MANUSCRIPT.** This notable volume, MS 178 in the Library of Eton College, is the oldest and in some respects the largest collection of early Tudor music. It is dated between 1490 and 1502, and contained originally about a hundred motets and magnificats for 4, 5, 6, 7, 8 and in one case 9 voices; but rather more than half of them are either incomplete or wholly lost. Twenty-five different composers are named in the contemporary index in the volume, and the most frequent contributors are Browne, Cornyshe, Davy, Fayrfax, Lambe and Wilkinson, the last being the transcriber of the music. A five-part motet by Dunstable, the only five-part

music on record under his name, is among the lost treasures. The size of the page is  $23\frac{1}{2}'' \times 17''$ , but even this is exceeded by the similar manuscripts at Caius College, Cambridge ( $28\frac{1}{2}'' \times 19''$ ) and Lambeth ( $26\frac{1}{2}'' \times 18\frac{1}{2}''$ )

**ÉTRANGER, L'** (Opera). See D'INDY

**ETTINGER, Max** (b. Lwów, 27 Dec. 1874; d. Basel, 19 July 1951).

German composer. Although born in Poland he had a wholly German musical upbringing, starting his musical studies in Berlin in 1899 and continuing them the following year at the Munich Conservatory. He lived there for many years, but later went to Berlin, which he left in 1933 to settle in Switzerland, at Ascona.

In his music Ettinger adhered to the Munich music school originating with Ludwig Thuille, to which belong such composers as Braunsfels, Franckenstein and Waltershausen. He devoted himself mainly to opera, in which he showed a predilection for subjects that had been successfully treated by dramatic poets. Later, however, he became his own librettist, and his opera 'Dolores' to his own text was awarded the prize for opera of the Emil Hertzka Foundation in Vienna.

Ettinger also made a close study of the older English music, especially the Fitzwilliam Virginal Book. The fruits of this work are seen in his 'Old English Suite', introduced to London by Wilhelm Furtwängler, and his arrangements of old English music for violin and pianoforte.

The following are Ettinger's chief works:

#### OPERAS

- 'Judith' (libretto by composer from Friedrich Hebbel's drama), prod. 24 Nov. 1921
- 'Juana' (lib. by Georg Kaiser) } prod. Nuremberg, 7 Feb. 1925
- 'Der eifersüchtige Trinker' (lib. by Friedrich Freksa) }
- 'Clavigo' (lib. by composer, from Goethe's play), prod. Leipzig, 19 Oct. 1926.
- 'Frühlings Erwachen' (lib. by composer, based on Frank Wedekind's play), prod. Leipzig, 14 Apr. 1928.
- 'Dolores' (lib. by composer), ? not produced.

#### CHORAL WORKS

- 'Weisheit des Ostens' (Omar Khayyám) for 4 solo voices, chorus & orch. (1921).
- 'Moses' (words from the Bible) for 4 solo voices, chorus & orch.

#### ORCHESTRAL WORKS

- 'Drei Traumbilder.'
- 'Alt-Englische Suite.'
- 'Alte Tanz-Suite.'
- 'An den Wassern Babylons.'

#### CHAMBER MUSIC

- String Quartet.
- Sonata for vn. & pf.
- Suite for vn. & pf.

Sonata for cello & pf.  
Also numerous songs

**ÉTUDE.** See STUDY.

**EUCLID** (b. ?, d. ?).

Greek 4th-3rd-century (B.C.) mathematician. He flourished at Alexandria about 300 B.C. Two works on music have come down under his name. The 'Introduction to Harmonics' is now attributed to Cleonides. The 'Division of the Monochord' contains a series of propositions about musical intervals, and the greater part of it is probably genuine. Edition by C. von Jan, 'Musici scriptores graeci' (1895); French translation by C. E. Ruelle (1884).

R. P. W.-I.

See also Cleonides.

**EUGENE ONEGIN** ('Евгений Онегин'). Opera in 3 acts by Tchaikovsky. Libretto by the composer and Konstantin S. Shilovsky, based on Pushkin's novel in verse. Produced Moscow, Little Theatre, by students of the Conservatory, 29 Mar. 1879. 1st perf. abroad, Prague (Czech trans. by Marie Červinková-Riegrová), 6 Dec. 1888. 1st in England, London, Olympic Theatre (trans. by H. S. Edwards), 17 Oct. 1892. 1st in U.S.A., New York, Metropolitan Opera (in Italian), 24 Mar. 1920.

**EULE, Carl David** (b. ?, 1776; d. Hamburg, 30 Aug. 1827).

German conductor and composer. He was the son of Gottlieb Eule, an actor and buffo singer (who from 1798 was for some years one of the directors of the Hamburg theatre) and succeeded J. F. Honicke as musical director there in 1809. Eule wrote for Hamburg a number of comic operas such as 'Der verliebte Werber' (1799), 'Oberstlieutenant Taps' (1803), 'Fernando' (1807), 'Der Unsichtbare' (1809), 'Der tote Onkel' (1810) and 'Der Antiquatensammler' (1812), of which the fourth was the most successful and made the round of the German stages until about 1870. Scores of two others operas, 'Das Amts- und Wirtshaus' and 'Giaffar und Zaide', are preserved at Brussels and Munich respectively. Besides his works for the stage, Eule wrote a number of concert arias, a string Quartet and pianoforte music (Opp. 7-10 reviewed in A.M.Z.). According to an account in the same periodical (Dec. 1821) he was a bad conductor.

A. L.

**EULENSTEIN, Charles** (b. Heilbronn, 1802; d. Styria, 1890).

German Jew's harp and guitar player. After enduring all sorts of privations and ill-success, he appeared in London in 1827 and produced extremely beautiful effects by performing on sixteen Jew's harps, having for many years cultivated this instrument in an extraordinary manner. The patronage of the Duke of Gordon induced him to return in 1828; but he soon found that the iron Jew's

harp had so injured his teeth that he could not play without pain, and he therefore applied himself more and more to the guitar. At length a dentist contrived a glutinous covering for the teeth, which enabled him to play his Jew's harp again. He was very successful in Scotland and thence went to Bath (1834-45), to establish himself as teacher of the guitar, concertina and the German language. He eventually returned to Germany and lived at Gunzburg near Ulm.

**EULER, Leonhard** (b. Basel, 15 Apr. 1707, d. St. Petersburg, 3 Sept. 1783).

Swiss mathematician. He studied under Jean Bernoulli and will always be famous for the advance he brought about in pure mathematics, e.g. in the study of convergency, analytical comets and lunar motion. Musically he is to-day remembered for his theory of consonance, which within limits gave correct answers for mistaken or imperfect reasons, as Helmholtz pointed out in his 'Tonempfindungen'. An interesting exposition of Euler's theory was given by Dr. B. van der Pol in a lecture delivered at Haarlem in Jan. 1942, on 'Music and Elementary Theory of Numbers', an English translation of which appeared in *Mus. Rev.*, VII, Feb. 1946, 11-14 & 20-22.

LL. S. L.

**EUNUCH-FLUTE** (Fr. *flûte-eunuque*). An instrument described and figured by Mersenne<sup>1</sup>

It consisted of a tube (A C) open at one end, where it terminated in a bell mouth (C), but closed at the other (A) by a piece of membrane stretched like the head of a drum and covered for protection with a movable cap (A B) pierced with holes. In the side of the tube not far from the membrane, which was to be as thin as the skin of an onion, was a hole (B) into which the player emitted his voice. The membrane, thrown into vibration by the sound of the voice, gave out notes of its own, the same in pitch as those of the voice, but louder and different in timbre, they being of an ægophonous or bleating character. Mersenne states that music in four or five parts was performed on such instruments, the eunuch-flute having

this advantage over all other flutes that it imitates better the concert of voices, for it lacks only the pronunciation to which a near approach is made in these flutes.

He adds that "the little drum imparts a new charm to the voice by its tiny vibrations which reflect it", and expresses

the opinion that a concert of eunuch-flutes is better than one of voices, "which lack the softness of the harmony and the charm of the pieces of membrane". The idea on which the eunuch-flute is based seems to have struck Lord Bacon, for he wrote<sup>2</sup>:

if you sing into the hole of a drum, it maketh the singing more sweet. And so I conceive it would, if it were a song in parts sung into several drums; and for hand-someness and strangeness sake, it would not be amiss to have a curtain between the place where the drums are and the hearers.

One of the instruments is preserved in the Museum of the Paris Conservatoire. It is 88 centimetres in length and is believed to date from the time of Henry III of France. Eunuch-flutes are still manufactured, but only as toys. They are made in several sizes.

**EUSTORG, Hector (Eustorg de Beauhieu)** (b. Beauhieu-sur-Ménoire, Limousin, c. 1498; d. Basel, 8 Jan. 1552)

French poet, organist and composer. He was a friend of Clément Marot and other contemporary poets and in 1522 was organist of the cathedral of Lectoure (Gers). In 1524 he removed to Tulle, where he taught music and wrote poetry addressed to notable persons in the town. He is mentioned as a priest in 1529, but it is not on record that he ever held office, and he is known to have brought a lawsuit at Bordeaux over an inheritance. About 1534 he entered the service of Pomponne Trivulce, governor of Lyons, where he met several distinguished people, including François de Layolle, and it was there that he first began to sign himself "Hector".

Some time during this period he became a Protestant, and on 1 May 1537 he fled to Geneva, afterwards becoming a student of the new theology at Lausanne. He remained in Switzerland for the rest of his life. On 10 May 1540 the consistory of Berne appointed him pastor at Thierrens, but he resigned this living in 1547 and matriculated at the University of Basel in 1548. In 1550 he taught at Bienne, but he returned to Basel.

Eustorg is better known as a poet than as a musician, and of his musical works only three chansons for 4 voices survive, 'Bon jour bon an', 'Voicy le bon temps' and 'Mondain séjour', published in Jacques Moderne's 'Parangon des chansons' at Lyons, the first two in Book I (c. 1538), the third in Book II (1538). It is known that he also set 12 poems in the collection 'Des Divers Rapports', published by Pierre de Saint-Lucie at Lyons in 1537, and composed 38 settings of sacred words in another, 'Chrestienne Resjouys-

sance', of 1546; but both these books contain the words only, and the music is lost.

**EUTERPE.** The Muse of lyric poetry in Greek mythology and, since such poetry was sung, also the Muse of music, which had no separate patroness among the nine Muses, doubtless because in ancient Greece music had no separate existence as an art.

**EVA** (Opera). See FOERSTER (J. B.).

**EVACUATIO** (Eng. *evacuation*; Ger. *Ausleerung*; Ital. *evacuazione*). A late-Latin term used in the 15th and 16th centuries to denote the substitution of a "void" or open-headed note for a "full" or closed one; e.g. of a minim for a crotchet. The process was employed both with black and red notes, and continued for some time after the invention of printing; but its effect upon the duration of the notes concerned differed considerably at different epochs. Morley<sup>1</sup>, writing in 1597, says:

If a white note wh they called blacke voyd, happened amongst blacke full, it was diminished of halfe the value, so that a minime was but a crotchet, and a semi-briefe a minime . . .

But in many cases the diminution was one third, marking the difference between "perfection" and "imperfection"; or one fourth, superseding the action of the "point of augmentation".

W. S. R.

See also Notation.

**EVANGELATOS, Antiochos** (b. Lixouri, Cephalonia, 7 Jan. 1904).

Greek conductor and composer. He was educated in Athens at a Greek "Gymnasium", after which he entered the University first for medicine and later for law. In Dec. 1921 he was sent to Leipzig to continue his legal studies, but he gave them up in favour of music; he had already taken violin lessons at the Athens Conservatory from T. Schultze. After nine years of study at the Leipzig Conservatory in composition and orchestral conducting he graduated in 1928. In 1930 he went to Vienna for further studies and in 1931 to Basel, where he studied under Felix Weingartner.

Evangelatos returned to Greece in 1932 and made his first appearance both as composer and conductor at a concert on 25 Feb. 1932. Appointed in 1933 as professor of harmony, counterpoint and composition at the Greek Conservatory of Athens, he became in 1937 artistic co-director of that institution with K. Sfakianakis and M. Varvoglis. In 1938-1940 he was conductor of the Athens radio station orchestra and since 1941 he has been

<sup>1</sup> 'A Plaine and Ease Introduction.' Annotation at the end of the volume, referring to p. 9.

permanent conductor at the National Lyric Theatre.

Several of his works have been performed in Athens and outside Greece. His Symphony had its first performance under D. Mitropoulos (Athens, 1930), while his 'Overture to a Drama', after a first performance in Athens (1937, under Economidis), was also given in Berlin, Frankfurt o/M. and Bucharest. His most important symphonic work, so far, 'Variations and Fugue on a Greek Folksong' for full orchestra, was performed under Economidis in Athens (Apr. 1949) and London (Dec. 1949) with the New London Orchestra.

Evangelatos is generally considered one of the most distinguished Greek composers of the younger generation. He also shows literary interests and published a collection of poems, 'Impressions' (1925). His chief compositions are the following:

#### INCIDENTAL MUSIC

'The Persians', Aeschylus.  
'Electra', Sophocles.  
'Hecuba', Euripides.

#### CHORAL WORKS

'In Memoriam' for chorus & orch. (dedication to the memory of the heroes of the second world war) (1945).  
Several choruses.

#### ORCHESTRAL WORKS

Symphony (1930).  
'Epitaph' (1931).  
Larghetto and Scherzo (1932).  
Suite, D ma. (Academy of Athens Prize, 1934).  
'Overture to a Drama' (1937).  
Variations and Fugue on a Greek Folksong (1949).

#### VOICE AND ORCHESTRA

'The Maiden and Death.'

#### CHAMBER MUSIC

String Quartet.  
String Sextet.  
Also songs, &c

S. M

**EVANGELIMANN, DER** (Opera). See KIENZL.

**EVANS, Charles (Smart)** (b. ? , 1778; d. London, 4 Jan. 1849).

English alto singer and composer. He was a chorister of the Chapel Royal under Ayrton. On arriving at manhood he developed an unusually fine alto voice. On 14 June 1808 he was admitted a Gentleman of the Chapel Royal. He was the composer of some anthems (two of them printed) and of many excellent glees and other vocal pieces, most of which were published. In 1811 the Glee Club awarded him a prize for his cheerful glee 'Beauties have you seen a toy?', and in the following year a second for his 'Fill all the glasses'. In 1817 he carried off the prize offered by the Catch Club for the best setting of William Linley's 'Ode to the Memory of Samuel Webbe', the eminent glee composer. In 1821 he obtained another prize for his glee

'Great Bacchus'. He also produced several motets for the use of the choir of the Portuguese ambassador's chapel in South Street, Grosvenor Square (of which he was a member), some of which are printed in Vincent Novello's collection of motets. He was for some years organist of St. Paul's, Covent Garden.

W. H. H.

**EVANS, D. Emlyn** (b. Newcastle-Emlyn, Cardiganshire, 1843, d. ? , 1913).

Welsh composer. Following the trade of a draper for over thirty years, he was almost entirely self-taught as a musician. He was, however, a pioneer in Welsh choral music and his compositions include four cantatas and numerous anthems, glees, partsongs, songs and hymn-tunes. Several of his works won prizes at the National Eisteddfodau. He also arranged a quantity of old Welsh music and published a 'Treasury of Welsh Songs' in 1909.

P. C. H.

**EVANS, Edgar** (b. Cardiganshire, 9 June 1914).

Welsh tenor singer. He was educated at a tutorial private school at New Quay, Cardiganshire, and studied singing with Dawson Freer, Joseph Hislop and Luigi Ricci. He made his first appearance in opera as Herman in Tchaikovsky's 'Queen of Spades', and during the second world war he did work for C.E.M.A. and E.N.S.A. Since 1946 he has been a principal tenor at the Covent Garden Opera in London, taking among other parts those of Don José in 'Carmen', Alfred in 'La Traviata', Dimitry in 'Boris Godunov', Calaf in 'Turandot', the Chevalier des Grieux in 'Manon' and King Gustav in Verdi's 'Masked Ball'. He also doubled the part of Captain Vere in Britten's 'Billy Budd'.

M. K. W.

**EVANS, Edwin (i)** (b. ? London, 1844; d. London, 21 Dec. 1923).

English organist and writer on music. He produced several meritorious books on music, of which 'A Historical, Descriptive and Analytical Account of the Entire Works of Johannes Brahms' (4 vols.) is valuable as a work of reference for English readers. It began with the issue of the vocal section in 1912. Two volumes on 'Beethoven's Nine Symphonies' were published in 1923-24.

H. C. C.

**EVANS, Edwin (ii)** (b. London, 1 Sept. 1874; d. London, 3 Mar. 1945).

English critic, son of the preceding. Abandoning a business career, he devoted himself mainly to propaganda on behalf of modern types of composition. His campaign was almost entirely carried on through lecturing and journalism, though he produced a book of essays, 'The Margin of Music' (Oxford, 1924) and contributed analyses of Stravinsky's 'Firebird' and 'Petrouchka' to the 'Musical

Pilgrim' series (Oxford, 1933) 'Music and the Dance' was published posthumously (London, 1948).

Evans became music critic to 'The Pall Mall Gazette' in 1912. His series of articles in 'The Musical Times' (1919-20) on modern British composers is full of valuable information, and he contributed articles, mainly on modern British and French composers, to this Dictionary from the second edition onwards. In Jan. 1923 his services to the cause of the younger British composers were acknowledged by the presentation to him of his portrait, by Wyndham Lewis, subscribed for by a group of composers. He served 'The Pall Mall Gazette' until it ceased publication in 1923. During the first European war he had contributed also to 'The Daily Mail', and he became its regular music critic in succession to Richard Capell in 1933.

In 1938 Evans succeeded Edward J. Dent as president of the I.S.C.M.; as chairman of the British section he had taken a keen interest in the society's work ever since its inception at Salzburg. He left a valuable library of books on music and scores and sheet music (mainly modern works) which became the nucleus of the Central Music Library instituted in London in 1948, being purchased out of the funds provided by Mrs. Christie-Moór (Winifred Christie).  
H. C. C., adds

See also Christie (Winifred). Goossens (3, 5 songs). International Society for Contemporary Music.

**EVANS, Harry** (b. Dowlais, South Wales, 1 May 1873; d. Liverpool, 23 July 1914).

Welsh conductor, educationist and composer. His father (known as Eos Myrddin) was a steelworker and himself an amateur choral conductor of more than ordinary ability, succeeding to the traditions of Eos Morlais in a district which, despite the most tragic vicissitudes of industrial depression, has never failed to maintain its choral institutions and interests. Apart from a few pianoforte lessons from E. Lawrance, a pupil of Moscheles, Harry Evans was entirely self-taught; but he succeeded in passing the A.R.C.O. examination when he was twenty and, four years later, he was one of the first Welshmen to secure the coveted Fellowship of that college.

Evans was one of the strongest and most attractive musical personalities that Wales has ever produced. His influence on Welsh musical life was incalculable. It was no less so in England, where he was regarded as one of the chief figures in the British choral renaissance and the leading adjudicator in the young and thriving competitive festival movement. In 1902 he became conductor of the Liverpool Welsh Choral Union, and after he settled in Liverpool in 1906 he added the

University Choral Society and the Philharmonic Society to the list. As a choral conductor he was quite outstanding. To a superbly controlled enthusiasm in direction he added an interpretative genius that was uncanny. His musical mind was far-ranging and embraced all the best things in music from Bach to Brahms, as well as the developments contemporary with him in the choral idiom exemplified in the music of Parry, Elgar and Bantock.

The claims of a busy and arduous life left little time for composition, but some hymns and anthems as well as the dramatic cantata 'The Victory of St. Garmon' (first performed at Cardiff, 1904) reveal a remarkable talent. Evans's death at the early age of forty-one, just as he was entering into his rightful inheritance, was a tragic loss, not only to his native Wales, but also to Great Britain at large.  
S. N.

**Evans, Maurice.** See Engel (L., 'A Hero is Born', incid. m.).

**EVANS, Nancy** (b. Liverpool, 19 Mar. 1915).

English mezzo-soprano singer. She was educated at Calder High School, Liverpool, and studied singing privately with John Tobin, Maggie Teyte and Eva de Reusz. She gave her first public recital at Liverpool when she was seventeen, and a year later gave her first London recital. She made her first appearance on the stage in a revival of Sullivan's 'Rose of Persia' at the Princes Theatre in London and in 1938 sang in opera at Glyndebourne. She sang in the international season at Covent Garden in 1939 and during the war made many tours for E.N.S.A., appearing in France, Belgium, Holland, Egypt, Persia and Iraq. In 1946 she joined the English Opera Group and won high praise for her performance in Britten's 'Rape of Lucretia'. She also played the part of Nancy in the same composer's 'Albert Herring' in 1947 and Polly in his arrangement of 'The Beggar's Opera' two years later.

Nancy Evans has sung at concerts and in opera in many countries, including France, Holland, Belgium, Germany, Switzerland, Scandinavia and Turkey, and she is regularly engaged for numerous choral society concerts throughout England and appeared at the festivals of Cheltenham, Aldeburgh, Edinburgh, Lucerne and Ankara. Since 1945 she has sung regularly at the Promenade Concerts, and she has often broadcast. She is a highly accomplished and finished singer, and is a sympathetic interpreter of modern music, especially the works of Benjamin Britten, who dedicated his 'Charm of Lullabies' to her, which she performed for the first time in 1948. In 1949 she married Eric Crozier, the librettist.

M. K. W.

**ÈVE, Alphonse d'** (b. Brussels, 1666; d. Antwerp, 1727).

Flemish composer. He is said, without clear evidence, to have been a chorister in the chapel of St. Martin's at Courtrai and, after being ordained priest, to have become choir-master there, and later at St. Walburga's at Oudenarde. A certain fact is that on 5 Nov. 1718 he was appointed choir-master at Antwerp Cathedral. The following year he dedicated to the chapter a Mass for 9-part double chorus and orchestra. In a document of 14 Mar. 1720 one Marie-Françoise Voelders is named as the wife of "Maître Alphonse d'Ève", but it is not certain, though extremely likely, that this was the composer. He resigned in 1725 on account of great age and was succeeded by Guillaume de Fesch.

He wrote music for an early Flemish opera on the subject of 'Don Quixote', the *musical kluchtspel* 'Het Gouvernement van Sancho Panca in 't Eylandt Barataria' (Antwerp, 1700), as appears from the libretto at the Bibliothèque Nationale in Paris. Of his numerous masses<sup>1</sup> and other church compositions only a few are still in existence.

**EVERS, Carl** (b. Hamburg, 8 Apr. 1819; d. Vienna, 31 Dec. 1875).

German pianist and composer. He made his first appearance at the age of twelve and shortly afterwards went on long professional tours. Returning to Hamburg in 1837 he studied composition under Carl Krebs. On a visit to Leipzig in 1838 he made the acquaintance of Mendelssohn, whose influence affected him greatly and started him in instrumental compositions on an extended scale. In the following year he went to Paris, where he was kindly received by Chopin and Auber, and remained for some time working hard. In 1841 he was appointed *Kapellmeister* at Graz, where he started a music business in 1853, taught, and otherwise exercised his profession. From 1872 until his death he resided in Vienna. His compositions comprise four pianoforte sonatas, of which those in B minor, B $\flat$  major and D minor were much esteemed; twelve 'Chansons d'amour' for pianoforte, fugues, fantasies; solo and part-songs, etc. Haslinger of

Vienna and Schott of Mainz were his publishers.

M. C. C.

**EVERS, Katinka** (b. Hamburg, 1822; d. ?).

German singer, sister of the preceding. She was favourably known as an opera singer in Germany and Italy.

**EVESHAM, Walter of.** See ODINGTON, WALTER DE.

**EVOVAE** (or *Euouae*). A technical word, formed from the vowels of the last clause of the Gloria Patri—*seculorum Amen*—and used, in medieval office-books, as an abbreviation when, at the close of an antiphon, it is necessary to indicate the ending of the tone adapted to the following Psalm or canticle.

The following example, indicating the second ending of the first tone, is taken from an office-book printed at Magdeburg in 1613.

F. M. Bohme<sup>2</sup> mistook the vowels EVOVAE for a familiar Greek word, and was greatly exercised at the admission of a "Bacchanalian shout" into the office-books of the church! "Statt *Amen* der bacchische Freudenruf, *evouae*!"

**EWER & CO.** English importers of music, music sellers and publishers. The firm was established by John Jeremiah Ewer at 1 Bow Church Yard, Cheapside, London, about 1823, with additional premises at 263 Regent Street in 1824. A year or so later Julius Johanning joined Ewer in partnership as Ewer & Johanning, at 1 Bow Church Yard, which continued until about 1829, with additional premises at 263 Regent Street, about 1825-26, and at 20 Titchbourne Street, Piccadilly, from about 1826. When Johanning withdrew from the firm it continued as J. J. Ewer & Co. at 1 Bow Church Yard until 1841, subsequent addresses being 69 Newgate Street, c. 1841-43; 72 Newgate Street, 1843-52; 390 Oxford Street, c. 1852-59; 87 Regent Street, c. 1859-1867. They then became merged with Novello & Co, as Novello, Ewer & Co, with premises at 1 Berners Street.

Ewer & Co. had an extensive business, and were the principal English publishers of Mendelssohn's works, the copyrights of which passed to Novello, Ewer & Co. Ewer & Co. also had a music circulating library. In 1839

<sup>1</sup> For a Mass by him, misattributed to T. A. Arne, see ARNE (1, Catalogue, footnote to Church Music).

<sup>2</sup> 'Das Oratorium' (Leipzig, 1861).

they acquired the stock of Gustavus Andre, a publisher and importer of foreign music, who was in business at 79 Cheapside and other addresses in London in 1838-39.

After Johanning left Ewer he became a partner in the firm of Johanning & Whatmore, or Johanning & Co., music and musical-instrument sellers and publishers, at 126 Regent Street, from about 1831 to 1835, their subsequent addresses being 6 John Street, Oxford Street, c. 1835-37; 122 Great Portland Street, c. 1837-43; 9 Newman Street, Oxford Street, c. 1843-49; and 2 Marylebone Street, c. 1849-50.

**EWING, Alexander** (b. Old Machar, Aberdeen, 3 Jan. 1830; d. Taunton, 14 July 1895).

Scottish composer. He was the son of Alexander Ewing, M.D., and a nephew of Bishop Ewing (1814-73) of Argyll. He was educated for law at Marischal College, Aberdeen, but entered the army (1855) and became a staff paymaster and hon. lieut.-colonel. To the English-speaking world he is known as the composer of the hymn-tune "Ewing" in the 'Scottish Hymnal' (No. 275). It was composed in 1853 and published on single slips. This version, in 3-4 time, was set to the words of Neale's hymn "To thee, O dear, dear country", and it began on the first beat of the bar. In 1861 it appeared in 'Hymns, Ancient and Modern', without permission, and in common time. To-day it is best known under the title of "Jerusalem the Golden". Ewing was not only "a most accomplished amateur musician", but a fine composer. This has only recently come to light from his autograph compositions acquired by the National Library of Scotland. There are to be found some fine anthems: 'He that goeth', 'Now upon the first day' and 'There shall come a star', as well as his deeply moving 'Deus misereatur' and 'O how amiable'. In the secular field are some exquisite partsongs, such as 'Gladly ring, oh joy bells' and 'The Gentle Spring', while another, reminding one of Farnaby, is 'Oh doubting heart'. A work of maturity, 'From Guinevere', for eight voices (1868) and a madrigal 'Life is full of trouble' are gems.

**EXAQUIR.** See CHEKKER.

**EXAUDET (Exaudé), Joseph** (b. Rouen, c. 1710; d. Paris, c. 1763).

French violinist and composer. He was first violin at the Rouen Academy concerts. Thence he went to Paris, where he was engaged for the Opéra in 1749. He composed 2 books of sonatas, Opp. 1 and 3 (MS), for violin and bass, and a book of trios for 2 violins

and bass, Op. 2. He is now remembered only by a beautiful minuet. E. v. d. s.

**EXIMENO, Antonio** (b. Valencia, 26 Sept. 1729; d. Rome, 9 June 1808).

Spanish mathematician and musical scholar. He was a Jesuit and, having studied mathematics and music at Salamanca, became professor of both sciences at the military academy of Segovia. On the expulsion of the Jesuits from Spain he settled in Rome. His work, 'Dell' origine e delle regole della musica, colla storia del suo progresso, decadenza, e rinnovazione' (1774, Spanish trans. 1796), contains the germ of the theories afterwards elaborated by Wagner and at the time raised a host of polemical writings, to which even Padre Martini contributed his share. He proposed to abolish the strict laws of counterpoint and harmony, and apply the rules of prosody to musical composition. He was the first scientific exponent of the doctrine that the aim of music is to express emotion, and thus exercised considerable influence on musical aesthetics. His contemporaries stigmatized his book as an "extraordinary romance, in which he seeks to destroy music without being able to reconstruct it"—a verdict which curiously anticipates that often passed upon Wagner in later days.

His other works include 'Don Lazarillo Vizcardi', a musical novel in the manner of 'Don Quixote', describing the adventures of a musician whose mind has been deranged not by books of chivalry but by the study of counterpoint. Besides the plan of the book, the author has something of the admirable prose style of his model. It was edited by Barbieri (Madrid, 1872-73), while chapters taken from it and other writings by Eximeno were reprinted by Pedrell in 1921. Eximeno was one of the first exponents of the theory of nationalism in music; it was (he said) on the basis of its national song that the music of a country should be founded. J. B. T.

**EXPERT, Henry** (b. Bordeaux, 12 May 1863).

French musicologist. He went to Paris in 1881 and entered the École de Musique Classique founded by Niedermeyer (École Niedermeyer), in which he afterwards taught. He subsequently completed his musical studies under Franck and Gigout. For many years professor at the École des Hautes Études Sociales in the musical department, he founded with E. Maury a Société d'Études Musicales et de Concerts Historiques, and the choral society La Chanterie de la Renaissance, which he himself conducted. From 1909 he was second librarian of the Paris Conservatoire Library, replacing J. Tiersot as senior librarian in 1920. He resigned this post in 1933. Irresistibly attracted by the music of the French Renaissance, he devoted himself heart and soul to the

study of music of this period and to the publications of its achievements. Under the general title of 'Les Maîtres musiciens de la Renaissance française', continued as 'Monuments de la musique française au temps de la Renaissance', he published from 1894 on a great quantity of examples of Franco-Flemish art of the 15th and 16th centuries in a manner which is a model of scrupulous erudition. The work is divided into ten sections as follows:

- I. 23 volumes ('Maîtres musiciens') containing works by Lassus, Goudimel, Costeley, Claudin de Sermisy, Consilium, Courtois, Deslonges, Dulot, Gascogne, Hesdin, Jacotin, Jannequin, Lombart, Solier, Vermont, Brumel, P. de La Rue, Mouton, Fevin, Mauduit, Le Jeune, Regnard, E. du Caurroy, Claude Gervaise, E. du Tertre. The sequel ('Monuments de la musique') comprises (1924-25) 3 vols. (Le Jeune, Certon, Didier Le Blanc)
- II 'Bibliographie thématique' (catalogue of French and Flemish works of the 15th and 16th century [2 vols])
- III. 'Théoriciens de la musique au temps de la Renaissance' (1 vol), Michel de Menchou
- IV 'Sources du corpus' (authorities), abandoned and replaced by 2 vols devoted to Anthoine de Bertrand
- V 'Commentaires'
- VI 'Extraits des Maîtres musiciens de la Renaissance' (Anthologie chorale), separate examples of sacred and secular music.
- VII. Anthoine de Bertrand, pt. III.
- VIII. Claude Le Jeune.
- IX. Goudimel.
- X. Paschal de L'Estocart.

To these publications must be added reprints of instrumental music of the same period (Le Jeune, du Caurroy), and a special selection of pieces written on poetry by Ronsard, under the title of 'La Fleur des musiciens de P. de Ronsard, sonnets, odes et chansons à 4 voix . . .' (Paris, 1923). He wrote besides a remarkable book on the Huguenot Psalter of the 16th century. Especially dedicated to the music of the 16th, 17th and 18th centuries are the following collections: 'Chants de France et d'Italie' (3 series), 'Répertoire classique de musique religieuse et spirituelle', 'Les Maîtres français du clavecin', 'Amusements des maîtres français du XVIII<sup>e</sup> siècle'. He contributed to the 'Encyclopédie de la Musique et Dictionnaire du Conservatoire' (article: 'Musique vocale', 16th century), and wrote the analytical notes for the 'Édition Nationale'.

**EXPOSITION.** The putting out or statement of the musical subjects upon which any movement is founded, regulated by various rules in different forms of the art.

In fugue the process of introducing the several parts or voices is the exposition, and it ends and passes into episode or counter-exposition when the last part that enters has concluded with the last note of the subject. Counter-exposition is the reappearance of the principal subject or subjects, after complete exposition or such digressions as episodes.

In forms of the harmonic order the term "exposition" is commonly used of the first

half of a movement in binary form, because that part contains the statement of the principal subjects. This use of the word is evidently derived from the incomplete and superficial view, which was the legacy of theorists of some generations back, that a binary movement was based on two tunes which for the sake of variety are put into two different keys. Hence it is not so apt in this sense as it is in connection with fugue. But it may be defended as less open to objection when it is used as the obverse to recapitulation, so as to divide binary movements into three main portions, the exposition, development (or working-out) and recapitulation; and though it leaves out of count the vital importance of the contrast and balance of key, it is likely to be commonly accepted in default of a better. C. H. K. P.

**EXPRESSION** (Eng and Fr; Ger. *Ausdruck*; Ital. *espressione*) The creative element in musical performance. All art is a partnership between the originator and the percipient, in which the latter must relive what the former set out; but certain arts, of which music is one, also employ an intermediary on whose capacity to relive the originator's experience in high degree, and on whose technical competence in relaying it, the percipient's pleasure ordinarily depends. The conditions under which the performer's creativeness can contribute to the composer's without conflicting with it are somewhat finely balanced, and it is the purpose of the present article to draw attention to them.

It must first be realized how widely the distribution of responsibility has varied in musical history. For long periods in antiquity, as still in the East, improvisation within traditionally inherited formulae has played a major part. Even in the Baroque period, and still to a small extent more recently, much of the figuration which to us falls so obviously within the composer's province was left to the performer under the guidance of conventions whose recovery comprises one of our chief problems in recreating the music.<sup>1</sup> It was felt that ornamental figuration is too individual a matter to be stereotyped by writing it down. In theory the same principle lay behind the figured basses left to the performer to realize, though in practice the saving of labour to the composer must also have been a powerful motive.

These matters have now passed from expression to composition; but others remain. Our present principle is to write into the notation not as little but as much as we can; yet we recognize that while notation can be fairly specific about what is to be played, it can do no more than hint how to play it. We use many more descriptive words and expression

<sup>1</sup> See ORNAMENTATION

marks than our ancestors, but it cannot be too strongly emphasized (a) that we do not use any more expression and (b) that in the last resort expression can no more now than then be confined within notation. For notation, however much amplified, is always limited, while expression ranges through unlimited gradations.

The chief particulars in which expression remains paramount are :

(1) MOOD.—The most general characteristic and fundamentally the most important. Extraordinary misconceptions can and do occur, especially where (as is the case with virtually all Baroque and earlier music) tradition has been discontinuous. But a performer who cannot at least in a familiar tradition learn from his own musical intuition what is the prevailing mood, and convey it vividly and appropriately, is no fit interpreter.

The use of descriptive words at the beginning of a piece, a movement or a passage to give some broad indication of its mood is of comparatively recent origin, becoming habitual only in the second half of the 18th century. It may perhaps be traced to dance music. The designations Pavan, Galliard, Saraband, etc. etc. effectively conveyed to those familiar with these dances the general character of their music, subject only to variations of time and place such as those which made the English 17th-century saraband a quick incisive movement quite unlike the continental versions. When dance forms were combined with or replaced by other movements not in dance forms, descriptive titles were given to the latter with the ostensible purpose of indicating the mood rather than the pace: *allegro* (cheerful), *grave* (solemn), etc. The chief purpose which they actually serve, however, like others such as *presto* (quick), *lento* (slow), etc., is to give some guidance on a decision involved in the mood but not by any means alone: namely the speed. Such words first appear early in the 17th century. The somewhat fanciful titles used by Couperin and others of his school are often helpful as a clue to mood: there would be little excuse for taking 'Les Vieux Seigneurs' flippantly or 'Les Barricades mystérieuses' flashily. During the 19th century the custom established itself of adding adjectives to serve the function once allotted to the main directions: *agitato*, *appassionato*, etc. As preliminary indications these are of considerable value; but the act of comprehension itself remains as intuitive as it was in the Baroque period, and is the responsibility of the performer.

It must be clearly understood that the earlier music in which few if any written indications of mood are given makes essentially the same demands on the emotional

participation of the performer as more recent music in which these demands are in some degree specified. That music is possible without emotion (or as some put it "subjective emotion") is a recurrent illusion among the reticent of every generation, including our own; but the attempt to fasten it on the Baroque musicians will not bear careful examination. Caccini ('Nuove musiche', 1601) condemns "those who do not well understand what it is to sing passionately". Mace ('Musick's Monument', 1676) knew that "in Musick, may any Humour, Conceit or Passion (never so various) be Exprest". Ragueneau ('Comparison Between the French and Italian Music', 1702) characterized the Italian as

seized with an unavoidable agony; he tortures his violin; he racks his body; he is no longer master of himself, but is agitated like one possessed with an irresistible motion.

His English translator (? Galliard, 1709) commented.

I have never met with any man that suffered his passions to hurry him away so much whilst he was playing on the violin as the famous Arcangelo Corelli . . . he gives in so much to what he is doing that he doth not look like the same man.

Quantz ('Versuch', 1752) required music

to touch the heart, to arouse or soothe the motions of the soul, and to carry the hearer from one passion to another . . . the performer must try to feel in himself not only the principal passion [to which "the word found at the beginning" is a clue] but all the others as they come.

It would be difficult to express the performer's perennial responsibility in this respect more admirably.

(2) TEMPO.—Closely allied with the foregoing, and next to that the most crucial decision which the performer has to take. Written indications of tempo are found at least as early as Luis Milan's 'El maestro' of 1535 ("a priesa", fast, "a espazio", slow). They became gradually more frequent in the 17th century (see last paragraph): "drag", "away", "fast" (or "F"), "slow" (or "S"), etc., were not unusual in Restoration England and already appear in Orlando Gibbons (*d* 1625); by the 18th century similar indications were common, especially in the careful French school.<sup>1</sup>

The performer has first to establish the general tempo of the piece, movement or passage. He can only do so when he has become aware of the mood itself; hence the close connection between the two problems. In unfamiliar music allowance must be made for changes in the interpretation of familiar terms. The French minuet was defined by Brossard in 1703 as "very gay and fast", but by Diderot in 1751 as "noble and elegant . . . moderate rather than quick". The French saraband was slow, sometimes very; the English fast in the 17th century (Mace in

<sup>1</sup> See TEMPO & RUBATO.

1676: "of the Shortest Triple-Time . . . more Toyish, and Light, than Corantes"), but could be slower by J. S. Bach's time if his "English" Suites are not totally misnamed. Purcell in 1683 classed *adagio* as in speed "a middle movement"; Grassineau in 1733 classed *presto* as "fast or quick, gayly yet not with rapidity"; and indeed it is our modern tendency to take Baroque slow movements too slowly and quick movements too quickly. The fault is not a new one. Here is C. P. E. Bach's admirable advice (I, iii, 10):

The speed of a work, which is usually suggested by various familiar Italian terms, depends upon its general character and also on the speed of the fastest notes and passage-work which it contains. Proper attention to these considerations will prevent an *allegro* from being hurried and an *adagio* dragged.

The general tempo established, in the main by intuition, its fluctuations must next be understood. Few as are the written indications of such fluctuation in the earlier music, it is as essential there as in more recent times, when the words *ritardando*, *accelerando*, *più* or *meno mosso*, etc. etc., are usually written wherever considerable fluctuations are desired. Lesser fluctuations must in any case be left to the performer. There is a useful distinction drawn in 1753 by C. P. E. Bach, and echoed rather less than a century later by Chopin, between (i) irregularities of tempo which occur wholly or mainly within the metrical unit or bar, and thus do not disturb the basic rhythm set by the bass; and (ii) irregularities which override the unit and involve the basic rhythm. The former is an ornamental and the latter a fundamental fluctuation; hence the former can be more freely indulged than the latter, as C. P. E. Bach and Chopin agree. But both kinds are often necessary in music of any period.

(i) Ornamental or expressive fluctuation and flexibility are what Couperin meant by "the spirit, the soul that must be added" to the mere "quantity and equality of beats" ("L'Art de toucher le clavecin", 1717). Jean Rousseau in his "Traité de la viole" of 1687 wrote that "one can play in time without entering into the movement, because the time depends only on the music; but the movement depends on genius and good taste". C. P. E. Bach in 1753 gave careful instructions for certain irregularities of rhythm within a steady bar-unit. There need, therefore, be no hesitation in allowing the same spontaneous flexibility in moulding the tempo as is taken for granted in more recent music, usually with no more written indication than in early times.

(ii) Fundamental fluctuation in the tempo is chiefly necessary at cadences, where it can only be dispensed with as a rare special effect. Frescobaldi in the preface to his Toccatas of 1614 gave a number of stylistic instructions,

among them: "the cadences, though written rapid, are to be played in a very sustained manner; the nearer you approach to the cadence, the more you should hold back the tempo". He also describes the continual variations of tempo in singing "modern madrigals". The preface to his 'Fiori musicali' of 1635 further discusses such variations. Mace (*op. cit.*) in 1676 prescribed "Liberty (and very often . . .) to Break Time; sometimes Faster, and sometimes Slower, as we perceive, the Nature of the Thing Requires". C. P. E. Bach in 1753 mentions not only, as we have seen, an easy flexibility of rhythm within a steady metre, but also the customary slowing of the tempo when approaching cadences, he merely makes the reasonable (but, he adds, rarely met) stipulation that the basic tempo shall remain as it began. *Ritardando* and *accelerando* are included in his short list of essential ingredients in good performance (I, iii, 3), and he later insists that from the habitual slowing down at cadences "the passage acquires an impressiveness which places it in relief". This is not the description of an innovation. It is thus almost certainly a misconception that the frequent cadences so characteristic of Baroque music should be taken mainly without *ritardando*; on the contrary, this is the very way to make them unconvincing. It is not really possible to hush them up and it is as impolitic as it is unwarrantable to try. Each needs its own natural flexibility, though this may vary according to circumstances from the merest easing scarcely consciously perceptible, at the one extreme, to a majestic broadening at the other. It is for the performer to judge on the merits of each case between sentimental excess and self-conscious rigidity.

In more recent music fluctuations of this second and more fundamental character are usually given some written indication; and the same is true of actual changes of speed when a new tempo is introduced. The earlier the music, the more probable that such modifications may be left unindicated; but cases still occur, and even where the fact is indicated the degree and the proportioning remain the performer's responsibility.

(3) RHYTHM.—A performance in which each note lasted its precise written length would be inconceivable. Some are prolonged and others shortened to a degree usually very slight but in sum essential to a living interpretation. In Baroque music conventions obtained affecting certain rhythms to which intuition alone is an insufficient guide and which must therefore be learnt if serious misinterpretation is to be avoided.<sup>1</sup> In more recent music the tradition governing such modifications of rhythm is a living one, all the

<sup>1</sup> See INÉGALITÉ.

more efficacious for being predominantly unconscious.<sup>1</sup>

(4) ACCENTUATION. — Closely allied to rhythm, accentuation may be of very different characters.<sup>2</sup> From the performer's point of view the most important accents are the agogic and the dynamic. An agogic accent introduced by the performer is a special case of the rhythmic modification described under (3) above; he will lend emphasis to a note of special significance such as the peak note of a phrase by slightly prolonging it. A dynamic accent may but need not accompany an agogic accent. There are three chief methods of making a dynamic accent: (a) by a massive but momentary access of volume at the instant of attack; (b) by a slightly more gradual access of volume just after the instant of attack, followed by a similarly graded decline; (c) by a silence of articulation robbed from the end of the preceding note and followed by a crisp but not massive attack. (a) is the customary modern accent, and has comparatively little place in Baroque music; (b) is the *sforzando*, which is implied by certain instructions of Geminiani's in his 'Art of . . . the Violin' of 1740 and is of great service in Baroque music if intelligently applied, (c) is the customary accent of the Baroque period, where it should normally replace (a).

Our present signs of accentuation are of fairly recent introduction<sup>3</sup>, as is the use of the word *marcato* as a general indication. But the responsibility for correct accentuation remains primarily what it used to be entirely, a weighty charge upon the performer. It is particularly easy to misconstrue unfamiliar music in this respect. In Baroque music a common fault (though less common since Schweitzer's work on Bach) is that of which Geminiani (*op. cit.*) found it necessary to warn even his contemporaries:

If by your Manner of Bowing you lay a particular Stress on the Note at the Beginning of every Bar, so as to render it predominant over the rest, you alter and spoil the true Air of the Piece.

The correct accentuation of Baroque music is partially and of Renaissance polyphony almost entirely independent of bar-units; considerable experience is required to respond to it sensitively and justly. The greater familiarity of more recent idioms renders them more readily accessible in this as in other respects.

(5) DYNAMICS — Intimately linked with accentuation, the distribution of loud and soft varies continually; it is now customary to give written indication of the main contrasts, but it is never possible to indicate the transient fluctuations which enliven every phrase on all instruments capable of such fluctuations, and

which by means of agogic accents, silences of articulation and similar resources of expression are suggested even when they cannot be actually made. There are three main varieties of dynamic contrast: (a) "terrace" dynamics contrasting entire passage of loud and soft; (b) *crescendo* and *diminuendo*, (c) transient light and shade.

(a) There is no more obvious expressive resource than the juxtaposition of loud and soft passages, and there is no period of music which can be assumed to have lacked it. Echo effects, where the soft phrase is a replica of the loud phrase, were popular in the 16th century and through the Baroque period. Massive contrasts between succeeding passages are an elementary necessity of both choral and orchestral idioms, besides occurring very naturally on the organ and the harpsichord, where they are more readily produced than gradual changes. Dance forms and others of similar pattern where each of several sections is repeated before proceeding to the next invite terraced dynamics, though without precluding other varieties. The use of words and abbreviations to distinguish loud from soft passages became fairly frequent during the 17th century: "loud" or "lo." and "soft" or "so." were not at all unusual in England by the Restoration; but the Italian terms *forte* and *piano* had become international by the end of that century, with their abbreviations *f*, *ff*, *p*, *pp*, etc. The range of dynamic signs printed by Brossard in 1703 was already large and various; but not until late in the 18th century were they used by composers with a freedom at all approaching that which became habitual in the course of the 19th. Occasionally *fff* or *ppp* have occurred since Brossard, in some composers quite commonly; a few have added a fourth degree, but rather for emphasis than exact measurement, which is never actually possible where so much depends on taste and context. There is no absolute scale, but only relative value, a choir *ppp* being almost immeasurably louder than a clavichord *fff*, yet sounding soft by contrast with its own *fff*, as the clavichord sounds loud by contrast with its own *ppp*. Only when the two scales, so far removed absolutely, are heard together or in close juxtaposition do their relative values collapse. The extremes of volume within the scale of values natural to any instrument or combination of instruments are reached rather exceptionally, and are not necessarily even closely approached.

The signs generally thought sufficient to convey the finest distinctions worth specifying are *pp*, *p*, *mp*, *mf*, *f*, *ff*. It is for the performer to interpret them according to circumstances, as well as to supply them where, as so often in the earlier music, the composer (or, less authoritatively, the editor) has not done so.

<sup>1</sup> See RHYTHM & POLYPHONY.

<sup>2</sup> See ACCENT.

<sup>3</sup> See STACCATO.

Where the performer must supply his own basic contrasts in this way, he will consult his own temperament, it is true, but he should also study closely the construction of the music. Passages brilliant in character tend to be best served by loud volume, reflective passages by soft volume, while their relative positions in the entire structure will help to determine the best arrangement of the contrasts. The main dynamic plan must accord and not conflict with the contours of the music, and while some choice is often possible the decision can never be regarded as an arbitrary one.

(b) The gradation of volume by more or less prolonged *crescendo* and *diminuendo* is almost as fundamental a resource of expression as the juxtaposition of contrasted passages. Many Oriental orchestras use a *crescendo* and *diminuendo* of great range and duration with a mastery such as that attributed by Burney and following historians to the Mannheim school of Stamitz, their mastery appears to be traditional and is compatible with what little we know of antiquity and of the Occidental middle ages in these respects. By the end of the 16th century we have exact information on the use by famous singers of a controlled and protracted *crescendo* and *diminuendo* described in 1601 by Caccini ('Nuove musiche') and by numerous authorities throughout the Baroque period. The effect was almost exaggeratedly esteemed and applied not only to the voice but to all instruments capable of executing it, such as the viols, the violins, the trumpet and others. When vocal *crescendo* and *diminuendo* are both completed on a single note, with all the control of breath and voice-production which that implies, the effect is known as  *messa di voce*. Contemporary references both to this effect and to gradations of the ordinary variety dispose emphatically of the exaggeration of some modern scholars who suggest that "terrace dynamics" were the normal Baroque practice, gradations unknown or unusual. "We play Loud or Soft, according to our fancy, or the humour of the music . . . sometime . . . in one and the same Note" (Simpson, 'Division Violist', 1659). "Swellings of prodigious length" (Raguenet, 'Comparison', 1702). "One of the principal Beauties of the Violin is the swelling or encreasing and softening the Sound" (Gemini, 'Art of the . . . Violin', 1740). "Increase or diminish the tone when required" (Quantz, 'Versuch', 1752).

Written indications of *crescendo* and *diminuendo* are found in mid-17th-century Italy: Mazzocchi, for example, showed a *diminuendo* by *forte*, *piano*, *pianissimo*, etc.; and in Restoration England: Locke's 'Tempest' music includes "louder by degrees" and "soft and slow by degrees". Gemini and Ramcau used signs close to our "hairpin" diverging

lines for *crescendo* and converging lines for *diminuendo*. The words *crescendo* and *diminuendo* are found occasionally in the music of G. P. E. Bach. But indications of gradation are still rarer before the 19th century than indications of contrast. The abbreviations *cresc.* and *dim.* and the modern "hairpins" are used interchangeably at convenience, and it is now usual to indicate all the main gradations by one or the other. Where a main gradation is shown by *cresc.* or *dim.* there has been some recent tendency to show subsidiary nuances within the main gradation by a small pair of "hairpins", but these nuances, which are almost always necessary (since few if any gradations can persist quite without fluctuation), are normally left to the performer's plastic sense. Where, as in early music with the rarest exceptions, even the main gradations are left to the performer, considerations apply similar to those conditioning the basic contrasts. There is a strong and natural association between climax and *crescendo*, relaxation and *diminuendo*; and another only less binding between rising phrases and *crescendo*, falling phrases and *diminuendo*. These are universal inclinations and are to be followed unless for good and distinct reasons to the contrary. Temperament plays its part, and the choice is again considerable, but not arbitrary.

(c) With the partial and recent exception mentioned in the previous paragraph, transient dynamic nuances are and have always been left entirely to the performer. Like the basic contrasts and gradations, they spring naturally from a living experience of the music and are necessary in music of whatever period. They are not sharply distinguished from the main gradations: a  *messa di voce* may, if long, have the effect of a main gradation, if short, of a transient nuance. Thus Caccini's information relates to the latter as much as to the former, as does that of the other authorities mentioned under (b) above. Roger North in his Autobiography (early 18th cent.) "would have them learn to fill, and soften a sound, as shades in needlework". Quantz spoke in 1752 of a continual play of light and shade; he even gave rules for grading the volume of each successive chord according to its degree of dissonance. G. P. E. Bach a year later rightly commented that "for each case met even by the best rule there will be an exception". His own instructions (I, 3) are less rigid and more comprehensive: briefly (i) dynamic shadings depend on context; (ii) whole passages complete with their consonances and dissonances may often be taken first loud, then soft, especially at repeats and sequences; (iii) but in general (and within the main contrasts and gradations) dissonances are taken louder than consonances, since the first excite and exacerbate while the

second soothe our emotions; (iv) a forceful *Affect* calls for loud volume; (v) interrupted cadences are to be emphasized, (vi) chromatic notes may be stressed above diatonic in suitable cases; (vii) certain ornaments are especially characterized by dynamic shadings.

Of these rules by far the most important is that enjoining dissonances louder than consonances. In Baroque music of whatever period it is quite essential to stress or even swell the discord, but to let the resolution fall away from it in volume. Of all the transient nuances this is least at the will of the performer and most at the dictate of the musical structure, it is equally necessary whether the main level is loud or soft, increasing, decreasing or stationary. Renaissance music requires the same treatment; and indeed wherever the technique of discord and resolution occurs, in music of whatever date, this is the natural rule, to which exceptions are now made more frequently than warrantably. Even the smallest nuance should stand in organic relationship with the melodic, harmonic and rhythmic structure of the music; but in most cases this relationship, being too subtle for conscious analysis, depends on unconscious tradition and intuition—rightly so. Temperament is entirely to the fore; yet even here nothing really arbitrary can be admitted.

The entire problem of dynamics needs for its solution a developed sense of the implications of the music itself. From the 19th century onwards composers and editors have tended to relieve the performer of as much as possible of this responsibility. The extent to which they can do so is limited. Schumann used fewer dynamic markings at the end than at the beginning of his career. Editors' markings are never to be trusted blindly; even the composer's are sometimes more or less disregarded, by no means invariably without justification, though often so. Where, as is the case in early music, original markings are uncommon, old-fashioned editors and performers have naturally tended to misapply modern principles, and it is in reaction against this mistake that some recent authorities have largely narrowed their use of dynamic changes to those of the "terrace" variety. The weight of the Baroque evidence seems conclusively against any such extreme; and by the time of C. P. E. Bach it is unmistakably so, since he praises a harpsichord with pedal stops on the express grounds of its superiority in making gradual dynamic changes. But a forerunner of this instrument had already been used and extolled by Mace in 1676, for the same reason. If, therefore, but only if the performer has trained himself to apprehend the dynamic implications of the Baroque style in question where these differ from more familiar styles, he may trust his intuition here as elsewhere,

and will need to do so even if the editor has used as many markings as a modern score, and as reliably. The best markings need interpreting.

(6) **BALANCE**—A particular aspect of dynamics, *i.e.* the relative volume of the different parts. An accompanied melody can often be allowed to stand out above its accompaniment; but a combination of melodies always demands careful handling. In polyphonic music the performer, besides the natural rise and fall of his own part, must be constantly on guard to rise to important entries and fall to less important phrases: in other words, to get out of the way. If this is not done the temptation to force each entry in hope of making it tell becomes irresistible, competition becomes cumulative and all clarity is destroyed. The sense of polyphonic give and take can itself become an element in musical intuition, but it will not do so without deliberate self-discipline, and it cannot afford to be arbitrary in the smallest degree.

(7) **TEXTURE**—The actual colouring of the tone, particularly on stringed instruments where control of this factor is unusually great, is an extremely personal element in expression, but one which needs to be matched to the requirements of the music much more accurately than is always realized. A great violinist has always a certain indefinable timbre highly expressive of his own individuality, and the same is true of other instruments in varying degrees. This is most desirable; but he also can and should modify the texture of sound to suit the music. There is a splendidly massive and opaque quality of tone appropriate to many passages from the 19th-century romantics but catastrophic in those of the 18th century, equally impassioned but in a different vein. There is an almost strained intensity which sometimes serves late Beethoven as well as it serves Mozart or Purcell ill. There is an icy glitter occasionally proper to our neo-classicists, and a transparent but warm and easy flow proper to J. S. Bach. It is for the performer to combine the expression of his own personality with the imperative requirements of the music. As usual, he will be at an advantage in familiar styles of which the tradition remains strong and at a disadvantage in unfamiliar styles of which the tradition has been interrupted, that is to say in the Baroque and older schools. The quality most insisted on in Baroque descriptions is clarity. Simpson ('Division Violist', 1659) "full and clear sound"; Playford ('Introduction', 1655) "a clear sound"; Mace ('Musick's Monument', 1676) "a Handsom—Smooth—Sweet—Smart—Clear—Stroak; or else Play not at all". Indeed, in an age predominantly contrapuntal transparency is the most obvious requirement.

Contrary to popular belief, high positions and spontaneous *vibrato* are both proper to Baroque string music. Geminiani in 1740 taught the 7th position on all strings of the violin, Simpson in 1659 already took the viola da gamba to the same height. Nevertheless, the veiled colourings resulting are far less typical than the rounder sounds of the low positions (above all the first), excepting in virtuoso solos. *Vibrato* is a natural means of expression on the voice and many instruments, and was taught in several varieties by Caccini, Tosi (voice), Playford, Simpson, Marais (violin, viol), Hotteterre (flute), Marpurg, C. P. E. Bach (clavichord) and others. Jean Rousseau ('*Traité de la viole*', 1687) wrote "one uses it in all circumstances when the duration of the note permits it" and Geminiani ('*Art of . . . the Violin*', 1740) recommended it "as often as possible", slowly on long notes, rapidly on short notes; but these are somewhat extreme opinions. Most Baroque authorities preferred to confine the *vibrato* to the more expressive notes, and until the generation of Kreisler this has been the most accepted as it is possibly the most musicianly practice (Spohr in his '*Violin School*' of 1831 wrote "avoid its frequent use, and in improper places"). The present fashion favours an incessant and rather tight *vibrato*, but provided gross exaggeration in any direction is avoided (especially in early music) the matter is one which can best be left to individual preference. On wind instruments a much warmer, slower and more selective *vibrato* is in current favour.

(8) ARTICULATION.—By no means every note is to be sustained for its full duration. Many are curtailed, and the curtailed portion is replaced by a silence. Engramelle ('*Tonotechnie*', 1775) wrote that all [*sic*] notes "have a certain length of sound and a certain length of silence, which combine to make the whole value of the note . . . those intervals, more or less long, I call silences of articulation". Bédos ('*L'Art du facteur d'orgues*', 1766) spoke of "the combinations of silences, held and touched notes to form the articulation of the music". Quantz ('*Versuch*', 1752) wrote that "the notes must not sound as though glued together. You must use your tongue on wind instruments and the attack of the bow on stringed instruments to give the necessary articulation", avoiding "slurring what should be detached notes and detaching what should be slurred" (but he discourages much slurring). Geminiani in his '*Art of . . . the Violin*' (1740) gives much detailed advice, from which it appears that the normal *détaché* of the modern violinist (notes bowed separately but in a legato style) had a remarkably small place in his technique, being largely replaced either by a light stac-

cato or by an easy and resilient "sprung" *détaché* in which the bow nearly but not quite rebounds from the string.<sup>1</sup> C. P. E. Bach ('*Versuch*', 1753) encourages harpsichordists to play staccato on occasion in terms which suggest that the normal touch on this instrument was legato, as it must be to maintain a singing tone, Diruta ('*Transilvano*', 1597) a century and a half earlier had rebuked organists who "lose half the harmony" because they "strike the keys and raise their hands". There is much other evidence throughout the Baroque period, and some of it is confused and apparently contradictory. Different Baroque styles require different treatment, and different instruments impose different technical considerations, but the following generalizations are fairly reliable:

(i) The correct original technique is often the best guide — for example, the early fingerings of keyboard instruments were designed to impose silences of articulation at the desired points but not at others.<sup>2</sup> Conversely, an incorrect technique may interpose insuperable obstacles; for example, playing the viola da gamba with cello bowing makes its characteristic articulation impossible.

(ii) Except in *cantabile* passages the degree of articulation is likely to be much greater than in more recent music, though never such as to allow the notes of a phrase to fall apart. A genuine familiarity with Baroque idioms is required in order to judge the articulation sensitively and exactly; but the chief danger is an inappropriate legato. This is to be avoided partly by silences of articulation, which have the effect of lightening the texture as if by letting in the air, partly by a certain crispness of attack, not massive but incisive, which has the effect of a somewhat pointed style.

In more recent music the norm on stringed instruments is not the "sprung" *détaché* but the smooth *détaché* (so called; the term is a misleading one), which alternates with a firm staccato and with the *spiccato* style, whose use in early music is much less habitual (Baroque passages are often bowed at the heel with the bow leaving the string which should properly be bowed, for correct articulation, near the point with the bow not quite leaving the string). Signs of articulation became not uncommon during the latter 17th and the 18th centuries, and have multiplied of late<sup>3</sup>; but on any instrument their translation into practice if shown, and their mental provision if not shown, are essentially matters for the performer's judgment.

(9) PHRASING.— Articulation between phrases or passages is still more necessary and is likely to be still more marked between

<sup>1</sup> See STACCATO & VIOLIN PLAYING.

<sup>2</sup> See FINGERING.

<sup>3</sup> See STACCATO.

phrases than between notes within the phrase.<sup>1</sup> It may be far from easy to detect the phrase-endings in an unfamiliar idiom; but it is of paramount importance. When detected, they must be made clear in performance by a silence of articulation either robbed from the value of the last note of the phrase ended or added as a momentary break in tempo before the next phrase begins. Its duration may vary from the least appreciable to the greatest intelligible, and is governed solely by circumstances. Frescobaldi (Toccatas, 1614) demanded an (unwritten) pause on the last note of a passage "even if this note is a quaver or semiquaver, since such a pause prevents confusion between one phrase and another". Mace ('Musick's Monument', 1676) demanded "a kind of Cessation, or standing still, sometimes Longer, and sometimes Shorter, according to the Nature, or Requiring of the Humour of the Musick". Quantz ('Versuch', 1752) wrote "you must not divide ideas which belong together, and conversely you must divide them when their musical sense is complete, whether a pause mark is shown or not".

The pause mark or *fermata* became familiar in the 17th century in its modern sense of a delay in the time (with, however, a possible further implication of improvising a cadenza). The phrasing comma was freely used by Couperin (who also employed short lines between notes to indicate the opposite effect, namely a high degree of conjunction); it must be carefully distinguished in music of his school from the similar signs used for certain ornaments. Other signs are in modern use, the most convenient and valuable being the single rising diagonal stroke (/) for a moderate articulation and the double stroke (//) for an extreme one. But at no period have marks of articulation been in the least common, and a performer unable, with due familiarity, to find phrase-endings intuitively would certainly have mistaken his vocation. R. D.

**EXPRESSION STOP.** See HARMONIUM.

**EXPRESSIONSHARMONIUM.** A German term for the harmonium producing its sound by exhalation of wind, not by suction.

**EXTEMPORIZATION or IMPROVISATION.** The art of thinking and performing music simultaneously. It is therefore the primitive act of music-making, existing from the moment that the untutored individual obeys the impulse to relieve his feelings by bursting into song. Among all primitive peoples, therefore, musical composition consists of extemporization subsequently memorized, and the process can proceed no farther until some method of notation is devised to record the composer's musical thoughts independently of his musical performance. The

folk music of all countries, so long as it has existed without notation, has been developed in this way. The composer extemporizes a melody either to a poem (possibly also extemporized) or to the movements of the dance, and memorizes it for repetition later. Where memory is imperfect the power of extemporization is called in again, either by the original composer or by some other, and so the melody is gradually moulded in the passage of time.

Notation of any sort stereotypes the composition once for all. That is the difference between folksong and plainsong. The Christian church fixed its traditional melodies by notation comparatively early, while folksong remained unnoted and therefore subject to perpetual variation by extempore additions. Much of English folksong has been noted for the first time in our own generation.

But the standardization of the church's song (plainsong) by notation merely turned the impulse to extemporize in another direction. The contrapuntal art of church music was developed primarily by the persistent desire of singers to extemporize additions, ornaments and contrasting melodies<sup>2</sup> on and around the prescribed plainsong. Experiments made extemporaneously were passed into writing; they then became codified and reduced to rule. The conflict between ecclesiastical authority and the exuberant fancy of singers in extemporization, existing from the famous edict of Pope John XXII<sup>3</sup> (1322) to the Council of Trent (1545-63), has been noted by all historians; another and a more purely artistic conflict has not been so generally recognized: the conflict between the composer who writes and the impulse of the performer to embellish by extemporization. That, which began in the middle ages, was carried on at any rate to the beginning of the 19th century. The whole history of composed music from John Dunstable to Beethoven may be described as the process of making the composer's defences sure against the incursions of the extemporizer.

Extemporization played a large part in the two forms most characteristic of the 17th century, the opera and the sonata. The singer of an aria was expected to show his skill in extemporized ornamentation, especially at cadences, and the composer left him free to do so; Corelli and other founders of the Italian sonatas for strings frequently made their written parts a mere sketch of what the player should do. C. P. E. Bach's comments in his 'Versuch' show that he regarded extemporized ornamentation as a legitimate part of the harpsichord player's interpretation.

For two centuries (17th and 18th) accompaniment both in the opera and in concerted chamber music was generally left to the extemporizing skill of a harpsichord player

<sup>1</sup> See PHRASING.

<sup>2</sup> See DESCANT.

<sup>3</sup> See O.H.M., II, 89.

guided by the indications of a figured thorough-bass part. Gradually the autocracy of composers curtailed these liberties. Handel browbeating his singers, Bach pursuing a course of peaceful penetration by so elaborating his instrumental *obbligati* that neither singer nor harpsichordist could indulge in independent action, indicate the general process of strengthening the composer's defences. By Mozart's day the singer of an aria and the player of a solo concerto alike had to submit to discipline, and both were only, as it were, let out on sufferance in passages marked cadence or cadenza, where the orchestra was brought to a halt, generally on the  $\frac{2}{4}$  chord preceding the final dominant-to-tonic ending. The cadenza of the concerto was still frequently extemporized at the beginning of the 19th century, and sometimes later. Even Brahms in his violin Concerto (1879) allowed for it, but by that time the custom of writing cadenzas had become so general that his friend Joachim promptly composed cadenzas for the work. Thus the divorce of extempore from written composition was made absolute.

Meantime extemporization had had a distinguished history as an independent art; it had exerted at times a powerful influence on written composition and had in turn been influenced by the rules which, crystallizing round instrumental composition, produced works in distinguishable forms. This history was more especially bound up with the perfecting of keyboard instruments, organ, harpsichord, etc., towards the end of the 16th century, for they gave to the single player complete control of harmony. The European reputation which the English virtuoso of these instruments, John Bull, enjoyed, was evidently founded largely on his power of extemporization at the keyboard, especially that of the organ. In the 17th century the organists of Germany developed the great school of organ music which culminated in J. S. Bach largely on the basis of extemporization. Such rhapsodic forms as the toccata and fantasia were created in this way, and many existing specimens of the more loosely constructed kind seem to justify the suggestion that they may have been extemporized first and noted afterwards. Of even greater importance was the organists' extempore preluding on chorales or hymn-tunes. What the singers of descant had done with the plainsong in the 14th century German organists did with the Lutheran melodies in the 17th, and with at least equally important results. If the efforts of the descanters may be said to have evolved the counterpoint which made Palestrina's 'Missa Papae Marcelli' possible, the organists equally put tools into the hands of the greatest master of them all with which to fashion the St. Matthew Passion. Reinken's commendation of Bach's own ex-

temporization on a chorale is sufficient evidence of this.

In the 18th century the debt which written composition owed to the extempore player was repaid. All the accounts bear witness to the fact that what impressed listeners in that classic age most profoundly was the ability of the masters to extemporize in fugue and sonata, which the written art had evolved. Their triumph was to show that they could do without premeditation at the keyboard what they did in their studies on paper. Handel playing between the parts of his oratorios in London, Bach accepting themes from Frederick the Great at Potsdam (1747), Mozart and Clementi competing in Vienna (1781) are particularly salient instances among the many which crowd the pages of 18th-century history. Their admirers never tired of the marvel; the more subtle the art of instrumental composition became, the more they could wonder at the masters' command of its subtleties of form and style in extempore playing, until the story is rounded off by Czerny's explicit account<sup>1</sup> of Beethoven's extemporization in three ways, namely, first-movement sonata form, variations and free fantasia.

Many eminent composers of later times have been masters of extemporization, from Mendelssohn and Hummel to César Franck and Saint-Saëns, yet undoubtedly in the 19th century the art retired rather into the background, except among French organists, in whose training elaborate extemporization, including improvised polyphonic playing, is an essential factor. Several causes contributed to this. Romanticism, which set comparatively little store by perfection of form, killed that wonder at the capacity to produce fugues and sonatas extempore which brought fame to the performances of earlier masters. Moreover, specialization reached a stage hitherto unheard of in which great composers appeared, like Wagner and Berlioz, who were scarcely able to play their own works on the pianoforte, much less improvise in their manner. Such men thought in terms of the orchestra, not in terms of their hands on a keyboard. Again, the conventionalizing of all music-making by the spread of public concerts and the premium set on personal interpretation of famous works tended to banish extemporization. There have been pianists from time to time who introduced it into their recitals, but with only very partial success.

Not unnaturally it has flourished most conspicuously among organists, since the organist's duties in church favour if they do not absolutely demand it. The two French composers mentioned above were organists, and the French use of the organ in churches to provide interludes between various parts of the Mass

<sup>1</sup> Thayer, II, 347

and Vespers is peculiarly favourable to organ extemporization. The record of English organists is by no means insignificant, though the English cathedral service practically allows a place to it only in voluntaries before and after the office, and sometimes as an introduction to the anthem. S. S. Wesley (1810-76) was a great master of extemporization. As he sat at the organ extemporizing after service he appeared to be like a man in a hypnotic trance. His playing would include the most daring modulations and harmonic effects, which anticipated those of modern music.<sup>1</sup> It is recorded that the beautiful opening passage of his anthem 'Thou wilt keep him in perfect peace' was originally improvised as a voluntary. E. J. Hopkins (1818-1901), for fifty-five years organist of the Temple Church, London, was famous for his extemporized introductions to anthems, and his successor, Walford Davies, carried the tradition farther. Edwin Lemarc, W. G. Alcock, Alfred Hollins and W. Wolstenholme, the last two stimulated in this direction by the fact of their blindness, have been other worthy representatives of the art in England.

Extempore playing is now recognized as an important factor in musical education even in the most elementary stages. Systems of mental training and "aural culture" for children and young musicians, such as those of Jaques-Dalcroze and Yorke Trotter, rely on it to a considerable extent. As a means of teaching the simple principles of form, the balance of rhythmic phrases in the structure of melodies, the current figures of speech in harmony and the contrasts producible by modulation, it has proved invaluable. It brings reason to the support of instinct and quickens the intelligence. Years ago it was said to be doubtful whether "the art of improvisation could ever be satisfactorily taught,"<sup>2</sup> but the statement could hardly stand to-day. It has been realized that not only can it be taught just so far as and no farther than written composition can be taught (that is, you cannot create genius but you can impart technique), but it is one of the most direct ways of teaching music itself. It is the most natural means of approach.

H. C. C., adds.

**EXTENSION ORGAN.** An organ in which some of the stops on the manuals and pedals are obtained by playing the parent ranks of pipes in various pitches. A rank of pipes can be "extended" by adding twelve notes in the bass to make a 16-ft. stop by playing an 8-ft. stop an octave lower. 4-ft. and 2-ft. stops are obtained by adding extra octaves to the top of the parent rank. Practically all British organ builders use the system for increasing the effects of their pedal organs, but only Compton has developed it artistically throughout the whole organ. The system is little used in America and on the continent of Europe in organs for churches or concert-halls.

W. L. S. (11).

**EXTRAVAGANZA.** A hybrid word derived from the English "extravagance" but taking its ending from the Italian *stravaganza*. It is applied to works which depend for their interest on extravagant fancy of one kind or another.

(1) It has been applied to instrumental works which either violate the conventions of contemporary style purposely or are designed in the spirit of caricature. Mozart's 'Ein musikalischer Spass' (K 522) has been quoted as the classical instance of instrumental extravaganza. In an age which disowns all conventions extravaganza of this type is scarcely possible. Stanford's 'Ode to Discord' may be recalled, however, as an attempt to caricature the liberties of the modern composer.

(2) The word is most frequently met with in connection with the theatre, but there the extravagance is more usually in the part of the playwright than in that of the musician. Thus W. S. Gilbert used it more than once as a sub-title, e.g. 'Trial by Jury, an Extravaganza'.

**EYBLER, Joseph (von)** (b Schwachat nr. Vienna, 8 Feb 1765; d. Vienna, 24 July 1846).

Austrian conductor and composer. He took lessons from Albrechtsberger in 1777-79, and in 1793 his former master gave him a testimonial in which he places him second only to Mozart. Both Haydn (1787) and Mozart

(1790) testified to his ability as a composer and his fitness for the post of *Kapellmeister*. Eybler nursed Mozart during his last illness, and after his death it was to him that the widow at once committed the task of completing the Requiem. He accepted the charge in a letter dated 21 Dec. 1791 and began the work, but soon gave it up. It was then that it was handed over to Sussmayr.

Eybler was appointed choirmaster to a church in the suburbs in 1792, and in 1794 to the "Schotten" monastery in Vienna itself. About this time his first work, three string quartets, dedicated in Italian to Haydn, was published by Traeg. In 1804 he was appointed vice-*Kapellmeister*, in 1810 music-master to the imperial children and, on Saleri's retirement in 1824, chief *Kapellmeister*. In 1834 he was ennobled by the emperor, whose meetings for quartet practice he had regularly attended. A year before he had been obliged to give up the exercise of his profession owing to a paralytic stroke while conducting Mozart's Requiem.

Eybler's opera 'Das Zauberschwert' was performed at the Leopoldstadt Theatre in Vienna in 1802, and some other operas are in the possession of the Gesellschaft der Musikfreunde. For the Tonkünstler-Societat, of which he was many years president, he wrote the cantata 'Die Hürten bei der Krippe' (1794), and for the emperor 'Die vier letzten Dinge', an oratorio first performed at court (1810) and afterwards by the Tonkünstler-Societat. His printed works — chamber music, pieces for pianoforte and other instruments, vocal music and several symphonies — were favourites in their day, but his church music is of greater value. His best work is the Requiem in C minor. Haslinger published this, seven masses, two Te Deums, thirteen offertories, graduals and vespers, of which some long continued in use.

**EYE MUSIC.** A special use of musical notation, characteristic of certain compositions written between 1500 and 1650 and, to a lesser extent, of the music of earlier and later periods. In eye music the performer can derive two simultaneous interpretations from the signs on the page in front of him, one purely musical and the other symbolical. Eye music does not include (1) the use of musical signs for decorative or cryptographic purposes, since their musical significance is thereby completely destroyed; (2) the complicated cross-rhythms of the English virginalists, designed for the eye rather than for the ear: these uses of notation have little or no

symbolic meaning; (3) puzzle-cans: here the musical meaning becomes apparent only after the symbolism has been unravelled; (4) the private asides to the player of composers like Erik Satie, for these do not use the signs of musical notation.

Eye music and word painting are two particular instances of a widely held philosophy of music having its roots in Platonic thought, and summed up in Sir Thomas Browne's epigram that music "is an hieroglyphical and shadowed lesson of the whole world". The same attitude lies behind the moralizing verses, filled with musical words and phrases, of William Cornish and the Leckington proverbs:

The margin silver and the notes sable  
Should move us to remembrance of the joys intermable

This idea of *congruity* between the narrow world of music and the universal world of life and thought finds its first and simplest expression in word painting — the onomatopoeia of

and the visual images of rolling:

and of ascent and descent:

found in plainsong. Many examples will be found analysed and illustrated in Alec Robertson's 'The Interpretation of Plainchant'. In these and other instances, found both in plainsong and in polyphony, the visual image of the notes on the page supports and heightens, and provides a parallel to, the aural image of the music. Word painting of this kind is nearly always associated with verbal ideas of motion or of linear form and it constitutes one kind of eye music, though perhaps not the most typical or intellectually stimulating one. Innumerable instances of its use may be found in the music of all periods, associated with words like "rise", "fall", "step", "pace", "crooked", "slope", "scatter", "wave", "hover", and so on.

It is difficult to establish a precise dividing-line between word painting and eye music proper. Perhaps one of the earliest instances of pure eye music is to be found in Johannes Alanus's very curious motet 'Fons catharizantium — Sub Arturo — In omnem terram', written in 1425 or so (see D.T.Ö., XL, 9-11). The text of the contratenor part consists of a "potted" history of music, from Tubal to

<sup>1</sup> See CRYPTOGRAPHY.

Alanus, and each of the technical terms it contains is scrupulously matched in the musical setting. Thus Guido's invention of the musical stave and his use of its lines and spaces is illustrated by a melodic passage leaping up the spaces of the stave and tumbling down the lines. At the words "Franco gave music its measure" the melody consists of a chain of equal semibreves forming a complicated cross-rhythm with the main stream of the music; and the same cross-rhythm is used later to the words "triparii . . . emiolii", since its technical term was *hemolia*.

Another more mannered use of eye music is confined almost entirely to the 16th and early 17th centuries, a period characterized on the one hand by a great deal of thought and discussion about the matching of words with suitable music, and on the other by an unusually rich variety of notational signs. Most note-shapes existed in two forms: black

(♣ ♢ ♣ ♢ ♣) and white (◻ ◻ ◻ ◻ ◻), the duration of a white symbol usually differing from that of a black. Thus the blackness or whiteness of a note had primarily a musical significance, but it could also have a symbolical one if words like "black", "shade", "Nigella", "death", "blind", "colour", "night", "Beelzebub" and "darkness" were associated with black notes, and words like "white", "day", "light", "pale", "wan" and "open" with white notes. A mourning-song, one on the death of the Emperor Maximilian (1519), for instance, may be written in black notation throughout, even though the other songs in the same manuscript are in white. The rich store of time-signatures in use at this period could be similarly used: the theological mysteries of certain passages in the Creed could be appropriately symbolized by setting the individual polyphonic lines in conflicting yet congruent time-signatures (Dufay and others); madrigal words like "new masks and forms", "divers tongues", "be changed into a thousand forms", "change her mood" are treated in the same way. Echoes of this are found in Handel (the use of rapidly changing time-signatures in 'Rinaldo' to signify the hero's madness) and in programme music by Couperin and Fux (to symbolize flightiness or the resolution of conflict in peaceful union). Telemann's Gulliver Suite for two violins (from the 'Getreue Musikmeister') includes a Lilliputian chaconne and a Brobdignagian gigue, the one in absurdly small note-values (3-32) and the other in ridiculously large ones (24-1) — charmingly apt to their titles, and a clear instance of eye music since only the performers see the point of the joke.

The names of the various musical signs are

often used in eye music. "Change her mood" is associated with a change of time-signature, since "mood" is the technical term for the (duple or triple) relationship between breve and long. And of course words like "long", "breve", "bind", "lega", "passaggi", "radoppian" will be linked to a long, a breve, a chain of suspensions, a tie, a florid run and a passage in dupla proportion (in which the duration of the written symbol is only one half of what it would normally be). The words "sharp", "flat", "chromatic", "finto" coincide with the occurrence in the musical text of sharps, flats and chromatic passages (for *finto* = "feigned", and thus = *musica ficta*). The syllables "re", "mi", "fa", "sol", "la" occurring in a verbal text will be spiced by being set to a note with the corresponding solmization syllable.

Sometimes the composer's line of thought will be more difficult for us to explain, especially if the technical term involved in the pun (for all these are musical puns) has long been obsolete. For instance, one might expect the words "sustinete hic" in G. Nasco's motet 'Tristis est anima mea' to be set to a sustained note of some kind. Instead it is given a progression of a chromatic semitone. Why? In 14th- and 15th-century musical theory (e.g. J. de Muris, whose treatise was still well known in the 16th century), "sustinere" means "to raise a chromatic semitone".

A fourth class of eye music is almost too trivial to mention. Its essence is that numbers in the text must be directly matched in the music. "Garnished with five pearls", for instance: a semibreve is pearl-shaped and five of them in a row (at the same pitch) will do to symbolize the five pearls. "Fair Phillis I saw sitting all alone": a solo soprano, of course. "First two by two": pairs of voices are appropriate. "Ten commandments": ten fugal entries. But this is descending to symbolism of the most automatic kind. So is the conceit of writing out the music of a love song on a stave bent into a heart-shape, of a perpetual canon on one bent into a circle, of a canon 4 in 2 as a crucifix (theologically something of a malapropism?). More than one instance exists of the symbolism of the Crucifixion by means of a set of notes in the form of a cross. Compare:

and:

Two very special instances of eye music in the 20th century may perhaps be noted here. One is the system, due to Ludwig, of laying out the music of an isorhythmic motet so that the recurring groups of staves on the printed page reproduce the structural divisions of the music. Examples of its use will be found in his edition of Machault's motets and in the recently published volume of Dufay's isorhythmic motets (in his collected works, edited by de Van). The original function of musical notation was to provide the performer with a recipe for music-making; here its function has been widened in order to provide the reader with a map of the music's structure. The same kind of enlargement of scope is perhaps to be seen in the music of certain twelve-note composers, the laws governing the construction of the piece of music can be apprehended only from looking at the music, not from hearing it.

To conclude this discussion one warning is perhaps necessary. It must not be assumed that *all* composers between 1500 and 1650 or so made use of these devices. Eye music was a mannerism, confined above all to two groups of composers: the madrigalists (Italian, roughly speaking from 1550 to 1625, and the more italianate English madrigalists, though to a much lesser extent) and the mystics. By no means all even of these men used eye music; in the hands of the best of them it retains a spontaneous charm and is never worked to death.

**EYSLER, Edmund** (b. Vienna, 12 Mar 1874; d. Vienna, 4 Oct. 1949)

Austrian composer. He studied at the Vienna Conservatory under J. N. Fuchs and Robert Fuchs. He wrote no fewer than 63 works for the stage, including 40 full-length operettas, 20 operettas in one act, two full-length operas (including 'Der Hexenspiegel') and a one-act opera. The first operetta was 'Bruder Straubinger', produced at the Theater an der Wien in 1903, the chief hit in which, the song "Kussen ist keine Sünd", became a world success. Later notable operettas were 'Die Schützenliesel' (1905), 'Künstlerblut' (1906), 'Der lachende Ehemann' (1912) and between the two wars (1927) 'Die goldene Meisterin', which is occasionally revived even to-day. The last to be heard in Vienna (1947), and the most successful of all, was 'Wiener Musik'.

Eysler's stage pieces stem from the *Singspiel* and satisfied above all the demand for popular music at the suburban theatres of Vienna during the era of monarchist Austria preceding the first world war. They show considerable skill and abound in attractive songs. H. R.
